ASSET ALLOCATION

INVESTMENT STRATEGY

To achieve the objective of the Fund, we intend to invest a minimum of 70% of the Fund’s NAV in fixed income instruments, i.e. debentures, money market instruments and/or deposits, and the remaining balance of the Fund’s NAV in cash, derivatives and/or structured products.

The Fund may also invest up to 40% of its NAV in unrated debentures and/or debentures which are rated below investment grade by Standard & Poor's, Moody's, Fitch, RAM, MARC or any other rating agencies (please refer to the credit ratings chart under "Understanding the Risks of the Fund - Credit and default risk" section, for further details).

At the Maturity Date of the Fund, we will redeem or sell the investments, and return all proceeds to you (based on the number of Units you hold), subject to the applicable Fund expenses and fees. In this respect, we will endeavour, as far as it is possible, to purchase investments with maturities that closely mirror the maturity period for this Fund so as to enable the Fund to potentially obtain the full nominal value of those instruments upon the Maturity Date. We may trade the fixed income instruments as and when opportunities arise and/or to manage the credit risk of the fixed income instruments issuers or external adverse events affecting any of the fixed income instruments in the Fund's portfolio. In the event the Maturity Date falls on a non-Business Day, the Maturity Date shall be the first Business Day following the date that is the third (3rd) anniversary of the Investment Date.

However, if Early Maturity is triggered, that is subject to the requirements specified under "How is an Early Maturity triggered", we will liquidate all the investments in the portfolio and return the investment proceeds to you. In the event of an Early Maturity, the Fund will mature on the Early Maturity Date, which will fall on a Business Day as decided by us. Please refer to "Early Maturity" section below for more details.

The payment of proceeds to be paid to you, however, is expected to be within two (2) weeks from the Maturity Date and will not be more than one (1) month from the Maturity Date.

The fundamental investment process will be driven by two main factors:

- The interest rate outlook for the market over the Short term; and
- The overall balance between credit quality and yield of the targeted bonds.
This entails studying relevant economic and business statistics in order to produce forecasts of interest rate trends over the Short term.

Fixed Income Instruments Selection Process and Criteria

We will follow a strict selection process to ensure only appropriate debentures are invested in order to meet the Fund's investment objective. The selection process is in essence of a screening process that selects instruments with risk-return profiles that match the Fund's objective and maturity.

The selection of the debentures will depend largely on its credit quality. Focus will be on the ability of the issuer and/or guarantor to meet their financial obligations and make timely payment of interest and principal in order to protect your interest while delivering the expected returns to the Fund and meet the Fund's investment objective. The following are the more important considerations:

- Issuer's and/or guarantor's industry and business Short term outlook;
- Issuer's and/or guarantor's financial strength and gearing levels;
- Issuer's and/or guarantor's cash flow quality and volatility;
- Issuer's and/or guarantor's expected future cash flow and ability to pay interest and principal;
- Collateral type and value, and claims priority;
- Price and yield-to-maturity; and
- Issuer's and/or guarantor's ratings by RAM, MARC, Standard & Poor's, Moody's, Fitch, or equivalent.

The Fund will also invest in money market instruments and deposits with Financial Institutions. The selection of the issuers will depend largely on the credit quality and liquidity of the issuer based on our internal credit rating model.

Investments in Foreign Fixed Income Instruments

The Fund will invest in foreign fixed income instruments where the regulatory authority is an ordinary or associate member of the International Organization of Securities Commissions (IOSCO).

Derivative Investments

Derivatives trades may be carried out for both investments and hedging purposes through financial instruments such as, but not limited to, forward contracts, futures contracts swaps and options.

Structured Product

The Fund may also invest into structured products such as but not limited to credit linked notes. Investment into these structured products will provide the Fund with the exposure to the reference asset. Each of these products has its own targeted maturity and will expose investors to the price fluctuation of, in the case of a credit linked note, the reference entity that the credit linked note is linked to. As a result, any fluctuation in the price of the structured product may also lead to fluctuations in the NAV of the Fund i.e., if the price of the structured product sees a drop in price, the NAV of the Fund will also be negatively impacted. As the note is structured by an external party, investments into a structured product will also expose the Fund to counterparty risk, which we will attempt to mitigate by carrying out a stringent selection process on its counterparty prior to an investment being made.

