FUND INFORMATION

Fund Name	AHAM Aiiman Money Market Fund	
Fund Type	Income	
Fund Category	Islamic Money Market	
Investment Objective	To provide short-term liquidity and income whilst maintaining capital stability by investing in a diversified portfolio of Islamic money market instruments.	
Benchmark	1-month GIA rate quoted by Maybank	
Distribution Policy	Subject to the availability of income, the Fund will provide Unit Holders with monthly income by way of cash payment or reinvestment in the form of additional Units.	
	At our discretion, the Fund may distribute (1) realised income, (2) realised capital gains, (3) unrealised income, (4) unrealised capital gains, (5) capital, or (6) a combination of any of the above. The rationale for distribution out of capital is to allow the Fund the ability to distribute income on a regular basis in accordance with the income distribution policy of the Fund.

<u>Basis of calculation and assumption made in calculating the returns:</u> The performance figures are a comparison of the growth/decline in NAV for the stipulated period taking into account all the distribution payable (if any) during the stipulated period.

An illustration of the above would be as follow:-

Capital return	= NAV per Unit end / NAV per Unit begin – 1
Income return	= Income distribution per Unit / NAV per Unit ex-date
Total return	= (1+Capital return) x (1+Income return) – 1

¹ The TER of the Fund was unchanged over the period under review. ² The PTR of the Fund decreased over the period under review due to the decreased in trading activities over the period under review.

The Fund solely invests into Islamic deposit placements.

Market Review

To provide a global review over the financial period under review on a total return basis, the Standard and Poor's ("S&P") 500 Index returned 13.07% with the Morgan Stanley Capital International ("MSCI") World index slightly behind at 12.57%. Specific to the Asian region, MSCI AC Asia ex Japan Index saw a relatively weaker return of 3.00% while locally, the Financial Times Stock Exchange ("FTSE") Bursa Malaysia Kuala Lumpur Composite Index ("KLCI") fared better at 8.14% in Ringgit terms. Within bond markets, Bloomberg Barclays Global Aggregate Index gained 2.62%.

The US equities market underwent a dynamic period of fluctuation and recovery during the six-month span. Commencing with a notable downturn in September, where the S&P 500 experienced a significant decline of 4.87% from the previous month, investor sentiment was adversely affected by a pronouncedly hawkish stance from the US Federal Reserve and heightened geopolitical tensions. However, by the conclusion of February, the S&P 500 had staged a remarkable rebound, surging by 5.20% over the 6 months period.

The stance of the US Federal Reserve underwent a discernible evolution from September 2023 to February 2024, significantly influencing market sentiment and dynamics. September witnessed a notable pivot towards a hawkish posture from the Fed, characterized by indications of potential interest rate increases to counter inflationary pressures. This stance engendered considerable market volatility and apprehension among investors. However, by February, the Fed had adopted a more accommodative stance, signaling the possibility of rate cuts in 2024 contingent upon inflation trends. This shift in Federal Reserve rhetoric played a pivotal role in shaping investor expectations and market trajectory over the six-month period, highlighting the central bank's influence on market sentiment.

Global markets traversed a terrain marked by fluctuations and volatility throughout the six-month period, influenced by an array of factors including interest rate expectations, geopolitical tensions, and economic data releases. Despite periods of uncertainty, positive developments in China's economy, such as robust GDP data and stimulus measures, bolstered investor confidence. However, geopolitical tensions in regions like the Middle East and heightened US-China relations contributed to market unease, amplifying fluctuations in sentiment. The global market landscape exhibited resilience in navigating challenges, with investors vigilantly monitoring developments for potential impacts on market dynamics.

In Malaysia, market dynamics were shaped by a confluence of domestic policy developments and global economic trends. The benchmark KLCI encountered fluctuations over the six-month period, influenced by factors ranging from political developments to fiscal policies and industry regulations. By the culmination of February, the KLCI had closed on a positive note, reflecting a mixed but ultimately favorable performance. Concurrently, fluctuations in the 10-year MGS yield mirrored shifting investor sentiment and domestic economic conditions. Malaysia's investment landscape exhibited resilience amidst global uncertainties, with market participants diligently monitoring both domestic and international factors for investment opportunities.

Investment Outlook

We maintain our positive outlook for fixed income asset class in 2024, as global growth is expected to moderate due to restrictive monetary policies and rising geopolitical tension. We expect volatility to persist, but at a tighter range compared to 2023. Inflation expectations have peaked, but inflationary environment may persist due to elevated commodity prices. The second half of 2024 may present higher noise as political uncertainties increase on the back of large number of elections especially the US Presidential election in November 2024.

