ASSET ALLOCATION

Defensive Assets	Minimum 90%
Active Assets	Maximum 10%

INVESTMENT STRATEGY

We strive to achieve capital preservation[#] of the Fund by investing a minimum of 90% of the Fund's NAV in Defensive Assets. The maturity proceeds from the investments in Defensive Assets could potentially match the capital of the Unit Holders (including Sales Charge and GST imposed on the subscription of Units during the Offer Period), subject to no occurrence of credit default by the Financial Institutions.

In order to provide potential capital appreciation of the Fund, we may invest up to a maximum of 10% of the Fund's NAV in Active Assets. At the Investment Date of the Fund, the Fund will only invest in one type of Active Assets, and will remain so until the Maturity Date of the Fund. We will evaluate the underlying asset of the Active Assets, i.e. a collective investment scheme (CIS) regulated in an eligible market, where we are of the view that the CIS may rise in value and may be able to provide income to the Fund. Subsequently, it enables the Fund to provide potential income distribution to the investors. You should note that investment in Active Assets will expose you to the price fluctuations of the CIS. As a result, it may also lead to fluctuations in the NAV of the Fund i.e. if the price of the Active Assets drops, the NAV of the Fund will also be negatively impacted. As the Active Assets are structured by an external party, investments into the Active Assets will also expose the Fund to counterparty risk, which we will attempt to mitigate by carrying out a stringent selection process on the counterparty prior to an investment being made. You will be informed of the type of the Active Assets and its underlying asset of which the Fund will be invested into via a Communiqué after the end of the Offer Period.

The currency denomination of the Active Assets that the Fund intends to invest into may be in a currency that differs from that of the Base Currency. As such, the Fund will be exposed to currency risk arising from the currency exchange between the denomination of the Active Asset and the denomination of the Base Currency. For example, if the Base Currency is MYR, and the denomination of the Active Asset is EUR, the Fund is then exposed to the currency fluctuation of the EURMYR. With the assumption that the performance of the Active Asset remains unchanged, the value of the Active Asset will be negatively impacted should MYR appreciate against the EUR, thus negatively impacting the Fund's NAV. Similarly, the value of the Active Asset will appreciate should the MYR depreciate against the EUR, thus leading to a positive rise in the Fund's NAV.

The Fund will invest only into countries where the regulatory authorities are ordinary or associate members of the International Organization of Securities Commissions.

In line with the Fund's objective, we will employ a buy and hold strategy for the Fund's investments. As such, the Fund will make its investments into its Defensive Assets and its Active Assets at the Investment Date and remain invested until the Maturity Date of the Fund.

