PRODUCT HIGHLIGHTS SHEET

AHAM WORLD SERIES – GLOBAL BALANCED FUND

BRIEF INFORMATION ON THE PRODUCT

1. What is this product about?

AHAM World Series – Global Balanced Fund is an open-ended balanced (fund-of-funds) fund. The Fund’s investment objective is to provide investors with capital growth opportunities through a portfolio of collective investment schemes.

PRODUCT SUITABILITY

2. Who is this product suitable for?

The Fund is designed for retail investors who want a diversified portfolio that includes exposure into global markets, seek capital appreciation over medium to long term and have a high risk tolerance.

The Fund offers investors with 7 different Classes of Units, known respectively as the USD Class, MYR Hedged-class, SGD Hedged-class, AUD Hedged-class, GBP Hedged-class, EUR Hedged-class and MYR Class.

KEY PRODUCT FEATURES

Launch date	1 September 2016				6 June 2017	16 May 2018	13 June 2024
Tenure	This Fund is an open-ended fund where it does not have a fixed maturity date and may only be terminated in accordance with the terms of the Prospectus and the provisions of the Deed.						
Base currency	USD						
Benchmark	50% MSCI All Country World Index + 50% Barclays Global Aggregate Index <i>The risk profile of this Fund is different from the risk profile of the benchmark.</i>						
Investment strategy	<p>In line with its objective, the investment strategy of the Fund is to invest in a diversified portfolio of collective investment schemes (“CIS”) that will provide capital growth through exposure into global markets.</p> <p>To offer investment diversification, the selection of CIS will be made based on the geographical and asset class focus to broaden the investment reach. Through its investment into CIS, the Fund will provide you with access into equities listed in global markets, as well as access into fixed income instruments such as debt securities, money market instruments and fixed deposits, issued globally. We will look towards having a balanced portfolio holding between 40% to 60% exposure into both equities and fixed income instruments respectively. Exposure into equities are generally considered to be able to provide higher returns as compared to fixed income instruments thus exposing you to relatively higher risk that comes with equity investments. However, the Fund will also have exposure in fixed income instruments, which are generally considered to be of lower risk, and the balanced allocation is aimed at managing the overall volatility of the Fund.</p> <p>We may place the uninvested portion of the Fund in liquid assets such as money market instruments and/or deposits with Financial Institutions. However, we may also take temporary defensive positions that may be inconsistent with the Fund’s principal strategy by holding up to all of the Fund’s NAV in money market instruments and/or fixed deposits with Financial Institutions in attempting to respond to adverse conditions that could negatively impact the financial markets.</p> <p>Derivatives</p> <p>Derivative trades may be carried out for hedging purposes through financial instruments including, but not limited to, forward contracts, futures contracts and swaps. Future and forward contracts are generally contracts between two parties to trade an asset at an agreed price on a pre-determined future date whereas swaps is an agreement to swap or exchange two financial instruments between two parties.</p> <p>The intention of hedging is to preserve the value of the asset from any adverse price movements. For example, to hedge against foreign currency exchange risk, the Fund may enter into a currency forward</p>

	<p>contract to offset any adverse foreign currency movements by determining an agreed rate for an agreed tenure with its counterparty. While the hedging transactions will assist with mitigating the potential foreign exchange losses by the Fund, any potential foreign exchange gains from the hedging strategy will be capped as well.</p> <p>The Fund adopts commitment approach to measure the Fund's global exposure to derivatives. The commitment approach is a methodology that aggregates the underlying market values or notional values of derivatives after taking into account the possible effects of netting and/or hedging arrangements. The Fund's global exposure from the derivatives position must not exceed 100% of NAV of the Fund at all times.</p>						
Asset allocation	<ul style="list-style-type: none"> ➤ A minimum of 85% of the Fund's NAV will be invested in collective investment schemes; and ➤ The balance of the Fund's NAV will be placed in liquid assets such as money market instruments and/or deposits with Financial Institutions. 						
Distribution policy	The Fund is not expected to make any income distribution. However, incidental income distribution may be declared whenever appropriate.

4. Who am I investing with?

Relevant parties' information:

The Manager	AHAM Asset Management Berhad
The Trustee	TMF Trustees Malaysia Berhad

5. What are the possible outcomes of my investment?

The Fund is a balanced (fund-of-funds) that invests in a diversified portfolio of collective investment schemes that will provide capital growth through exposure into global markets.