Domestically, moderating growth and contained inflation continued to be supportive of the fixed income market. A lower government bond supply profile in 2024 due to fiscal consolidation is also a positive factor to the market. Domestic liquidity is ample with demand from duration coming from pension funds and lifers. Headline inflation may face upward pressure as the proposed targeted subsidies mechanism.

State of Affairs of the Fund

There is neither any significant change to the state affairs of the Fund nor any circumstances that materially affect any interests of the unit holders during the period under review.

Soft Commissions received from Brokers

Soft commissions received from brokers/dealers may be retained by the management company only if the:-

- (i) goods and services provided are of demonstrable benefit to Unit holders of the Fund; and
- (ii) goods and services are in the form of research and advisory services that assists in the decision making process.

During the financial period under review, no soft commission was received by the Manager on behalf of the Fund.

Cross Trade

No cross trade transactions have been carried out during the reported period.

Securities Financing Transactions

The Fund has not undertaken any securities lending or repurchase transactions during the financial period under review.

MATERIAL ACCOUNTING POLICY INFORMATION FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 29 FEBRUARY 2024

The following accounting policies have been used in dealing with items which are considered material in relation to the financial statements.

A BASIS OF PREPARATION OF THE FINANCIAL STATEMENTS

The financial statements have been prepared in accordance with the Malaysian Financial Reporting Standards ("MFRS") and International Financial Reporting Standards ("IFRS"). The financial statements have been prepared under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities (including derivative financial instruments) at fair value through profit or loss.

The preparation of financial statements in conformity with MFRS and IFRS requires the use of certain critical accounting estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the reported financial period. It also requires the Manager to exercise their judgment in the process of applying the Fund's accounting policies. Although these estimates and judgment are based on the Manager's best knowledge of current events and actions, actual results may differ.

The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note I.

(a) Standards, amendments to published standards and interpretations that are applicable & effective:

There are no standards, amendments to standards or interpretations that are effective for annual periods beginning on 1 January 2023 that have a material effect on the financial statements of the Fund.

- (b) Standards and amendments that have been issued that are applicable to the Fund but not yet effective:
 - Amendments to MFRS 101 'Classification of liabilities as current or non-current' (effective 1 January 2024) clarify that liabilities are classified as either current or non-current, depending on the rights that exist at the end of the reporting period. Classification is unaffected by the entity's expectations or events after the reporting date (e.g. the receipt of a waiver or a breach of covenant). In addition, the amendments clarify that when a liability could be settled by the transfer of an entity's own equity instruments (e.g. a conversion option in a convertible bond), conversion option meeting the definition of an equity instrument in MFRS 132 'Financial Instruments: Presentation' does not impact the current or non-current classification of the convertible instrument.

The amendments also specify that covenants of loan arrangements which an entity must comply with only after the reporting date would not affect classification of a liability as current or noncurrent at the reporting date. However, those covenants that an entity is required to comply with on or before the reporting date would affect classification of a liability as current or non-current, even if the covenant is only assessed after the reporting date.

The adoption of the above standards, amendments to standards or interpretations is not expected to have a material effect on the financial statements of the Fund.

MATERIAL ACCOUNTING POLICY INFORMATION FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 29 FEBRUARY 2024 (CONTINUED)

B INCOME RECOGNITION

Profit income

Profit income from Shariah-based deposits with licensed financial institutions are recognised based on effective profit rate method on an accruals basis.

Profit income is calculated by applying the effective profit rate to the gross carrying amount of a financial asset except for financial assets that subsequently become credit-impaired. For credit-impaired financial assets, the effective profit rate is applied to the net carrying amount of the financial asset (after deduction of the loss allowance).

C TAXATION

Current tax expense is determined according to the Malaysian tax laws at the current rate based upon the taxable profit earned during the financial period.

D DISTRIBUTIONS

A distribution to the Fund's unitholders is accounted for as a deduction from realised reserve. A proposed distribution is recognised as a liability in the period in which it is approved by the Trustee of the Fund.

E FUNCTIONAL AND PRESENTATION CURRENCY

Items included in the financial statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates (the "functional currency"). The financial statements are presented in Ringgit Malaysia ("RM"), which is the Fund's functional and presentation currency.

F FINANCIAL ASSETS AND FINANCIAL LIABILITIES

(i) Classification

The Fund classifies its financial assets in the following measurement categories:

- those to be measured at fair value through profit or loss, and
- those to be measured at amortised cost.