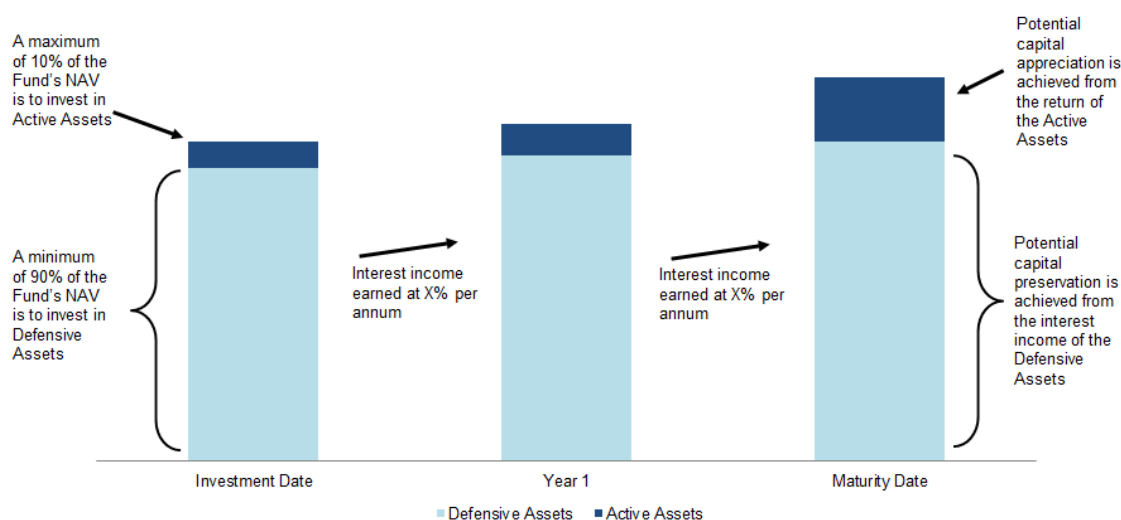

At the Maturity Date of the Fund, we will redeem or sell all the assets of the Fund, and return all the proceeds to you (based on the number of Units you hold) after deducting applicable Fund expenses and fees. The proceeds is expected to be paid to you within two (2) weeks from the Maturity Date.

Please refer to "Pertinent Information of the Fund" section for a better understanding of the mechanics of the investment return of the Fund.

[#] The Fund is not a capital guaranteed nor a capital protected fund.

PERTINENT INFORMATION OF THE FUND

The following chart depicts the potential capital preservation[#] and potential capital appreciation during the tenure of the Fund:

Below is an illustration on how the potential capital preservation[#] is achieved by investing in Defensive Assets. Let's assume the following:

Total asset of the Fund as at the Investment Date	MYR 98 million
Total Sales Charge and GST imposed on the subscription of Units during the Offer Period	MYR 2 million
Investment in Defensive Assets as at Investment Date	MYR 94 million ¹
Interest rate	4.2%
Interest income as at Year 1	MYR 94 million x 4.2% = MYR 3.95 million
Value of the investment as at Year 1	MYR 94 million + MYR 3.95 million = MYR 97.95 million
Interest income as at Maturity Date	MYR 97.95 million x (4.2% ÷ 2) = MYR 2.05 million
Value of the investment as at Maturity Date	MYR 97.95 million + MYR 2.05 million = MYR 100.00 million

Formula for calculating:-

Interest income as at Year 1	= Investment in Defensive Assets as at Investment Date x interest rate
Value of the investment as at Year 1	= Investment in Defensive Assets as at Investment Date + Interest income as at Year 1
Interest income as at Maturity Date	= Value of the investment as at Year 1 x (interest rate ÷ 2) ²
Value of the investment as at Maturity Date	= Value of the investment as at Year 1 + Interest income as at Maturity Date

The total amount of the *value of the investment as at Maturity Date* is equivalent to the *total asset of the Fund as at the Investment Date* plus *total Sales Charge and GST imposed on the subscription of Units during the Offer Period*.

[#] The Fund is not a capital guaranteed nor a capital protected fund.

¹ This figure is the present value (PV) of the NAV of the Fund as at the Investment Date. The PV is the current worth of a future sum of money or stream of cash flows, given a specified rate of return. With regards to the above, the PV of the NAV of the Fund at the Investment Date has to be calculated in order to ascertain the exact amount that we can place in the Defensive Assets, based on the interest rate of the money market instruments and/or the deposits could achieve.

² The interest rate is an annualised figure. As the Maturity Date falls on the sixth (6th) month of that particular year, the interest rate is to be divided by 2.

Below is an illustration on how the potential capital appreciation is achieved by investing in the Active Assets. Let's assume the following:

Investment Date	
Total asset of the Fund as at Investment Date	MYR 98 million
Total Sales Charge and GST imposed on the subscription of Units during the Offer Period	MYR 2 million
Notional amount of the Active Assets	MYR 100 million
EURMYR exchange rate	5.00
Denomination of Active Assets	EUR

It is important to note that the amount of potential income distribution is subject to deduction of the applicable fees and expenses of the Fund.

What is a participation rate?

In this section, you will be introduced to the term "participation rate". It is defined as the exposure of the Fund to movements in the price of its investment in the Active Assets, which is proportionally linked to the movement in the price of the underlying asset. For example, a participation rate of 200% means that the Fund would receive a return equivalent to 200% increase in the price of the underlying asset. The participation rate below is for illustration purposes and is indicative only. The participation rate can only be locked in at the Investment Date of the Fund.

