## PRODUCT HIGHLIGHTS SHEET

### AHAM WORLD SERIES – BIOTECHNOLOGY FUND

#### BRIEF INFORMATION ON THE PRODUCT

##### 1. What is this product about?

The Fund is an open-ended wholesale feeder fund that seeks to achieve capital appreciation over medium to long term period by investing in a collective investment scheme (“CIS”), namely the Janus Henderson Horizon Fund – Biotechnology Fund.

#### PRODUCT SUITABILITY

##### 2. Who is this product suitable for?

The Fund is designed for Sophisticated Investors who seek capital appreciation over a medium to long term investment horizon.

#### KEY PRODUCT FEATURES

##### 3. What am I investing in?

Classes	USD Class	MYR Class	MYR Hedged-class
Launch Date	30 May 2024		
Initial Offer Price	USD 0.50	MYR 0.50	MYR 0.50
	The initial offer price is the Selling Price and Repurchase Price for each Unit during the initial offer period.		
Initial Offer Period	The initial offer period for USD Class, MYR Class and MYR Hedged-class will be for a period of not more than forty-five (45) days from the Commencement Date. The initial offer period may be shortened if we determine that it is in your best interest.		
Tenure	This Fund is an open-ended fund where it does not have a fixed maturity date and may only be terminated in accordance with the terms of the Information Memorandum and the provisions of the Deed.		
Base Currency	USD		
Investment Objective	The Fund seeks to achieve capital appreciation over medium to long term period. <i>Any material change to the Fund’s investment objective would require Unit Holders’ approval.</i>		
Investment Strategy	<p>The Fund will be investing a minimum of 85% of the Fund’s NAV in the Target Fund and a maximum of 15% of the Fund’s NAV in money market instruments and/or deposits.</p> <p>We may substitute the Target Fund with another fund that has a similar investment objective with the Fund, if, in our opinion, the Target Fund no longer meets the Fund’s investment objective. However, this is subject to the Unit Holders’ approval before such changes are made.</p> <p><b>Temporary Defensive Measure</b> We may take temporary defensive positions that may be inconsistent with the Fund’s principal strategy and asset allocation by reducing its investments in the Target Fund and raise liquidity levels of the Fund during adverse market conditions that may impact financial markets to protect the Unit Holders’ interest. In raising the Fund’s liquidity levels, we may also invest in CIS that are able to meet the Fund’s investment objective. To manage the risk of the Fund, we may shift the Fund’s focus and exposure to lower risk investments such as deposits or money market instruments.</p> <p><b>Derivatives</b> Derivatives trades may be carried out for hedging purposes through financial instruments including, but not limited to, forward contracts, futures and swaps. Futures and forward contracts are generally contracts between two parties to trade an asset at an agreed price on a pre-determined future date whereas swaps is an agreement to swap or exchange two financial instruments between two parties.</p>		

Classes	USD Class	MYR Class	MYR Hedged-class
	<p>The intention of hedging is to preserve the value of the asset from any adverse price movements. For example, to hedge against foreign currency exchange risk, the Fund may enter into a currency forward contract to offset any adverse foreign currency movements by determining an agreed rate for an agreed tenure with its counterparty. While the hedging transactions will assist with mitigating the potential foreign exchange losses by the Fund, any potential foreign exchange gains from the hedging strategy will be capped as well.</p> <p>The Fund adopts commitment approach to measure the Fund's global exposure to derivatives. The commitment approach is a methodology that aggregates the underlying market values or notional values of derivatives after taking into account the possible effects of netting and/or hedging arrangements. The Fund's global exposure from the derivatives position must not exceed 100% of NAV of the Fund at all times.</p>		
<b>Asset Allocation</b>	<ul style="list-style-type: none"> <li>A minimum of 85% of the Fund's NAV to be invested in the Target Fund; and</li> <li>A maximum of 15% of the Fund's NAV to be invested in money market instruments and/or deposits.</li> </ul>		
<b>Distribution Policy</b>	The Fund is not expected to make distribution. However, incidental distribution may be declared whenever is appropriate.		
<b>Minimum Initial Investment*</b>	USD 10,000	MYR 30,000	MYR 30,000
<b>Minimum Additional Investment*</b>	USD 5,000	MYR 10,000	MYR 10,000
<b>Minimum Units of Repurchase*</b>	10,000 Units	20,000 Units	20,000 Units
<b>Minimum Units Held*</b>	20,000 Units	60,000 Units	60,000 Units
	If the balance of your investment (i.e. total number of Units) is less than the minimum holding of Units, you will be required to make an additional investment in order to meet the required minimum balance of investment. Otherwise, we may withdraw all your holding of Units in the Fund and pay the proceeds to you.		
<b>Minimum Units Per Switch*</b>	10,000 Units	20,000 Units	20,000 Units

