#### 5. What are the possible outcomes of my investment?

The Fund invests in growth and income Shariah-compliant stocks irrespective of market. The Fund's investment into mainly local equities would to a great extent, be linked to the price movements of the local equity market. If the local equities that are investable by the Fund performs well, the Fund's performance may reflect the same. However, should the local equities that are investable by the Fund performs poorly, the Fund's performance may also be impacted negatively.

Distribution of income is incidental and will be subject to the availability of income. Please note that the capital and returns of the Fund are not guaranteed.

### KEY RISKS

#### 6. What are the key risks associated with this product?

##### General risks

- **Affected by variable factors and not guaranteed** - The performance of a unit trust fund is affected by many variable factors and is not guaranteed. These include overall economic and financial market conditions such as interest rate fluctuation and stability of local currency. While a track record may provide some insight on future performance, it is by no means guaranteed. The prices of Units may go down as well as up. Likewise, distribution may vary from year to year depending on the performance of the unit trust fund.
- **Issuer risk** - The value of each individual securities that a unit trust fund invests in may decline for a number of reasons which is directly related to the issuer, such as but not limited to, the management performance, financial leverage, changing industry conditions and changes in consumer tastes and demand.

\* At our discretion, we may reduce the transaction value and Units, including for transactions made via digital channels, subject to terms and conditions disclosed in the respective channels.

- **Fund management risk** – This risk refers to the day-to-day management of the Fund by the Manager which will impact the performance of the Fund. For example, investment decisions undertaken by the Manager as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error, fraud, dishonesty, or weaknesses in operational process and systems, may adversely affect the performance of the Fund.
- **Financing risk** – This risk occurs when you take a financing to finance your investment. The inherent risk of investing with finance money includes you being unable to service the financing payments. In the event Units are used as collateral, you may be required to top-up your existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower NAV per unit as compared to the NAV per unit at the point of purchase towards settling the financing.
- **Suspension of repurchase request risk** - Having considered the best interests of Unit Holders, the repurchase requests by the Unit Holders may be subject to suspension due to exceptional circumstances, where the market value or fair value of a material portion of the Fund's assets cannot be determined. In such case, Unit Holders will not be able to redeem their Units and will be compelled to remain invested in the Fund for a longer period of time. Hence, their investments will continue to be subject to the risks inherent to the Fund.

#### Specific risks

- **Shariah-compliant equity and Shariah-compliant equity linked instruments investment risk** – The buying and selling of Shariah-compliant equities and Shariah-compliant equity linked instruments (hereinafter referred to as “Shariah-compliant equities”) carry a number of risks. The most important being the volatility of the capital markets (of those tradable Shariah-compliant equities), the general insolvency risk associated with the issuers of Shariah-compliant equities, and/or the performance of the underlying equity that the Shariah-compliant equity linked instrument is linked to.  

The value of the Shariah-compliant equities depends on its growth and earning potential, sound management, treatment of minority shareholders, as well as a myriad of other factors. Failure to achieve the expected earnings would result in declining investment value which in turn affects the performance of the Fund. This risk can be mitigated by diversifying the Fund's portfolio. The Manager will employ stringent Shariah-compliant stock selection criteria which would effectively filter its Shariah-compliant stock components to Shariah-compliant equities which may provide returns to the Fund in the form of capital gains and income.
- **Market risk** – Market risk arises because of factors that affect the entire market. Factors such as economic growth, political stability and social environment are some examples of conditions that have an impact on businesses, whether positive or negative. Market risk cannot be eliminated but may be reduced through diversification. It stems from the fact that there are economy-wide perils, or instances of political or social instability which threaten all businesses. Hence, the Fund will be exposed to market uncertainties and no matter how many securities are held, fluctuations in the economic, political and social environment will affect the market price of the investments either in a positive or negative way.
- **Specific Shariah-compliant stock risk** – Prices of a particular Shariah-compliant stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such Shariah-compliant stock will adversely affect the Fund's NAV.
- **Liquidity risk** – Liquidity risk refers to two scenarios. The first is where an investment cannot be sold due to unavailability of a buyer for that investment. The second scenario exists where the investment, by its nature, is thinly traded. This will have the effect of causing the investment to be sold below its fair value which would adversely affect the NAV of the Fund and subsequently the value of Unit Holders' investments in the Fund.
- **Credit and default risk** – Credit risk relates to the creditworthiness of the issuers of the Sukuk or Islamic money market instruments investment and the Financial Institutions where the Islamic deposits are placed (hereinafter referred to as “investment”) and their expected ability to make timely payment of profit and/or principal. Any adverse situations faced by the issuer and/or Financial Institution may impact the value as well as liquidity of the investment. In the case of rated investments, this may lead to a credit downgrade. Default risk relates to the risk of an issuer and/or Financial Institution of the investment either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the investment. This could adversely affect the value of the Fund.
- **Profit rate risk** – This risk refers to the impact of profit rate changes on the valuation of Sukuk or Islamic money market instruments (hereinafter referred to as “investment”). Generally, movement in profit rates affect the prices of investment inversely. For example, when profit rates rise, prices of investment will fall. The fluctuations of the prices of investment will also have an impact on the NAV of the Fund. This risk can largely be eliminated by holding investment until their maturity. We also manage profit rate risk by considering each investment's sensitivity to profit rate changes. When profit rates are expected to increase, the Fund would then likely seek to switch to investment that are less sensitive to profit rate changes. For investments into Islamic deposits, the fluctuations in the profit rates will not affect the placement of Islamic deposits but will result in the opportunity loss by the Fund if the placement of Islamic deposits is made at lower profit rate.