What is a notional amount?

The notional amount is the amount as stated in a contract entered into by the issuer of the Active Assets and the Manager and the Trustee, as the case may be, on behalf of the Fund for the purchase of the Active Assets. It is the basis for calculating the potential income distribution of the Fund and at all times, the notional amount is equivalent to the total asset of the Fund as at the Investment Date plus total Sales Charge and GST imposed on the subscription of Units during the Offer Period.

Scenario 1		Price of the Underlying Asset (P)	Participation rate (PR)	EURMYR exchange rate (FX)
Investment Date	0	EUR 100	200%	5.00
Maturity Date	1	EUR 105		5.25

Maturity Date	
Performance rate of the Active Assets	$= PR \times [(P_1 - P_0) / P_0] \times 100\%$ $= 200\% \times [(105 - 100) / 100] \times 100\%$ $= 200\% \times (EUR 5 / 100) \times 100\%$ $= 200\% \times (0.05 \times 100\%)$ $= 200\% \times 5\%$ $= 10\%$ <p>At the Maturity Date, the price of the underlying asset is increased from EUR 100 to EUR 105 which is equivalent to 5% during the period. Guided by the assumption of 200% participation rate, the performance rate of the Active Assets is increased to 10% as the 5% return of the underlying asset is increased proportionally by the 200% participation rate.</p>
Investment payout rate in EUR (Performance rate of the Active Assets or 0%, whichever is higher)	= 10%
Investment payout rate in MYR	$= \text{Investment payout rate in EUR} \times FX_1 / FX_0$ $= 10\% \times FX_1 / FX_0$ $= 10\% \times 5.25 / 5.00$ $= 10\% \times 1.05$ $= 10.5\%$

Scenario 1		Price of the Underlying Asset (P)	Participation rate (PR)	EURMYR exchange rate (FX)
Investment Date	0	EUR 100	200%	5.00
Maturity Date	1	EUR 105		5.25

	As the Base Currency is in MYR, the investment payout rate of the Active Assets will be converted to MYR using the ratio of EURMYR exchange rate as at Maturity Date over the EURMYR exchange rate as at Investment Date. During the period, the EUR has appreciated against MYR from 5.00 as at Investment Date to 5.25 as at Maturity Date; hence the investment payout rate in MYR is 10.5%.
Potential income distribution in MYR as at Maturity Date	<p>Investment payout rate in MYR x notional amount = 10.5% x MYR 100 million = MYR 10.5000 million</p> <p>To obtain the potential income distribution as at Maturity Date, the investment payout rate in MYR is to be multiplied by the notional amount of the Active Assets. Thus, the potential income distribution in MYR as at Maturity Date is MYR 10.5000 million.</p>

Scenario 2		Price of the Underlying Asset (P)	Participation rate (PR)	EURMYR exchange rate (FX)
Investment Date	0	EUR 100	200%	5.00
Maturity Date	1	EUR 104		4.75

Maturity Date	
Performance rate of the Active Assets	$= PR \times [(P_1 - P_0) / P_0] \times 100\%$ $= 200\% \times [(104 - 100) / 100] \times 100\%$ $= 200\% \times (EUR 4 / 100) \times 100\%$ $= 200\% \times (0.04 \times 100\%)$ $= 200\% \times 4\%$ $= 8\%$ <p>At the Maturity Date, the price of the underlying asset is increased from EUR 100 to EUR 104 which is equivalent to 4% during the period. Guided by the assumption of 200% participation rate, the performance rate of the Active Assets is increased to 8% as the 4% return of the underlying asset is increased proportionally by the 200% participation rate.</p>
Investment payout rate in EUR <i>(Performance rate of the Active Assets or 0%, whichever is higher)</i>	= 8%
Investment payout rate in MYR	$= \text{Investment payout rate in EUR} \times FX_1 / FX_0$ $= 8\% \times FX_1 / FX_0$ $= 8\% \times 4.75 / 5.00$ $= 8\% \times 0.95$ $= 7.6\%$ <p>As the Base Currency is in MYR, the investment payout rate of the Active Assets will be converted to MYR using the ratio of EURMYR exchange rate as at Maturity Date over the EURMYR exchange rate as at Investment Date. During the period, the EUR has depreciated against MYR from 5.00 as at Investment Date to 4.75 as at Maturity Date; hence the investment payout rate in MYR is 7.6%.</p>
Potential income distribution in MYR	<p>Investment payout rate in MYR x notional amount = 7.6% x MYR 100 million = MYR 7.6000 million</p> <p>To obtain the potential income distribution as at Maturity Date, the investment payout rate in MYR is to be multiplied by the notional amount of the Active Assets. Thus, the potential income distribution in MYR as at Maturity Date is MYR 7.6000 million.</p>