#### 4. Who am I investing with?

Relevant parties' information:

The Manager	AHAM Asset Management Berhad
The Trustee	TMF Trustees Malaysia Berhad

#### 5. What are the possible outcomes of my investment?

The Fund is a wholesale feeder fund that invests in the Target Fund, which in turn invests in at least 85% of its net assets in equities or equity-related instruments of biotechnology and biotechnology-related companies worldwide. The performance of this Fund would to a great extent be linked to the price movements of the Target Fund which in turn is

\*At our discretion, we may reduce the transaction value and Units, including for transactions made via digital channels, subject to the terms and conditions disclosed in the respective channels

reliant on the performance of the underlying investments that it is invested in.

As such, the value of your investments will be reliant on the performance of the Target Fund. This means that if the Target Fund performs well, the Fund may reflect similar performance and likewise if the performance of the Target Fund falls, the value of your investment will also be affected. The Fund's performance is dependent on the investment manager's expertise in managing the Target Fund.

The Fund is not expected to make distribution. However, incidental distribution may be declared whenever is appropriate. Please note that the capital and returns of the Fund are not guaranteed.

## KEY RISKS

### 6. What are the key risks associated with this product?

#### General Risks

- **Market risk** – Market risk arises because of factors that affect the entire market place. Factors such as economic growth, political stability and social environment are some examples of conditions that have an impact on businesses, whether positive or negative. Market risk cannot be eliminated but may be reduced through diversification. It stems from the fact that there are economy-wide perils, or instances of political or social instability which threaten all businesses. Hence, the Fund will be exposed to market uncertainties and fluctuations in the economic, political and social environment that will affect the market price of the investments either in a positive or negative way.
- **Fund management risk** – This risk refers to the day-to-day management of the Fund by us which will impact the performance of the Fund. For example, investment decisions undertaken by us as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error, fraud, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.
- **Performance risk** – The Fund is a feeder fund which invests in another collective investment scheme, namely the Target Fund. The performance of the Fund very much depends on the performance of the Target Fund. If the Target Fund does not perform in accordance with its investment objective, the performance of the Fund will also be impacted negatively. The performance of the Target Fund and consequently of the Fund may go down as well as up, depending on the circumstances prevailing at a particular given time. On that basis, there is never a guarantee that investing in the Fund will produce a positive investment returns in accordance with its investment objective.
- **Liquidity risk** – This is the risk that the shares of the Target Fund that is held by the Fund cannot be readily sold and converted into cash. This can occur when there is a restriction on realisation of shares of the Target Fund. The Management Company may suspend the realisation of shares of the Target Fund or delay the payment of realisation proceeds in respect of any realisation request received, during any period in which the determination of the net asset value of the Target Fund is suspended. As a result, the Fund may not be able to receive the repurchase proceeds in a timely manner which in turn may delay the payment of repurchase proceeds to the Unit Holders. In managing liquidity risk, we will maintain sufficient liquidity level for the purposes of meeting repurchase requests. Please refer to the "Suspension of Dealing in Units" section of this Information Memorandum for more details..
- **Operational risk** – This risk refers to the possibility of a breakdown in our internal controls and policies. The breakdown may be a result of human error, system failure or fraud where our employees collude with one another. This risk may cause monetary loss and/or inconvenience to you. We will review our internal policies and system capability to mitigate instances of this risk. Additionally, we maintain a strict segregation of duties to mitigate instances of fraudulent practices amongst our employees.
- **Inflation risk** – This is the risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
- **Loan financing risk** – This risk occurs when you take a loan or financing to finance your investment. The inherent risk of investing with borrowed or financed money includes you being unable to service the loan or financing payments. In the event Units are used as collateral, you may be required to top-up your existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower NAV per Unit as compared to the NAV per Unit at the point of purchase towards settling the loan or financing.
- **Suspension of repurchase request risk** – Having considered the best interests of Unit Holders, the repurchase requests by the Unit Holders may be subject to suspension due to exceptional circumstances, where the market value or fair value of a material portion of the Fund's assets cannot be determined, or such other circumstances as may be determined by the Manager, where there is good and sufficient reason to do so.

The exceptional circumstances may include, amongst others, the suspension of dealing by the Target Fund. In such case, Unit Holders will not be able to redeem their Units and will be compelled to remain invested in the Fund for a longer period of time. Hence, their investments will continue to be subject to the risks inherent to the Fund.

