RISK FACTORS

This section of the Prospectus provides you with information on the general risks involved when investing in a unit trust fund and the specific risks associated with the securities/instruments that the Fund will be investing in.

GENERAL RISKS

Market risk

Market risk arises because of factors that affect the entire market place. Factors such as economic growth, political stability and social environment are some examples of conditions that have an impact on businesses, whether positive or negative. Market risk cannot be eliminated but may be reduced through diversification. It stems from the fact that there are economy-wide perils, or instances of political or social instability which threaten all businesses. Hence, the Fund will be exposed to market uncertainties and fluctuations in the economic, political and social environment that will affect the market price of the investments either in a positive or negative way.

Fund management risk

This risk refers to the day-to-day management of the Fund by the Manager which will impact the performance of the Fund. For example, investment decisions undertaken by the Manager as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error, fraud, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.

Performance risk

There is no guarantee in relation to the investment returns or on the distribution to Unit Holders.

Inflation risk

This is the risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.

Liquidity risk

Liquidity risk refers to two scenarios. The first is where an investment cannot be sold due to unavailability of a buyer for that investment. The second scenario exists where the investment, by its nature, is thinly traded. This will have the effect of causing the investment to be sold below its fair value which would adversely affect the NAV of the Fund. Upon such event and in the best interest of the Unit Holders, the Trustee may suspend the repurchase of Units requests. Please refer to *“What Is The Process of Repurchase Application”* on page 18 for more details

Operational risk

This risk refers to the possibility of a breakdown in the Manager’s internal controls and policies. The breakdown may be a result of human error, system failure or may be fraud where employees of the Manager collude with one another. This risk may cause monetary loss and/or inconvenience to you. The Manager will review its internal policies and system capability to mitigate instances of this risk. Additionally, the Manager maintains a strict segregation of duties to mitigate instances of fraudulent practices amongst employees of the Manager.

Loan financing risk

This risk occurs when you take a loan or financing to finance your investment. The inherent risk of investing with borrowed money includes you being unable to service the loan repayments. In the event Units are used as collateral, you may be required to top-up your existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower NAV per Unit as compared to the NAV per Unit at the point of purchase towards settling the loan.

SPECIFIC RISKS

Credit and default risk

Credit risk relates to the creditworthiness of the issuers of the fixed income instruments, i.e. debentures, money market instruments and deposits, and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the instruments. In the case of rated instruments, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of the instruments either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the instruments. This could adversely affect the value of the Fund.

As the Fund may also invest up to 40% of its NAV in unrated debentures and/or debentures which are rated below investment grade by Standard & Poor's, Moody's, Fitch, RAM, MARC or any other rating agencies, this will imply a higher credit risk. We will follow a strict selection process to reduce the credit risk of the Fund. Please refer to "Fixed Income Instruments Selection Process and Criteria" on page 9 for more details.

The chart below shows the credit rating assigned by Moody's, Standard & Poor's, Fitch, RAM and MARC:-

	Global Rating Agencies			Malaysian Rating Agencies

Non-Investment Grade	Ba1	BB+	BB+	BB+	BB1
	Ba2	BB	BB	BB	BB2
	Baa3 & lower	BB- & lower	BB- & lower	BB- & lower	BB3 & lower

Interest rate risk

This risk refers to the impact of interest rate changes on the valuation of the fixed income instruments, i.e. debentures and money market instruments. When interest rates rise, the instruments prices generally decline and this may lower the market value of the instruments. The reverse may apply when interest rates falls. For investments into deposits, the fluctuations in the interest rates will not affect the placement of deposits but will result in the opportunity loss by the Fund if the placement of deposits is made at lower interest rate.

Structured products risk

The NAV of the Fund will be impacted by the valuation of the structured product. Factors that may impact the valuation of the structured products will include, but not limited to movement of the underlying asset, volatility of the underlying assets, interest rate levels, the correlation of the underlying assets and other such factors. Any change in the aforesaid factors would either positively or negatively impact the valuation of the structured products hence impacting the NAV of the Fund. As such, the Fund's NAV will be exposed to potential price volatility, which will be dependent on the valuation of the structured products that the Fund invested in.

Derivatives risk

Valuation of derivatives takes into account a multitude of factors such as movement of the underlying assets, the correlation of the underlying assets with the Fund, the implied future direction of the underlying assets and other factors. Any diverse changes of the factors mentioned above, may result in a lower NAV price and higher volatility for the Fund's NAV.

Counterparty risk

Counterparty risk concerns the Fund's investment in structured products and derivatives ("Investments"). Counterparty risk is prevalent as the potential returns derived from the Investments are dependent on the ongoing ability and willingness of the issuer i.e. a financial institution to fulfill their respective financial commitments to the Fund in a timely manner. Bankruptcy, fraud or regulatory non-compliance arising out of and/or in connection with the issuer may impair the operations and/or the performance of the Fund. However, we will conduct stringent credit selection process of the issuer of the Investments prior to commencement of Investments and monitoring mechanisms established by us may potentially mitigate this risk. If, we are of the opinion there is material adverse change to an issuer, we may consider unwinding the issuer's Investments to mitigate potential losses that may arise.

Country risk

Investments of the Fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV of the Fund or prices of Units to fall.

Currency risk

As the investments of the Fund may be denominated in currencies other than the base currency, any fluctuation in the exchange rate between the base currency and the currencies in which the investments are denominated may have an impact on the value of these investments. You should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

Regulatory risk

The investments of the Fund would be exposed to changes in the laws and regulations in the countries that the Fund is invested in. These regulatory changes pose a risk to the Fund as it may materially impact the investments of the Fund. In an effort to manage and mitigate such risk, the Manager seeks to continuously keep abreast of regulatory developments (for example, by closely monitoring announcements on regulators' website and mainstream media) in that country. The Manager may dispose its investments in that particular country should the regulatory changes adversely impact the Unit Holders' interest or diminish returns to the Fund.

