FUND INFORMATION

Fund Name	Affin Hwang New China Tracker Fund
Fund Type	Growth
Fund Category	Feeder fund
Investment Objective	The Fund aims to provide investors with investment results that closely correspond to the performance of the benchmark
Benchmark	S&P New China Sectors Ex A-Shares Index
Distribution Policy	The Fund is not expected to make distribution. However, incidental distribution may be declared whenever is appropriate

BREAKDOWN OF UNITHOLDERS BY SIZE MYR CLASS AS AT 31 OCTOBER 2021

Size of holdings (units)	No. of unitholders	No. of units held * ('000)
5,000 and below	146	344
5,001 to 10,000	77	590
10,001 to 50,000	197	4,987
50,001 to 500,000	156	21,872
500,001 and above	16	44,375
Total	592	72,168

* Note: Excluding Manager's stock

FUND PERFORMANCE DATA

Category	As at 31 Oct 2021 (%)
Portfolio composition	
Collective investment scheme - local	95.03
Cash & cash equivalent	4.97
Total	100.00
Total NAV (RM'million)	31.174
NAV per Unit (RM)	0.4319
Unit in Circulation (million)	72.171
Highest NAV	0.5241
Lowest NAV	0.4074
Return of the Fund (%) ⁱⁱⁱ	-16.83
- Capital Growth (%) ⁱ	-16.83
- Income Distribution (%) ⁱⁱ	Nil
Gross Distribution per Unit (sen)	Nil
Net Distribution per Unit (sen)	Nil
Management Expense Ratio (%)	0.27
Portfolio Turnover Ratio (times)	0.26

Basis of calculation and assumption made in calculating the returns:-

The performance figures are a comparison of the growth/decline in NAV for the stipulated period taking into account all the distribution payable (if any) during the stipulated period.

An illustration of the above would be as follow:-

Capital return	= NAV per Unit end / NAV per Unit begin – 1
Income return	= Income distribution per Unit / NAV per Unit ex-date
Total return	= (1+Capital return) x (1+Income return) – 1

MANAGER'S REPORT

Income Distribution / Unit Split

No income distribution or unit splits were declared for the financial period ended 31 October 2021.

Performance Review

For the period 1 May 2021 to 31 October 2021, the Fund registered a return of -16.83% compared to the benchmark return of -18.85%. The Fund thus outperformed the Benchmark by 2.02%. The Net Asset Value per unit ("NAV") of the Fund as at 31 October 2021 was MYR0.4319 while the NAV per unit on 30 April 2021 MYR0.5193.

Since commencement, the Fund has registered a return of -13.62% compared to the benchmark return of -14.88%, outperforming by 1.26%. The Fund has met its investment objective.

"This information is prepared by Affin Hwang Asset Management Berhad (AFFINHWANGAM) for information purposes only. Past earnings or the fund's distribution record is not a guarantee or reflection of the fund's future earnings/future distributions. Investors are advised that unit prices, distributions payable and investment returns may go down as well as up. Source of Benchmark is from Bloomberg."

Benchmark: S&P New China Sectors Ex A-Shares Index

Past performance is not necessarily indicative of future performance and that Unit prices and investment returns may go down, as well as up.

Asset Allocation

For a snapshot of the Fund's asset mix during the period under review, please refer to Fund Performance Data.

As at 31 October 2021, the Fund's exposure into the collective investment scheme stood at 95.03% of the Fund's NAV and the remaining in cash and cash equivalent.

Strategies Employed

The Manager continues to hold the flexibility to invest into a range of asset classes depending on the prevailing market conditions. Over the period under review, the Fund was fully invested into collective investment schemes.

Market Review

Global equities started 2021 on a strong note as policy easing, and global vaccine rollouts went underway. At the start of January, US markets saw strong optimism. The storming of the US Capitol in early January had little effect over the broader market. However, a black swan event at the end of the month saw retail investors selectively targeting underperforming stocks (e.g. GME and AMC) that resulted in a short squeeze and pushing their share prices to new highs.

US equity markets ended the month of February with modest gains though sentiment was tested as surging bond yields and inflation fears took precedence. Whilst equities and bonds tend to move in opposite directions, the reality is that equity outperformance in the past year has largely come from growth-centric stocks and "stay at home" trades, which were facing short-term squeezes on their profit margins from rising rates. Another factor is the shift from growth to value, with value stocks performing better over the period.

Global equities endured a mixed session in March as US-China tensions boiled over dampening sentiment. With recovery still in a fragile state, global central banks including the Fed are expected to keep monetary policy accommodative to nurse the economy through the pandemic. Meanwhile, rising bond yields continue to unsettle markets. Banks are enjoying higher trading fees and lower provision costs as the economy gradually regains its footing.