Cross Trades Policy

We may conduct cross trades between funds we currently manage provided that all criteria imposed by the regulators are met. Notwithstanding, cross trades between the personal account of our employee and the Fund's account(s); and between our proprietary trading accounts and the Fund's account(s) are strictly prohibited. Compliance with the criteria are monitored by our compliance unit, and reported to our compliance and risk management committee, to avoid conflict of interests and manipulation that could have a negative impact on the investors.

EARLY MATURITY

What is an Early Maturity?

An Early Maturity is an event where the Fund is unwound on or after the first (1st) anniversary of the Fund's Investment Date and up to 30 days before the third (3rd) anniversary of the Fund's Investment Date, subject to the Fund achieving certain requirements (please refer to "How is an Early Maturity triggered" below). Should this occur, the Fund will mature on the Early Maturity Date. When an Early Maturity occurs, we will liquidate all of the investments in the portfolio and return to you the NAV proportion to the number of Units held by you.

How is an Early Maturity triggered?

The Fund's Early Maturity will be triggered when:-

- (a) The NAV per Unit of the Fund is at or higher than the Target NAV per Unit for at least ten (10) consecutive Business Days; and
- (b) Once criteria (a) is met, we have the option to exercise the right to trigger an Early Maturity by issuing an Early Maturity Communiqué to you on the next Business Day of the day when criteria (a) is met.

Although (a) and (b) have occurred, the decision to exercise the right to trigger the Early Maturity is at our sole discretion. For example, we may need to take into account the NAV per Unit after deducting the unwinding cost of forwards, swaps and structured products as well as other expenses. We will decide to call for Early Maturity should the NAV per Unit (after deducting the unwinding cost of forwards, swaps and structured products as well as other expenses) is higher than the Target NAV per Unit.

Should the right to trigger the Early Maturity is exercised by us, the Fund will mature on the Early Maturity Date, which falls on the 10th Business Day immediately following the date we issue the Communiqué to you. In the event we deem unable to liquidate all the assets on the 10th Business Day, we will issue a Communiqué to you to extend the Early Maturity Date up to the 20th Business Day from the date the Early Maturity Communiqué is issued.

Note: The Early Maturity Date may fall on a date, earliest on the 1st anniversary of the Investment Date up to the date, 30 days before the 3rd anniversary of the Investment Date.

What is the expected payout to you once an Early Maturity is triggered?

It is important to note that for an Early Maturity to be triggered, one of the criteria is that the NAV per Unit of the Fund must be higher than the Target NAV per Unit for at least ten (10) consecutive Business Days. The Target NAV per Unit is MYR 1.0100 + Sales Charge per Unit imposed + Target Yield in MYR per unit terms.

The Target Yield is the minimum annual income distribution rate that the Fund endeavours to distribute to you, subject to the availability of income. It is useful to note that the Target Yield is a projected distribution rate that the Fund is expected to be able to meet, based on the targeted portfolio of fixed income instruments investments.

The Target Yield will be confirmed via a Communiqué after the end of the Offer Period and is expected to be presented as a % rate (e.g. 4.50%). For the Target Yield to be adjusted in MYR per unit terms, the following calculation will be used:

Target Yield in MYR per unit terms = (Target Yield × (Offer Price + Sales Charge per Unit))

As an illustration to how the Target NAV per Unit is computed, let assume the following:

Target Yield	=	4.50%
Sales Charge per Unit imposed	=	3.0% (i.e. MYR 0.0300 per Unit)
Offer Price	=	MYR 1.0000 per Unit
Target Yield in MYR per Unit terms	=	(4.50% × (MYR 1.0000 + MYR 0.0300)) = MYR 0.0464

Target NAV per Unit is computed as:-

MYR 1.0100 plus Sales Charge per Unit imposed and Target Yield in MYR per unit terms

= MYR 1.0100 + MYR 0.0300 + MYR 0.0464 = MYR 1.0864 per Unit

Therefore, the Target NAV per Unit is MYR 1.0864.

In this example, the Fund's NAV per Unit will need to be at least MYR 1.0864 per Unit for 10 consecutive Business Days before we can issue the Early Maturity Communiqué on the next Business Day of the day when criteria (a) of "How Is an Early Maturity triggered" is met. Subsequently, the Fund will early mature on the 10th Business Day following the date the Early Maturity Communiqué is issued. We will need to liquidate the remaining assets in the Fund and you will be paid based on the NAV of the Fund as at the 10th Business Day from the date the Early Maturity Communiqué is issued. In the event we deem unable to liquidate all the assets on the 10th Business Day, we will issue a Communiqué to you to extend the Early Maturity Date up to the 20th Business Day from the date the Early Maturity Communiqué is issued. In such event, Unit Holders will be paid based on the NAV of the Fund as at the 20th Business Day from the date the Early Maturity Communiqué is issued.