The Fund classifies its investments based on both the Fund's business model for managing those financial assets and the contractual cash flow characteristics of the financial assets. The portfolio of financial assets is managed, and performance is evaluated on a fair value basis. The Fund is primarily focused on fair value information and uses that information to assess the assets' performance and to make decisions. The Fund has not taken the option to irrevocably designate any equity securities as fair value through other comprehensive income.

MATERIAL ACCOUNTING POLICY INFORMATION FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 29 FEBRUARY 2024 (CONTINUED)

F FINANCIAL ASSETS AND FINANCIAL LIABILITIES (CONTINUED)

(i) Classification (continued)

The contractual cash flows of the Fund's Shariah-based deposits with licensed financial institutions are solely payments of principal and interest¹ ("SPPI"). However, these securities are neither held for the purpose of collecting contractual cash flows nor held both for collecting contractual cash flows and for sale. The collection of contractual cash flows is only incidental to achieving the Fund's business model's objective. Consequently, all investments are measured at fair value through profit or loss.

¹ For the purposes of this Fund, interest refers to profits earned from Shariah-compliant investments.

The Fund classifies cash and cash equivalents as financial assets at amortised cost as these financial assets are held to collect contractual cash flows that represent SPPI.

The Fund classifies amount due to Manager, amount due to Trustee, auditors' remuneration, tax agent's fee, payable for fund accounting fee and other payables and accruals as financial liabilities measured at amortised cost.

(ii) Recognition and measurement

Regular purchases and sales of financial assets are recognised on the trade-date – the date on which the Fund commits to purchase or sell the asset. Investments are initially recognised at fair value.

Financial liabilities, within the scope of MFRS 9, are recognised in the statement of financial position when, and only when, the Fund becomes a party to the contractual provisions of the financial instrument.

Financial assets are derecognised when the rights to receive cash flows from the investments have expired or have been transferred and the Fund has transferred substantially all risks and rewards of ownership.

Financial liabilities are derecognised when it is extinguished, i.e., when the obligation specified in the contract is discharged or cancelled or expired.

Shariah-based deposits with licensed Islamic financial institutions are stated at fair value. Due to the short-term nature of the deposits, the cost-plus accrued profit calculated based on the effective profit rate method over the period from the date of placement to the date of maturity of the respective deposits is a reasonable estimate of fair value.

Financial assets at amortised cost and other financial liabilities are subsequently carried at amortised cost using the effective profit method.

(iii) Impairment

The Fund's financial asset measured at amortised cost are subject to expected credit losses. The Fund measures credit risk and expected credit losses using probability of default, exposure at default and loss given default. Management considers both historical analysis and forward-looking information in determining any expected credit loss. Management considers the probability of default to be close to zero as these instruments have a low risk of default and the counterparties have a strong capacity to meet their contractual obligations in the near term. As a result, no loss allowance has been recognised based on 12-month expected credit losses as any such impairment would be wholly insignificant to the Fund.

MATERIAL ACCOUNTING POLICY INFORMATION FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 29 FEBRUARY 2024 (CONTINUED)

F FINANCIAL ASSETS AND FINANCIAL LIABILITIES (CONTINUED)

(iii) Impairment (continued)

Significant increase in credit risk

A significant increase in credit risk is defined by management as any contractual payment which is more than 30 days past due.

Definition of default and credit-impaired financial assets

The Fund defines a financial instrument as default, which is fully aligned with the definition of creditimpaired, when it meets one or more of the following criteria:

Quantitative criteria:

Any contractual payment which is more than 90 days past due is considered credit-impaired.

Qualitative criteria:

The debtor meets unlikeliness to pay criteria, which indicates the debtor is in significant financial difficulty. The Fund considers the following instances:

- the debtor is in breach of financial covenants,
- concessions have been made by the lender relating to the debtor's financial difficulty,
- it is becoming probable that the debtor will enter bankruptcy or other financial reorganisation, and
- the debtor is insolvent

Financial instruments that are credit-impaired are assessed on individual basis.

Write-off

The Fund writes off financial assets, in whole or in part, when it has exhausted all practical recovery efforts and has concluded there is no reasonable expectation of recovery. The assessment of no reasonable expectation of recovery is based on unavailability of debtor's sources of income or assets to generate sufficient future cash flows to repay the amount.

The Fund may write off financial assets that are still subject to enforcement activity. Subsequent recoveries of amounts previously written off will result in bad debt recoveries. There are no write-offs/recoveries during the financial period.