Through its balanced portfolio, the Fund's returns would, to a great extent, be linked to the performance of the global fixed income market, as well as the global equity market. Investments in fixed income instruments are expected to generate consistent and regular income while the investments into equities may lead to the portfolio benefiting from capital growth if the equities within the global markets do well.

Please note that the capital and returns of the Fund is not guaranteed.

KEY RISKS

6. What are the key risks associated with this product?

General risks

- **Fund management risk** – This risk refers to our day-to-day management of the Fund which will impact the performance of the Fund. For example, our investment decisions as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error,

* At our discretion, we may reduce the transaction value and Units, including for transactions made via digital channels, subject to the terms and conditions disclosed in the respective channels.

fraud, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.

- **Inflation risk** – This is the risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
- **Loan / financing risk** – This risk occurs when you take a loan or financing to finance your investment. The inherent risk of investing with borrowed/financed money includes you being unable to service the loan/financing repayments. In the event Units are used as collateral, you may be required to top-up your existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower NAV per Unit as compared to the NAV per Unit at the point of purchase towards settling the loan/financing.
- **Operational risk** – This risk refers to the possibility of a breakdown in our internal controls and policies. The breakdown may be a result of human error, system failure or fraud where our employees collude with one another. This risk may cause monetary loss and/or inconvenience to you. We will regularly review our internal policies and system capability to mitigate this risk. Additionally, we maintain a strict segregation of duties to mitigate instances of fraudulent practices amongst our employees.
- **Suspension of repurchase request risk** - Having considered the best interests of Unit Holders, the repurchase requests by the Unit Holders may be subject to suspension due to exceptional circumstances, where the market value or fair value of a material portion of the Fund's assets cannot be determined. Such exceptional circumstances may occur when, amongst others, the collective investment schemes that make up material portion of the NAV of the Fund suspend the dealings* and the inability to repatriate the proceeds of the redemptions of the shares or units of the collective investment schemes arising from the regulatory restrictions and/or foreign exchange controls imposed by the authorities in respective jurisdictions. In such case, Unit Holders will not be able to redeem their Units and will be compelled to remain invested in the Fund for a longer period of time. Hence, their investments will continue to be subject to the risks inherent to the Fund.

* The Manager may consider to suspend the Fund when multiple collective investment schemes (which make up material portion of the Fund's NAV) that the Fund invest in suspend the dealings under circumstances, amongst others, as follows:

- (i) Should redemption applications by investors of the collective investment scheme exceeds 10% of the NAV of the collective investment schemes on any dealing day, the Manager of the collective investment schemes may in its absolute discretion defer such redemption applications; and
- (ii) When substantial portion of the collective investment scheme's investments is suspended or restricted for trading that subsequently affects the valuation of the collective investment schemes.

Specific risks

Specific risks relating to the Fund are as below:

- **Collective investment scheme risk** – Any adverse effect on the collective investment scheme which the Fund is investing in will impact the NAV of the Fund. For example, the respective collective investment schemes may underperform its benchmarks due to poor market conditions and as a result, the NAV of the Fund will be adversely affected as the performance of the Fund is dependent on the performance of the respective collective investment schemes.
- **Credit and default risk** – Credit risk relates to the creditworthiness of the issuers of the money market instruments and the Financial Institutions where the deposits are placed (hereinafter referred to as "investment") and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer and/or the Financial Institution may impact the value as well as liquidity of the investment. In the case of rated investment, this may lead to a credit downgrade. Default risk relates to the risk of an issuer and/or the Financial Institution of the investment either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the investment. This could adversely affect the value of the Fund.
- **Interest rate risk** – This risk refers to the impact of interest rate changes on the valuation of money market instruments. Generally, movement in interest rates affects the prices of money market instruments inversely. For example, when interest rates rise, prices of money market instruments will fall. The fluctuations of the prices of money market instruments will also have an impact on the NAV of the Fund. This risk can largely be eliminated by holding money market instruments until their maturity. We also manage interest rate risk by considering each money market instruments' sensitivity to interest rate changes. When interest rates are expected to increase, the Fund would then likely seek to switch to money market instruments that are less sensitive to interest rate changes. For investments in deposits, the fluctuations in the interest rates will not affect the placement of deposits but will result in the opportunity loss by the Fund if the placement of deposits is made at lower interest rate.
- **Currency risk** – As the investments of the Fund may be denominated in currencies other than the Base Currency, any fluctuation in the exchange rate between the Base Currency and the currencies in which the investments are denominated may have an impact on the value of these investments. You should be aware that if the currencies in which the investments are denominated depreciate against the Base Currency, this will have an adverse effect on the NAV of the Fund in the Base Currency and vice versa. You should also note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

