! YOU SHOULD NOT MAKE PAYMENT IN CASH TO A UNIT TRUST CONSULTANT OR ISSUE A CHEQUE IN THE NAME OF A UNIT TRUST CONSULTANT.

This Product Highlights Sheet only highlights the key features and risks of this Fund. Investors are advised to request, read and understand the Prospectus of the Fund before deciding to invest.

PRODUCT HIGHLIGHTS SHEET

AHAM SELECT INCOME FUND

BRIEF INFORMATION ON THE PRODUCT

1. What is this product about?

AHAM Select Income Fund is an open-ended fixed income fund, issued and managed in-house by the Manager.

The Fund's investment objective is to provide investors with a steady and regular income stream in the form of distributions over the medium to longer term.

PRODUCT SUITABILITY

2. Who is this product suitable for?

The Fund is designed for retail investors who are relatively conservative with a bias towards receiving regular income and want a meaningful medium to long-term capital growth.

KEY PRODUCT FEATURES

3. What am I investing in?

Launch date	6 January 2005
Tenure	This Fund is an open-ended fund where it does not have a fixed maturity date and may only be terminated in accordance with the terms of the Prospectus and the provisions of the Deed.
Benchmark	70% Maybank 12-month fixed deposit rate (for fixed income investment) and 30% Dow Jones/Asia Pacific Select Dividend 30 Index (for equities investment)*. * <i>The risk profile of this Fund is different from the risk profile of the benchmark</i>
Investment strategy	<p>The Fund will focus on achieving its objective by investing in a diversified portfolio consisting a minimum of 70% of its NAV in debentures, money market instruments and/or deposits, and a maximum of 30% of its NAV in equities. The portfolio composition is aimed at providing investors with a regular income, as well as potential capital growth through price appreciation of its investments. The Fund will invest primarily in Asia Pacific ex Japan companies. The Fund may also invest a smaller portion of its NAV in other regions.</p> <p>We will combine a top-down and bottom-up investment approach to identify investment opportunities. When making investment decisions for debentures, money market instruments and deposits, macroeconomic trends and market analysis are the important considerations in deriving the top-down perspective on interest rate outlook, fixed income market and currency movement. For its bottom-up approach, we would conduct analysis on the issuers to assess its ability to service its debt obligations.</p> <p>The Fund's investment in debentures would consist of government and corporate bonds. The selection of debentures will not be constrained by credit ratings of issuances. However, the selection will depend largely on its quality where the respective issuers display strong ability to meet their financial obligations, healthy cash-flow, the collateral type, value, claims priority as well as offer highest safety for timely payment of interest and principal.</p> <p>For its equity portion, the Fund intends to focus on dividend yielding equities with the aim of enhancing income and returns for the Fund. As such, we would adopt a bottom-up strategy where individual stock analysis forms the primary building blocks for portfolio construction and stock selection. The Fund focuses on higher dividend paying sectors where cash flows are more resilient, and selected lower dividend yielding stocks with prospects of growing its dividends to achieve an element of capital growth in addition to dividend yield on a total return basis.</p>

Key factors which are useful to the identification of such companies would include sales and profit growth, financial strength and gearing levels, capital expenditure levels as well as management's commitment towards rewarding shareholders via dividends or capital repayments. The dividends provided by these companies would be a source of income from which the Fund would then declare income distributions to you.

To achieve its objective, the Fund will also have the flexibility to invest in warrants, as well as collective investment schemes that have similar investment objective to the Fund.

Foreign investments

For the Fund's exposure into debentures, the Fund will hold the ability to access investment opportunities through issuances made in global markets. While the Fund's exposure into equities will have a similar flexibility, we will look towards a minimum of 80% of the Fund's equity exposure into companies listed within the Asia Pacific ex Japan region, and have the flexibility to invest up to 20% of the Fund's equity exposure into companies listed on global markets outside the Asia Pacific ex Japan region.

Derivatives and Embedded Derivatives

Derivative trades may be carried out for hedging purposes through financial instruments including, but not limited to, forward contracts, futures contracts and swaps. Future and forward contracts are generally contracts between two parties to trade an asset at an agreed price on a pre-determined future date. Swaps, whereas is an agreement to swap or exchange two financial instruments between two parties.