Repurchase risk

You are reminded to be prepared to commit your investment until the Maturity Date. Any repurchase request made by you will be based on Forward Pricing which is the NAV per Unit at the next valuation point. The NAV per Unit at that valuation point may be lower than your investment outlay. You are also reminded that exiting this Fund prior to the Maturity Date will attract a Penalty Charge and this may further reduce any monies payable to you. The Penalty Charge incurred by you will be retained by the Fund for the benefit of the remaining Unit Holders.

Reinvestment risk

This risk arises when an issuer of fixed income instrument decides to repay the principal earlier than the intended maturity date, especially during times of declining interest rates. As a result, the Fund may experience lower returns due to reinvesting in lower yielding fixed income instruments.

Mismatch risk

This risk arises upon the commencement of the Investment Date when there is a mismatch between the Maturity Date of the Fund and the maturity date of the investments which the Fund holds. A mismatch of maturity may potentially result in a loss to the Fund. As a simple example, assuming that the Fund matures on 31 January 2022 (3 years from Investment Date of 31 January 2019) but the Fund is holding a debenture that matures only in 2023. When the Fund matures, the Fund is forced to sell that debenture (to liquidate all investments) at the current market price (as at 31 January 2022) which may be lower than the nominal value of the debenture had the debenture been held until 2023.

RISK MANAGEMENT

In our day-to-day running of the business, we employ a proactive risk management approach to manage portfolio risks and operational risks. The Board of Directors of AHAM (“the Board”) has established a board compliance & risk management committee to oversee AHAM’s risk management activities both at operational level and at portfolio management level to ensure that the risk management process is in place and functioning. The board compliance & risk management committee comprises of at least three Board members and is chaired by an independent director. At the operational level, we have established a compliance & risk oversight committee with the primary function of identifying, evaluating and monitoring risks as well as to formulate internal control measures to manage and mitigate the exposure to risks that may affect the performance of the Fund, returns to the investors or Unit Holders’ interest within a clearly defined framework and is primarily responsible for ensuring that the policies and procedures that have been implemented are reviewed on an on-going basis with periodic assessments. The compliance & risk oversight committee reports to the board compliance & risk management committee on a quarterly basis.

In managing portfolio risks, we engage a stringent screening process by conducting fundamental analysis of economic, political and social factors to evaluate their likely effects on the performance of the markets and sectors. Regular meetings are held to discuss investment themes and portfolio decisions taken at the meetings are then implemented according to the investment guidelines which also take into account requirements for minimum portfolio diversification across individual investment holdings, sectors, geographies and asset classes (based on the portfolio’s objective and strategy). We also practise prudent liquidity management with the objective to ensure that the Fund is able to meet its short-term expenses including repurchase requests by the Unit Holders.

We have in place a system that is able to monitor the transactions to ensure compliance with the Fund’s investment limits and restrictions. These limits are system-controlled and not manually tracked, thus reducing the probability of human error occurring in ensuring the Fund’s limits and restrictions are adhered to. We also undertake stringent evaluation of movements in market prices and regularly monitor, review and report to the investment committee to ensure that the Fund’s investment objective is met. Regular portfolio reviews by senior members of the investment team further reduce the risk of implementation inconsistencies and violations of the Guidelines. We also have in place a credit risk management process to reduce counterparty risk of derivatives and structured products whereby such risk arises when the counterparty is not able to meet their contractual obligations. Prior to entering into a contract with the counterparty, we will conduct an evaluation on the credit standing of the counterparty to ensure they are able to meet their contractual obligations. It is important to note that an event of downgrade does not constitute a default. If we view that the downgrade in the rating of the counterparty may lead to high credit risk, we will not hesitate to take pre-emptive measures to unwind these positions.

We also employ a performance attribution system that enables us to review the performance of the Fund to determine the key factors that have contributed to and detracted from the Fund’s performance. This system complements our overall risk management process as the system also provides standard risk analytics on the portfolio such as the Fund’s standard deviation, tracking error and measures of excess return. The data produced by the performance attribution system is reviewed regularly and at least on a monthly basis in meetings chaired by the managing director and participated by the portfolio managers and the performance evaluation team.

! It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are recommended to read the whole Prospectus to assess the risks associated with the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.

ASSET ALLOCATION

Debentures, money market instruments and/or deposits	Minimum of 70% of the Fund's NAV
Cash, derivatives and/or structured products	Maximum of 30% of the Fund's NAV

INVESTMENT STRATEGY

To achieve the objective of the Fund, we intend to invest a minimum of 70% of the Fund's NAV in fixed income instruments, i.e. debentures, money market instruments and/or deposits, and the remaining balance of the Fund's NAV in cash, derivatives and/or structured products.

The Fund may also invest up to 40% of its NAV in unrated debentures and/or debentures which are rated below investment grade by Standard & Poor's, Moody's, Fitch, RAM, MARC or any other rating agencies (please refer to the credit ratings chart under "Understanding the Risks of the Fund - Credit and default risk" section, for further details).

At the Maturity Date of the Fund, we will redeem or sell the investments, and return all proceeds to you (based on the number of Units you hold), subject to the applicable Fund expenses and fees. In this respect, we will endeavour, as far as it is possible, to purchase investments with maturities that closely mirror the maturity period for this Fund so as to enable the Fund to potentially obtain the full nominal value of those instruments upon the Maturity Date. We may trade the fixed income instruments as and when opportunities arise and/or to manage the credit risk of the fixed income instruments issuers or external adverse events affecting any of the fixed income instruments in the Fund's portfolio. In the event the Maturity Date falls on a non-Business Day, the Maturity Date shall be the first Business Day following the date that is the third (3rd) anniversary of the Investment Date.