Currency risk at the Class level

The impact of the exchange rate movement between the Base Currency and the currency of the respective classes (other than USD Class) may result in a depreciation of your holdings as expressed in the Base Currency.

Currency risk at the Hedged-class level

Currency hedging reduces the effect of exchange rate movements for the Hedged-class, but it does not entirely eliminate currency risk between the Hedged-class and the Base Currency (not a perfect hedge). Hence, the unhedged portion of the

respective Hedged-class will be affected by the exchange rate movements and it may cause fluctuation of NAV of the respective Hedged-class. You should note however, that if the exchange rate moves favourably, the Fund would not benefit from any upside in currency movement due to the hedging strategy. In addition, hedging is subject to a minimum investment size of entering into a forward contract and cost of hedging which may affect returns of the respective Hedged-class.

- **Liquidity risk** – Liquidity risk refers to two scenarios. The first is where an investment cannot be sold due to unavailability of a buyer for that investment. The second scenario exists where the investment, by its nature, is thinly traded. This will have the effect of causing the investment to be sold below its fair value which would adversely affect the NAV of the Fund and subsequently the value of Unit Holders’ investments in the Fund.
- **Related party transaction risk** – The Fund may invest in collective investment schemes managed by AHAM and may also have dealings with parties related to AHAM. Nevertheless, it is our policy that all transactions with related parties are to be executed on terms which are best available to the Fund and which are not less favourable to the Fund than an arm’s length transaction between independent parties.
- **Country risk** – Investments of the Fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests in. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV of the Fund to fall.

Note: Please refer to the Fund’s Prospectus for further details on the general and specific risks.

It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are recommended to read the whole Prospectus to assess the risks associated with the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.

Basic of calculation and assumption made in calculating the returns

The performance figures are a comparison of the growth/decline in NAV for the stipulated period taking into account all the distribution payable (if any) during the stipulated period.

An illustration of the above would be as follow:-

Capital return = NAV per Unit end / NAV per Unit begin – 1

Income return = Income distribution per Unit / NAV per Unit ex-date

Total return = (1+Capital return) x (1+Income return) – 1

FEES & CHARGES

7. What are the fees and charges involved?

There are fees and charges involved and you are advised to consider them before contributing to the Fund.

What will I be charged by the Manager?

Sales charge	Up to 5.50% of the NAV per Unit of a Class. <i>You may negotiate for a lower Sales Charge.</i> The Sales Charge for investors purchasing Units through the EMIS shall be limited to a maximum charge of 3% of the NAV per Unit or as determined by the EPF.
Repurchase charge	There will be no repurchase charge imposed on the redemption of Units.
Switching fee	The Manager does not impose any switching fee. However, if the amount of sales charge of the fund (or class) that the Unit Holder intends to switch into is higher than the sales charge imposed by the fund (or class) being switched from, then the difference in the sales charge between the two (2) funds (or classes) shall be borne by the Unit Holder.
Transfer fee	There will be no transfer fee imposed on the transfer facility.

What are the key ongoing fees charged to the Fund?

Management fee	Up to 1.80% per annum of the NAV of the Fund, and is calculated using the Base Currency (before deducting the management fee and trustee fee).
Trustee fee	Up to 0.06% per annum of the NAV of the Fund (excluding foreign custodian fees and charges), and is calculated using the Base Currency (before deducting the management fee and trustee fee).

Note: Please refer to the Prospectus for further explanation and illustration on the Fund's fees, charges and expenses.

ALL FEES AND CHARGES PAYABLE BY YOU ARE SUBJECT TO ALL APPLICABLE TAXES AND / OR DUTIES AS MAY BE IMPOSED BY THE GOVERNMENT AND / OR THE RELEVANT AUTHORITIES FROM TIME TO TIME.