As a reminder, the Target NAV per Unit covers your initial capital invested including the Sales Charge imposed and the annual income distribution at a rate that the Fund endeavours to distribute to you. The Early Maturity proceeds received by you based on the final NAV of the Fund is expected to closely match the Target NAV per Unit but it may be lower than the Target NAV per Unit as the liquidation of assets in the portfolio is subject to market conditions and liquidation costs. To increase the likelihood of the Offer Price, Sales Charge imposed and Target Yield being covered by the Early Maturity proceeds, an additional buffer of 1% has been incorporated into the computation of Target NAV per Unit. The final NAV will be communicated to you via a Communiqué.

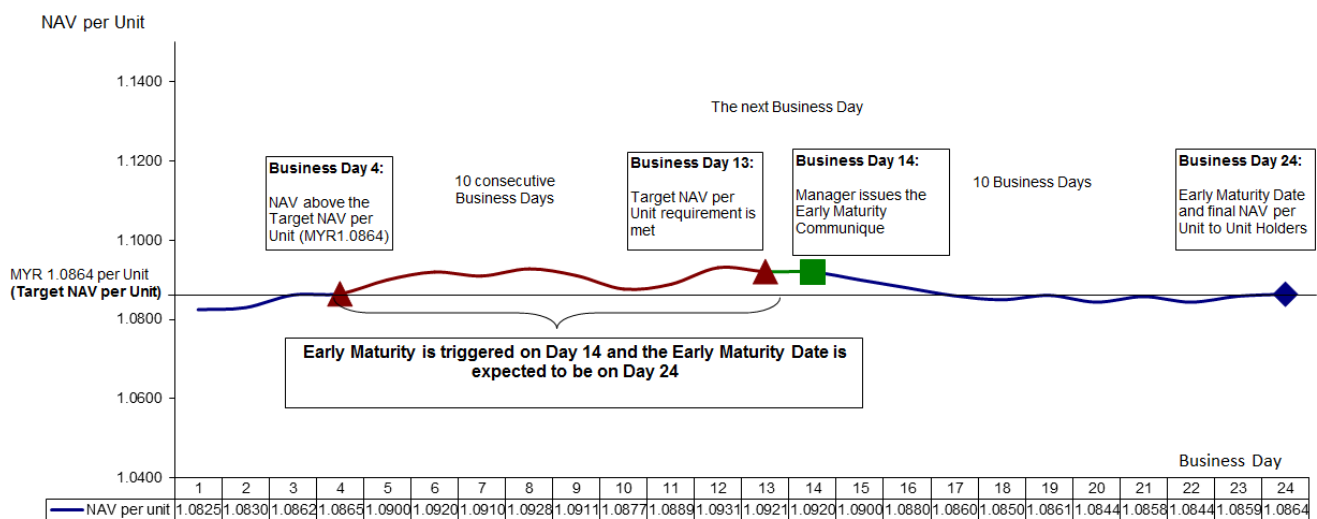

Once a Target Yield is confirmed, the Target NAV per Unit will remain the same throughout the life of the Fund. It is useful to note that the Fund is expected to provide annual income distributions with a minimum per annum rate that equals the Target Yield until the Fund matures. Should the Early Maturity occur in a later stage of the Fund, such as on the 2nd year, you would have already received 2 rounds of annual income distributions on top of the Early Maturity proceeds. Please be reminded that your investments in the Fund will be subject to the risks highlighted under "Understanding The Risks Of The Fund" section.

Offer Price (MYR per Unit)	=	1.0000

The Fund will be valued at 6.00 p.m. on every Business Day (or “trading day” or “T” day). However, if the Fund has exposure to investments outside of Malaysia, the Fund will be valued at 11.00 a.m. on the next Business Day (or “T + 1”). All foreign assets are translated into the base currency of the Fund i.e. MYR, based on the latest available bid exchange rate quoted by Bloomberg/Reuters at 4.00 p.m. (United Kingdom time) which is equivalent to 11 p.m. or 12 a.m. midnight (Malaysian time) on the same day, or at such time as stipulated in the investment management standards issued by the FiMM.