Scenario 3		Price of the Underlying Asset (P)	Participation rate (PR)	EURMYR exchange rate (FX)
Investment Date	0	EUR 100	200%	5.00
Maturity Date	1	EUR 98		5.25

Maturity Date	
Performance rate of the Active Assets	$= PR \times [(P_1 - P_0) / P_0] \times 100\%$ $= 200\% \times [(98 - 100) / 100] \times 100\%$ $= 200\% \times (EUR -2 / 100) \times 100\%$ $= 200\% \times (-0.02 \times 100\%)$ $= 200\% \times -2\%$ $= -4\%$ <p>At the Maturity Date, the price of the underlying asset is decreased from EUR 100 to EUR 98, which is equivalent to -2%, or -4% after the participation rate. However, the payout will be zero, as the maximum loss that the Fund's Unit Holders will incur is zero if the underlying asset's performance over the period is negative.</p>
Investment payout rate in EUR (Performance rate of the Active Assets or 0%, whichever is higher)	= 0%
Investment payout rate in MYR	$= \text{Investment payout rate in EUR} \times FX_1 / FX_0$ $= 0\% \times FX_1 / FX_0$ $= 0\% \times 5.25 / 5.00$ $= 0\% \times 1.05$ $= 0\%$ <p>As the Base Currency is in MYR, the investment payout rate of the Active Assets will be converted to MYR using the ratio of EURMYR exchange rate as at Maturity Date over the EURMYR exchange rate as at Investment Date. During the period, the EUR has appreciated against MYR from 5.00 as at Investment Date to 5.25 as at Maturity Date, but the underlying asset's performance is negative; hence the investment payout rate in MYR is 0%.</p>
Potential income distribution in MYR	$\text{Investment payout rate in MYR} \times \text{notional amount}$ $= 0\% \times \text{MYR 100 million}$ $= \text{MYR 0}$ <p>To obtain the potential income distribution as at Maturity Date, the investment payout rate in MYR is to be multiplied by the notional amount of the Active Assets. Thus, the potential income distribution in MYR as at Maturity Date is MYR 0.</p>

In the absence of daily price or value of the assets, we will use the latest available price or value of the assets respectively.

➤ Money Market Instruments

For money market instruments, the valuation may use the amortization method, i.e. the purchased discount or premium will be amortized to the remaining period of maturity.

➤ Deposits

Deposits placed with Financial Institutions are valued by reference to the principal value of such investments and the interests accrued thereon for the relevant period.

➤ Derivatives and Structured Products

The valuation will be at bid price of the derivatives and structured products provided by the respective issuers based on fair value. The issuers generate the market valuation through the use of their own proprietary valuation models, which incorporates all the relevant and available market data with respect to the derivatives and structured products (e.g. interest rates, movement of the underlying asset, volatility of the underlying assets, the correlation of the underlying assets and other factors).

Investors are advised that certain types of securities are required to be held until such securities mature for the "actual value" to be realised. Any sale of such securities prior to its maturity may attract costs and penalties that would result in a value which is less than its "actual value". As such, any valuation of such securities (prior to its

maturity) is merely indicative of what the value might be and does not represent the “actual value” of such securities.

ABOUT THE FEES AND CHARGES

There are fees and charges involved and investors are advised to consider the fees and charges before investing in the Fund.