However, if Early Maturity is triggered, that is subject to the requirements specified under "How is an Early Maturity triggered", we will liquidate all the investments in the portfolio and return the investment proceeds to you. In the event of an Early Maturity, the Fund will mature on the Early Maturity Date, which will fall on a Business Day as decided by us. Please refer to "Early Maturity" section below for more details.

The payment of proceeds to be paid to you, however, is expected to be within two (2) weeks from the Maturity Date and will not be more than one (1) month from the Maturity Date.

The fundamental investment process will be driven by two main factors:

- The interest rate outlook for the market over the Short term; and
- The overall balance between credit quality and yield of the targeted bonds.

This entails studying relevant economic and business statistics in order to produce forecasts of interest rate trends over the Short term.

Fixed Income Instruments Selection Process and Criteria

We will follow a strict selection process to ensure only appropriate fixed income instruments are invested in order to meet the Fund's investment objective. The selection process is in essence of a screening process that selects instruments with risk-return profiles that match the Fund's objective and maturity.

The selection of the debentures will depend largely on its credit quality. Focus will be on the ability of the issuer and/or guarantor to meet their financial obligations and make timely payment of interest and principal in order to protect your interest while delivering the expected returns to the Fund and meet the Fund's investment objective. The following are the more important considerations:

- Issuer's and/or guarantor's industry and business Short term outlook;

- Issuer's and/or guarantor's financial strength and gearing levels;
- Issuer's and/or guarantor's cash flow quality and volatility;
- Issuer's and/or guarantor's expected future cash flow and ability to pay interest and principal;
- Collateral type and value, and claims priority;
- Price and yield-to-maturity; and
- Issuer's and/or guarantor's ratings by RAM, MARC, Standard & Poor's, Moody's, Fitch, or equivalent.

The Fund will also invest in money market instruments and deposits with Financial Institutions. The selection of the issuers will depend largely on the credit quality and liquidity of the issuer based on our internal credit rating model.

Investments in Foreign Fixed Income Instruments

The Fund will invest in foreign fixed income instruments where the regulatory authority is an ordinary or associate member of the International Organization of Securities Commissions (IOSCO).

Derivative Investments

The Fund may employ derivatives, such as foreign exchange forward contracts, cross currency swaps or interest rate swaps primarily for hedging purposes. Cross currency swaps and/or foreign exchange forward contracts could be used to hedge the principal and/or the returns of the foreign currency denominated fixed income instruments back to MYR while interest rate swaps could be used to hedge the interest rate exposure borne by the Fund. As prices of fixed income instruments are generally inversely related to yields and interest rates, the use of interest rate swap will enable us to exchange the fixed interest rate for floating interest rate with the intention to mitigate the potential decline in prices of the Fund's investments. While the hedging strategy will assist with mitigating the potential foreign exchange losses by the Fund, any potential gains from the hedging strategy will be capped as well.

Additionally, the Fund may also invest in derivatives for investment purposes to enhance the returns of the Fund. We will take a view on the underlying asset, currency or interest rates and establish a long position to gain a specific underlying exposure. For example, if we expect the Singapore Dollar (SGD) to appreciate relative to MYR and the Fund has existing position in SGD denominated bonds, we may long SGD against MYR in a forward contract. This will increase the Fund's effective currency exposure to SGD. The types of derivatives envisaged for investment purposes are the same as those for hedging. These include OTC and those traded on a centralised exchange which could typically range from forwards and swaps. The use of derivatives for investment purposes may cause Fund's NAV per Unit to have higher volatility. This occurs when certain factors change substantially, such as price and volatility of the underlying assets, interest rate levels, correlation between the underlying assets and the derivatives and the implied future direction of the underlying assets.

Structured Product

The Fund may also invest into structured products such as but not limited to credit linked notes. Investment into these structured products will provide the Fund with the exposure to the reference asset. Each of these products has its own targeted maturity and will expose investors to the price fluctuation of, in the case of a credit linked note, the reference entity that the credit linked note is linked to. As a result, any fluctuation in the price of the structured product may also lead to fluctuations in the NAV of the Fund i.e., if the price of the structured product sees a decline in price, the NAV of the Fund will also be negatively impacted. As the note is structured by an external party, investments into a structured product will also expose the Fund to counterparty risk, which we will attempt to mitigate by carrying out a stringent selection process on its counterparty prior to an investment being made.

PERTINENT INFORMATION OF THE FUND

WHAT IS AN EARLY MATURITY?

An Early Maturity is an event where the Fund is unwound on or after the first (1st) anniversary of the Fund's Investment Date and up to 30 days before the third (3rd) anniversary of the Fund's Investment Date, subject to the Fund achieving certain requirements (please refer to "How is an Early Maturity triggered" below). Should this occur, the Fund will mature on the Early Maturity Date. When an Early Maturity occurs, we will liquidate all of the investments in the portfolio and return to you the NAV proportion to the number of Units held by you.

HOW IS AN EARLY MATURITY TRIGGERED?

The Fund's Early Maturity will be triggered when:-

- (a) The NAV per Unit of the Fund is at or higher than the Target NAV per Unit for at least ten (10) consecutive Business Days; and
- (b) Once criteria (a) is met, we have the option to exercise the right to trigger an Early Maturity by issuing an Early Maturity Communiqué to you on the next Business Day of the day when criteria (a) is met.

Although (a) and (b) have occurred, the decision to exercise the right to trigger the Early Maturity is at our sole discretion. For example, we may need to take into account the NAV per Unit after deducting the unwinding cost of forwards, swaps and structured products as well as other expenses. We will decide to call for Early Maturity should the NAV per Unit (after deducting the unwinding cost of forwards, swaps and structured products as well as other expenses) is higher than the Target NAV per Unit.

Should the right to trigger the Early Maturity is exercised by us, the Fund will mature on the Early Maturity Date, which falls on the 10th Business Day immediately following the date we issue the Communiqué to you. In the event we deem unable to liquidate all the assets on the 10th Business Day, we will issue a Communiqué to you to extend the Early Maturity Date up to the 20th Business Day from the date the Early Maturity Communiqué is issued.

