INVESTMENT OBJECTIVE

The Fund aims to provide investors with a steady income stream by investing in Sukuk, Islamic money market instruments and/or Islamic deposits.

Any material change to the Fund's investment objective would require Unit Holders' approval.

PERFORMANCE BENCHMARK

Maybank 1-month General Investment Account (GIA-i) rate.

The risk profile of this Fund is different from the risk profile of the performance benchmark.

ASSET ALLOCATION

Sukuk, Islamic money market instruments and/or Islamic deposits	Minimum of 70% of the Fund's NAV
Cash	Maximum of 30% of the Fund's NAV

INVESTMENT STRATEGY

The Manager will endeavour to achieve the Fund's objective by investing a minimum of 70% of the Fund's NAV in Sukuk, Islamic money market instruments and/or Islamic deposits and a maximum of 30% of the Fund's NAV in cash.

The portfolio will comprise of Sukuk and issuances guaranteed by the Government of Malaysia. These instruments may include but are not limited to Government Investment Issues, Malaysian Islamic Treasury Bills, Bank Negara Monetary Notes-i and government guaranteed ("GG") sukuk.

The Manager will employ an active investment management strategy to provide regular income to investors and to maintain a sufficient level of liquidity to meet cash flows requirements. The Manager will add value primarily by employing active asset allocation, duration and yield curve strategy, taking into consideration the fundamentals of the Malaysian economic and interest outlook, valuation of the underlying Sukuk and technical analysis of the domestic government and GG sukuk market.

The Fund will invest in Sukuk with remaining time to maturity of not more than five and a half (5.5) years at the time of investment. In terms of duration, the Fund shall have a maximum weighted portfolio duration of three (3) years.

The Fund will be managed primarily to provide regular income, while at the same time preserving capital¹ and maintaining a sufficient level of liquidity in order to meet cash flow requirements. We believe that an important way to accomplish this is by analysing various factors such as the current and anticipated changes in interest rates, economic statistics, yield curve changes and other general market conditions that could affect Islamic money market instruments and Islamic deposits.

¹The Fund is neither a capital guaranteed nor a capital protected fund.

The Manager may hold more than 30% of the Fund's NAV in cash under circumstances such as:

- (i) large injection of cash by investors into the Fund;
- (ii) sale of investment holdings of the Fund; and
- (iii) any other circumstances that are in line with the Fund's objective.

In the event the Fund's cash level exceeds 30% due to the above circumstances, the Manager will, on best effort basis, ensure that the cash level is to be reduced to 30% within five (5) consecutive Business Days.

There will be no foreign investments for this Fund. The Fund will also have the flexibility to invest in Islamic collective investment schemes that are relevant and consistent with the Fund's investment objective.

Temporary Defensive Measure

We hold the option to take temporary defensive positions that may be inconsistent with the Fund's principal strategy and asset allocation to protect the Fund against adverse market conditions that may impact the Fund's capital.

Cross Trades

We may conduct cross trades between funds which we are currently managing provided that all criteria imposed by the regulators are met. Notwithstanding the above, cross trades between the personal account of our employee and the Fund's account(s); and between our proprietary trading accounts and the Fund's account(s) are strictly prohibited. Compliance with the criteria would be monitored by our compliance unit and reported to our compliance and risk management committee to avoid conflict of interests and manipulation that could have a negative impact on the investors.

However, a 5% allowance in excess of any limits or restrictions may be permitted where the limit or restriction is breached through the appreciation or depreciation of the NAV of the Fund (whether as a result of an appreciation or depreciation in value of the Shariah-compliant investments, or as a result of repurchase of Units or payment made from the Fund). The Manager will not make any further acquisitions to which the relevant limit is breached and the Manager, within three (3) months from the date of the breach, will take all necessary steps and actions to rectify the breach.

The said investment will be disposed of or withdrawn with immediate effect or within a month of knowing the status of the investment. In the event of the investment resulted in gain (through capital gain, dividend, and/or profit) received before or after the disposal of the investment, the gain is to be channelled to baitulmal and/or any other charitable bodies as advised by the Shariah Adviser. VALUATION OF ASSETS

We will ensure that the valuation of the Fund is carried out in a fair manner in accordance to the relevant laws and Guidelines. We will obtain the daily price or value of the assets for the purpose of valuing the Fund in accordance to the Malaysian Financial Reporting Standard 9 issued by the Malaysian Accounting Standards Board. In the absence of daily price or value of the assets, we will use the latest available price or value of the assets respectively.

➤ **Sukuk**

For unlisted MYR denominated Sukuk, valuation will be done using the price quoted by a bond pricing agency (“BPA”) registered with the SC. For listed Sukuk, valuation will be based on the closing price or last known transacted price on the eligible market on which the investment is quoted. If the price is not representative of its fair value or is not available to the market, including in the event of suspension in the quotation of the listed Sukuk for a period exceeding 14 days, or such shorter period as agreed by the Trustee, such listed Sukuk will be valued at fair value determined in good faith by the Manager or its delegate, based on the methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

UNDERSTANDING THE RISKS OF THE FUND

Below are the risks associated with the investments of the Fund that you should consider before investing.