G CASH AND CASH EQUIVALENTS

For the purpose of statement of cash flows, cash and cash equivalents comprise cash and bank balances and Shariah-based deposits held in highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value.

H UNITHOLDERS' CAPITAL

L

.1

The unitholders' contributions to the Fund meet the criteria to be classified as equity instruments under MFRS 132 "Financial Instruments: Presentation". Those criteria include:

- the units entitle the holder to a proportionate share of the Fund's net asset value ("NAV");
- the units are the most subordinated class and class features are identical;
- there are no contractual obligations to deliver cash or another financial asset other than the obligation on the Fund to repurchase; and
- the total expected cash flows from the units over its life are based substantially on the profit or loss of the Fund.

The outstanding units are carried at the redemption amount that is payable at each financial period if unitholder exercises the right to put the unit back to the Fund.

Units are created and cancelled at the unitholder's option at prices based on the Fund's NAV per unit at the time of creation or cancellation. The Fund's NAV per unit is calculated by dividing the net assets attributable to unit holders with the total number of outstanding units.

CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS IN APPLYING ACCOUNTING POLICIES

The Fund makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, rarely equal the related actual results. To enhance the information content of the estimates, certain key variables that are anticipated to have material impact to the Fund's results and financial position are tested for sensitivity to changes in the underlying parameters.

Estimates and judgments are continually evaluated by the Manager and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

However, the Manager is of the opinion that there are no accounting policies which require significant judgment to be exercised.

In undertaking any of the Fund's investment, the Manager will ensure that all assets of the Fund under management will be valued appropriately, that is at fair value and in compliance with the Securities Commission's ("SC") Guidelines on Unit Trust Funds.

REALISED AND UNREALISED PORTIONS OF PROFIT OR LOSS AFTER TAX

The analysis of realised and unrealised profit or loss after tax as presented on the statement of comprehensive income is prepared in accordance with SC's Guidelines on Unit Trust Funds.

INFORMATION ON THE FUND

1

The Unit Trust Fund was constituted under the name Affin Islamic Money Market Fund (the "Fund") pursuant to the execution of a Master Deed dated 20 August 2008, First Supplemental Deed dated 3 January 2013, Second Supplemental Deed dated 26 September 2013, Third Supplemental Deed dated 22 July 2014, Fourth Supplemental Deed dated 6 August 2015, Fifth Supplemental Deed dated 24 April 2019 and Sixth Supplemental Deed dated 16 January 2023 (the "Deeds") entered into between AHAM Asset Management Berhad (the "Manager") and AmanahRaya Trustees Berhad (the "Trustee"). The Fund has changed its name from Affin Islamic Money Market Fund to Affin Hwang Aiiman Money Market Fund as amended by the Third Supplemental Deed dated 22 July 2014 and from Affin Hwang Aiiman Money Market Fund to AHAM Aiiman Money Market Fund as amended by the Sixth Supplemental Deed dated 16 January 2023.

The Fund commenced operations on 20 August 2008 and will continue its operations until terminated by the Trustee as provided under Clause 12.3 of the Deeds.

The Fund may invest in the following permitted investments subject to the following restrictions imposed or as may be amended from time to time by the SC and/or the relevant authorities and/or the Deeds and as permitted by the SC's Shariah Advisory Council and/or the Shariah Advisor:

- Government and/or any other government-related agencies Islamic Investment Issues, Islamic Acceptance Bills, Bank Negara Negotiable Notes, Negotiable Islamic Debt Certificate ("NIDC"), Islamic Negotiable Instrument of Deposits ("INID"), Cagamas Mudharabah Bonds and any other Government Islamic papers;
- (ii) Islamic fixed deposits with financial institutions, Bank Islam Malaysia Berhad and placements of money at call with investment banks;
- (iii) Shariah-compliant obligations issued or guaranteed by the Malaysian government, Bank Negara Malaysia, state governments and government-related agencies;
- (iv) Islamic money market instruments;
- (v) Sukuk;
- (vi) Units/shares in Shariah-compliant collective investment schemes which are in line with the objective of the Fund; and
- (vii) Any other form of Shariah-compliant investments as may be permitted by the SC and/or the Shariah Advisor from time to time that is in line with the Fund's objective.

All investments will be subjected to the SC's Guidelines on Unit Trust Funds, the Deeds and the objective of the Fund.

The main objective of the Fund is to provide short-term liquidity and income, whilst maintaining capital stability by investing in a diversified portfolio of Islamic money market instruments.

The Manager is a company incorporated in Malaysia. The principal activities of the Manager are establishment and management of unit trust funds, exchange-traded funds and private retirement schemes as well as providing fund management services to private clients.