Global markets shrugged off inflation fears to climb higher in June as investors start to buy-in to the Fed's dovish testimony. The S&P 500 and Nasdaq index rose, buoyed by stimulus optimism after early indication of bipartisan support of the proposed US\$1.2 trillion infrastructure bill in the US Congress. US Fed Chair, Jerome Powell testified in the House of Representatives to reiterate the central bank's view that inflation is transitory and that the FOMC will not rush to hike rates. The yield on the 10-year Treasury note tumbled as the Fed affirmed that it would not pre-emptively hike rates before signs of a recovery.

In Asia, the MSCI Asia ex-Japan index was marginally weaker in June as sentiment was dampened on geopolitical tensions and consolidation seen in China's economy. The Group of Seven ("G7") nations and North Atlantic Treaty Organisation ("NATO") held its annual summit with political leaders from US and Europe vowing to toughen its stance on China.

China had also reported weaker than expected retail sales and industrial production data. Industrial production grew 8.8% y-o-y in May, which came below consensus expectations of 9.2%. Weaker upstream production as well as a power shortage in the Yunan province which is an aluminium production hub led to lower factory output. May retail sales which rose 12.4% y-o-y also fell market expectations of 14.0%. However, weaker economic data could push back any chance of further tightening in China as policymakers look to sustain growth.

Asia was dragged by the weakness in the Chinese market in July. Once again, China saw regulators cracking down on businesses, this time targeting the education sector. Authorities had banned the provision of holiday and weekend tutoring, and further said that they will no longer approve the establishment of new tuition centres. Instead, tutoring companies are being asked to register as non-profit institutions.

In Asia, the MSCI Asia ex-Japan index reversed course by climbing slightly higher. Regulatory noise still dominated headlines in China amidst calls for more oversight in the electric vehicle (EV) industry. The Fed is currently adopting a wait-and-see approach to the Delta variants impact and its implication on job data, highlighting that inflation is transitory and it was more harmful to react amidst the temporary surge in inflation.

The local equity market's performance was muted relative to regional peers. In the February result season, the tech sector was largely reporting earnings that beat expectations on the back of robust demand. Meanwhile, Finance Minister clarified in an interview that the government is not looking to impose capital gains tax on stocks. The government was mulling new taxes to widen its revenue base once the economy is on a more stable footing.

The Malaysian bond market saw an unwinding of "rate cut" bets at the end of January following BNM's announcement to keep interest rates unchanged at 1.75% highlighting that recovery of the local economy was underway. The shorter-end of the MGS curve saw yields rise whilst longer-tenured papers remained resilient that month.

Yields trended higher in tandem with US treasury movement in the quarter. Undoubtedly, the performance of the local bond market has been subpar since the start of the year; especially given the volatility in US Treasury yields, as well as the lack of support from EPF due to its ongoing commitment to the i-Sinar and i-Lestari programme. However, demand was seen returning in March, as more investors – including insurance players and asset managers – are seen nibbling into the market given the more attractive yield levels.

Fiscal deficit is expected to breach above the government's target of 6.0%. With the unveiled PEMULIH stimulus package, we could see the debt ceiling be raised to 65.0% from 60.0%. This could translate to more government bond supplies, which may put further pressure on Malaysia's sovereign rating.

On the monetary policy side, Bank Negara Malaysia ("BNM") kept Overnight Policy Rates ("OPR") at 1.75% in its monetary policy meeting in July. The central bank remained slightly optimistic on Malaysia's growth outlook on the back of various support measures in place, vaccine rollouts, as well as stronger export numbers.

Political risks abated slightly with the appointment of Datuk Seri Ismail Sabri Yaakob as the 9th Prime Minister after securing the majority support of 114 MPs. The next Parliament sitting is slated in September which Datuk Seri Ismail Sabri will face a test of majority support through a vote of confidence. With political stability expected until the next General Election (GE) due by 2023, the local market could see further support on the back of continued vaccination roll-outs. The gradual reopening of more economic sectors also point to economic growth improving in the coming quarters.

During its quarterly GDP briefing, BNM said that Malaysia's GDP grew 16.1% y-o-y in the 2Q'21, although it contracted 2% on a q-o-q basis. The central bank also revised its full-year GDP growth forecast for Malaysia to between 3% and 4%, from the previous forecast of between 6% and 7.5% for 2021.