The intention of hedging is to preserve the value of the asset from any adverse price movements. For example, to hedge against foreign currency exchange risk, the Fund may enter into a currency forward contract to offset any adverse foreign currency movements by determining an agreed rate for an agreed tenure with its counterparty. While the hedging transactions will assist with mitigating the potential foreign exchange losses by the Fund, any potential foreign exchange gains from the hedging strategy will be capped as well.

The Fund may also invest in embedded derivatives such as, but not limited to, equity-linked notes, and credit-linked notes. Investment in these embedded derivatives will provide the Fund with the exposure to the reference asset. Each of these embedded derivatives has its own targeted maturity and will expose investors to the price fluctuations of, in the case of an equity-linked note, the stock that the equity-linked note is linked to. As a result, any fluctuation in the price of the embedded derivatives may also lead to fluctuations in the NAV of the Fund i.e., if the price of the embedded derivative sees a drop in price, the NAV of the Fund will also be negatively impacted. As the embedded derivative is structured by an external party, investments in an embedded derivative will also expose the Fund to counterparty risk, which we will attempt to mitigate by carrying out a stringent selection process on its counterparty prior to an investment being made. Risks associated with the investments in embedded derivative will also be mitigated by limiting the Fund's total exposure to not more than 10% of the Fund's NAV.

The Fund adopts commitment approach to measure the Fund's global exposure to derivatives and embedded derivatives. The commitment approach is a methodology that aggregates the underlying market values or notional values of derivatives and/or embedded derivatives after taking into account the possible effects of netting and/or hedging arrangements. The Fund's global exposure from the derivatives position must not exceed 100% of NAV of the Fund at all times.

Temporary Defensive Position

We hold the option to take temporary defensive positions that may be inconsistent with the Fund's principal strategy and asset allocation to protect the Fund against adverse market conditions that may negatively impact the financial markets. To manage the risk of the Fund, we may shift the Fund's focus and exposure into lower risk investments such as money market instruments and/or deposits.

Asset allocation	Asset Class	% of the Fund's NAV
	Debentures, money market instruments and/or deposits	Minimum of 70%
	Equities	Maximum of 30%

Distribution policy	Subject to the availability of income, the Fund will distribute income on a quarterly basis. However, the amount of income available for distribution may fluctuate from year to year. At our discretion, the Fund may distribute (1) realised income, (2) realised capital gains, (3) unrealised income, (4) unrealised capital gains, (5) capital, or (6) a combination of any of the above.
Minimum initial investment*	MYR1,000
Minimum additional investment*	MYR100
Minimum repurchase amount*	200 Units
Minimum units held*	2,000 Units It is important to note that, you must meet the above minimum holding of Units after a repurchase transaction. If you insist on making a repurchase request knowing that after the transaction, the balance of your investment (i.e. total number of Units) is less than the minimum holding of Units, we may withdraw all your holding of Units and pay the proceeds to you.
Minimum switching of Units*	200 Units

Note: Please refer to the Fund's Prospectus for further details of the Fund.

4. Who am I investing with?

Relevant parties' information:

The Manager	AHAM Asset Management Berhad
The Trustee	HSBC (Malaysia) Trustee Berhad

5. What are the possible outcomes of my investment?

This is a fixed income fund that invests a minimum of 70% in debentures, money market instruments and/or deposits, and a maximum of 30% in equities within the domestic and investable foreign markets.

The performance of the Fund would be dependent on the debentures, money market instruments and/or deposits, and equity markets that are investable by the Fund. The Fund's performance is reliant on the Manager's expertise in managing the Fund to meet its objective.

Unlike fixed deposits which generally provide a guarantee on capital invested and carry specific rate of return, the Fund's investments into debentures and money market instruments do not provide a guarantee on capital contributed nor does it guarantee a fixed rate of return.

The Fund's investment into equities would to a great extent, be linked to the price movements of the equity markets. If the equities that are investable by the Fund performs well, the Fund's performance may reflect the same. However, should the equities that are investable by the Fund perform poorly, the Fund's performance may also be impacted negatively.

