! YOU SHOULD NOT MAKE PAYMENT IN CASH TO A PRS CONSULTANT OR ISSUE A CHEQUE IN THE NAME OF A PRS CONSULTANT.

This Product Highlights Sheet only highlights the key features and risks of the PRS Scheme and PRS Funds. Investors are advised to request, read and understand the Scheme’s disclosure document before deciding to invest.

You should not contribute to the Scheme if you do not understand it or are not comfortable with the accompanying risks.

What is the AHAM Private Retirement Scheme?

The Scheme has been set up with the purpose of providing you with an avenue to facilitate an accumulation of wealth for your retirement needs. We have within our Scheme, a number of fund choices that can cater for your retirement needs and various risk tolerance levels. The funds under the Scheme have been carefully crafted out with the purpose of achieving long term optimum returns, through our stringent investment process with the emphasis of meeting the individual fund’s investment objective.

What are the benefits of contributing to the Scheme?

- An additional avenue to cater for your retirement needs.
- Empower you with the ability to decide on how your money is to be invested.
- Fees and charges have been kept to a minimum to optimize your retirement savings.
- Ability to invest and switch between Funds within this Scheme at no extra cost.
- Contributions will be allocated into the relevant Core Funds or Islamic Core Funds that corresponds to your age group, should you waive your right to select a fund.

How does the Scheme work?

We provide an array of funds under the Scheme to meet your retirement needs and varying risk tolerance levels. Our funds are divided into Core Funds and Islamic Core Funds. Please seek financial and/or professional advice when choosing Fund(s) which is most suitable for you.

Should you choose to waive your rights to select any of the PRS Funds within the Scheme, we will allocate your contribution into the relevant Core Fund that corresponds to your age group. By default, the allocation will be as follows:-

Member’s Age	Core Fund	Islamic Core Fund
Below forty five (45) years old	AHAM PRS Growth Fund	AHAM Aiiman PRS Shariah Growth Fund
Forty five (45) to below fifty five (55) years old	AHAM PRS Moderate Fund	AHAM Aiiman PRS Shariah Moderate Fund
Fifty five (55) years old and above	AHAM PRS Conservative Fund	AHAM Aiiman PRS Shariah Conservative Fund

Note: The current retirement age is fifty five (55) years old and it may change to any other compulsory age of retirement from employment as may be specified under any written law.

Cooling-off Right

You are also given the option to exercise your cooling-off right (of no more than six (6) business days from the date of receipt of the application by us) whereby you will be able to obtain a refund of your contribution in any of the funds under the Scheme. However, such right is only applicable to you if you are contributing in a private retirement scheme for the first time. Once you become a member of a private retirement scheme and have exercised your cooling-off right, the cooling-off right is not available for contributions in other private retirement schemes.

Note: This right is not applicable to a staff of that PRS Provider, or to a person registered with a body approved by the SC to deal in private retirement schemes.

Type of Accounts

In line with the Scheme's objective of promoting savings for your retirement needs, all contributions made into the Scheme will be segregated into 2 separate accounts –

- (a) 70% of the Units of each Fund in Sub-account A; and
- (b) 30% of the Units of each Fund in Sub-account B.

Sub-account A - Please note that withdrawal from this account is not permitted unless you meet any of the circumstances of withdrawal as mentioned below.

Sub-account B - Withdrawals at all times are only allowed to be made out of this account in respect of vested Units in any fund within a private retirement scheme after one (1) year from the first contribution (whether by Member or employer on behalf of its employee) with that private retirement scheme provider. Subsequent withdrawal is only permitted once every calendar year from the Provider or other private retirement scheme provider (from one or multiple funds under this Scheme or other private retirement schemes). However, please note that any withdrawal made prior to the retirement age will be subject to a **tax penalty of 8%** by the Inland Revenue Board of Malaysia on the withdrawal amount.

Note: Members who hold conditionally vested Units are not permitted to withdraw their Units. In this case, it would apply to contribution made by employer on behalf of the employee which may be subject to a Vesting Schedule. Withdrawal of Units can only be made when Units issued pursuant to such contributions are vested Units.