Note: The Early Maturity Date may fall on a date, earliest on the 1st anniversary of the Investment Date up to the date, 30 days before the 3rd anniversary of the Investment Date.

WHAT IS THE EXPECTED PAYOUT TO YOU ONCE AN EARLY MATURITY IS TRIGGERED?

It is important to note that for an Early Maturity to be triggered, the NAV per Unit of the Fund must be higher than the Target NAV per Unit for at least ten (10) consecutive Business Days. The Target NAV per Unit is:-

$$\text{MYR } 1.0100 + \text{Sales Charge per Unit imposed} + \text{Target Yield in MYR per Unit terms.}$$

The Target Yield is the annual income distribution rate that the Fund endeavours to distribute to you, subject to the availability of income. It is useful to note that the Target Yield is a projected distribution rate that the Fund is expected to be able to meet, based on the targeted portfolio of fixed income instruments investments.

The Target Yield will be confirmed via a Communiqué after the end of the Offer Period and is expected to be presented as a % rate (e.g. 4.80%). For the Target Yield to be adjusted in MYR per Unit terms, the following calculation will be used:

$$\text{Target Yield in MYR per Unit terms} = (\text{Target Yield} \times (\text{Offer Price} + \text{Sales Charge per Unit}))$$

As an illustration to how the Target NAV per Unit is computed, let assume the following:

Target Yield	=	4.80%
Sales Charge per Unit imposed	=	3.0% (i.e. MYR 0.0300 per Unit)

Offer Price	=	MYR 1.0000 per Unit
Target Yield in MYR per Unit terms	=	$(4.80\% \times (\text{MYR } 1.0000 + \text{MYR } 0.0300)) = \text{MYR } 0.0494$

Target NAV per Unit is computed as:-

MYR 1.0100 plus Sales Charge per Unit imposed and Target Yield in MYR per Unit terms

= MYR 1.0100 + MYR 0.0300 + MYR 0.0494

= MYR 1.0894 per Unit

Therefore, the Target NAV per Unit is MYR 1.0894.

In this example, the Fund's NAV per Unit will need to be at least MYR 1.0894 per Unit for 10 consecutive Business Days before we can issue the Early Maturity Communique on the next Business Day of the day when criteria (a) of "How Is an Early Maturity triggered" is met. Subsequently, the Fund will early mature on the 10th Business Day following the date the Early Maturity Communique is issued. We will need to liquidate the remaining assets in the Fund and you will be paid based on the NAV of the Fund as at the 10th Business Day from the date the Early Maturity Communique is issued. In the event we deem unable to liquidate all the assets on the 10th Business Day, we will issue a Communique to you to extend the Early Maturity Date up to the 20th Business Day from the date the Early Maturity Communique is issued. In such event, Unit Holders will be paid based on the NAV of the Fund as at the 20th Business Day from the date the Early Maturity Communique is issued.

As a reminder, the Target NAV per Unit covers your initial capital invested including the Sales Charge imposed and the annual income distribution at a rate that the Fund endeavours to distribute to you. The Early Maturity proceeds received by you based on the final NAV of the Fund is expected to closely match the Target NAV per Unit but it may be lower than the Target NAV per Unit as the liquidation of assets in the portfolio is subject to market conditions and liquidation costs. To increase the likelihood of the Offer Price, Sales Charge imposed and Target Yield being covered by the Early Maturity proceeds, an additional buffer of 1% has been incorporated into the computation of Target NAV per Unit. The final NAV will be communicated to you via a Communique.

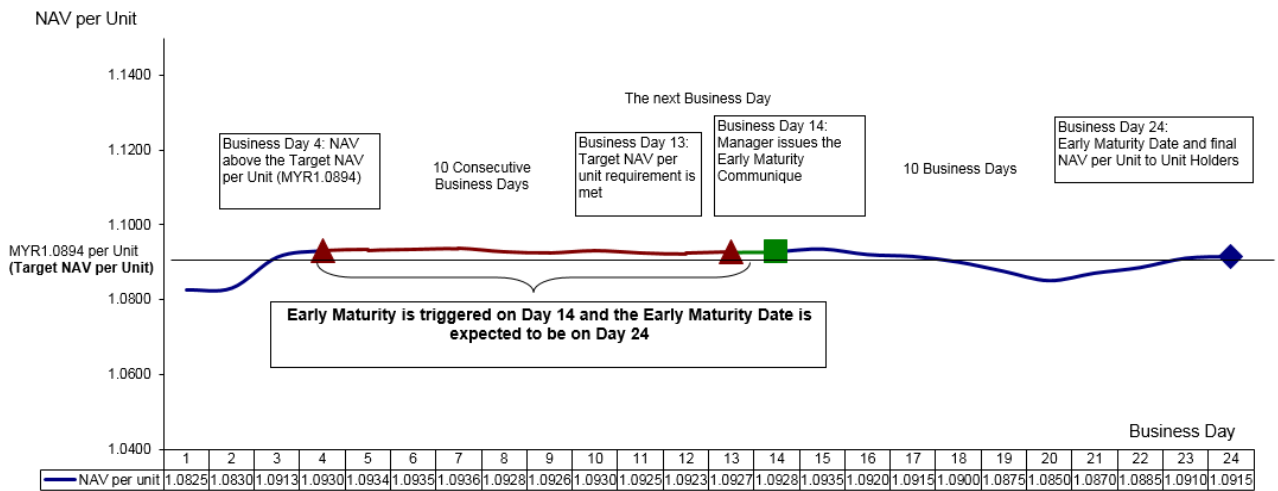

Once a Target Yield is confirmed, the Target NAV per Unit will remain the same throughout the life of the Fund. It is useful to note that the Fund is expected to provide annual income distributions with a minimum per annum rate that equals the Target Yield until the Fund matures. Should the Early Maturity occur in a later stage of the Fund, such as on the 2nd year, you would have already received 2 rounds of annual income distributions on top of the Early Maturity proceeds. Please be reminded that your investments in the Fund will be subject to the risks highlighted under "Understanding The Risks Of The Fund" section.