Prime Minister Datuk Seri Ismail Sabri Yaakob unveiled his cabinet line-up with familiar faces at the helm. Foreigners turned net buyers in the last week of August with net inflows rising to the tune of RM960 million which is the strongest weekly inflow since 2019.

On a separate note, Bank Negara Malaysia is slated to hold its next Monetary Policy Committee meeting on 9 September 2021. Despite recently revising its 2021 GDP forecast to a lowered range of 3.0-4.0%, we expect the central bank to keep rates unchanged at 1.75% amid several supportive drivers including: (i) healthy vaccination rollouts, (ii) robust external demand, and (iii) gradual reopening of sectors and economies.

Investment Outlook

Global markets have rallied sharply from their lowest, supported by fiscal and monetary stimulus. The economy is still recovering, albeit at a slow pace, as consumers' confidence return. Recovery plays will be the most obvious theme for the year of improving macroeconomic conditions and the inevitable rollout of vaccines has everyone looking to the future and letting go of 2020's miseries. We have already seen the rotation from growth to value take place in the start of 2021.

Earnings momentum will continue in 2021 with earnings growth projected to rise in Asia ex-Japan. Key sectors leading the recovery include the energy, consumer discretionary and industrials. Though, this is tempered by moderately higher valuations which has crept up above historical averages. Liquidity conditions remain positive and with earnings visibility from Asian companies that are riding along a China-led economic recovery, Asia continues to be an ocean of growth potential as the region continues to grow. Selected Chinese consumer names which are less likely to be pressured by regulatory headwinds were deemed more favourable.

Back home, economic recovery continues to progress as international borders slowly start to reopen. On COVID-19 developments, over 90% of Malaysia's adult population has been vaccinated. From a bottom-up perspective, the domestic focus will be on the recovery beneficiaries and exporters in the technology and EMS segment which have strong earnings visibility in the near term as well increasing demand. Weights in politically sensitive stocks have also been trimmed as the situation remains fluid.

ESG funds have also been gathering plenty of interest and we will expect this investor shift to ESG-focused funds to be more commonplace across the industry. The Biden administration's foray into building stronger climate change initiatives also signals a shift for the investment industry as this will generate more opportunities across asset classes. The wider implications of this on the economy will take time to materialise, but will continue to be observed.

State of Affairs of the Fund

There is neither any significant change to the state affairs of the Fund nor any circumstances that materially affect any interests of the unit holders during the period under review.

Soft Commissions received from Brokers

As per the requirements of the Securities Commission's Guidelines on Unit Trust Funds and Guidelines on Compliance Function for Fund Management Companies, soft commissions received from brokers/dealers may be retained by the management company only if the :-

- (i) goods and services provided are of demonstrable benefit to Unit holders of the Fund; and

- (ii) goods and services are in the form of research and advisory services that assists in the decision making process.

During the financial period under review, the management company had received on behalf of the Fund, soft commissions in the form of research materials, data and quotation services, investment-related publications, market data feed and industry benchmarking agencies which are of demonstrable benefit to Unitholders of the Fund.

Cross Trade

No cross trade transactions have been carried out during the reported period.

TRUSTEE'S REPORT TO THE UNITHOLDERS OF AFFIN HWANG NEW CHINA TRACKER FUND

We have acted as Trustee of Affin Hwang New China Tracker Fund (“the Fund”) for the financial period ended 31 October 2021. To the best of our knowledge, **Affin Hwang Asset Management Berhad**, the Manager, has operated and managed the Fund in accordance with the following:-

- (a) limitations imposed on the investment powers of the Management Company and the Trustee under the Deeds, other provisions of the Deeds, the Capital Markets and Services Act 2007, the Securities Commission’s Guidelines on Unit Trust Funds and other applicable laws during the financial period then ended;
- (b) valuation/pricing is carried out in accordance with the Deeds and any regulatory requirements; and
- (c) creation and cancellation of units have been carried out in accordance with the Deeds and any regulatory requirements.

AFFIN HWANG NEW CHINA TRACKER FUND

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 31 OCTOBER 2021

The following accounting policies have been used in dealing with items which are considered material in relation to the financial statements.

A BASIS OF PREPARATION OF THE FINANCIAL STATEMENTS

The financial statements have been prepared under the historical cost convention, except as disclosed in the summary of significant accounting policies and comply with Malaysian Financial Reporting Standards, International Financial Reporting Standards (“MFRS”).

The preparation of financial statements in conformity with MFRS requires the use of certain critical accounting estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the reported financial period. It also requires the Manager to exercise their judgment in the process of applying the Fund’s accounting policies. Although these estimates and judgment are based on the Manager’s best knowledge of current events and actions, actual results may differ.