KEY RISKS

6. What are the key risks associated with this product?

General risks

- **Market risk** - Market risk arises because of factors that affect the entire market place. Factors such as economic growth, political stability and social environment are some examples of conditions that have an impact on businesses, whether positive or negative. Market risk cannot be eliminated but may be reduced through diversification. It stems from the fact that there are economy-wide perils, or instances of political or social instability which threaten all businesses. Hence, the Fund will be exposed to market uncertainties and fluctuations in the economic, political and social environment that will affect the market price of the investments either in a positive or negative way.
- **Fund management risk** - This risk refers to the day-to-day management of the Fund by the Manager which will impact the performance of the Fund. For example, investment decisions undertaken by the Manager as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or

* At our discretion, we may reduce the transaction value and Units, including for transactions made via digital channels, subject to the terms and conditions disclosed in the respective channels.

guidelines due to factors such as human error, fraudulent, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.

- **Performance risk** - The performance of the Fund depends on the financial instruments that the Fund purchases. If the instruments do not perform within expectation or if there is a default, then, the performance of the Fund will be impacted negatively. The performance of the Fund may also be impacted if the allocation of assets is not properly done. This is where the experience and expertise of the fund managers are important and the risk on the lack of experience and expertise of the fund managers has been highlighted above. On that basis, there is never a guarantee that investing in the Fund will produce the desired investment returns or distribution of income.
- **Inflation risk** - This is the risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
- **Liquidity risk** - Liquidity risk refers to two scenarios. The first is where an investment cannot be sold due to unavailability of a buyer for that investment. The second scenario exists where the investment, by its nature, is thinly traded. This will have the effect of causing the investment to be sold below its fair value which would adversely affect the NAV of the Fund and subsequently the value of Unit Holder's investments in the Fund.
- **Operational risk** - This risk refers to the possibility of a breakdown in the Manager's internal controls and policies. The breakdown may be a result of human error, system failure or may be fraud where employees of the Manager collude with one another. This risk may cause monetary loss and/or inconvenience to you. The Manager will review its internal policies and system capability regularly to mitigate instances of this risk. Additionally, the Manager maintains a strict segregation of duties to mitigate instances of fraudulent practices amongst employees of the Manager.
- **Loan / financing risk** - This risk occurs when you take a loan or financing to finance your investment. The inherent risk of investing with borrowed/financed money includes you being unable to service the loan/financing repayments. In the event Units are used as collateral, you may be required to top-up your existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower NAV per Unit as compared to the NAV per Unit at the point of purchase towards settling the loan/financing.
- **Suspension of repurchase request risk** - Having considered the best interests of Unit Holders, the repurchase requests by the Unit holders may be subject to suspension due to exceptional circumstances, where the market value or fair value of a material portion of the fund's assets cannot be determined. In such case, Unit Holders will not be able to redeem their Units and will be compelled to remain invested in the Fund for a longer period of time. Hence, their investments will continue to be subject to the risks inherent to the Fund.

Specific risks

- **Stock specific risk** - Prices of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the Fund's NAV.
- **Credit and default risk** - Credit risk relates to the creditworthiness of the issuers of the debentures or money market instruments and the Financial Institutions where the deposits are placed (hereinafter referred as "investment") and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer and/or Financial Institution may impact the value as well as liquidity of the investment. In the case of rated investment, this may lead to a credit downgrade. Default risk relates to the risk of an issuer and/or a Financial Institution of the investment either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the investment. This could adversely affect the value of the Fund.
- **Interest rate risk** - This risk refers to the impact of interest rate changes on the valuation of debentures or money market instruments (hereinafter referred as "investment"). Generally, movement in interest rates affects the prices of investment inversely. For example, when interest rates rise, prices of investments will fall. The fluctuations of the prices of investment will also have an impact on the NAV of the Fund. This risk can largely be eliminated by holding investment until their maturity. We also manage interest rate risk by considering each investment's sensitivity to interest rate changes. When interest rates are expected to increase, the Fund would then likely seek to switch to investment that are less sensitive to interest rate changes. For investments in deposits, the fluctuations in the interest rates will not affect the placement of deposits but will result in the opportunity loss by the Fund if the placement of deposits is made at lower interest rate.
- **Embedded Derivatives risk** - The NAV of the Fund will be impacted by the valuation of the embedded derivatives. Factors that may impact the valuation of the embedded derivatives will include, but not be limited to movement of the underlying asset, volatility of the underlying assets, interest rate levels, the correlation of the underlying assets and other such factors. Any change in the aforesaid factors would either positively or negatively impact the valuation of the

embedded derivatives hence impacting the NAV of the Fund. As such, the Fund's NAV will be exposed to potential price volatility, which will be dependent on the valuation of the embedded derivatives that the Fund invested in.