The financial statements were authorised for issue by the Manager on 15 April 2024.

The Fund is exposed to a variety of risks which include market risk (including profit rate risk), credit risk, liquidity risk and capital risk and reclassification of Shariah status risk.

Financial risk management is carried out through internal control processes adopted by the Manager and adherence to the investment restrictions as stipulated by the SC's Guidelines on Unit Trust Funds.

Market risk

(a) Profit rate risk

Profit rate risk arises from the effects of fluctuations in the prevailing levels of market profit rates on the fair value of assets and liabilities and future cash flows.

The Fund's exposure to profit rate risk is mainly confined to Shariah-based deposits with licensed financial institutions. The Manager overcomes this exposure by placing deposits with licensed financial institutions with fixed rates of profit and maturity.

Credit risk

Credit risk refers to the ability of any issuer or counterparty to make timely payments of profit, principals and proceeds from realisation of Shariah-compliant investments. The Manager manages the credit risk by undertaking credit revaluation to minimise risk.

Credit risk arising from cash and bank balances is managed by ensuring that they are held by parties with credit rating of AA or higher.

Credit risk arising from placement of Shariah-based deposits in licensed financial institutions is managed by ensuring that the Fund will only place deposits in reputable licensed financial institutions.

Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting its financial obligations. The Manager manages this risk by maintaining sufficient level of Shariah-based liquid assets to meet anticipated payment and cancellations of unit by unitholders. Shariah-based liquid assets comprise cash, Shariah-based deposits with licensed financial institutions and other Shariah-compliant instruments, which are capable of being converted into cash within 7 days.

The table below analyses the Fund's financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position date to the contractual maturity date.

2 FINANCIAL INSTRUMENTS, RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

Capital risk

The capital of the Fund is represented by equity consisting of unitholders' capital and retained earnings. The amount of equity can change significantly on a daily basis as the Fund is subject to daily subscriptions and redemptions at the discretion of unitholders. The Fund's objective when managing capital is to safeguard the Fund's ability to continue as a going concern in order to provide returns for unitholders and benefits for other stakeholders and to maintain a strong capital base to support the development of the Shariah-compliant investment activities of the Fund.

Reclassification of Shariah status risk

The risk refers to the risk that the currently held Shariah-compliant securities in the portfolio of Shariahcompliant funds may be reclassified to be non Shariah-compliant upon review of the securities by the Shariah Advisory Council of the Securities Commission performed twice yearly. If this occurs, the value of the Fund may be adversely affected where the Manager will take the necessary steps to dispose of such securities in accordance with the Shariah Advisory Council's advice.

3 FAIR VALUE ESTIMATION

Financial instruments comprise financial assets and financial liabilities. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value of financial assets traded in active markets (such as trading securities) is based on quoted market prices at the close of trading on the period end date.

An active market is a market in which transactions for the asset take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

The fair value of financial assets and financial liabilities that are not traded in an active market is determined by using valuation techniques.

(i) <u>Fair value hierarchy</u>

The table below analyses financial instruments carried at fair value. The different levels have been defined as follows:

- Quoted prices (unadjusted) in active market for identical assets or liabilities (Level 1)
- Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2)
- Inputs for the asset and liability that are not based on observable market data (that is, unobservable inputs) (Level 3)

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgment, considering factors specific to the asset or liability.

NOTES TO THE UNAUDITED SEMI-ANNUAL FINANCIAL STATEMENTS FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 29 FEBRUARY 2024 (CONTINUED)

3 FAIR VALUE ESTIMATION (CONTINUED)

(i) Fair value hierarchy (continued)

The determination of what constitutes 'observable' requires significant judgment by the Fund. The Fund considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary and provided by independent sources that are actively involved in the relevant market.

The following table analyses within the fair value hierarchy the Fund's financial assets (by class) measured at fair value:

<u>2024</u>	Level 1 RM	Level 2 RM	Level 3 RM	<u>Total</u> RM
Financial assets at fair value through profit or loss: - Shariah-based deposits with licensed financial institutions		15,309,188,120		15,309,188,120
<u>2023</u>				
Financial assets at fair value through profit or loss: - Shariah-based deposits with licensed financial institutions		14,835,903,647		14,835,903,647

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2. These include Shariah-based deposits with licensed financial institutions. As Level 2 instruments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or nontransferability, which are generally based on available market information.

(ii) The carrying values of cash and cash equivalents and all current liabilities are a reasonable approximation of the fair values due to their short-term nature.