Assumptions

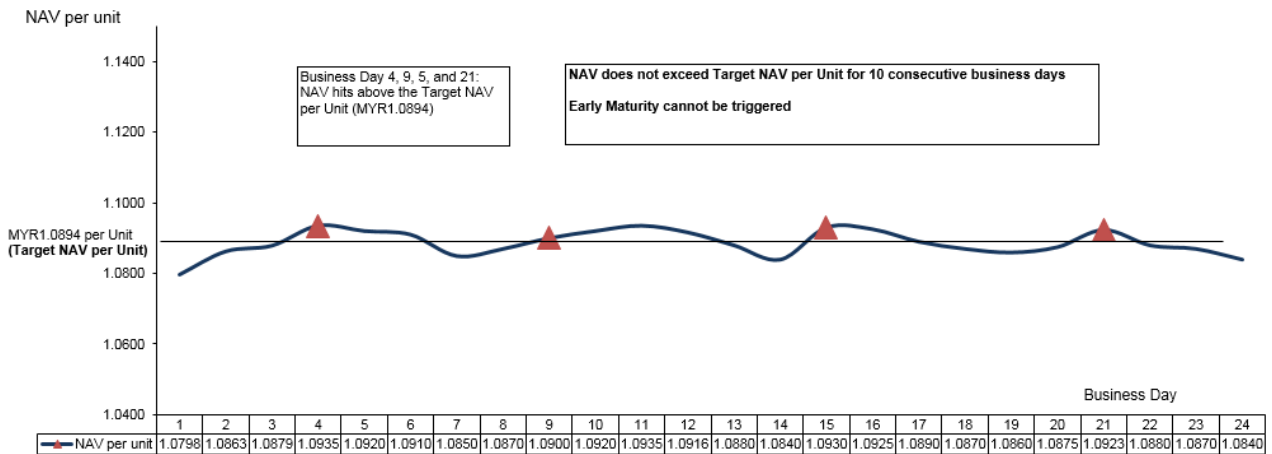

For illustration purposes, Business Day count starts from the 1st anniversary of Investment Date. The Early Maturity Date may fall on a date, earliest on the 1st anniversary of the Investment Date up to the date, 30 days before the 3rd anniversary of the Investment Date.

Sales Charge	=	3.00%
Offer Price (MYR per Unit)	=	1.0000
Target Yield	=	4.80%
Target Yield (MYR per Unit)	=	0.0494
Target NAV per Unit	=	1.0894

We will not make any further acquisitions to which the relevant limit is breached and within a reasonable period of not more than three (3) months from the date of the breach, we will take all necessary steps and actions to rectify the breach.

VALUATION OF PERMITTED INVESTMENTS

We will ensure that the valuation of the Fund is to be carried out in a fair manner in accordance to the relevant laws and Guidelines. We will obtain the daily price or value of the assets for the purpose of valuing the Fund in accordance to the Malaysian Financial Reporting Standard 9 issued by the Malaysian Accounting Standards Board. In the absence of daily price or value of the assets, we will use the latest available price or value of the assets respectively.

The valuation bases for the permitted investments of the Fund are as below:

➤ **Debentures**

Valuation of unlisted debentures denominated in MYR will be done using the fair value price quoted by a bond pricing agency (“BPA”) registered with the SC. If we are of the view that the price quoted by BPA differs from the market price quoted by at least three (3) independent dealers by more than 20 basis points and we determine that the methodology used by the independent dealers to obtain the market price is more appropriate, we may elect to use the price quoted by the independent dealers as the market price, provided that we record our basis for using a non-BPA price, obtain the necessary internal approvals to use the non-BPA price and keep an audit trail of all decisions and basis for adopting the market yields.

Investment in other listed and unlisted debentures will be valued by reference to the average indicative price quoted by at least 3 independent and reputable institutions. In the case where we are unable to obtain quotation from 3 independent and reputable institutions, the other listed and unlisted debentures will be valued in accordance to fair value as determined in good faith by us, on methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

➤ **Deposits**

Valuation of deposits placed with Financial Institutions will be done by reference to the principal value of the deposits and the interests accrued thereon for the relevant period.

➤ **Money Market Instruments**

The valuation of MYR denominated money market instruments will be done using the price quoted by a Bond Pricing Agency registered with the SC. For foreign money market instruments, valuation will be done using the average indicative yield quoted by 3 independent and reputable institutions.

➤ **Derivatives and Structured Products**

The valuation will be at bid price of the derivatives and structured products provided by the respective issuers based on fair value. The issuers generate the market valuation through the use of their own proprietary valuation models, which incorporates all the relevant and available market data with respect to the derivatives and structured products (e.g. interest rates, movement of the underlying asset, volatility of the underlying assets, the correlation of the underlying assets and other such factors).

VALUATION POINT FOR THE FUND

The Fund will be valued at 6.00 p.m. on every Business Day (or “trading day” or “T” day). However, if the Fund has exposure to investments outside of Malaysia, the Fund will be valued at 11.00 a.m. on the next Business Day (or “T + 1”). All foreign assets are translated into the base currency of the Fund i.e. MYR, based on the latest available bid exchange rate quoted by Bloomberg/Reuters at 4.00 p.m. (United Kingdom time) which is equivalent to 11 p.m. or 12 a.m. midnight (Malaysian time) on the same day, or at such time as stipulated in the investment management standards issued by the FiMM.

