Investment Strategy	<p>To meet the Fund's objective, the Fund will adopt a tactical asset allocation strategy depending on the prevailing market conditions. The Fund will have the flexibility to invest in a diversified range of investment instruments such as equities and equity-linked instruments, fixed income instruments such as debentures, money market instruments and/or deposits with Financial Institutions. Additionally, the Fund will also have the option to invest in collective investment schemes, embedded derivatives and derivatives. At any one time, the asset mix may comprise of one or all asset classes.</p> <p>To meet its objective, the Fund will invest primarily in equities and equity-linked instruments such as warrants issued by companies. For the purpose of diversification, the investment strategy of the Fund would be unconstrained by any country, market capitalisation or sector. Notwithstanding this, the Fund will only invest in foreign markets which are eligible markets. In our aim to maximize the Fund's growth potential, we will also have the option to invest into unlisted securities where those companies are likely to develop into future industry leaders. We will dedicate resources through primary research including company visits and developing earnings models, in search of these companies.</p> <p>In our equity selection process, we seek to identify companies that we believe are attractively valued relative to long-term growth that these companies can achieve. These companies will be identified through internal research, and by subjecting them to a disciplined set of growth, valuation and quality criteria. Criteria that are looked at during the investment selection process include sales and profit growth, financial strength and gearing levels, capital expenditure levels, as well as the management's commitment to rewarding shareholders via dividends or capital repayments.</p> <p>When selecting fixed income instruments, the selection will depend largely on its credit quality of the issuers, as well as criteria such as the ability to meet their financial obligations, displays healthy cash flow, the collateral type, value, claims priority, as well as issuances that offer highest safety for timely payment of interest and capital.</p>												

Classes	USD Class	MYR Class	SGD Class
	<p>The asset allocation decision between equities and fixed income instruments is decided based on the consideration of the market outlooks for the respective asset classes over the medium to long-term horizon. Under normal market conditions, we will likely have a higher exposure to the equity market to capitalise on growth potential. However, we may reduce the equity exposure of the Fund when the risk reward environment turns less attractive, and thus increasing the Fund's exposure to the fixed income market instead.</p> <p>The Fund may also invest in collective investment schemes that have a similar investment objective to the Fund. These instruments may include, but not limited to real estate investment trusts, exchange-traded funds and mutual funds including mutual funds managed by us. In this instance, we will ensure that there will be no improper use of our position in managing the Fund to gain, directly or indirectly, any advantage or to cause detriment to your interest, and investments into the said instruments will be done in the best interest of the Fund.</p> <p>Due to the fast-paced market environment, we will also have the option to invest in money market instruments and deposits with Financial Institutions while waiting for investment opportunities to arise in equities or fixed income markets. The selection of the issuers will depend largely on the credit quality and liquidity of the issuer based on our internal credit rating model.</p> <p><b>Derivatives</b></p> <p>Derivatives trades may be carried out for both investments and hedging purposes through financial instruments including, but not limited to, forward contracts, futures contracts and swaps. Futures and forward contracts are generally contracts between two parties to trade an asset at an agreed price on a pre-determined future date whereas swaps is an agreement to swap or exchange two financial instruments between two parties.</p> <p>The intention of hedging is to preserve the value of the assets from any adverse price movements. For example, to hedge against foreign currency exchange risk, the Fund may enter into a currency forward contract to offset any adverse foreign currency movements by determining an agreed rate for an agreed tenure with its counterparty. While the hedging transactions will assist with mitigating the potential foreign exchange losses by the Fund, any potential foreign exchange gains from the hedging strategy will be capped as well.</p> <p><b>Embedded Derivatives</b></p> <p>We may also invest into embedded derivatives such as, but not limited to, equity-linked notes and credit linked notes. Investment into these embedded derivatives will provide the Fund with the exposure to the reference asset. Each of these embedded derivatives has its own targeted maturity and will expose investors to the price fluctuations of, in the case of an equity-linked note, the stock that the equity-linked note is linked to. As a result, any fluctuation in the price of the embedded derivatives may also lead to fluctuations in the NAV of the Fund i.e. if the price of the embedded derivatives drops, the NAV of the Fund will also be negatively impacted. As the note is structured by an external party, investments into an embedded derivative will also expose the Fund to counterparty risk, which we will attempt to mitigate by carrying out a stringent selection process on its counterparty prior to an investment being made.</p>		
<b>Distribution Policy</b>	The Fund is not expected to make distribution. However, incidental distribution may be declared whenever is appropriate.		
<b>Minimum Initial Investment*</b>	USD 30,000	MYR 100,000	SGD 30,000
<b>Minimum Additional Investment*</b>	USD 10,000	MYR 50,000	SGD 10,000
<b>Minimum Holding of Units*</b>	30,000 Units	100,000 Units	30,000 Units
	If the balance of your investment (i.e. total number of Units) is less than the minimum holding of Units, you will be required to make an additional investment in order to meet the required minimum balance of investment. Otherwise, we may withdraw all your holding of Units in the Fund and pay the proceeds to you.		
<b>Minimum Units Per Switch*</b>	30,000 Units	100,000 Units	30,000 Units

**Note: Please refer to the Information Memorandum for further details of the Fund.**

\* At our discretion, we may reduce the minimum initial investment, minimum additional investment, minimum holding of Units and minimum Units per switch.

