ABOUT AHAM HARD CURRENCIES FIXED INCOME FUND

Fund Category	: Fixed Income (Wholesale)
Fund Type	: Income
Base Currency	: USD
Financial Year End	: 31 May
Distribution Policy	: Subject to the availability of income, the Fund will provide distribution on a quarterly basis.

INVESTMENT OBJECTIVE

The Fund seeks to provide investors with a steady income stream over the medium to long-term investment horizon through investments primarily in global fixed income instruments.

Any material change to the Fund's investment objective would require Unit Holders' approval.

PERFORMANCE BENCHMARK

USD Libor 3 months +1.5%

ASSET ALLOCATION

- A minimum of 70% of the Fund's NAV to be invested in fixed income instruments; and
- A maximum of 30% of the Fund's NAV to be invested in cash.

INVESTMENT STRATEGY

The Fund will focus on achieving its objective by investing a minimum of 70% of the Fund's NAV in fixed income instruments such as debentures, money market instruments and deposits with Financial Institutions.

We will combine a top-down and bottom-up investment approach to identify investment opportunities. Macroeconomic trends and market analysis are the important considerations in deriving the top-down perspective on interest rate outlook, fixed income markets and currency movements. For its bottom-up approach, we would conduct analysis on the issuers to assess its ability to service its debt obligations.

The selection will depend largely on its quality where the respective issuers display strong ability to meet their financial obligations, healthy cash-flow, the collateral type, value, claims priority as well as offer highest safety for timely payment of interest and principal.

To provide you with a broader investment reach, the Fund will have the flexibility to participate in global investment opportunities. However, to manage the volatility of the Fund, we will look towards maintaining a minimum of 70% of the Fund's exposure in USD. This will be achieved by either investing in USD denominated investments or hedging the non-USD denominated including but not limited to EUR, GBP, AUD and other hard currencies investments back to USD.

The Fund may invest in collective investment schemes that have a similar investment objective to the Fund.

The Fund may also use various portfolio management techniques (including without limitation when issued, delayed delivery, forward commitment, currency transactions, repurchase and reverse repurchase and securities lending transactions). The use of such portfolio management techniques will only be used in line with the best interests of the Fund with the aim of reducing certain risks associated with the Fund's investments, reducing costs and to generate additional income.

Derivatives

Derivative trades may be carried out for both investments and hedging purposes through financial instruments such as, but not limited to, forward contracts, futures contracts swaps, and options.

Embedded Derivatives

We may also invest in embedded derivatives such as, but not limited to, equity-linked notes and credit-linked notes. An investment into these embedded derivatives will provide the Fund with exposure to a referenced asset. As the note is structured by an external party, investments into an embedded derivative will also expose the Fund to counterparty risk, which we will attempt to mitigate by carrying out a stringent selection process on the counterparty prior to an investment being made.

Cross Trades

AHAM may conduct cross trades between funds which it is currently managing provided that all criteria imposed by the regulators are met. Notwithstanding the above, cross trades between the personal account of an employee of AHAM and the Fund's account(s) and between AHAM's proprietary trading accounts and the Fund's account(s) are strictly prohibited. Compliance with the criteria would be monitored by AHAM's Compliance Unit, and reported to AHAM's compliance and risk management committee, to avoid conflict of interests and manipulation that could have a negative impact on investors.

PERMITTED INVESTMENT

The Fund will invest in the following investments:

- Debentures
- Money market instruments
- Deposits
- Derivatives
- Embedded derivatives
- Units/shares in collective investment schemes
- Any other form of investments as may be determined by the Manager from time to time that is in line with the Fund's objective

INVESTMENT RESTRICTIONS AND LIMITS

- (a) The aggregate value of the Fund's investments in debentures, money market instruments, deposits and over-the-counter derivatives issued by or placed with (as the case may be) any single issuer/Financial Institution shall not exceed 25% of the Fund's NAV;
- (b) The value of the Fund's investments in debentures issued by any single issuer shall not exceed 20% of the Fund's NAV;
- (c) The single issuer limit in (b) may be increased to 30% if the debentures are rated by RAM, MARC, Standard & Poor's, Moody's or Fitch to be of the best quality and offer highest safety for timely payment of interest and principal (i.e. AAA rating by RAM or its equivalent rated by other rating agencies);
- (d) The aggregate value of the Fund's investments in debentures which are rated below the investment grade i.e. lower than BBB3 rating by RAM or below investment grade rating by other rating agencies, must not exceed 40% of the Fund's NAV;
- (e) For the purpose of (a), where the single issuer limit is increased to 30% pursuant to item (c), the aggregate value of the Fund's investments shall not exceed 30% of the Fund's NAV;

VALUATION POINT OF THE FUND

The Fund will be valued at 6.00 p.m. on every Business Day (or “trading day” or “T day”). However, if the Fund has exposure to investments outside of Malaysia, the Fund shall be valued at 11.00 a.m. on the next Business Day (or “T + 1 day”). All foreign assets are translated into the Base Currency based on the last available bid exchange rate quoted by Bloomberg/Refinitiv at 4.00 p.m. (United Kingdom time) which is equivalent to 11.00 p.m. or 12.00 midnight (Malaysian time) on the same day, or at such time as stipulated in the investment management standards issued by the FiMM.