Circumstances of Withdrawal

You may request for withdrawals of your vested units under the following circumstances:

- (a) after the day you reach the Retirement Age, withdrawals may be made in part or in full;
- (b) prior to your Retirement Age, withdrawals from Sub-account B may be made in part or in full and shall be subject to a tax penalty;
- (c) following your death, withdrawals may be made in part or in full, and are subject to the authorisation of the PPA;
- (d) on your permanent departure from Malaysia, only full withdrawals may be made;
- (e) permanent total disablement, serious disease or mental disability, only full withdrawals may be made; or
- (f) for healthcare purpose, withdrawals from Sub-account B may be made in part or in full for a Member's own self or a Member's immediate family. Such withdrawals are only permitted for illnesses listed in the relevant schedule of the Guidelines; or
- (g) for housing purpose, withdrawals from Sub-account B may be made in part or in full provided that the Members has a minimum balance of RM500 in their Sub-account B.

Note: If you hold conditionally vested Units, you are not permitted to withdraw your Units. In this case, it would apply to contribution made by employer on behalf of the employee which may be subject to a Vesting Schedule.

Switching

You are permitted to switch from and to other funds within our Scheme at no cost and there will not be any limitation imposed on the frequency of switching or a minimum amount per switch.

Please note that switching from AHAM Aiiiman PRS Shariah Growth Fund, AHAM Aiiiman PRS Shariah Moderate Fund and AHAM Aiiiman PRS Shariah Conservative Fund to a conventional fund is discouraged for Muslim Members.

Transfer

Subject to transfer fee, you will have the option to transfer your contributions in the Funds under our Scheme to another private retirement scheme of another private retirement scheme provider once every calendar year provided you have been a member of our Scheme for at least one (1) year and the transfer of your contribution must be made to one (1) fund under another private retirement scheme of another private retirement scheme provider.

Note: If you hold conditionally vested Units, you are not permitted to transfer your Units. In this case, it would apply to contribution made by employer on behalf of the employee which may be subject to a Vesting Schedule.

Nomination

You may nominate any individual to receive the proceeds payable to you upon your death. You will be eligible to carry out the nomination if you are a Malaysian citizen or a foreigner with a permanent residence status in Malaysia.

A nomination may be made in favour of up to six (6) individuals with specification on the percentage (%) of the proceeds payable to each nominee. The nomination shall be deemed to apply to your account with us and any other private retirement scheme accounts you may have with other private retirement scheme providers.

What are the risks?

General Risks

- **Capital and returns not guaranteed risk** – Unlike deposits which generally provide a guarantee on capital invested and carry a specific rate of return, the Funds do not provide a guarantee on capital contributed nor does it guarantee a fixed rate of return.
- **Fund manager risk** – The performance of a Fund depends on the experience, expertise and ability of the Provider to generate returns. Lack of any of the above mentioned may adversely affect the performance of the Funds.
- **Market risk** – Market risk arises because of factors that affect the entire market place. Factors such as economic growth, political stability and social environment are some examples of conditions that have an impact on businesses, whether positive or negative.
- **Inflation risk** – The risk that Members’ investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce Members’ purchasing power even though the value of the investment in monetary terms has increased.
- **Liquidity risk** – Liquidity risk arises in two scenarios. The first scenario is where an investment cannot be sold due to the unavailability of a buyer for that investment. The second scenario exists where the investment, by its nature, is thinly traded. Liquidity risk will have the effect of causing the investment to be sold below its fair value which would adversely affect the NAV of the Fund and subsequently the value of Members’ investments in the Fund.
- **Risk associated with Default Option** – For Members who fail to exercise their right to select a Fund under the Core Funds/Islamic Core Funds, their contribution will, by default, be invested into a Core Fund/Islamic Core Fund (i.e. Default Option) based on the age group the Members fall within. As Members progress to the next age group, their current investments will be switched by default to the investments of the next age group. At the point of switching, the Unit price may be lower than the price Members paid when they contributed into the Core Fund/Islamic Core Fund, and as such Members may be faced with the likelihood of having to realise losses. Members should note that the Provider will notify them in writing a month before they reach the maximum age of a particular age group. As such, this risk can be avoided if Members elect to stay on with that particular Core Fund/Islamic Core Fund before their investments are switched.
- **Risk of non-compliance** – The establishment of this Scheme follows rules set out in the Deed and the Guidelines. There is a risk that the Provider may not observe the rules whether intentionally or through inadvertence. Whilst not every non-observance of the rules governing the Funds will necessarily result in some losses to the Funds, you cannot discount the risk that losses may be suffered by the Funds if the non-observance of the rules is serious.
- **Operational risk** – This risk refers to the possibility of a breakdown in the Provider’s internal controls and policies. Whilst this risk may not necessarily cause monetary loss to the Funds, it will most certainly cause inconvenience to Members.
- **Legal and regulatory risk** - The investments of the Fund would be exposed to changes in the laws and regulations in the countries in which the Fund is invested. The Scheme is also exposed to changes in law and guidelines relating to private retirement schemes, which may amongst others, affect the Member’s PRS account and/or his/her ability to access his/her balance in the account.
- **Suspension of repurchase request risk** – Having considered the best interests of Members, the withdrawal requests by the Members may be subject to suspension due to exceptional circumstances or any other circumstances as may be determined by the Provider, where there is good and sufficient reason to do so. In such case, Members will not be able to withdraw their Units and will be compelled to remain invested in the Fund for a longer period of time. Hence, their investments will continue to be subject to the risks inherent to the Fund.