You should be aware that all fees, charges and expenses referred to or quoted in the Information Memorandum (including any supplemental information memorandum) and the Deed (including any supplemental deed) are referred to or quoted as being exclusive of GST. We (including the Trustee and other service providers) will charge GST at the rate of 6% on the fees, charges and expenses in accordance with the Goods and Services Tax Act 2014.

The following are the charges that may be directly incurred by you.

SALES CHARGE

The Sales Charge is 2.00% of the Offer Price and it is non-negotiable.

PENALTY CHARGE

We will impose a Penalty Charge of 5.00% of the NAV per Unit, if repurchase of Units is made after the Investment Date of the Fund.

Note:

- There will not be any Penalty Charge applicable on a repurchase request made before the Investment Date.
- The Penalty Charge is fixed and non-negotiable. It will be retained by the Fund for the benefit of the existing Unit Holders.
- The Penalty Charge is not subject to GST.

Assuming that the number of Units repurchased is 100,000 Units and the NAV per Unit is MYR 1.00, the repurchased amount would be:-

100,000 Units x MYR 1.00 = MYR 100,000

Then, the Penalty Charge would be:-

MYR 100,000 x 5.00% = MYR 5,000

TRANSFER FEE

Nil.

SWITCHING FEE

Nil.

The following are the fees and expenses that you may indirectly incur when you invest in the Fund.

ANNUAL MANAGEMENT FEE

Nil.

ANNUAL TRUSTEE FEE

The annual trustee fee is up to 0.04% per annum of the NAV of the Fund (excluding foreign custodian fees and charges). In addition to the trustee fee which includes the transaction fee i.e. the fee incurred for handling purchase or sale of local investments, the Trustee may be reimbursed by the Fund for any expenses properly incurred by it in the performance of its duties and responsibilities.

The trustee fee is calculated and accrued daily and payable monthly to the Trustee.

Please note that the example below is for illustration purposes only:

Assuming the NAV of the Fund is MYR 50,000,000.00 for the day, the accrued trustee fee for the day would be:-

$$\frac{\text{MYR } 50,000,000.00 \times 0.04\%}{365 \text{ days}} = \text{MYR } 54.79 \text{ per day}$$

FUND EXPENSES

Only the expenses (or part thereof) which are directly related and necessary to the operation and administration of the Fund may be charged to the Fund. These would include (but are not limited to) the following:

- Any other expenses allowed under the Deed.

MAXIMUM RATE OF FEES AND CHARGES ALLOWABLE BY THE DEED

We may impose higher fees and charges up to the following stated maximum rate, provided that we have taken the necessary procedures as stated in the Deed to increase the fees and charges.

Sales Charge	3.00% of the Offer Price
Penalty Charge	5.00% of the NAV per Unit
Annual Management Fee	Not applicable
Annual Trustee Fee	0.10% per annum of the NAV of the Fund (excluding foreign custodian fees and charges)

We, including our delegate (if any), Trustee or Trustee's delegate will not retain any rebate or soft commission from, or otherwise share in any commission with, any broker or dealer in consideration for directing dealings in the investments of the Fund. Accordingly, any rebates or shared commissions will be directed to the account of the Fund.

The soft commission can be retained by us or our delegates provided that:-

- the goods and services are of demonstrable benefit to the Unit Holder in the form of research and advisory services that assist in the decision-making process relating to the Fund's investments; and
- any dealing with the broker or dealer is executed on terms which are the most favourable for the Fund.

UNDERSTANDING THE RISKS OF THE FUND

Below are the risks associated with the investments of the Fund that you should consider before investing.