GENERAL RISKS OF THE FUND	
Market risk	Market risk arises because of factors that affect the entire market place. Factors such as economic growth, political stability and social environment are some examples of conditions that have an impact on businesses, whether positive or negative. It stems from the fact that there are economy-wide perils, or instances of political or social instability which threaten all businesses. Hence, the Fund will be exposed to market uncertainties and fluctuations in the economic, political and social environment that will affect the market price of the investments either in a positive or negative way.
Fund management risk	This risk refers to the day-to-day management of the Fund by us which will impact the performance of the Fund. For example, investment decisions undertaken by us as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error, fraud, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.
Liquidity risk	Liquidity risk refers to two scenarios. The first scenario is where an investment cannot be sold due to the unavailability of a buyer for that investment. The second scenario exists where the investment, by its nature, is thinly traded. This will have the effect of causing the investment to be sold below its fair value which would adversely affect the NAV of the Fund and subsequently the value of Unit Holders' investments in the Fund. Upon such event and in the best interest of the Unit Holders, the Manager may suspend the repurchase of Units requests. Please refer to " <i>Suspension of Dealing in Units</i> " section of this Information Memorandum for more details.
Performance risk	The performance of the Fund depends on the financial instruments that the Fund purchases. If the instruments do not perform within expectation or if there is a default, then, the performance of the Fund will be impacted negatively. The performance of the Fund may also be impacted if the allocation of assets is not properly done. This is where the experience and expertise of the fund managers are important and the risk on the lack of experience and expertise of the fund managers has been highlighted above. On that basis, there is never a guarantee that investing in the Fund will produce the desired investment returns or distribution of income.
Inflation risk	This is the risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
Operational risk	This risk refers to the possibility of a breakdown in the Manager's internal controls and policies. The breakdown may be a result of human error, system failure or fraud where employees of the Manager collude with one another. This risk may cause monetary loss and/or inconvenience to you. The Manager will review its internal policies and system capability to mitigate instances of this risk. Additionally, the Manager maintains a strict segregation of duties to mitigate instances of fraudulent practices amongst employees of the Manager.
Related party transaction risk	The Fund may invest in AIIMAN's Islamic collective investment schemes and may also have dealings with parties related to AIIMAN. Nevertheless, it is our policy that all transactions with related parties are to be executed on terms which are best available to the Fund and which are not less favourable to the Fund than an arm's length transaction between independent parties.

Suspension of repurchase request risk	Having considered the best interests of Unit Holders, the repurchase requests by the Unit Holders may be subject to suspension due to exceptional circumstances, where the market value or fair value of a material portion of the Fund's assets cannot be determined, or such other circumstances as may be determined by the Manager, where there is good and sufficient reason to do so. In such case, Unit Holders will not be able to redeem their Units and will be compelled to remain invested in the Fund for a longer period of time. Hence, their investments will continue to be subject to the risks inherent to the Fund.
--	---

SPECIFIC RISKS OF THE FUND	
Sukuk investment risk	The buying and selling of Sukuk carry a number of risks, the most important being the volatility of the debt capital markets on which those Sukuk are traded and the general credit risk associated with the issuers of Sukuk. Price changes in Sukuk are influenced predominantly by interest rate developments in the capital markets, which in turn are influenced by macro-economic factors. As a result, the Fund's portfolio performance may be affected by significant changes of such factors. In managing Sukuk investment risk, the Manager will actively monitor the market developments and may make the necessary adjustments to the portfolio should the need arises. The price changes also depend on the term or residual time to maturity of the Sukuk. In general, Sukuk with shorter terms have less price risks than Sukuk with longer terms.
Credit and default risk	Credit risk relates to the creditworthiness of the issuers of the Sukuk and Islamic money markets instruments and the Financial Institutions where the Islamic deposits are placed (hereinafter referred to as "investment") and their expected ability to make timely payment of profit and/or principal. Any adverse situations faced by the issuer and/or Financial Institution may impact the value as well as liquidity of the investment. In the case of rated investments, this may lead to a credit downgrade. Default risk relates to the risk of an issuer and/or a Financial Institution of the investment either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the investment. This could adversely affect the value of the Fund.
Profit rate risk	This risk refers to the impact of profit rate changes on the valuation of the Sukuk and Islamic money market instruments (hereinafter referred to as "investment"). Generally, movement in profit rates affects the prices of investment inversely, for example, when profit rates rise, prices of investment will fall. The fluctuations of the prices of the investment will also have an impact on the NAV of the Fund. This risk can largely be eliminated by holding the investment until their maturity. We also manage profit rate risk by considering each investment's sensitivity to profit rate changes. When profit rates are expected to increase, the Fund would then likely seek to switch to investment that are less sensitive to profit rate changes. For investments in Islamic deposits, the fluctuations in the profit rates will not affect the placement of Islamic deposits but will result in the opportunity loss by the Fund if the placement of Islamic deposits is made at lower profit rate.
Reinvestment risk	This risk arises when coupons from the Sukuk are not reinvested at the prevailing profit rate when the investment was initially made. The risk is more likely to take place during a declining profit rate and may impact the yield-to-maturity of the investments which is calculated based on the assumption that all coupon payments made by the investments are reinvested at the same profit rate when the investments were first made. The Manager will mitigate this risk by closely monitoring the profit rate movements and take measures which will not be limited to reduce the Fund's exposure into such investments.