**4. Who am I investing with?**

Relevant parties' information:

<b>The Manager</b>	AHAM Asset Management Berhad
<b>The Trustee</b>	CIMB Commerce Trustee Berhad

**5. What are the possible outcomes of my investment?**

This Fund is a wholesale mixed asset fund that hold a flexibility of being invested in a diversified range of investment instruments such as equities and equity-linked instruments, fixed income instruments such as debentures, money market instruments and/or deposits with Financial Institutions. Concurrently, the Fund will also have the option to invest in collective investment schemes, embedded derivatives, and derivative.

The Fund's investment into equities and fixed income instruments would have to a great extent be linked to the price movements of the global equity and fixed income markets. If the equities and fixed income instruments that are investable by the Fund performs well, the Fund's performance may reflect the same. However, should the investments that are investable by the Fund perform poorly; the Fund's performance may also be impacted negatively.

The Fund is not expected to make any income distribution. Due to the Fund's portfolio of investments, the Manager expects the Fund's long-term focus to be on capital growth.

Please note that the capital and returns of the Fund are not guaranteed.

**KEY RISKS**

**6. What are the key risks associated with this product?**

**General risks**

- **Market risk** - Market risk arises because of factors that affect the entire market place. Factors such as economic growth, political stability and social environment are some examples of conditions that have an impact on businesses, whether positive or negative. It stems from the fact that there are economy-wide perils, or instances of political or social instability which threaten all businesses. Hence, the Fund will be exposed to market uncertainties and fluctuations in the economic, political and social environment that will affect the market price of the investments either in a positive or negative way.
- **Fund management risk** - This risk refers to the day-to-day management of the Fund by us which will impact the performance of the Fund. For example, investment decisions undertaken by us as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error, fraud, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.
- **Liquidity risk** – Liquidity risk refers to two scenarios. The first scenario is where an investment cannot be sold due to the unavailability of a buyer for that investment. The second scenario exists where the investment, by its nature, is thinly traded. This will have the effect of causing the investment to be sold below its fair value which would adversely affect the NAV of the Fund and subsequently the value of Unit Holders' investments in the Fund. Upon such event and in the best interest of the Unit Holders, the Manager may suspend the repurchase of Units requests. Please refer to "Suspension of Dealing in Units" section of the Information Memorandum for more details.
- **Performance risk** – The performance of the Fund depends on the financial instruments that the Fund purchases. If the instruments do not perform within expectation or if there is a default, then, the performance of the Fund will be impacted negatively. The performance of the Fund may also be impacted if the allocation of assets is not properly done. This is where the experience and expertise of the fund managers are important and the risk on the lack of experience and expertise of the fund managers has been highlighted above. On that basis, there is never a guarantee that investing in the Fund will produce the desired investment returns or on the distribution of income.
- **Inflation risk** – This is the risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
- **Operational risk** – This risk refers to the possibility of a breakdown in the Manager's internal controls and policies. The breakdown may be a result of human error, system failure or fraud where employees of the Manager collude with one another. This risk may cause monetary loss and/or inconvenience to you. The Manager will review its internal policies and system capability to mitigate instances of this risk. Additionally, the Manager maintains a strict segregation of duties to mitigate instances of fraudulent practices amongst employees of the Manager.
- **Related party transaction risk** - The Fund may also have dealings with parties related to AHAM. Nevertheless, it is our policy that all transactions with related parties are to be executed on terms which are best available to the Fund and which are not less favourable to the Fund than an arm's length transaction between independent parties.

- **Suspension of repurchase request risk** - Having considered the best interests of Unit Holders, the repurchase requests by the Unit Holders may be subject to suspension due to exceptional circumstances, where the market value or fair value of a material portion of the Fund's assets cannot be determined, or such other circumstances as may be determined by the Manager, where there is good and sufficient reason to do so. In such case, Unit Holders will not be able to redeem their Units and will be compelled to remain invested in the Fund for a longer period of time. Hence, their investments will continue to be subject to the risks inherent to the Fund.