The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note I.

(a) Standards, amendments to published standards and interpretations that are effective:

- The Conceptual Framework for Financial Reporting (Revised 2018)
- Amendments to MFRS 101 and MFRS 108 ‘Definition of Material’

The adoption of the above standards, amendments to standards or interpretations did not have a material effect on the financial statements of the Fund.

(b) Standards and amendments that have been issued but not yet effective:

- Amendments to MFRS 3 ‘Reference to Conceptual Framework’ (effective 1 January 2022) replace the reference to Framework for Preparation and Presentation of Financial Statements with 2018 Conceptual Framework.
- Annual Improvements to MFRSs 2018 – 2020 Cycle (effective for annual periods beginning on or after 1 January 2022).
- Amendments to MFRS 137 ‘onerous contracts—cost of fulfilling a contract’ (effective 1 January 2022) clarify that direct costs of fulfilling a contract include both the incremental cost of fulfilling the contract as well as an allocation of other costs directly related to fulfilling contracts.
- Amendments to MFRS 101 ‘Classification of liabilities as current or non-current (effective 1 January 2023) clarify that a liability is classified as non-current if an entity has a substantive right at the end of the reporting period to defer settlement for at least 12 months after the reporting period. A liability is classified as current if a condition is breached at or before the reporting date and a waiver is obtained after the reporting date.

The adoption of the above standards, amendments to standards or interpretations is not expected to have a material effect on the financial statements of the Fund.

AFFIN HWANG NEW CHINA TRACKER FUND

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 31 OCTOBER 2021 (CONTINUED)

B INCOME RECOGNITION

Interest income

Interest income from short term deposits with licensed financial institutions is recognised based on effective interest rate method on an accrual basis.

Interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset except for financial assets that subsequently become credit impaired. For credit-impaired financial assets the effective interest rate is applied to the net carrying amount of the financial asset (after deduction of the loss allowance).

Realised gains and losses on sale of investments

For collective investment schemes ("CIS"), realised gains and losses on sale of investments are accounted for as the difference between the net disposal proceeds and the carrying amount of investments, determined on a weighted average cost basis.

C TRANSACTION COSTS

Transaction costs are costs incurred to acquire financial assets or liabilities at fair value through profit or loss. They include the bid-ask spread, fees and commissions paid to agents, advisors, brokers and dealers. Transaction costs, when incurred, are immediately recognised in the statement of comprehensive income as expenses.

D TAXATION

Current tax expense is determined according to the Malaysian tax laws at the current rate based upon the taxable profits earned during the financial period.

E FUNCTIONAL AND PRESENTATION CURRENCY

Items included in the financial statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates (the "functional currency"). The financial statements are presented in Ringgit Malaysia ("RM"), which is the Fund's functional and presentation currency.

AFFIN HWANG NEW CHINA TRACKER FUND

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 31 OCTOBER 2021 (CONTINUED)

F FINANCIAL ASSETS AND FINANCIAL LIABILITIES

(i) Classification

The Fund classifies its financial assets in the following measurement categories:

- those to be measured at fair value through profit or loss, and
- those to be measured at amortised cost.

The Fund classifies its investments based on both the Fund's business model for managing those financial assets and the contractual cash flow characteristics of the financial assets. The portfolio of financial assets is managed, and performance is evaluated on a fair value basis. The Fund is primarily focused on fair value information and uses that information to assess the assets' performance and to make decisions. The Fund has not taken the option to irrevocably designate any equity securities as fair value through other comprehensive income.

The contractual cash flows of the Fund's debt securities are solely principal and interest ("SPPI"). However, these securities are neither held for the purpose of collecting contractual cash flows nor held both for collecting contractual cash flows and for sale. The collection of contractual cash flows is only incidental to achieving the Fund's business model's objective. Consequently, all investments are measured at fair value through profit or loss.

Investment in CIS have contractual cash flows that do not represent SPPI, and therefore are classified as fair value through profit or loss.

The Fund classifies cash and cash equivalents and amount due from Manager as financial assets at amortised cost as these financial assets are held to collect contractual cash flows that represent SPPI.

The Fund classifies amount due to Manager and amount due to Trustee as financial liabilities measured at amortised cost.

(ii) Recognition and measurement

Regular purchases and sales of financial assets are recognised on the trade-date – the date on which the Fund commits to purchase or sell the asset. Investments are initially recognised at fair value. Transaction costs are expensed in the statement of comprehensive income.