- **Target fund manager risk** – The Target Fund (which the Fund invests in) is managed by the Management Company. It is important to note that the Manager has no control over the investment management techniques and operational controls of the Management Company. Thus, mismanagement of the Target Fund (i.e. breach of its prescribed investment restriction due to human error) may negatively affect the Fund (as an investor of the Target Fund). Should such a situation arise, the Manager may propose to invest in other alternative collective investment scheme that is consistent with the investment objective of the Fund provided always that the approval of the Unit Holders has been obtained.

#### Specific Risks of the Fund

- **Concentration risk** – As a feeder fund, this Fund invests in a single collective investment scheme. Any adverse effect on the Target Fund will inevitably affect the Fund as well. The performance of the Fund is also dependent on the

performance of the Target Fund. This risk may be mitigated as we are allowed to take temporary defensive positions in response to adverse market conditions. We are also able to substitute the Target Fund with another fund with similar investment objective of the Fund if, in our opinion, the Target Fund no longer meets the Fund's investment objective subject to Unit Holders' approval. For better understanding of the risks associated to the Target Fund, please refer to the "Risks of the Target Fund" below.

- **Country risk** – Investments of the Fund in the Target Fund which is domiciled in Luxembourg may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of Luxembourg. For example, the deteriorating economic condition of such country may adversely affect the value of the investments undertaken by the Fund. This in turn may cause the NAV of the Fund or prices of Units to fall.
- **Counterparty risk** – Counterparty risk is the risk associated with the ongoing ability and willingness of the issuers to derivatives ("investments") to fulfil their respective financial commitments to the Fund in a timely manner. Bankruptcy, fraud or regulatory non-compliance arising out of and/or in connection with the issuers may impair the operations and/or the performance of the Fund. However, we will conduct stringent credit selection process of the issuers of the investments prior to commencement of investments and monitoring mechanisms established by us may potentially mitigate this risk. If, we are of the opinion there is material adverse change to an issuer, we may consider unwinding the issuer's investment to mitigate potential losses that may arise.
- **Currency risk** – As the investments of the Fund may be denominated in currencies other than the Base Currency, any fluctuation in the exchange rate between the Base Currency and the currencies in which the investments are denominated may have an impact on the value of these investments. You should be aware that if the currencies in which the investments are denominated depreciate against the Base Currency, this will have an adverse effect on the NAV of the Fund in the Base Currency and vice versa. You should note that any gain or loss arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

*Currency risk at the Class level*

The impact of the exchange rate movement between the Base Currency and the currency of the respective Classes (other than USD Class) may result in a depreciation of your holdings as expressed in the Base Currency.

*Currency risk at the Hedged-class level*

Currency hedging reduces the effect of exchange rate movements for the Hedged-class, but it does not entirely eliminate currency risk between the Hedged-class and the Base Currency (not a perfect hedge). Hence, the unhedged portion of the respective Hedged-class will still be affected by the exchange rate movements and it may cause fluctuation of NAV of the respective Hedged-class. You should note, however, that if the exchange rate moves favourably, the Hedged-class would not benefit from any upside in currency movement due to the hedging strategy. In addition, hedging is subject to a minimum investment size of entering into a forward contract and the cost of hedging which may affect returns of the respective Hedged-class.

- **Target fund manager risk** – The Target Fund (which the Fund invests in) is managed by the Management Company. It is important to note that the Manager has no control over the investment management techniques and operational controls of the Management Company. Thus, mismanagement of the Target Fund (i.e. breach of its prescribed investment restriction due to human error) may negatively affect the Fund (as an investor of the Target Fund). Should such a situation arise, the Manager may propose to invest in other alternative collective investment scheme that is consistent with the investment objective of the Fund provided always that the approval of the Unit Holders has been obtained.

**Risks related to the Target Fund**

- General investment risk
- Geopolitical risk
- Pandemic risk
- Brexit risk
- Eurozone risk
- Securities lending risk
- Risk associated with reinvestment of cash collateral
- Risk associated with reverse repurchase transactions entered into by the securities lending agent on behalf of the Target Fund

- Equities risk
- Funds offering hedged share classes
- Smaller companies risk
- Emerging markets risk
- China securities risk
- China A-Shares risk
- Stock Connect Programs risk
- Risks relating to companies listed on the STAR Board of the SSE through the Stock Connect Program
- Technology, including healthcare and telecommunications risk
- Special purpose acquisition companies ("SPACs")
- Derivatives risk
- Other derivative risk

**Note: Please refer to "Understanding the Risks of the Fund and the Target Fund" in Information Memorandum for further details on each risk.**

**It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are recommended to read the whole Information Memorandum to assess the risks associated with the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.**

**FEES AND CHARGES**

**7. What are the fees and charges involved?**

There are fees and charges involved and you are advised to consider them before contributing to the Fund.
