| Investment Strategy  | <p>The Fund will be investing a minimum of 80% of the Fund's NAV in the Target Fund and a maximum of 20% of the Fund's NAV in money market instruments, deposits and/or cash. The Fund may also have the flexibility to invest in non-US related money market instruments, deposits and/or cash.</p> <p>We may take temporary defensive positions that may be inconsistent with the Fund's principal strategy by reducing its investment in the Target Fund and raise the liquidity levels of the Fund during adverse market conditions to protect the Unit Holders' interest. In raising the Fund's liquidity levels, we may also invest in CIS that are able to meet the Fund's investment objective.</p> <p>We may substitute the Target Fund with another fund that has a similar investment objective with the Fund, if, in our opinion, the Target Fund no longer meets the Fund's investment objective. However, this is subject to the Unit Holder's approval before such changes are made.</p> <p><b>Derivatives</b></p> <p>We may use derivatives, such as foreign exchange forward contracts and cross currency swaps, mainly for hedging purposes. Cross currency swaps and/or foreign exchange forward contracts may be used to hedge the principal and/or the returns of the foreign currency exposure of any of the Classes against the</p> |                  |                  |                  |

|                                   | Base Currency. The employment of derivatives under these circumstances is expected to reduce the impact of foreign currency movement of the Fund's NAV, irrespective of the currency classes. While the hedging strategy will assist in mitigating the potential foreign exchange losses by the Fund, any potential foreign exchange gains from the hedging strategy will be capped as well. The Fund may also employ derivatives for investment purposes to enhance the returns of the Fund by taking a view on the underlying asset or currency and establish a long position to gain a specific underlying exposure. The types of derivatives envisaged for investment purposes include forwards and swaps which are OTC or traded on centralised exchanges. |              |              |              |

## Asset Management

### 5. What are the possible outcomes of my investment?

The Fund is a wholesale feeder fund that invests in the Target Fund, which in turn invests in equities globally. The performance of this Fund would to a great extent be linked to the price movements of the Target Fund which in turn is reliant on the performance of the underlying investments that it is invested in.

As such, the value of your investments will be reliant on the performance of the Target Fund. This means that if the Target Fund performs well, the Fund may reflect similar performance and likewise if the performance of the Target Fund falls, the value of your investment will also be affected. The Fund's performance is dependent on the investment manager's expertise in managing the Fund.

The Fund is not expected to make distribution. However, incidental distribution may be declared whenever is appropriate.

Please note that the capital and returns of the Fund are not guaranteed.

## KEY RISKS

### 6. What are the key risks associated with this product?

#### General Risks

- **Market risk** – Market risk arises because of factors that affect the entire market place. Factors such as economic growth, political stability and social environment are some examples of conditions that have an impact on businesses, whether positive or negative. It stems from the fact that there are economy-wide perils, or instance of political or social instability which threaten all businesses. Hence, the Fund will be exposed to market uncertainties and fluctuations in the economic, political and social environment that will affect the market price of the investments either in a positive or negative way.
- **Fund management risk** – This risk refers to our day-to-day management of the Fund which will impact the performance of the Fund. For example, the investment decisions undertaken by us, as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error, fraud, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.
- **Performance risk** – The performance of the Fund very much depends on the performance of the Target Fund. If the Target Fund does not perform in accordance with its objective, the performance of the Fund will also be impacted negatively. The performance of the Target Fund and consequently of this Fund may go down as well as up, depending on the circumstances prevailing at a particular given time. On that basis, there is never a guarantee that investing in the Fund will produce a positive investment returns in accordance with its objective.
- **Inflation risk** – This is the risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
- **Loan financing risk** – This risk occurs when you take a loan/financing to finance your investment. The inherent risk of investing with borrowed money includes you being unable to service the loan repayments. In the event Units are used as collateral, you may be required to top-up your existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower NAV per Unit as compared to the NAV per Unit at the point of purchase towards settling the loan.
- **Operational risk** – Operational risk is the risk of loss due to the breakdown, deficiencies or weaknesses in the operational support functions resulting in the operations or internal control processes producing an insufficient degree of customer quality or internal control by the Manager. Operational risk is typically associated with human error, system failure, fraud and inadequate or defective procedures and controls.

#### Specific Risks

- **Concentration risk** – This Fund is a feeder fund which invests in a single CIS. Any adverse effect on the Target Fund will inevitably affect the Fund as well. The performance of the Fund is also dependent on the performance of the Target Fund.
- **Liquidity risk** – This is the risk that the Shares of the Target Fund that is held by the Fund cannot be readily sold and converted into cash. This can occur when there is a restriction on realisation of shares of the Target Fund. The Investment Manager may suspend the realisation of shares, or delay the payment of realisation proceeds in respect of any realisation request received, during any period in which the determination of the net asset value of the Target Fund is suspended. As a result, the Fund may not be able to receive the repurchase proceeds in a timely manner which in turn may delay the payment of repurchase proceeds to the Unit Holders.