VALUATION OF ASSETS

We will ensure that the valuation of the Fund is carried out in a fair manner in accordance to the relevant laws and Guidelines. We will obtain the daily price or value of the assets for the purpose of valuing the Fund in accordance to the Malaysian Financial Reporting Standard 9 issued by the Malaysian Accounting Standards Board. In the absence of daily price or value of the assets, we will use the latest available price or value of the assets respectively. The valuation bases for the permitted investments of the Fund are as below:

➤ **Listed debentures**

Valuation of investments listed debentures shall be based on the official closing prices or last known transacted price on the eligible market on which the investment is quoted. If the price is not representative of its fair value or is not available to the market, including in the event of suspension in the quotation of the listed debentures for a period exceeding fourteen (14) days, or such shorter period as agreed by the Trustee, such listed debentures will be valued at fair value determined in good faith by the Manager or its delegate, based on methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

➤ **Unlisted debentures**

For unlisted MYR denominated debentures, valuation will be done using the price quoted by a Bond Pricing Agency (“BPA”) registered with the SC. For non-MYR denominated unlisted debentures, valuation will be based on the average indicative price quoted by independent and reputable institutions. Where the Manager is of the view that the price quoted by BPA differs from the fair value or where reliable market quotations are not available, the fair value will be determined in good faith by the Manager using methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

For other unlisted securities, valuation will be based on fair value as determined in good faith by the Manager using methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

➤ **Money market instruments**

Valuation of MYR denominated money market instruments will be done using the price quoted by a BPA registered with the SC. For non-MYR denominated money market instruments, valuation will be done using an average of quotations provided by reputable Financial Institutions. Where the Manager is of the view that the price quoted by BPA differs from fair value or where reliable market quotations are not available, the fair value will be determined in good faith by the Manager using methods or bases which have been verified by the auditor of the Fund and approved by the Trustee. This may be determined by reference to the valuation of other money market instruments which are comparable in rating, yield, expected maturity date and/or other characteristics.

➤ **Deposits**

Valuation of deposits placed with Financial Institutions will be done by reference to the principal value of deposits and the interests accrued thereon for the relevant period.

➤ **Derivatives and embedded derivatives**

Valuation of derivatives and embedded derivatives will be based on the price provided by the respective issuers. The issuers generate the market valuation through the use of their own proprietary valuation models, which incorporates all the relevant and available market data with respect to the derivatives and embedded derivatives (e.g. interest rates, movement of the underlying assets, volatility of the underlying assets, the correlation of the underlying assets and such other factors). For foreign exchange forward contracts (“FX Forwards”), interpolation formula is applied to compute the value of the FX Forwards based on the rates provided by Bloomberg or Refinitiv. If the rates are not available on Bloomberg or Refinitiv, the FX Forwards will be valued based on fair value as determined in good faith by the Manager using methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

➤ **Collective investment schemes**

Valuation in investments in unlisted collective investment schemes shall be based on the last published repurchase price.

Valuation in investments in listed collective investment schemes shall be done in a similar manner used in the valuation of listed debentures as described above.

➤ **Any other investments**

Fair value as determined in good faith by the Manager, based on the methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

The Fund may create new classes of Units without having to seek Unit Holders' prior approval. You will be notified of the issuance of the new classes of Units by way of a communiqué and the prospective investors will be notified of the same by way of a supplemental/replacement information memorandum.

UNDERSTANDING THE RISKS OF THE FUND

Below are the risks associated with the investments of the Fund that you should consider before investing.

GENERAL RISKS OF THE FUND	
Market risk	Market risk arises because of factors that affect the entire market place. Factors such as economic growth, political stability and social environment are some examples of conditions that have an impact on businesses, whether positive or negative. It stems from the fact that there are economy-wide perils, or instances of political or social instability which threaten all businesses. Hence, the Fund will be exposed to market uncertainties and fluctuations in the economic, political and social environment that will affect the market price of the investments either in a positive or negative way.
Fund management risk	This risk refers to the day-to-day management of the Fund by us which will impact the performance of the Fund. For example, investment decisions undertaken by us as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error, fraud, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.
Liquidity risk	Liquidity risk refers to two scenarios. The first scenario is where an investment cannot be sold due to the unavailability of a buyer for that investment. The second scenario exists where the investment, by its nature, is thinly traded. This will have the effect of causing the investment to be sold below its fair value which would adversely affect the NAV of the Fund and subsequently the value of Unit Holders' investments in the Fund. Upon such event and in the best interest of the Unit Holders, the Manager may suspend the repurchase of Units requests. Please refer to " <i>Suspension of Dealing in Units</i> " section of this Information Memorandum for more detail.
Performance risk	The performance of the Fund depends on the financial instruments that the Fund purchases. If the instruments do not perform within expectation or if there is a default, then, the performance of the Fund will be impacted negatively. The performance of the Fund may also be impacted if the allocation of assets is not properly done. This is where the experience and expertise of the fund managers are important and the risk on the lack of experience and expertise of the fund managers has been highlighted above. On that basis, there is never a guarantee that investing in the Fund will produce the desired investment returns or on the distribution of income.
Inflation risk	This is the risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
Loan / Financing risk	This risk occurs when you take a loan/financing to finance your investment. The inherent risk of investing with borrowed/financed money includes you being unable to service the loan/financing repayments. In the event Units are used as collateral, you may be required to top-up your existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower NAV per Unit as compared to the NAV per Unit at the point of purchase towards settling the loan/financing.
Operational risk	This risk refers to the possibility of a breakdown in the Manager's internal controls and policies. The breakdown may be a result of human error, system failure or may be fraud where employees of the Manager collude with one another. This risk may cause monetary loss and/or inconvenience to you. The Manager will review its internal policies and system capability to mitigate instances of this risk. Additionally, the Manager maintains a strict segregation of duties to mitigate instances of fraudulent practices amongst employees of the Manager.