VALUATION OF ASSETS

We will ensure that the valuation of the Fund is to be carried out in a fair manner in accordance to the relevant laws and Guidelines. We will obtain the daily price or value of the assets for the purpose of valuing the Fund in accordance to the Malaysian Financial Reporting Standard 9 issued by the Malaysian Accounting Standards Board. In the absence of daily price or value of the assets, we will use the latest available price or value of the assets respectively.

The valuation bases for the permitted investments of the Fund are as below:

➤ **Debentures**

Valuation of unlisted debentures denominated in MYR will be done using the fair value price quoted by a bond pricing agency (“BPA”) registered with the SC. If we are of the view that the price quoted by BPA differs from the market price quoted by at least three (3) independent dealers by more than 20 basis points and we determine that the methodology used by the independent dealers to obtain the market price is more appropriate, we may elect to use the price quoted by the independent dealers as the market price, provided that we record our basis for using a non-BPA price, obtain the necessary internal approvals to use the non-BPA price and keep an audit trail of all decisions and basis for adopting the market yields.

Investment in other listed and unlisted debentures will be valued by reference to the average indicative price quoted by at least 3 independent and reputable institutions. In the case where we are unable to obtain quotation from 3 independent and reputable institutions, the other listed and unlisted debentures will be valued in accordance to fair value as determined in good faith by us, on methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

➤ **Deposits**

Valuation of deposits placed with Financial Institutions will be done by reference to the principal value of the deposits and the interests accrued thereon for the relevant period.

➤ **Money Market Instruments**

The valuation of MYR denominated money market instruments will be done using the price quoted by a Bond Pricing Agency registered with the SC. For foreign money market instruments, valuation will be done using the average indicative yield quoted by 3 independent and reputable institutions.

➤ **Derivatives and Structured Products**

The valuation will be at bid price of the derivatives and structured products provided by the respective issuers based on fair value. The issuers generate the market valuation through the use of their own proprietary valuation models, which incorporates all the relevant and available market data with respect to the derivatives and structured products (e.g. interest rates, movement of the underlying asset, volatility of the underlying assets, the correlation of the underlying assets and other such factors).

ABOUT THE FEES AND CHARGES

There are fees and charges involved and you are advised to consider the fees and charges before investing in the Fund.

You should be aware that all fees, charges and expenses referred to or quoted in this Information Memorandum (including any supplemental information memorandum) and the Deed (including any supplemental deed) are referred to or quoted as being exclusive of any tax which may be imposed by the relevant authority. We (including the Trustee and other service providers) will charge the applicable tax, if any, on the fees, charges and expenses in accordance with the relevant laws.

The following are the charges that may be directly incurred by you.

SALES CHARGE

3.00% on the Offer Price and it is non-negotiable.

REPURCHASE CHARGE

Nil.

PENALTY CHARGE

We will impose a Penalty Charge if repurchase of Units is made after the Investment Date of the Fund.

Depending on when the repurchase request is made, the following Penalty Charge shall be applicable:

- 3.00% of NAV per Unit from the Investment Date up to the first (1st) anniversary of the Investment Date.
- 2.00% of NAV per Unit from the Business Day immediately following the first (1st) anniversary up to the second (2nd) anniversary of the Investment Date.
- 1.00% of NAV per Unit from the Business Day immediately following the second (2nd) anniversary up to the third (3rd) anniversary of the Investment Date.
- At Maturity Date or Early Maturity Date – Nil

The Penalty Charge is not negotiable.

Notes:

- (1) There will not be any Penalty Charge applicable on the exercise of cooling-off right and repurchase request made before the Investment Date.
- (2) At the Maturity Date or Early Maturity Date, we will cancel all Units and as such do not constitute a repurchase request. That being the case, Penalty Charge is not applicable at the Maturity Date or Early Maturity Date, as the case may be.
- (3) The Penalty Charge will be retained by the Fund for the benefit of remaining Unit Holders.
- (4) The Penalty Charge is not subject to GST or any other applicable taxes.

Assuming that the number of Units repurchased is 100,000, the NAV per Unit is MYR 1.00 and the repurchase request is made on the Fund's 1st anniversary from the Investment Date, the repurchased amount would be:-

100,000 Units x MYR 1.00 = MYR 100,000

Then, the penalty charge would be:-

MYR 100,000 x 3.0% = MYR 3,000

The following are the fees and expenses that you may indirectly incur when you invest in the Fund.