- **Warrants investment risk** - The value of the warrants will depend on the pricing of the underlying security whereby the growth and performance prospect of the underlying security would consequentially affect the value of the warrants. In addition, the value of the warrants may decrease exponentially as the warrants approach its maturity date and the potential gains from a favourable price movement of the underlying may be offset by aggressive time decay. We may consider unwinding these warrants if there are material adverse changes to its value with the aim to mitigate the risk.
- **Country risk** - Investments of the Fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests in. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV of the Fund or prices of Units to fall.
- **Currency risk** - As the investments of the Fund may be denominated in currencies other than the base currency of the Fund, any fluctuation in the exchange rate between the base currency of the Fund and the currencies in which the investments are denominated may have an impact on the value of these investments. You should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.
- **Regulatory risk** - The investments of the Fund would be exposed to changes in the laws and regulations in the countries the Fund is invested in. These regulatory changes pose a risk to the Fund as it may materially impact the investments of the Fund. In an effort to manage and mitigate such risk, the Manager seeks to continuously keep abreast of regulatory developments (for example, by closely monitoring announcements on regulators' website and mainstream media) in that country. The Manager may dispose its investments in that particular country should the regulatory changes adversely impact the Unit Holders' interest or diminish returns to the Fund.
- **Distribution out of capital risk** - The Fund may distribute income out of capital. Such capital distributions represent a return or withdrawal of part of the amount of your original investment and/or capital gains attributable to the original investment and will result in a reduction in the NAV per Unit of the Fund and reduce the capital available for future investment and capital growth. Future capital growth may therefore be constrained.

Note: Please refer to the Fund's Prospectus for further details on each risks.

It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are recommended to read the whole Prospectus to assess the risks associated with the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.

PERFORMANCE

Average Total Return

	1 Year (1/3/23 - 29/2/24)	3 Years (1/3/21 - 29/2/24)	5 Years (1/3/19 - 29/2/24)	10 Years (1/3/14 - 29/2/24)	Since Commencement (27/1/05 - 29/2/24)
Fund	1.32%	-0.76%	1.81%	3.71%	5.69%
Benchmark	8.24%	3.10%	2.40%	3.82%	4.27%

Source: Bloomberg

Annual Total Return

Financial Year End ("FYE")	2024	2023	2022	2021	2020	2019	2018	2017	2016	2015
Fund	1.32%	-0.14%	-3.39%	4.75%	6.82%	0.29%	6.70%	9.51%	3.47%	9.42%
Benchmark	8.24%	0.89%	0.36%	3.52%	-0.72%	0.82%	-1.43%	12.76%	0.31%	15.35%

Source: Bloomberg

For the period 1 March 2023 to 29 February 2024, the Fund registered a 1.32% return compared to the benchmark return of 8.24%. Since commencement, the Fund has registered a return of 187.76% compared to the benchmark return of 122.23%, outperforming by 65.53%.

Effective 18 July 2015, the benchmark of the Fund have been changed from JP Morgan Asia Credit Investment Grade Index, weighting at 70% for the fixed income investments and Dow Jones/Asia Pacific Select Dividend 30 Index, weighting at 30% for the equities investment to Maybank 12- month fixed deposit rate, weighting at 70% for the fixed income

investments and Dow Jones/Asia Pacific Select Dividend 30 Index, weighting at 30% for the equities investment which is reflective of the asset allocation and investment strategy of the Fund. The Maybank 12-month fixed deposit rate has been selected as it aims to reflect the performance of the investment opportunities related to investments into fixed income instruments. The Maybank 12-month fixed deposit rate represents the performance benchmark relating to interest bearing instruments.

Please note that the change in the benchmark will not impact nor change the asset allocation or investment strategy of the Fund.