Financial liabilities, within the scope of MFRS 9, are recognised in the statement of financial position when, and only when, the Fund becomes a party to the contractual provisions of the financial instrument.

Financial assets are derecognised when the rights to receive cash flows from the investments have expired or have been transferred and the Fund has transferred substantially all risks and rewards of ownership.

AFFIN HWANG NEW CHINA TRACKER FUND

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 31 OCTOBER 2021 (CONTINUED)

F FINANCIAL ASSETS AND FINANCIAL LIABILITIES (CONTINUED)

(ii) Recognition and measurement (continued)

Financial liabilities are derecognised when it is extinguished, i.e. when the obligation specified in the contract is discharged or cancelled or expired.

Gains or losses arising from changes in the fair value of the “financial assets at fair value through profit or loss” category is presented in the statement of comprehensive income within “net gain/(loss) on financial assets at fair value through profit or loss” in the period which they arise.

The fair value of financial assets traded in active markets (such as trading securities) are based on quoted market prices at the close of trading on the financial period end date. The Fund utilises the last traded market price for financial assets where the last traded price falls within the bid-ask spread. In circumstances where the last traded price is not within the bid-ask spread, the Manager will determine the point within the bid-ask spread that is most representative of the fair value.

If a valuation based on the market price does not represent the fair value of the securities, for example during abnormal market conditions or when no market price is available, including in the event of a suspension in the quotation of the securities for a period exceeding 14 days, or such shorter period as agreed by the Trustee, then the securities are valued as determined in good faith by the Manager, based on the methods or basis approved by the Trustee after appropriate technical consultation.

Financial assets at amortised cost and other financial liabilities are subsequently carried at amortised cost using the effective interest method.

(iii) Impairment

The Fund’s financial assets measured at amortised cost are subject to expected credit losses. The Fund measures credit risk and expected credit losses using probability of default, exposure at default and loss given default. Management considers both historical analysis and forward looking information in determining any expected credit loss. Management considers the probability of default to be close to zero as these instruments have a low risk of default and the counterparties have a strong capacity to meet their contractual obligations in the near term. As a result, no loss allowance has been recognised based on 12 month expected credit losses as any such impairment would be wholly insignificant to the Fund.

Significant increase in credit risk

A significant increase in credit risk is defined by management as any contractual payment which is more than 30 days past due.

AFFIN HWANG NEW CHINA TRACKER FUND

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 31 OCTOBER 2021 (CONTINUED)

F FINANCIAL ASSETS AND FINANCIAL LIABILITIES (CONTINUED)

(iii) Impairment (continued)

Definition of default and credit-impaired financial assets

The Fund defines a financial instrument as default, which is fully aligned with the definition of credit-impaired, when it meets one or more of the following criteria:

Quantitative criteria:

Any contractual payment which is more than 90 days past due is considered credit impaired.

Qualitative criteria:

The debtor meets unlikeliness to pay criteria, which indicates the debtor is in significant financial difficulty. The Fund considers the following instances:

- the debtor is in breach of financial covenants
- concessions have been made by the lender relating to the debtor's financial difficulty
- it is becoming probable that the debtor will enter bankruptcy or other financial reorganisation
- the debtor is insolvent

Financial instruments that are credit-impaired are assessed on individual basis.

Write-off

The Fund writes off financial assets, in whole or in part, when it has exhausted all practical recovery efforts and has concluded there is no reasonable expectation of recovery. The assessment of no reasonable expectation of recovery is based on unavailability of debtor's sources of income or assets to generate sufficient future cash flows to repay the amount.

The Fund may write-off financial assets that are still subject to enforcement activity. Subsequent recoveries of amounts previously written off will result in bad debt recoveries. There are no write-offs/recoveries during the financial period.

G CASH AND CASH EQUIVALENTS

For the purpose of statement of cash flows, cash and cash equivalents comprise cash and bank balances and deposits held in highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value.

AFFIN HWANG NEW CHINA TRACKER FUND

NOTES TO THE FINANCIAL STATEMENTS FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 31 OCTOBER 2021 (CONTINUED)

H UNITHOLDERS' CAPITAL

The unitholders' contributions to the Fund meet the criteria to be classified as equity instruments under MFRS 132 "Financial Instruments: Presentation". Those criteria include:

- the units entitle the holder to a proportionate share of the Fund's net assets value;
- the units are the most subordinated class and class features are identical;
- there is no contractual obligations to deliver cash or another financial asset other than the obligation on the Fund to repurchase; and
- the total expected cash flows from the units over its life are based substantially on the profit or loss of the Fund.