Specific Risks for the Core Funds

- **Equity investment risk** - The buying and selling of equities carry a number of risks, the most important being the volatility of the capital markets on which those securities are traded and the general insolvency risk associated with the issuers of equities. The value of an equity investment depends on its earnings potential, sound management, treatment of minority shareholders, as well as a myriad of other factors. Failure to achieve the expected earnings would result in declining investment value which in turn affects the performance of the Fund. The Provider will employ stringent stock selection criteria where the Provider will select equities that will potentially increase in value.
 - **Credit or default risk** - The risk arises when the issuers or Financial Institution of the permitted investments do not make timely payment of profit and/or principal amount. This may lead to default in the payment of profit and/or principal amount and ultimately the value of the Fund may be adversely affected. The management of credit risk is largely accounted for by the Provider's management of issuer or Financial Institution specific risk. This refers to the emphasis on credit analysis conducted to determine the issuer's or the Financial Institution's ability to pay the promised payments. As the Fund may also invest in fixed income instruments that are unrated and rated below the BBB3 / P2 ratings by RAM or equivalent rating by other credit rating agencies, this will imply a higher credit risk.
 - **Interest rate risk** - This risk refers to the impact of interest rate changes on the valuation of money market instruments. Generally, movement in interest rates affects the prices of money market instruments inversely. For example, when interest rates rise, prices of money market instruments will fall. The fluctuations of the prices of money market instruments will also have an impact on the NAV of the Fund. This risk can largely be eliminated by holding money market instruments until their maturity. We also manage interest rate risk by considering each money market instruments' sensitivity to interest rate changes. When interest rates are expected to increase, the Fund would then likely seek to switch to money market instruments that are less sensitive to interest rate changes. For investments in deposits, the fluctuations in the interest rates will not affect the placement of deposits but will result in the opportunity loss by the Fund if the placement of deposits is made at lower interest rate.
 - **Collective investment scheme risk** - As the Funds are allowed to invest in collective investment schemes, any adverse effect on the respective collective investment schemes managed by the Provider will impact the NAV of the Funds. For example, the respective collective investment schemes may under-perform its benchmarks due to poor market conditions and as a result, the NAV of the Funds will be adversely affected as the performance of the Funds are dependent on the performance of the respective collective investment schemes.
 - **Embedded derivatives risk** (*only applicable to AHAM PRS Growth Fund and AHAM PRS Moderate Fund*) - Embedded derivatives would include but are not limited to equity-linked instruments. Investments in embedded derivatives can provide the Fund with the exposure to underlying assets in certain countries which restrict foreign direct investment into its capital market. Embedded derivatives referenced to underlying securities or indices, are subject to both counterparty risk and the inherent risk of the underlying investment. The pricing of embedded derivatives will depend on the growth and performance of the underlying equities, which would consequentially affect the pricing of the embedded derivatives. The NAV of the Fund may also be impacted by the valuation of the embedded derivatives. Factors that may impact the valuation of the embedded derivatives will include, but are not to be limited to movement of the underlying asset, volatility of the underlying assets, interest rate levels, the correlation of the underlying assets, the implied future direction of the price of the underlying assets and other such factors. Any change in the aforesaid factors would either positively or negatively impact the valuation of the embedded derivatives. If, in the opinion of the Provider, there is material adverse change to the pricing and valuation of the underlying equities, the Provider may consider unwinding the embedded derivatives to mitigate potential losses that may arise.
- Counterparty risk** - Counterparty risk is the risk associated with the ongoing ability and willingness of the issuers to embedded derivatives* and derivatives ("investments") to fulfil their respective financial commitments to the Fund in a timely manner. Bankruptcy, fraud or regulatory non-compliance arising out of and/or in connection with the issuers may impair the operations and/or the performance of the Fund. However, we will conduct stringent credit selection process of the issuers of the investments prior to commencement of investments and monitoring mechanisms established by us may potentially mitigate this risk. If, we are of the opinion there is material adverse change to an issuer, we may consider unwinding the issuer's investment to mitigate potential losses that may arise.* Not applicable to AHAM PRS Conservative Fund as the Fund does not invest in embedded derivatives.
- **Currency risk** - Currency risk is also known as foreign exchange risk. It is a risk associated with investments denominated in foreign currencies. When the foreign currencies fluctuate unfavourably against Ringgit Malaysia, this will result in the value of the Funds' investment to depreciate which will in turn affect the Members' investments in the Funds.
 - **Country risk** - The foreign investment of a Fund may be affected by risks specific to the country in which it invests. Such risks, which include changes in a country's economic fundamentals, social and political stability, currency movements and foreign investment policies, may have an impact on the prices of the Fund's investment in that country. Consequently, it may also affect the Fund's NAV.
 - **Derivatives risk** (*only applicable to AHAM PRS Growth Fund and AHAM PRS Moderate Fund*) - The Provider may use derivatives for investment purposes. Valuation of derivatives takes into account a multitude of factors such as price of the underlying assets, volatility of underlying assets, interest rate levels, the correlation between the underlying assets and the derivatives, the implied future direction of the underlying assets and other factors. Any adverse changes in the factors mentioned above may result in a lower NAV and higher volatility for the Funds' NAV.
 - **Related party transaction risk** - The Fund may invest in collective investment schemes managed by AHAM and may also have dealings with parties related to AHAM. Nevertheless, it is our policy that all transactions with related parties are to be executed on terms which are best available to the Fund and which are not less favourable to the Fund than an arms-length transaction between independent parties.