## Asset Management

- **Suspension of dealing in Units risk** – The Fund may be at risk of having a temporarily suspension of dealing in Units or deferment of the calculation of net asset value in the Target Fund and/or its Share Class when the following occurs:
  - any exchange or market, on which a substantial portion of the Target Fund's investments is traded, is closed, otherwise than for public holidays, or while dealings on any such exchange or market are restricted or suspended;
  - the Company is unable to repatriate funds for the purpose of making payments on the redemption of the Shares of the Target Fund or during which any transfer of the funds involved in the realisation or acquisition of investments or payments due on redemption of Shares cannot, in the opinion of the Directors, be effected at normal prices or rates of exchange;
  - a breakdown exists in the means of communications or computation normally employed in determining any of the Target Fund's assets, or the current price or values on any market of stock exchange;
  - the Company, the Target Fund or the Share Class is being, or may be, wound-up on or following the date on which notice is given of the meeting of Shareholders at which a resolution to wind up the Company, the Target Fund or the Share Class is proposed;
  - any state of affairs exists that, in the view of the Investment Manager, constitutes an emergency as a result of which disposal or valuation of investments of the Target Fund by the Company is impracticable;
  - the Management Company has determined that there has been a material change in the valuation of a substantial proportion of the investments of the Company attributable to the Target Fund, and has further decided, in order to safeguard the interests of the Shareholders and the Company, to delay the preparation or use of a valuation or carry out a later or subsequent valuation;
  - in the case of a suspension of the calculation of the net asset value of one or several underlying investment funds in which the Target Fund has invested a substantial portion of assets;
  - in the case of a merger, if the Investment Manager deems this to be justified for the protection of the Shareholders;
  - any other circumstance exists where a failure to do so might result in the Company or its Shareholders incurring any liability to taxation or suffering other pecuniary disadvantages or other detriment that the Company or its Shareholders might not otherwise have suffered.

A suspension will apply to all types of dealings in Shares (except transfers) and will apply at the Target Fund or Share Class level as applicable.

In connection with suspensions, the Company will refuse to accept requests to buy, switch or redeem Shares during the time the Investment Manager has suspended the calculation of net asset value of the Target Fund. During this time Shareholders may withdraw their request. Any requests that are not withdrawn will be dealt on the next valuation day once the suspension is over.

Unit Holders will be informed of any suspension or deferment as appropriate.

- **Country risk** – Investments of the Fund in the Target Fund which is domiciled in Luxembourg may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of Luxembourg. For example, the deteriorating economic condition of that country may adversely affect the value of the investments undertaken by the Fund and in turn may cause the NAV of the Fund to fall.
- **Currency risk** – As the investments of the Fund may be denominated in currencies other than the Base Currency, any fluctuation in the exchange rate between the Base Currency and the currencies in which the investments are denominated may have an impact on the value of these investments. You should be aware that if the currencies in which the investments are denominated depreciate against the Base Currency, this will have an adverse effect on the NAV of the Fund in the Base Currency and vice versa. You should note that any gain or loss arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

### *Currency risk at the Fund level*

The impact of the exchange rate movement between the Base Currency and the currency of the underlying investments (other than in USD) may result in a depreciation of the value of the investments as expressed in the Base Currency.

### *Currency risk at the Class level*

The impact of the exchange rate movement between the Base Currency and the currency of the respective Classes (other than USD Class) may result in a depreciation of your holdings as expressed in the Base Currency.

## Asset Management

### Currency risk at the Hedged-class level

Currency hedging reduces the effect of exchange rate movements for the Hedged-class, but it does not entirely eliminate currency risk between the Hedged-class and the Base Currency (not a perfect hedge). Hence, the unhedged portion of the respective Hedged-class will be affected by the exchange rate movements and it may cause fluctuation of NAV of the respective Hedged-class. You should note, however, that if the exchange rate moves favourably, the Fund would not benefit from any upside in currency movement due to the hedging strategy.

- **Investment Manager risk** – As a feeder fund, the Fund invests into the Target Fund which is managed by the Investment Manager. We have no control over the investment technique and knowledge, operational controls and management of the Investment Manager. In the event of any mismanagement of the Target Fund, the NAV of the Fund, which invests substantially all of its assets into the Target Fund, would be affected adversely.

*Note: Please refer to “Understanding the Risks of the Fund and the Target Fund” in Information Memorandum for further details on each risk.*

**It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are recommended to read the whole Information Memorandum to assess the risks associated with the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.**