#### Specific risks

- **Credit and default risk** – Credit risk relates to the creditworthiness of the issuers of the debentures and money market instruments and the Financial Institutions where the deposits are placed (hereinafter referred to as “investment”) and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer and/or Financial Institution may impact the value as well as liquidity of the investment. In the case of rated investment, this may lead to a credit downgrade. Default risk relates to the risk of an issuer and/or a Financial Institution of the investment either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the investment. This could adversely affect the value of the Fund.
- **Stock specific risk** – Prices of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movement of such stock will adversely affect the Fund's NAV.
- **Warrant investment risk** – The value of the warrants will depend on the pricing of the underlying security whereby the growth and performance prospect of the underlying security would consequentially affect the value of the warrants. In addition, the value of the warrants may decrease exponentially as the warrants approach its maturity date and the potential gains from a favourable price movement of the underlying may be offset by aggressive time decay. We may consider unwinding these warrants if there are material adverse changes to its value with the aim to mitigate the risk.
- **Interest rate risk** – This risk refers to the impact of interest rate changes on the valuation of debentures or money market instruments (hereinafter referred to as “investment”). Generally, movement in interest rates affects the prices of investment inversely. For example, when interest rates rise, prices of investment will fall. The fluctuations of the prices of investment will also have an impact on the NAV of the Fund. This risk can largely be eliminated by holding the investment until their maturity. We also manage interest rate risk by considering each investment's sensitivity to interest rate changes. When interest rates are expected to increase, the Fund would then likely seek to switch to investment that are less sensitive to interest rate changes. For investments in deposits, the fluctuations in the interest rates will not affect the placement of deposits but will result in the opportunity loss by the Fund if the placement of deposits is made at lower interest rate.
- **Currency risk** – As the investments of the Fund may be denominated in currencies other than the Base Currency, any fluctuation in the exchange rate between the Base Currency and the currencies in which the investments are denominated may have an impact on the value of these investments. You should be aware that if the currencies in which the investments are denominated depreciate against the Base Currency, this will have an adverse effect on the NAV of the Fund in the Base Currency and vice versa. You should note that any gain or loss arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

#### *Currency risk at the Class Level*

The impact of the exchange rate movement between the Base Currency and the currency of the respective Classes (other than MYR Class) may result in a depreciation of your holdings as expressed in the Base Currency.

- **Country risk** – Investments of the Fund in any country may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests in. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV of the Fund or prices of Units to fall.
- **Embedded derivatives risk** – The NAV of the Fund will be impacted by the valuation of the embedded derivatives. Factors that may impact the valuation of the embedded derivatives will include, but not limited to movement of the underlying assets, volatility of the underlying assets, interest rate levels, the correlation of the underlying assets and such other factors. Any change in the aforesaid factors would either positively or negatively impact the valuation of the embedded derivatives hence impacting the NAV of the Fund. As such, the Fund's NAV will be exposed to potential price volatility, which will be dependent on the valuation of the embedded derivatives that the Fund invested in.
- **Derivatives risk** – Valuation of derivatives takes into account a multitude of factors such as movement of the underlying assets, the correlation of the underlying assets with the Fund, the implied future direction of the underlying assets and other factors. Any diverse changes of the factors mentioned above, may result in a lower NAV price and higher volatility for the Fund's NAV.
- **Counterparty risk** – Counterparty risk concerns the Fund's investment in embedded derivatives and derivatives (hereinafter referred to as “Investments”). Counterparty risk is prevalent as the potential returns derived from the Investments are dependent on the ongoing ability and willingness of the issuer i.e. a Financial Institution to fulfil their respective financial commitments to the Fund in a timely manner. Bankruptcy, fraud or regulatory non-compliance arising out of and/or in connection with the issuer may impair the operations and/or the performance of the Fund. However, we will conduct stringent credit selection process of the issuer of the Investments prior to commencement of Investments and monitoring mechanisms established by us may potentially mitigate this risk. If, we are of the opinion there is material adverse change to an issuer, we may consider unwinding the issuer's Investments to mitigate potential losses that may arise.

- **Tactical asset allocation fund risk** – This Fund is a tactical asset allocation fund where the strategies employed to shift the asset mix between equities and equity-link notes, fixed income instruments or money market instruments and deposits, depending on the prevailing market outlook. The Manager’s investment decision pertaining to the asset allocation may adversely affect the Fund’s performance if the assessment concluded by the Manager is not consistent with the market outlook.

**Note: Please refer to “Understanding the Risks of the Fund” in Information Memorandum on further detail on each risk.**

It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are recommended to read the whole Information Memorandum to assess the risks associated to the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.