Specific Risks for the Islamic Core Funds

- **Shariah-compliant equity investment risk** - The buying and selling of Shariah-compliant equities carry a number of risks, the most important being the volatility of the capital markets on which those securities are traded and the general insolvency risk associated with the issuers of the Shariah-compliant equities. The value of an equity investment depends on its earnings potential, sound management, treatment of minority shareholders, as well as a myriad of other factors. Failure to achieve the expected earnings would result in declining investment value which in turn affects the performance of the Fund. The Provider will employ stringent stock selection criteria where the Provider will select equities that will potentially increase in value.
- **Shariah-compliant equity-linked instruments investment risk** (*only applicable to AHAM Aiiiman PRS Shariah Growth Fund and AHAM Aiiiman PRS Shariah Moderate Fund*) - Shariah-compliant equity-linked instruments would include but are not limited to Shariah-compliant equity-linked notes. Investments in Shariah-compliant equity-linked instruments can provide the Fund with the exposure to underlying assets in certain countries which restrict foreign direct investment into its equity market. Shariah-compliant equity-linked instruments referenced to underlying securities or indices, are subject to both counterparty risk (see “Counterparty risk” below) and the inherent risk of the underlying investment. The pricing of Shariah-compliant equity-linked instruments will depend on the growth and performance of the underlying equities (see also “Shariah-compliant equity investment risk” above), which would consequentially affect the pricing of the Shariah-compliant equity-linked instruments. The NAV of the Fund may also be impacted by the valuation of the Shariah-compliant equity-linked instruments. Factors that may impact the valuation of the Shariah-compliant equity-linked instruments include, but are not limited to movement of the underlying asset, volatility of the underlying assets, profit rate levels, the correlation of the underlying assets, the implied future direction of the price of the underlying assets and other such factors. Any change in the aforesaid factors would either positively or negatively impact the valuation of the Shariah-compliant equity-linked instruments. If, in the opinion of the Provider, there is material adverse change to the pricing and valuation of the underlying Shariah-compliant equities, the Provider may consider unwinding the Shariah-compliant equity-linked instruments to mitigate potential losses that may arise.
- **Counterparty risk** - Counterparty risk is the risk associated with the ongoing ability and willingness of the issuers of the Shariah compliant equity-linked instruments* and Islamic derivatives (“investments”) to fulfil their respective financial commitments to the Fund in a timely manner. Bankruptcy, fraud or regulatory non-compliance arising out of and/or in connection with the issuers may impair the operations and/or the performance of the Fund. We will conduct stringent credit selection process of the issuers of the investments prior to commencement of investments and monitoring mechanisms established by us may potentially mitigate this risk. If, we are of the opinion there is material adverse change to an issuer, we may consider unwinding the issuer’s investments to mitigate potential losses that may arise.
 - * Not applicable to AHAM Aiiiman PRS Shariah Conservative Fund as the Fund does not invest in Shariah compliant equity-linked instruments.
- **Credit or default risk** - The risk arises when the issuers or Financial Institution of the permitted investments do not make timely payment of profit and/or principal amount. This may lead to default in the payment of profit and/or principal amount and ultimately the value of the Fund may be adversely affected. The management of credit risk is largely accounted for by the Provider’s management of issuer or Financial Institution specific risk. This refers to the emphasis on credit analysis conducted to determine the issuer’s or Financial Institution’s ability to pay the promised payments.