The trustee fee is calculated and accrued daily and payable monthly to the Trustee.

Assuming that the NAV of the Fund is MYR 120 million for the day, then the daily accrued trustee fee would be:-

$$\frac{\text{MYR 120 million} \times 0.04\%}{365 \text{ days}} = \text{MYR 131.51 per day}$$

Accordingly, any rebates or shared commissions will be directed to the account of the Fund.

The soft commission can be retained by us or our delegates provided that:-

- the goods and services are of demonstrable benefit to the Unit Holder in the form of research and advisory services that assist in the decision-making process relating to the Fund's investments; and
- any dealing with the broker or dealer is executed on terms which are the most favourable for the Fund.

UNDERSTANDING THE RISKS OF THE FUND

Below are the risks associated with the investments of the Fund that you should consider before investing.

GENERAL RISKS OF THE FUND	
Market risk	Market risk arises because of factors that affect the entire market place. Factors such as economic growth, political stability and social environment are some examples of conditions that have an impact on businesses, whether positive or negative. It stems from the fact that there are economy-wide perils, or instances of political or social instability which threaten all businesses. Hence, the Fund will be exposed to market uncertainties and fluctuations in the economic, political and social environment that will affect the market price of the investments either in a positive or negative way.
Fund management risk	This risk refers to the day-to-day management of the Fund by us which will impact the performance of the Fund. For example, investment decisions undertaken by us as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error, fraudulent, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.
Liquidity risk	Liquidity risk refers to two scenarios. The first is where an investment cannot be sold due to unavailability of a buyer for that investment. The second scenario exists where the investment, by its nature, is thinly traded. This will have the effect of causing the investment to be sold below its fair value which would adversely affect the NAV of the Fund.
Performance risk	The performance of the Fund depends on the financial instruments that the Fund purchases. If the instruments do not perform within expectation or if there is a default, then, the performance of the Fund will be impacted negatively. The performance of the Fund may also be impacted if the allocation of assets is not properly done. This is where the experience and expertise of the fund managers are important and the risk on the lack of experience and expertise of the fund managers has been highlighted above. On that basis, there is never a guarantee that investing in the Fund will produce the desired investment returns or on the distribution of income.
Inflation risk	This is the risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
Operational risk	Operational risk is the risk of loss due to the breakdown, deficiencies or weaknesses in the operational support functions resulting in the operations or internal control processes producing an insufficient degree of customer quality or internal control by the Manager. Operational risk is typically associated with human error, system failure, fraud and inadequate or defective procedures and controls.

SPECIFIC RISKS OF THE FUND

Credit and default risk

Credit risk relates to the creditworthiness of the issuers of the fixed income instruments, i.e. debentures and money market instruments, and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the fixed income instrument. In the case of rated fixed income instruments, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of a fixed income instrument either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the fixed income instruments. This could adversely affect the value of the Fund.

As the Fund may also invest up to 40% of its NAV in unrated debentures and/or debentures which are rated below investment grade by Standard & Poor's, Moody's, Fitch, RAM, MARC or any other rating agencies, this will imply a higher credit risk. We will follow a strict selection process to reduce the credit risk of the Fund. Please refer to "Fixed Income Instruments Selection Process and Criteria" section for more details.

The chart below shows the credit rating assigned by Moody's, Standard & Poor's, Fitch, RAM and MARC:-

	Global Rating Agencies			Malaysian Rating Agencies	
	Moody's	Standard & Poor's	Fitch	MARC	RAM
Investment Grade	Aaa	AAA	AAA	AAA	AAA
	Aa1	AA+	AA+	AA+	AA1
	Aa2	AA	AA	AA	AA2
	Aa3	AA-	AA-	AA-	AA3
	A1	A+	A+	A+	A1
	A2	A	A	A	A2
	A3	A-	A-	A-	A3
	Baa1	BBB+	BBB+	BBB+	BBB1
	Baa2	BBB	BBB	BBB	BBB2
	Baa3	BBB-	BBB-	BBB-	BBB3
Non-Investment Grade	Ba1	BB+	BB+	BB+	BB1
	Ba2	BB	BB	BB	BB2
	Baa3 & lower	BB- & lower	BB- & lower	BB- & lower	BB3 & lower

Note: Credit ratings assigned by the credit rating agencies are dependent on the analyses and assessments conducted by the respective agencies. Due to different methodologies used by the agencies, the creditworthiness of the debentures may be concluded differently as well. Therefore, the credit ratings are not the sole indicator of investment merit. As such, credit rating assigned by a rating agency cannot be assumed as an equivalent rating by another rating agency and therefore, it should not be compared against with another.