The outstanding units are carried at the redemption amount that is payable at each financial period if unitholder exercises the right to put the unit back to the Fund.

Units are created and cancelled at prices based on the Fund's net asset value per unit at the time of creation or cancellation. The Fund's net asset value per unit is calculated by dividing the net assets attributable to unitholders with the total number of outstanding units.

I CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS IN APPLYING ACCOUNTING POLICIES

The Fund makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, rarely equal the related actual results. To enhance the information contents on the estimates, certain key variables that are anticipated to have material impact to the Fund's results and financial position are tested for sensitivity to changes in the underlying parameters.

Estimates and judgments are continually evaluated by the Manager and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

However, the Manager is of the opinion that there are no accounting policies which require significant judgment to be exercised.

In undertaking any of the Fund's investment, the Manager will ensure that all assets of the Fund under management will be valued appropriately, that is at fair value and in compliance with the Securities Commission's ("SC") Guidelines on Unit Trust Funds.

J REALISED AND UNREALISED PORTIONS OF PROFIT OR LOSS AFTER TAX

The analysis of realised and unrealised profit or loss after tax as presented on the statement of comprehensive income is prepared in accordance with SC's Guidelines on Unit Trust Funds.

AFFIN HWANG NEW CHINA TRACKER FUND

NOTES TO THE UNAUDITED INTERIM FINANCIAL STATEMENTS FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 31 OCTOBER 2021

1 INFORMATION ON THE FUND

The Unit Trust Fund was constituted under the name Affin Hwang New China Tracker Fund (the “Fund”) pursuant to the execution of a Deed dated 15 May 2020 entered into between Affin Hwang Asset Management Berhad (the “Manager”) and TMF Trustees Malaysia Berhad (the “Trustee”).

The Fund commenced operations on 9 December 2020 and will continue its operations until terminated by the Trustee as provided under Section 12.3 of the Deed.

The Fund may invest in the following permitted investments:

- (i) Units/shares in a collective investment schemes;
- (ii) Money market instruments;
- (iii) Deposits;
- (iv) Derivatives; and
- (v) Any other investments permitted by the SC from time to time which is in line with the objective of the Fund

All investments will be subjected to the SC’s Guidelines on Unit Trust Funds, the Deed and the objective of the Fund.

The main objective of the Fund is to provide investors with investment results that closely correspond to the performance of the benchmark, S&P New China Sectors Ex A-Shares Index.

The Manager is a company incorporated in Malaysia. The principal activities of the Manager are establishment and management of unit trust funds, exchange-traded funds and private retirement schemes as well as providing fund management services to private clients.

The financial statements were authorised for issue by the Manager on 15 December 2021.

AFFIN HWANG NEW CHINA TRACKER FUND

NOTES TO THE UNAUDITED INTERIM FINANCIAL STATEMENTS FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 31 OCTOBER 2021 (CONTINUED)

2 FINANCIAL INSTRUMENTS, RISK MANAGEMENT OBJECTIVES AND POLICIES

Financial instruments of the Fund are as follows:

	<u>Note</u>	At amortised <u>cost</u> RM	At fair value through <u>profit or loss</u> RM	<u>Total</u> RM
<u>2021</u>				
<u>Financial assets</u>				
Cash and cash equivalents	9	1,535,805	-	1,535,805
Amount due from Manager				
- creation of units		14,725	-	14,725
- management fee rebate receivable		12,285	-	12,285
Collective investment schemes	8	-	29,624,592	29,624,592
Total		<u>1,562,815</u>	<u>29,624,592</u>	<u>31,187,407</u>
<u>Financial liabilities</u>				
Amount due to Manager				
- management fee		13,102	-	13,102
Amount due to Trustee		786	-	786
Total		<u>13,888</u>	<u>-</u>	<u>13,888</u>

The Fund is exposed to a variety of risks which include market risk (including price risk and interest rate risk), credit risk, liquidity risk and capital risk.

Financial risk management is carried out through internal control processes adopted by the Manager and adherence to the investment restrictions as stipulated by the SC's Guidelines on Unit Trust Funds.

Market risk

(a) Price risk

Price risk arises mainly from the uncertainty about future prices of investments. It represents the potential loss the Fund might suffer through holding market positions in the face of price movements. The Manager manages the risk of unfavourable changes in prices by continuous monitoring of the performance and risk profile of the investment portfolio.