- **Profit rate risk** - Sukuk and Islamic money market instruments are subject to profit rate fluctuations. Generally, movement in profit rates affects the prices of Sukuk and Islamic money market instruments inversely. For example, when profit rates rise, prices of Sukuk and Islamic money market instruments will fall. The fluctuations of the prices of Sukuk and Islamic money market instruments will also have an impact on the NAV of the Fund. This risk can largely be eliminated by holding the Sukuk and Islamic money market instruments until their maturity. We also manage profit rate risk by considering each Sukuk’s and Islamic money market instruments’ sensitivity to profit rate changes. When profit rates are expected to increase, the Fund would then likely seek to switch to Sukuk and Islamic money market instruments that are less sensitive to profit rate changes. For investments into Islamic deposits, the fluctuations in the profit rates will not affect the placement of Islamic deposits but will result in the opportunity loss by the Fund if the placement of Islamic deposits is made at lower profit rates.
- **Islamic collective investment scheme risk** - As the Funds are allowed to invest in Islamic collective investment schemes, any adverse effect on the Islamic collective investment schemes managed by the Provider will impact the NAV of the Fund. For example, the Islamic collective investment schemes may under-perform its benchmarks due to poor market conditions and as a result, the NAV of the Fund will be adversely affected as the performance of the Fund is dependent on the performance of the Islamic collective investment schemes. In addition, any mismanagement of the collective investment schemes or poor decisions taken by the target fund manager may adversely affect the NAV of the collective investment schemes and hence, the Fund.
- **Currency risk** - Currency risk is also known as foreign exchange risk. It is a risk associated with investments denominated in foreign currencies. When the foreign currencies fluctuate unfavourably against Ringgit Malaysia, this will result in the value of the Funds’ investment to depreciate which will in turn affect the Members’ investments in the Fund.
- **Country risk** - The foreign investments of the Fund may be affected by risks specific to the country in which it invests in. Such risks, which include changes in a country’s economic fundamentals, social and political stability, currency movements and foreign investment policies, may have an impact on the prices of the Funds’ investments in such countries. Consequently, it may also affect the Funds’ NAV.
- **Reclassification of Shariah status risk** - With reference to “Shariah Investment Guidelines” section on page 37 of the Disclosure Document, this risk refers to the risk that the currently held Shariah-compliant securities by the Fund may be reclassified to be Shariah non-compliant in the periodic review of the securities by the SAC of the SC or the Shariah Adviser. If this occurs, then the value of the Fund may be adversely affected as the investments will be disposed of at cost, discounting any unrealised gains prior to the sale. The Provider will take the necessary steps to dispose of such securities in accordance with the advice from the Shariah Adviser.

- **Related party transaction risk** - The Fund may invest in Islamic collective investment schemes managed by AHAM and may also have dealings with parties related to AHAM. Nevertheless, it is our policy that all transactions with related parties are to be executed on terms which are best available to the Fund and which are not less favourable to the Fund than an arms-length transaction between independent parties.

Please refer to “Risk Factors” chapter of the Disclosure Document on further detail of each risk.

It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are recommended to read the Disclosure Document to assess risks associated to the Funds. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.