SPECIFIC RISKS OF THE FUND	
Shariah non-compliance risk	As the Fund can only invest in Shariah-compliant securities, there is always a risk that losses may be suffered by the Fund when the Manager is forced to dispose investments to rectify any Shariah non-compliance. This risk is mitigated through the appointment of Shariah Adviser, who will be responsible to ensure that the Fund is managed and administered in accordance with Shariah requirements.
Distribution out of capital risk	The Fund may distribute income out of capital. Such capital distributions represent a return or withdrawal of part of the amount of your original investment and/or capital gains attributable to the original investment and will result in a reduction in the NAV per Unit of the Fund and reduce the capital available for future investment and capital growth. Future capital growth may therefore be constrained.

! It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are recommended to read the whole Information Memorandum to assess the risks associated with the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.

- You will be refunded within ten (10) Business Days from our receipt of the cooling-off application.

CAN I TRANSFER MY UNITS TO ANOTHER PERSON?

- You are allowed to transfer your Units, whether fully or partially, to another person by completing the transfer transaction form and returning it to us on a Business Day. The transfer must be made in terms of Units and not in terms of MYR value. There is no minimum amount of Units required to effect a transfer except that the transferor and transferee must hold the minimum holding of Units to remain as a Unit Holder of the Fund.

Please note that the person who is in receipt of the Units must be a Sophisticated Investor as well.

DISTRIBUTION POLICY

- Subject to the availability of income, the Fund will make distribution to the Unit Holders on quarterly basis. However, the amount of income available for distribution may fluctuate from year to year.

At our discretion, the Fund may distribute (1) realised income, (2) realised capital gains (3) unrealised income, (4) unrealised capital gains, (5) capital or (6) a combination of any of the above. The rationale for distribution out of capital is to allow the Fund the ability to distribute income on a regular basis in accordance with the income distribution policy of the Fund.

Having the option to tap into the additional sources of income from (3) unrealised income, (4) unrealised capital gains and/or (5) capital (collectively known as “distribution out of capital”) would give the Manager the flexibility to increase the amount of income distributable to Unit Holders after taking the distribution out of capital risk into consideration.

Distribution out of capital has a risk of eroding the capital of the Fund. Payment of distribution out of capital amounts to a return or withdrawal of part of an investor’s original investment or from any capital gains attributable to that original investment. Any distribution involving any payment out of capital of the Fund will result in an immediate reduction of the NAV per Unit. As a result, the value of future returns would be diminished.

- You may elect the mode of distribution in cash payment or additional Units (by way of reinvestment) by ticking the appropriate column in the application form. You may also inform us at any time before the income distribution date of your wish of receiving cash payment or additional Units via reinvestment. All distribution will be automatically reinvested into additional Units in the Fund if you do not elect the mode of distribution in the application form.

Any distribution payable which is less than or equal to the amount of MYR 300.00 would be automatically reinvested.

Notwithstanding the above, we may also reinvest the distribution proceeds which remain unclaimed after twelve (12) months from the date of payment, provided that you still have an account with us.

Cash Payment Process

Income distribution by way of cash payment will be paid via telegraphic transfer. Income will be transferred to your bank account within seven (7) Business Days after the distribution date.

Reinvestment Process

We will create the Units based on the NAV per Unit at the income payment date which is within two (2) Business Days after the distribution date. There will not be any cost for reinvestments of those additional Units, i.e. no Sales Charge will be imposed on such reinvestment.

SUSPENSION OF DEALING IN UNITS

The Manager may, in consultation with the Trustee and having considered the interests of the Unit Holders, suspend the dealing in Units due to exceptional circumstances, or such other circumstances as may be determined by the Manager, where there is good and sufficient reason to do so. The Manager will cease the suspension as soon as practicable after the exceptional circumstances have ceased, and in any event, within twenty-one (21) days from the commencement of suspension.

The period of suspension may be extended if the Manager satisfies the Trustee that it is in the best interest of the Unit Holders for the dealing in Units to remain suspended, subject to a weekly review by the Trustee.

The Trustee may suspend the dealing in Units, if the Trustee, on its own accord, considers that exceptional circumstances have been triggered. In such a case, the Trustee shall immediately call for a Unit Holders’ meeting to decide on the next course of action.