AFFIN HWANG NEW CHINA TRACKER FUND

NOTES TO THE UNAUDITED INTERIM FINANCIAL STATEMENTS FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 31 OCTOBER 2021 (CONTINUED)

2 FINANCIAL INSTRUMENTS, RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

Market risk (continued)

(a) Price risk (continued)

The Fund's overall exposure to price risk are as follows:

	<u>2021</u> RM
Quoted investment	
Collective investment schemes	29,624,592

The following table summarises the sensitivity of the Fund's profit after taxation and net asset value to price risk movement. The analysis is based on the assumptions that the market price increased by 10% and decreased by 10% with all other variables held constant. This represents management's best estimate of a reasonable possible shift in the quoted securities.

The Fund's overall exposure to price risk was as follows:

<u>% Change in price</u>	<u>Market value</u> RM	<u>Impact on</u> <u>profit after</u> <u>tax/NAV</u> RM
<u>2021</u>		
-10%	26,662,133	(2,962,459)
0%	29,624,592	-
+10%	32,587,051	2,962,459

(b) Interest rate risk

Interest rate risk arises from the effects of fluctuations in the prevailing levels of market interest rates on the fair value of financial assets and liabilities and future cash flows.

The Fund's exposure to the interest rate risk is mainly confined to short term deposit placements with licensed financial institutions. The Manager overcomes this exposure by way of maintaining deposits on short term basis.

The Fund's exposure to interest rate risk associated with deposits with licensed financial institutions is not material as the deposits are held on a short term basis.

AFFIN HWANG NEW CHINA TRACKER FUND

NOTES TO THE UNAUDITED INTERIM FINANCIAL STATEMENTS FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 31 OCTOBER 2021 (CONTINUED)

2 FINANCIAL INSTRUMENTS, RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

Credit risk

Credit risk refers to the ability of an issuer or counterparty to make timely payments of interest, principals and proceeds from realisation of investments. The Manager manages the credit risk by undertaking credit evaluation to minimise such risk.

Credit risk arising from placements of deposits in licensed financial institutions is managed by ensuring that the Fund will only place deposits in reputable licensed financial institutions.

The settlement terms of the proceeds from the creation of units' receivable from the Manager are governed by the SC's Guidelines on Unit Trust Funds.

The following table sets out the credit risk concentrations of the Fund:

	Cash and cash equivalents RM	Amount due from Manager RM	Total RM
<u>2021</u>			
Financial services			
- AAA	1,535,805	-	1,535,805
Others			
- NR	-	27,010	27,010
	<u>1,535,805</u>	<u>27,010</u>	<u>1,562,815</u>

Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting its financial obligations. The Manager manages this risk by maintaining sufficient level of liquid assets to meet anticipated payments and cancellation of units by unitholders. Liquid assets comprise cash, deposits with licensed financial institutions and other instruments, which are capable of being converted into cash within 7 days.

The table below analyses the Fund's financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position date to the contractual maturity date.

AFFIN HWANG NEW CHINA TRACKER FUND

NOTES TO THE UNAUDITED INTERIM FINANCIAL STATEMENTS FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 31 OCTOBER 2021 (CONTINUED)

2 FINANCIAL INSTRUMENTS, RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

Liquidity risk (continued)

The amounts in the table below are the contractual undiscounted cash flows.

	<u>Within one month</u> RM	<u>Between one month to one year</u> RM	<u>Total</u> RM
<u>2021</u>			
Amount due to Manager			
- management fee	13,102	-	13,102
Amount due to Trustee	786	-	786
	<u>13,888</u>	<u>-</u>	<u>13,888</u>

Capital risk

The capital of the Fund is represented by equity consisting of unitholders' capital and net of accumulated losses. The amount of equity can change significantly on a daily basis as the Fund is subject to daily subscriptions and redemptions at the discretion of unitholders. The Fund's objective when managing capital is to safeguard the Fund's ability to continue as a going concern in order to provide returns for unitholders and benefits for other stakeholders and to maintain a strong capital base to support the development of the investment activities of the Fund.

3 FAIR VALUE ESTIMATION

Financial instruments comprise financial assets and financial liabilities. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value of financial assets traded in active markets (such as trading securities) is based on quoted market prices at the close of trading on the period end date. The Fund utilises the current bid price for financial assets which falls within the bid-ask spread.

An active market is a market in which transactions for the asset take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

The fair value of financial assets that are not traded in an active market is determined by using valuation techniques.

AFFIN HWANG NEW CHINA TRACKER FUND

NOTES TO THE UNAUDITED INTERIM FINANCIAL STATEMENTS FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 31 OCTOBER 2021 (CONTINUED)

3 FAIR VALUE ESTIMATION (CONTINUED)

i) Fair value hierarchy

The table below analyses financial instruments carried at fair value. The different levels have been defined as follows:

- Quoted prices (unadjusted) in active market for identical assets or liabilities (Level 1)
- Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2)
- Inputs for the asset and liability that are not based on observable market data (that is, unobservable inputs) (Level 3)

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgment, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgment by the Fund. The Fund considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary and provided by independent sources that are actively involved in the relevant market.