Interest rate risk

This risk refers to the impact of interest rate changes on the valuation of the fixed income instruments, i.e. debentures and money market instruments. When interest rates rise, the instruments prices generally decline and this may lower the market value of the instruments. The reverse may apply when interest rates falls. For investments into deposits, the fluctuations in the interest rates will not affect the placement of deposits but will result in the opportunity loss by the Fund if the placement of deposits is made at lower interest rate.

	SPECIFIC RISKS OF THE FUND
Derivatives risk	The Fund may be investing in derivative such as option. Valuation of derivatives takes into account a multitude of factors such as movement of the underlying assets, the correlation of the underlying assets with the Fund, the implied future direction of the underlying assets and other factors. Any diverse changes of the factors mentioned above, may result in a lower NAV price and higher volatility for the Fund's NAV.
Structured product risk	This risk arises from investments into instruments such as equity-linked notes and credit-linked notes issued by a third party. The NAV of the Fund will be impacted by the valuation of the structured product. Factors that may impact the valuation of the structured products will include, but not limited to movement of the underlying asset, volatility of the underlying assets, interest rate levels, the correlation of the underlying assets and other such factors. Any change in the aforesaid factors would either positively or negatively impact the valuation of the structured products hence impacting the NAV of the Fund. As such, the Fund's NAV will be exposed to potential price volatility, which will be dependent on the valuation of the structured products that the Fund invested in.
Currency risk	Currency risk is also known as foreign exchange risk where the risk is associated with the Fund's underlying investments which are denominated in different currencies than the Fund's base currency, i.e. MYR. The impact of the exchange rate movement between MYR and the currencies of the underlying investments may result in depreciation or appreciation of the value of the Fund's investments as expressed in MYR.
Country risk	The foreign investments of the Fund may be affected by risks specific to the country in which it invests in. Such risks, which include changes in a country's economic fundamentals, social and political stability, currency movements and foreign investment policies, may have an impact on the prices of the Fund's investments in such countries. Consequently, it may also affect the Fund's NAV.
Repurchase risk	You are reminded to be prepared to commit your investment until the Maturity Date. Any repurchase request made by you will be based on Forward Pricing which is the NAV per Unit at the next valuation point. The NAV per Unit at that valuation point may be lower than your investment outlay. You are also reminded that exiting this Fund prior to the Maturity Date will attract a penalty charge and this may further reduce any monies payable to you. The penalty charge incurred by you will be retained by the Fund for the benefit of the remaining Unit Holders.
Reinvestment risk	This risk arises when an issuer of fixed income instrument decides to repay the principal earlier than the intended maturity date, especially during times of declining interest rates. As a result, the Fund may experience lower returns due to reinvesting in lower yielding fixed income instruments.
Mismatch risk	This risk arises upon the commencement of the Investment Date when there is a mismatch between the Maturity Date of the Fund and the maturity date of the investments which the Fund holds. A mismatch of maturity may potentially result in a loss to the Fund. As a simple example, assuming that the Fund matures on 28 December 2021 (3 years from Investment Date of 28 December 2018) but the Fund is holding a debenture that matures only in 2022. When the Fund matures, the Fund is forced to sell that debenture (to liquidate all investments) at the current market price (as at 28 December 2021) which may be lower than the nominal value of the debenture had the debenture been held until 2022.
Liquidity risk	Liquidity risk occurs when the particular security is difficult to dispose or purchase in the secondary market. In the adverse market circumstances, the secondary market for particular security may be illiquid and, in extreme cases, may cease to function properly. For example, liquidity may dry up in the event of severe market stress as the willingness of transacting parties from both buyers and sellers drops materially. As the liquidity in the market dwindles, the bid-ask spread tends to widen markedly as transacting parties

SPECIFIC RISKS OF THE FUND	
	require higher illiquidity premium to compensate for the liquidity risk. Thus, the particular security may need to be disposed at deeper discount than the usual market price. As a result, this may cause the NAV of the Fund to decline.

! It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are recommended to read the whole Information Memorandum to assess the risks associated with the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.