Basic of calculation and assumption made in calculating the returns

The performance figures are a comparison of the growth/decline in NAV for the stipulated period taking into account all the distribution payable (if any) during the stipulated period.

An illustration of the above would be as follow:-

Capital return = NAV per Unit end / NAV per Unit begin – 1

Income return = Income distribution per Unit / NAV per Unit ex-date

Total return = (1+Capital return) x (1+Income return) – 1

Income Distribution

Financial Year End	29 February 2024	28 February 2023	28 February 2022
Gross distribution per Unit (sen)	3.00	2.35	2.55
Net distribution per Unit (sen)	2.62	2.35	2.55

Distribution will be made in the form of cash as well as Units in lieu of cash, if any.

Portfolio Turnover Ratio (PTR)

Financial Year End	28 February 2024	28 February 2023	28 February 2022
PTR (times)	0.95	0.69	0.70

The Fund recorded a higher PTR due to increased trading activities for the financial year.

PAST PERFORMANCE OF THE FUND IS NOT AN INDICATION OF ITS FUTURE PERFORMANCE

FEES & CHARGES

7. What are the fees and charges involved?

There are fees and charges involved and you are advised to consider them before contributing to the Fund.

What will I be charged by the Manager?

Sales charge	Up to 3.00% of the NAV per Unit of the Fund. <i>Investors may negotiate for a lower charge.</i>
Repurchase charge	There will be no Repurchase Charge levied on any repurchase of Units of the Fund.
Switching fee	The Manager does not impose any switching fee. However, if the amount of sales charge of the fund (or class) that the Unit Holder intends to switch into is higher than the sales charge imposed by the fund (or class) being switched from, then the difference in the sales charge between the two (2) funds (or classes) shall be borne by the Unit Holder.
Transfer fee	There will be no transfer fee levied on any transfer transactions.

What are the key ongoing fees charged to the Fund?

Annual Management fee	Up to 1.50% of the NAV of the Fund per annum (before deducting the management fee and trustee fee).
Annual Trustee fee	Up to 0.07% per annum of the NAV of the Fund, subject to a minimum of MYR18,000 per annum (excluding foreign custodian fees and charges) before deducting the management fee and trustee fee.

Note: Please refer to the Prospectus for further explanation and illustration on the Fund's fees, charges and expenses.

ALL FEES AND CHARGES PAYABLE BY YOU ARE SUBJECT TO ALL APPLICABLE TAXES AND / OR DUTIES AS MAY BE IMPOSED BY THE GOVERNMENT AND / OR THE RELEVANT AUTHORITIES FROM TIME TO TIME.

VALUATIONS AND EXITING FROM INVESTMENT
8. How often are valuations available?

The Fund will be valued on every Business Day and you may obtain the NAV and NAV per Unit of the Fund from our website at www.aham.com.my our customer service via our toll free number 1-800-88-7080 or email to customercare@aham.com.my.

9. How can I exit from this investment and what are the risks and costs involved?

You may request to redeem your investments in the Fund at any point in time by completing the repurchase application form and returning it to us on any Business Day between 8.45 a.m. and 3.30 p.m. Payments will be made to you within (7) Business Days from the day the repurchase request is received by us and provided that all documentations are completed and verifiable.

CONTACT INFORMATION
10. Who should I contact for further information or to lodge a complaint?

1. For internal dispute resolution, you may contact our customer service personnel:

(a) via phone to	:	03 – 2116 6000
(b) via fax to	:	03 – 2116 6100
(c) via toll free no.	:	1-800-88-7080
(d) via email to	:	customercare@aham.com.my
(e) via letter	:	AHAM Asset Management Berhad Ground Floor, Menara Boustead 69, Jalan Raja Chulan, 50200 Kuala Lumpur

Complaints should be made in writing with the following information:

 - (a) particulars of the complainant which include name, correspondence address, contact number, e-mail address (if any) and other relevant information;
 - (b) circumstances of the non-compliance or improper conduct;
 - (c) parties alleged to be involved in the improper conduct; and
 - (d) other supporting documentary evidence (if any).

2. If you are dissatisfied with the outcome of the internal dispute resolution process, please refer your dispute to the Securities Industries Dispute Resolution Centre (SIDREC):