POLICY ON GEARING AND MINIMUM LIQUID ASSETS REQUIREMENTS

The Fund is not permitted to borrow cash or other assets (including the borrowing of securities within the meaning of the Securities Borrowing and Lending Guidelines [SBL Guidelines]) in connection with its activities. However, the Fund may borrow cash for the purpose of meeting repurchase requests for Units and for short-term bridging requirements subject to the following:

- the Fund's borrowing is only on a temporary basis and that borrowings are not persistent;
- the borrowing period should not exceed one (1) month;
- the aggregate borrowings of the Fund should not exceed 10% of the Fund's NAV at the time the borrowing is incurred; and
- the Fund may only borrow from Financial Institutions.

Except for securities lending as provided under SBL Guidelines, none of the cash or investments of the Fund may be lent. Further, the Fund may not assume, guarantee, endorse or otherwise become directly or contingently liable for or in connection with any obligation or indebtedness of any person.

ABOUT THE FEES AND CHARGES

! There are fees and charges involved and investors are advised to consider the fees and charges before investing in the Fund.

You should be aware that all fees, charges and expenses referred to or quoted in this Prospectus (including any supplemental prospectus) and the Deed (including any supplemental deed) are referred to or quoted as being exclusive of any tax which may be imposed by the relevant authority. We (including the Trustee and other service providers) will charge the applicable tax, if any, on the fees, charges and expenses in accordance with the relevant laws.

CHARGES

The following are the charges that you may **directly** incur when you buy or redeem Units of this Fund.

SALES CHARGE

A Sales Charge will be imposed on the purchase of Units of the Fund. The Sales Charge will be a percentage of the Offer Price. The maximum Sales Charge that the distribution channels will impose is as stated below:-

Distributors	Maximum Sales Charge as a percentage of the Offer Price*
IUTA	3.00%
Internal distribution channel of the Manager	
Unit trust consultants	

* The Sales Charge is non-negotiable.

Note: All Sales Charges will be rounded up to two (2) decimal places.

PENALTY CHARGE

We will impose a Penalty Charge if repurchase of Units is made after the Investment Date of the Fund.

Depending on when the repurchase request is made, the following Penalty Charge shall be applicable:

- 3.00% of NAV per Unit from the Investment Date up to the first (1st) anniversary of the Investment Date.
- 2.00% of NAV per Unit from the Business Day immediately following the first (1st) anniversary up to the second (2nd) anniversary of the Investment Date.
- 1.00% of NAV per Unit from the Business Day immediately following the second (2nd) anniversary up to the third (3rd) anniversary of the Investment Date.
- At Maturity Date or Early Maturity Date – Nil

The Penalty Charge is not negotiable.

Notes:

- (1) There will not be any Penalty Charge applicable on the exercise of cooling-off right and repurchase request made before the Investment Date.

- (2) At the Maturity Date or Early Maturity Date, we will cancel all Units and as such do not constitute a repurchase request. That being the case, Penalty Charge is not applicable at the Maturity Date or Early Maturity Date, as the case may be.
- (3) The Penalty Charge will be retained by the Fund for the benefit of remaining Unit Holders.

Assuming that the number of Units repurchased is 100,000, the NAV per Unit is MYR 1.00 and the repurchase request is made on the Fund's 1st anniversary from the Investment Date, the repurchased amount would be:-

$$100,000 \text{ Units} \times \text{MYR } 1.00 = \text{MYR } 100,000$$

Then, the penalty charge would be:-

$$\text{MYR } 100,000 \times 3.0\% = \text{MYR } 3,000$$

TRANSFER FEE

Nil.

SWITCHING FEE

Not applicable as the switching facility is not available for this Fund.

FEES AND EXPENSES

We may (in our sole and absolute discretion), waive or reduce the amount of any fees (except the trustee fee) and expenses of the Fund, either for all the investors or a particular investor.

The following are the fees that you may **indirectly** incur when you invest in the Fund.

ANNUAL MANAGEMENT FEE

Nil.

TRUSTEE FEE

The Fund pays an annual trustee fee of up to 0.04% per annum of the NAV of the Fund (excluding foreign custodian fees and charges). The Trustee may be reimbursed by the Fund for any expenses properly incurred by it in the performance of its duties and responsibilities.

The trustee fee is calculated and accrued daily and payable monthly to the Trustee.

Assuming that the NAV of the Fund is MYR 120 million for the day, then the daily accrued trustee fee would be:-

$$\frac{\text{MYR } 120 \text{ million} \times 0.04\%}{365 \text{ days}} = \text{MYR } 131.51 \text{ per day}$$

ADMINISTRATIVE FEES

Only the expenses which are directly related and necessary to the operation and administration of the Fund may be charged to the Fund. These would include (but are not limited to) the following:

- Costs, fees and expenses incurred for any meeting of the Unit Holders save where such meeting is convened for the benefit of the Manager and/or the Trustee;
- any tax now or hereafter imposed by law or required to be paid in connection with any costs, fees and expenses incurred by the Fund; and
- Any other expenses allowed under the Deed.

REBATES AND SOFT COMMISSIONS

We, including our delegate (if any), Trustee or Trustee's delegate will not retain any rebate or soft commission from, or otherwise share in any commission with, any broker/dealer in consideration for directing dealings in the investments of the Fund. Accordingly, any rebates or shared commissions will be directed to the account of the Fund.

The soft commission can be retained by us or our delegates provided that:-

- the goods and services are of demonstrable benefit to the Unit Holder in the form of research and advisory services that assist in the decision-making process relating to the Fund's investments; and
- any dealing with the broker or dealer is executed on terms which are the most favourable for the Fund.

There are fees and charges involved and investors are advised to consider them before investing in the Fund.

All fees and charges payable by you are subject to all applicable taxes and/or duties as may be imposed by the government and/or the relevant authorities from time to time.

PRICING

COMPUTATION OF NAV AND NAV PER UNIT

The NAV of the Fund is determined by deducting the value of all the Fund's liabilities from the value of all the Fund's assets, at a particular valuation point. The NAV per Unit is the NAV of the Fund divided by the number of Units in Circulation, at the same valuation point.