Suspension of repurchase request risk	Having considered the best interests of Unit Holders, the repurchase requests by the Unit Holders may be subject to suspension due to exceptional circumstances, where the market value or fair value of a material portion of the Fund's assets cannot be determined or such other circumstances as may be determined by the Manager, where there is good and sufficient reason to do so. In such case, Unit Holders will not be able to redeem their Units and will be compelled to remain invested in the Fund for a longer period of time. Hence, their investments will continue to be subject to the risks inherent to the Fund.
Related Party Transaction Risk	The Fund may also have dealings with parties related to AHAM. Nevertheless, it is our policy that all transactions with related parties are to be executed on terms which are best available to the Fund and which are not less favourable to the Fund than an arm's length transaction between independent parties.

SPECIFIC RISKS OF THE FUND	
Credit and default risk	Credit risk relates to the creditworthiness of the issuers of the debentures and money market instruments and the Financial Institutions where the deposits are placed (hereinafter referred to as "investment") and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer and/or Financial Institution may impact the value as well as liquidity of the investment. In the case of rated investments, this may lead to a credit downgrade. Default risk relates to the risk of an issuer and/or a Financial Institution of the investment either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the investment. This could adversely affect the value of the Fund.
Interest rate risk	This risk refers to the impact of interest rate changes on the valuation of debentures or money market instruments (hereinafter referred to as "investment"). Generally, movement in interest rates affects the prices of investment inversely. For example, when interest rates rise, prices of investment will fall. The fluctuations of the prices of investment will also have an impact on the NAV of the Fund. This risk can largely be eliminated by holding the investment until their maturity. We also manage interest rate risk by considering each investment's sensitivity to interest rate changes. When interest rates are expected to increase, the Fund would then likely seek to switch to investment that are less sensitive to interest rate changes. For investments in deposits, the fluctuations in the interest rates will not affect the placement of deposits but will result in the opportunity loss by the Fund if the placement of deposits is made at lower interest rate.
Derivatives risk	Valuation of derivatives takes into account a multitude of factors such as movement of the underlying assets, the correlation of the underlying assets with the Fund, the implied future direction of the underlying assets and other factors. Any diverse changes of the factors mentioned above, may result in a lower NAV price and higher volatility for the Fund's NAV.
Embedded derivatives risk	The NAV of the Fund will be impacted by the valuation of the embedded derivatives. Factors that may impact the valuation of the embedded derivatives will include, but not limited to movement of the underlying asset, volatility of the underlying assets, interest rate levels, the correlation of the underlying assets and other such factors. Any change in the aforesaid factors would either positively or negatively impact the valuation of the embedded derivatives hence impacting the NAV of the Fund. As such, the Fund's NAV will be exposed to potential price volatility, which will be dependent on the valuation of the embedded derivatives that the Fund invested in.
Counterparty risk	Counterparty risk concerns the Fund's investment in derivatives ("Investments"). Counterparty risk is prevalent as the potential returns derived from the Investments are dependent on the ongoing ability and willingness of the issuer i.e. a Financial Institution to fulfill their respective financial commitments in a timely manner. Bankruptcy, fraud or regulatory non-compliance arising out of and/or in connection with the issuer may impair the operations and/or the performance of the Fund. However, we will conduct stringent credit selection process of the issuer of the Investments prior to commencement of Investments and monitoring mechanisms established by us may potentially mitigate this risk. If, we are of the opinion there is material adverse change to an issuer, we may consider unwinding the issuer's Investments to mitigate potential losses that may arise.

SPECIFIC RISKS OF THE FUND	
Currency risk	As the investments of the Fund may be denominated in currencies other than the Base Currency, any fluctuation in the exchange rate between the Base Currency and the currencies in which the investments are denominated may have an impact on the value of these investments. You should be aware that if the currencies in which the investments are denominated depreciate against the Base Currency, this will have an adverse effect on the NAV of the Fund in the Base Currency and vice versa. You should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.
Country risk	Investments of the Fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV of the Fund or prices of Units to fall.

! It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are recommended to read the whole Information Memorandum to assess the risks associated with the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.

DEALING INFORMATION

You are advised not to make payment in cash to any individual agent when purchasing Units of the Fund.