GENERAL RISKS OF THE FUND	
Market risk	Market risk arises because of factors that affect the entire market place. Factors such as economic growth, political stability and social environment are some examples of conditions that have an impact on businesses, whether positive or negative. Market risk cannot be eliminated but may be reduced through diversification. It stems from the fact that there are economy-wide perils, or instances of political or social instability which threaten all businesses. Hence, the Fund will be exposed to market uncertainties and fluctuations in the economic, political and social environment that will affect the market price of the investments either in a positive or negative way.
Fund management risk	This risk refers to the day-to-day management of the Fund by the Manager which will impact the performance of the Fund. For example, investment decisions undertaken by the Manager as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error, fraud, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.
Performance risk	There is no guarantee in relation to the investment returns or on the distribution to Unit Holders.
Inflation risk	This is the risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
Liquidity risk	Liquidity risk refers to two scenarios. The first is where an investment cannot be sold due to unavailability of a buyer for that investment. The second scenario exists where the investment, by its nature, is thinly traded. This will have the effect of causing the investment to be sold below its fair value which would adversely affect the NAV of the Fund.
Loan financing risk	This risk occurs when you take a loan or financing to finance your investment. The inherent risk of investing with borrowed money includes you being unable to service the loan repayments. In the event Units are used as collateral, you may be required to top-up your existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower NAV per Unit as compared to the NAV per Unit at the point of purchase towards settling the loan.
Operational risk	This risk refers to the possibility of a breakdown in our internal controls and policies. The breakdown may be a result of human error, system failure or may be fraud where our employees collude with one another. This risk may cause monetary loss and/or inconvenience to you. We will review our internal policies and system capability to mitigate instances of this risk. Additionally, we maintain a strict segregation of duties to mitigate instances of fraudulent practices amongst our employees.

SPECIFIC RISKS OF THE FUND	
Credit and default risk	Credit risk relates to the creditworthiness of the issuers of the money market instruments or deposits (hereinafter referred to as “investment”) and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the investment. In the case of rated investment, this may lead to a credit downgrade. Default risk relates to the risk of an issuer of the investment either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of

	SPECIFIC RISKS OF THE FUND
	the investment. This could adversely affect the value of the Fund.
Interest rate risk	This risk refers to the impact of interest rate changes on the valuation of the money market instruments. When interest rates rise, the instruments prices generally decline and this may lower the market value of the instruments. The reverse may apply when interest rates fall.
Structured product risk	This risk arises from investments into structured warrants issued by a third party. The NAV of the Fund will be impacted by the valuation of the structured warrants. Factors that may impact the valuation of the structured warrants will include, but not limited to movement of the underlying asset, volatility of the underlying assets, interest rate levels, the correlation of the underlying assets and other factors. Any change in the aforesaid factors would either positively or negatively impact the valuation of the structured warrants hence impacting the NAV of the Fund. As such, the Fund's NAV will be exposed to potential price volatility, which will be dependent on the valuation of the structured warrants that the Fund invested in.
Derivatives risk	The Fund may be investing in options. Valuation of options takes into account a multitude of factors such as movement of the underlying assets, the correlation of the underlying assets with the Fund, the implied future direction of the underlying assets and other factors. Any diverse changes of the factors mentioned above, may result in a lower NAV price and higher volatility for the Fund's NAV.
Concentration risk	This risk arises because the Fund may have placement of deposits with a single Financial Institution. The Fund is subject to the risks linked to the particular Financial Institution. The risk may be in the form of credit risk, for example, when the particular Financial Institution is not able to pay the interest and/or repay the principal possibly due to its poor financial position. Therefore, should such risk happens, the Fund's concentrated portfolio will cause the Fund's overall value to decline to a greater degree than if the Fund was exposed to a less concentrated portfolio.
Currency risk	As the investments of the Fund may be denominated in currencies other than the Base Currency, any fluctuation in the exchange rate between the Base Currency and the currencies in which the investments are denominated may have an impact on the value of these investments. You should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.
Country risk	Investments of the Fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV of the Fund or prices of Units to fall.
Repurchase risk	You are reminded to be prepared to commit your investment until the Maturity Date. Any repurchase request made by you will be based on Forward Pricing which is the NAV per Unit at the next valuation point. The NAV per Unit at that valuation point may be lower than your investment outlay. You are also reminded that exiting this Fund prior to the Maturity Date will attract a Penalty Charge and this may further reduce any monies payable to you. The Penalty Charge incurred by you will be retained by the Fund for the benefit of the remaining Unit Holders.

! It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are recommended to read the whole Information Memorandum to assess the risks associated with the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.