Please refer to the "Valuation Point For The Fund" section of this Prospectus for an explanation of the valuation point.

Illustration on computation of NAV and NAV per Unit for a particular day:-

* NAV per Unit is derived from the following formula:-

$$\frac{\text{NAV}}{\text{Units in Circulation}}$$

The rounding policy is four (4) decimal points for the purposes of publication of the NAV per Unit. However, the rounding policy will not apply when calculating the Penalty Charge (where applicable).

INCORRECT PRICING

We will take immediate action to rectify any incorrect valuation and/or pricing of the Fund and/or the Units and to notify the Trustee and the SC of the same unless the Trustee considers the incorrect valuation and/or pricing of the Fund and/or the Units is of minimal significance.

The Trustee will not consider an incorrect valuation and/or pricing of the Fund and/or the Units to be of minimal significance if the error involves a discrepancy of 0.5% or more of the NAV per Unit unless the total impact on your account is less than MYR 10.00. An incorrect valuation and/or pricing not considered to be of minimal significance by the Trustee will result in reimbursement of moneys in the following manner:

	Reimbursement by:	Receiving parties:
Over valuation and/or pricing in relation to the repurchase of Units.	AHAM	Fund
Under valuation and/or pricing in relation to the repurchase of Units	Fund	Unit Holder or former Unit Holder

COMPUTATION OF SELLING PRICE AND REPURCHASE PRICE

Under a single pricing regime, the Selling Price and the Repurchase Price are equivalent to the NAV per Unit. Any applicable Sales Charge and Penalty Charge are payable separately from the Selling Price and Repurchase Price.

During Offer Period, the Selling Price and/or the Repurchase Price is equivalent to the Offer Price. Forward Pricing will be used to determine the Repurchase Price after the Offer Period, i.e. the NAV per Unit as at the next valuation point after we receive the repurchase request.

Units will **ONLY** be sold at the Offer Price during the Offer Period.

Calculation of Selling Price

Any Sales Charge payable by the Unit Holder would be calculated as a percentage of Offer Price during Offer Period.

For illustration purposes, let's assume the following:

Investment Amount	MYR 10,000
Selling Price	MYR 0.50
Number Of Units Received*	MYR 10,000 ÷ MYR 1.00 = 10,000 Units
Sales Charge	0.00%
Sales Charge Paid By Investor**	3.00% x MYR 1.00 x 10,000 Units = MYR 300
Total Amount Paid By Investor***	MYR 10,000 + MYR 300 = MYR 9,700

Formula for calculating:-

$$* \text{ Number of Units received} = \frac{\text{Amount invested}}{\text{Selling Price}}$$

$$** \text{ Sales Charge paid by investor} = \text{Sales Charge} \times \text{Offer Price per Unit} \times \text{Number of Units received}$$

$$*** \text{ Total amount paid by investor} = \text{Amount invested} + \text{Sales Charge paid by investor}$$

Calculation of Repurchase Price

If you request for a repurchase request after the Investment Date, you will be subjected to a Penalty Charge. The Penalty Charge is a percentage of the NAV per Unit depending on when the repurchase request is made by you.

For illustration purposes, let's assume the following:-

Units Repurchased	20,000 Units
Repurchase Price	MYR 1.00
Repurchased Amount [^]	20,000 Units x MYR 1.00 = MYR 20,000
Penalty Charge	5.00% of the NAV per Unit
Penalty Charge Paid By Investor ^{^^}	5.00% x MYR 20,000 = MYR 1,000
Total Amount Received By investor ^{^^^}	MYR 20,000 - MYR 1,000 = MYR 19,000
Units Repurchased	20,000 Units

Formula for calculating:-

[^] Repurchase amount = Unit repurchased x Repurchase Price

^{^^} Penalty Charge paid by investor = Penalty Charge x Repurchase amount

^{^^^} Total amount received by investor = Repurchased amount + Penalty Charge paid by investor

(prepared for inclusion in this Prospectus)

The Board of Directors
Affin Hwang Asset Management Berhad
Ground Floor, Menara Boustead
69, Jalan Raja Chulan
50200 Kuala Lumpur

21 September 2018

Dear Sirs

Affin Hwang Flexible Maturity Income Fund 11 Taxation of the Fund and Unit Holders

1. This letter has been prepared for inclusion in the Prospectus (hereinafter referred to as "the Prospectus") in connection with the offer of units in the **Affin Hwang Flexible Maturity Income Fund 11** (hereinafter referred to as "the Fund").

The following is general information based on Malaysian tax law in force at the time of lodging the Prospectus with the Securities Commission Malaysia ("SC") and investors should be aware that the tax law may be changed at any time. To an extent, the application of tax law depends upon an investor's individual circumstances. The information provided below does not constitute tax advice. The Manager therefore recommends that an investor consult his accountant or tax adviser on questions about his individual tax position.

2. Taxation of the Fund

2.1 Income Tax

As the Fund's Trustee is resident in Malaysia, the Fund is regarded as resident in Malaysia. The taxation of the Fund is governed principally by Sections 61 and 63B of the Malaysian Income Tax Act, 1967 ("MITA").

Pursuant to the Section 2(7) of MITA, any reference to interest shall apply, mutatis mutandis, to gains or profits received and expenses incurred, in lieu of interest, in transactions conducted in accordance with the principles of Shariah. The effect of this is that any gains or profits received and expenses incurred, in lieu of interest, in transactions conducted in accordance with the principles of Shariah, will be accorded the same tax treatment as if they were interest.

The income of the Fund in respect of dividends, interest or profits from deposits and other investment income (other than income which is exempt from tax) derived from or accruing in Malaysia is liable to income tax. The Fund may be receiving income such as exit fee which will be subject to tax at the prevailing tax rate applicable on the Fund. Gains on disposal of investments by the Fund will not be subject to income tax.