The following table analyses within the fair value hierarchy the Fund's financial assets (by class) measured at fair value:

	<u>Level 1</u> RM	<u>Level 2</u> RM	<u>Level 3</u> RM	<u>Total</u> RM
<u>2021</u>				
Financial asset at fair value through profit or loss				
- collective investment schemes	<u>29,624,592</u>	<u>-</u>	<u>-</u>	<u>29,624,592</u>

Investments whose values are based on quoted market prices in active markets, and are therefore classified within Level 1, include collective investment schemes. The Fund does not adjust the quoted prices for these instruments.

- ii) The carrying values of cash and cash equivalents, amount due from Manager and all current liabilities are a reasonable approximation of the fair values due to their short-term nature.

AFFIN HWANG NEW CHINA TRACKER FUND

NOTES TO THE UNAUDITED INTERIM FINANCIAL STATEMENTS FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 31 OCTOBER 2021 (CONTINUED)

4 MANAGEMENT FEE

In accordance with the Deed, the Manager is entitled to a management fee at a rate up to 5.00% per annum of the NAV of the Fund calculated on a daily basis.

For the 6 months financial period ended 31 October 2021, management fee is recognised at a rate of 0.50% per annum on the NAV of the Fund, calculated on a daily basis as stated in the Fund's Prospectus.

There will be no further liability to the Manager in respect of management fee other than the amounts recognised above.

5 TRUSTEE FEE

In accordance with the Deed, the Trustee is entitled to an annual fee, at a rate up to 0.10% per annum of the NAV of the Fund calculated on a daily basis (excluding foreign custodian fees and charges).

For the 6 months financial period ended 31 October 2021, the Trustee fee is recognised at a rate of 0.03% per annum on the NAV of the Fund calculated on a daily basis as stated in the Fund's Prospectus.

There will be no further liability to the Trustee in respect of Trustee fee other than the amount recognised above.

6 AUDITORS' REMUNERATION AND TAX AGENT'S FEE

For the 6 months financial period ended 31 October 2021, auditors' remuneration and tax agent's fee is borne by the Manager.

- unrealised loss on changes in fair value	(4,727,926)
- management fee rebate on collective investment schemes #	64,311
	<hr/>
	(4,663,615)

AFFIN HWANG NEW CHINA TRACKER FUND

NOTES TO THE UNAUDITED INTERIM FINANCIAL STATEMENTS FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 31 OCTOBER 2021 (CONTINUED)

8 FINANCIAL ASSETS AT FAIR VALUE THROUGH PROFIT OR LOSS (CONTINUED)

In arriving at the fair value of the Fund's investment in collective investment schemes, the management fee initially paid to the Manager of collective investment schemes have been considered as part of its net asset value. In order to prevent the double charging of management fee which is not permissible under SC's Guidelines, management fee charged on the Fund's investments in collective investment schemes have been refunded to the Fund. Accordingly, any rebate of management fee received from the Manager of collective investment schemes is reflected as an increase in the net asset value of the collective investment schemes.

(a) Collective investment schemes - local

(i) Collective investment schemes – local as at 31 October 2021 is as follows:

	<u>Quantity</u>	<u>Aggregate cost RM</u>	<u>Fair value RM</u>	<u>Percentage of NAV %</u>

13 MANAGEMENT EXPENSE RATIO (“MER”)

6 months
financial
period ended
31.10.2021
%

MER 0.27

MER is derived from the following calculation:

$$\text{MER} = \frac{(A + B + C) \times 100}{D}$$

- A = Management fee, excluding management fee rebates
- B = Trustee fee
- C = Other expenses, excluding sales and service tax on transaction costs
- D = Average NAV of Fund calculated on a daily basis

The average NAV of the Fund for the financial period calculated on a daily basis was RM27,530,694.

14 PORTFOLIO TURNOVER RATIO (“PTR”)

6 months
financial
period ended
31.10.2021

PTR (times) 0.26

PTR is derived from the following calculation:

$$\frac{(\text{Total acquisition for the financial period} + \text{total disposal for the financial period}) \div 2}{\text{Average NAV of the Fund for the financial period calculated on a daily basis}}$$

where: total acquisition for the financial period = RM14,292,667
total disposal (aggregate cost) for the financial period = RM Nil