- **Shariah-compliant warrants investment risk** – The value of the Shariah-compliant warrants will depend on the pricing of the underlying security whereby the growth and performance prospect of the underlying security would consequentially affect the value of the Shariah-compliant warrants. In addition, the value of the Shariah-compliant warrants may decrease exponentially as the Shariah-compliant warrants approach its maturity date and the potential gains from a favourable price movement of the underlying may be offset by aggressive time decay. We may consider unwinding these Shariah-compliant warrants if there are material adverse changes to its value with the aim to mitigate the risk.
- **Islamic collective investment scheme risk** – Any adverse effect on the Islamic collective investment scheme which the Fund is investing in will impact the NAV of the Fund. For example, the respective Islamic collective investment schemes may underperform its benchmarks due to poor market conditions and as a result, the NAV of the Fund will be adversely affected as the performance of the Fund is dependent on the performance of the respective Islamic collective investment schemes. In addition, any mismanagement of the Islamic collective investment scheme or poor decisions taken on the Islamic collective investment scheme may adversely affect the NAV of the Islamic collective investment scheme and hence the Fund.
- **Reclassification of Shariah status risk** – This risk refers to the risk that the currently held Shariah-compliant equities in the Fund may be reclassified to be Shariah non-compliant in the periodic review of the equities by the SACSC, the Shariah Adviser or the Shariah boards of the relevant Islamic indices. If this occurs, we will take the necessary steps to dispose of such equities. There may be opportunity loss to the Fund due to the Fund not being allowed to retain the excess capital gains derived from the disposal of the Shariah non-compliant equities. We will be required to dispose-off these equities immediately if the prices are above the purchase price. Should the prices be below the purchase price, we may choose to hold on to these holdings until the prices meet the purchase price. Nevertheless, should we decide to dispose-off these equities below the purchase price, the Fund will be faced with the risk of realising its losses, thus negatively impacting the NAV of the Fund. Please refer to “*Shariah Investment Guidelines*” of this Prospectus on the Fund’s Shariah methodology on the treatment of gains and losses as a result of the reclassification of Shariah non-compliant equities.
- **Currency risk** – As the investments of the Fund may be denominated in currencies other than the base currency of the Fund, any fluctuation in the exchange rate between the base currency of the Fund and the currencies in which the investments are denominated may have an impact on the value of these investments. You should be aware that if the currencies in which the investments are denominated depreciate against the base currency of the Fund, this will have an adverse effect on the NAV of the Fund in the base currency of the Fund and vice versa. You should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.
- **Country risk** – Investments of the Fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests in. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV of the Fund and prices of Units to fall.

**Note:** Please refer to the Fund’s Prospectus for further details on the general and specific risks.

It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are recommended to read the whole Prospectus to assess the risks associated with the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.

Source: Bloomberg

For the period 1 April 2023 to 31 March 2024, the Fund registered a 21.79% return compared to the benchmark return of 8.65%. The Fund thus outperformed the Benchmark by 13.14%. Since commencement, the Fund has registered a return of 104.74% compared to the benchmark return of 23.74%, outperforming by 81.00%.

Basic of calculation and assumption made in calculating the returns

The performance figures are a comparison of the growth/decline in NAV for the stipulated period taking into account all the distribution payable (if any) during the stipulated period.

Capital return = NAV per Unit end / NAV per Unit begin – 1  
 Income return = Income distribution per Unit / NAV per Unit ex-date  
 Total return = (1+Capital return) x (1+Income return) – 1

**Income Distribution**

Financial Year End	31 March 2024	31 March 2023	31 March 2022
Gross distribution per Unit (sen)	1.27	2.00	2.00
Net distribution per Unit (sen)	1.27	2.00	2.00

Distribution will be automatically reinvested into additional Units of the Fund.

**Portfolio Turnover Ratio (PTR)**

Financial Year End	31 March 2024	31 March 2023	31 March 2022
PTR (times)	0.79	0.81	0.93

The Fund recorded a lower PTR than previous year due to lower trading activities for the financial year.