The income tax rate applicable to the Fund is 24%. Effective for years of assessment 2017 and 2018, the incremental portion of the chargeable income compared to the immediate preceding year of assessment enjoys reduced income tax rate as follows:

% of increase in chargeable income as compared to the immediate preceding year of assessment	Percentage point reduction in tax rate	Tax rate after reduction (%)
Less than 5.00	NIL	24
5.00 – 9.99	1	23

Tax exempt interest as listed in the Appendix attached received by the Fund are not subject to income tax.

With effect from 1 January 2014, Malaysia has fully moved to a single-tier income tax system. The Fund is not liable to tax on any Malaysia sourced dividends paid, credited or distributed to the Fund under the single tier tax system, where the company paying such dividend is not entitled to deduct tax under the MITA. The tax deductibility of other deductions by the Fund against such dividend income will be disregarded in ascertaining the chargeable income of the Fund.

In addition to the single-tier dividend that may be received by the Fund, the Fund may also receive Malaysian dividends which are tax exempt from investments in companies which had previously enjoyed or are currently enjoying the various tax incentives provided under the law. The Fund is not subject to income tax on such tax exempt dividend income.

The Fund may also receive dividends, profits and other income from investments outside Malaysia. Income derived from sources outside Malaysia and received in Malaysia by a unit trust is exempted from Malaysian income tax. However, such income may be subject to foreign tax in the country from which the income is derived.

The tax treatment of hedging instruments would depend on the particular hedging instruments entered into. Generally, any gain or loss relating to the principal portion will be treated as capital gain or loss. Gains or losses relating to the income portion would normally be treated as revenue gains or losses. The gain or loss on revaluation will only be taxed or claimed upon realisation. Any gain or loss on foreign exchange is treated as capital gain or loss if it arises from the revaluation of the principal portion of the investment.

Generally, income from distribution by the Malaysia Real Estate Investment Trusts (“REIT”) will be received net of withholding tax of 10%. No further tax will be payable by the Fund on the distribution. Distribution from such income by the Fund will also not be subject to further tax in the hands of the Unit Holders.

Expenses being manager’s remuneration, maintenance of register of Unit Holders, share registration expenses, secretarial, audit and accounting fees, telephone charges, printing and stationery costs and postage, which are not allowed under the general deduction rules, qualify for a special deduction, subject to a minimum of 10% and a maximum of 25% of such expenses pursuant to Section 63B of the MITA.

2.2 Gains on Disposal of Investments

Gains on disposal of investments by the Fund will not be subject to income tax but where the investments represent shares in real property companies, such gains may be subject to Real Property Gains Tax (“RPGT”) under the RPGT Act, 1976. A real property company is a controlled company which owns or acquires real properties or shares in real property companies with a market value of not less than 75% of its total tangible assets. A controlled company is a company which does not have more than 50 members and is controlled by not more than 5 persons.

2.3 Goods and Services Tax (“GST”) and Service Tax

GST was repealed effective from 1 September 2018 and Service Tax was introduced as a replacement tax effective from 1 September 2018.

As the Fund is not providing a taxable service under the Service Tax Regulations 2018, it is not required to register for Service Tax or charge Service Tax. Should the Fund provide taxable services (i.e. management and consulting services) with an aggregate value of RM500,000 or more in a 12 months period, the Fund would be required to register for Service Tax and charge Service Tax on the said services at the prevailing rate of 6%. The issuance of units by the Fund to investors will not be subject to Service Tax, and no Service Tax would be included in the price of the units. Any distributions made by the Fund to unitholders are also not subject to Service Tax.

Any fund management fees that are charged to the Fund by the Fund Managers in relation managing the Fund would not be subject to Service Tax as fund management fees are excluded from the scope of Service Tax under the Service Tax Regulations 2018. To the extent that the Fund invests in any financial services products (e.g. securities, derivatives, units in a fund or unit trust), the acquisition of these interests will also not be subject to Service Tax.

3. Taxation of Unit Holders

3.1 Taxable Distribution

Unit Holders will be taxed on an amount equivalent to their share of the total taxable income of the Fund to the extent such income is distributed to them. Unit Holders are also liable to pay income tax on the taxable income distributions paid by the Fund. Taxable income distributions carry a tax credit in respect of the tax chargeable on that part of the Fund. Unit Holders will be subject to tax on an amount equal to the net taxable income distribution plus attributable underlying tax paid by the Fund.

Income distributed to Unit Holders is generally taxable as follows in Malaysia :-

The tax credit that is attributable to the income distributed to the Unit Holders will be available for set off against tax payable by the Unit Holders. There is no withholding tax on taxable distributions made to non-resident Unit Holders.

Non-resident Unit Holders may also be subject to tax in their respective jurisdictions and depending on the provisions of the relevant tax legislation and any double tax treaties with Malaysia, the Malaysian tax suffered may be creditable in the foreign tax jurisdictions.

3.2 Tax Exempt Distribution

Tax exempt distributions made out of gains from realisation of investments and other exempt income earned by the Fund will not be subject to Malaysian tax in the hands of Unit Holders, whether individual or corporate, resident or non-resident. All Unit Holders do not pay tax on that portion of their income distribution from the Fund's distribution equalisation account.

3.3 Distribution Voucher

To help complete a Unit Holder's tax returns, the Manager will send to each Unit Holder a distribution voucher as and when distributions are made. This sets out the various components of the income distributed and the amount of attributable income tax already paid by the Fund.

3.4 Sale, Transfer or Redemption of Units

Any gains realised by a Unit Holder on the sale, transfer or redemption of his units are generally tax-free capital gains unless the Unit Holder is an insurance company, a financial institution or a person trading or dealing in securities. Generally, the gains realised by these categories of Unit Holders constitute business income on which tax is chargeable.

3.5 Reinvestment of Distribution

Unit Holders who receive their income distribution by way of investment in the form of the purchase of new units will be deemed to have received their income distribution after tax and reinvested that amount in the Fund.

3.6 Unit Splits
