YOU SHOULD NOT MAKE PAYMENT IN CASH TO A UNIT TRUST CONSULTANT OR ISSUE A CHEQUE IN THE NAME OF A UNIT TRUST CONSULTANT.

This Product Highlights Sheet only highlights the key features and risks of this Fund. Investors are advised to request, read and understand the Prospectus of the Fund before deciding to invest.

PRODUCT HIGHLIGHTS SHEET

AHAM TACTICAL FUND

BRIEF INFORMATION ON THE PRODUCT

1. What is this product about?

AHAM Tactical Fund is an open-ended mixed asset fund, issued and managed in-house by the Manager.

The Fund’s investment objective is to seek a stable return and generate capital growth over medium to long term period in a diversified mix of assets.

PRODUCT SUITABILITY

2. Who is this product suitable for?

The Fund is designed for retail investors who wish to capture returns from directional trends of both asset classes, wish to take advantage of short-term market events and seek potentially medium to long term capital appreciation.

KEY PRODUCT FEATURES

3. What am I investing in?

Launch date	10 August 2010
Tenure	This Fund is an open-ended fund where it does not have a fixed maturity date and may only be terminated in accordance with the terms of the Prospectus and the provisions of the Deed.
Benchmark	50% FTSE Bursa Malaysia KLCI (for equities and securities equivalent to equities) + 50% RAM Quantshop MGS All Index (for fixed income investments) <i>The risk profile of this Fund is different from the risk profile of the benchmark.</i>
Investment strategy	<p>The Fund is designed to deliver medium to long term capital appreciation and protection against adverse markets by enabling investors to participate in the growth prospect of the Malaysian market by tactically allocating its assets. Exposure will be tactically allocated into the equity market and lower risk assets to maintain potential for growth opportunities within the domestic market at the prevailing market environment.</p> <p>The Fund shall invest in a broadly diversified portfolio of equities and securities equivalent to equities, and fixed income instruments. The Fund’s investments in various asset classes may range between 10% to 90% of the Fund’s NAV.</p> <p>Through the use of tactical strategies and frequent portfolio reallocation reviews between equities and securities equivalent to equities, and fixed income instruments, the asset allocation can vary between defensive or aggressive at any given time. This will be dependent on the current market environment and/or based on the Manager’s view in order to take advantage of short-term market inefficiencies in both asset classes as well as to navigate changing markets with the objective of achieving sustainable, long term positive return.</p> <p>The reallocation of assets may occur in the following circumstances:</p> <ul style="list-style-type: none"> • Higher weighting in fixed income instruments when the in-house macro view of the equity market is less favourable; or • Higher weighting in equities and securities equivalent to equities when the in-house macro view of the equity market is more favourable; or • Higher allocation to cash or cash equivalents during adverse market conditions. <p>For the stock selection process, the Manager combines the qualitative top-down and bottom-up approach. The top-down approach begins with a review of the Malaysian economy and its financial</p>

	<p>markets in the context of global economic scenario and capital flows. Stock selection will then be carried out after an analysis on the outlook for the broad domestic economy, the individual sectors within the economy and the companies within each sector is carried out. Generally, the equity investments will focus on index linked and blue chip stocks with high liquidity and comparatively higher dividend yield against its peers. In identifying individual companies, the Manager conducts fundamental bottom-up assessment which will include, amongst others, historical and expected dividend yield, return on equity, earnings per share growth rate, financial strength, and management quality/track records. The Fund will not invest in sinful stocks such as gaming, liquor and tobacco.</p> <p>The Manager may invest in collective investment schemes that hold similar investment objectives to the Fund's investment objective.</p> <p>To meet its objective, the Fund will also look at investing in securities equivalent to equities such as rights and warrants, as well as unlisted securities such as unlisted bonds, and Initial Public Offerings (IPOs). The Fund may invest up to 20% of its NAV in countries which are eligible markets.</p> <p>The investments into fixed income instruments will be driven by quality credits that could potentially benefit from credit upgrades. We classify quality credits as credits that meet our in-house fixed income selection process as highlighted below. The Manager will also look out for papers that offer attractive yields, i.e. yields that are comparatively higher to its peers from the same industry and/or yields that are comparatively higher to investments with the similar credit rating. The fixed income selection process will include but not be limited to the following considerations:</p> <ul style="list-style-type: none"> • Issuer's and/or guarantor's industry and business medium to long term outlook; • Issuer's and/or guarantor's financial strength and gearing levels; • Issuer's and/or guarantor's cash flow quality and volatility; • Issuer's and/or guarantor's expected future cash flow and ability to pay interest and principal; • Issuer's and/or guarantor's credit rating; • Collateral type and value, claims priority; • Price and yield-to-maturity (YTM) / yield-to-call (YTC); and • Issuer's and/or guarantor's ratings by RAM, MARC, Standard & Poor's, Moody's, or equivalent. <p>Temporary Defensive Measures</p> <p>The Manager may take temporary defensive positions that may be inconsistent with the Fund's principal strategy by raising cash levels or increasing the Fund's asset allocation weighting in fixed income instruments, in attempting to respond to adverse conditions that may impact the financial markets.</p>						
<p>Asset allocation</p>	<table border="1"> <thead> <tr> <th data-bbox="434 1417 1086 1451">Asset Class</th> <th data-bbox="1086 1417 1444 1451">% of the Fund's NAV</th> </tr> </thead> <tbody> <tr> <td data-bbox="434 1451 1086 1485">Equities and securities equivalent to equities</td> <td data-bbox="1086 1451 1444 1485">10% to 90%</td> </tr> <tr> <td data-bbox="434 1485 1086 1529">Fixed income instruments</td> <td data-bbox="1086 1485 1444 1529">10% to 90%</td> </tr> </tbody> </table> <p><i>The Manager will maintain a sufficient level of cash for liquidity purposes.</i></p>	Asset Class	% of the Fund's NAV	Equities and securities equivalent to equities	10% to 90%	Fixed income instruments	10% to 90%
Asset Class	% of the Fund's NAV						
Equities and securities equivalent to equities	10% to 90%						
Fixed income instruments	10% to 90%						
<p>Distribution policy</p>	<p>Distribution (if any) is incidental and will be subject to the availability of income.</p>						
<p>Minimum initial investment*</p>	<p>MYR 200</p>						
<p>Minimum additional investment*</p>	<p>MYR 100</p>						
<p>Minimum repurchase amount*</p>	<p>400 Units</p>						
<p>Minimum holding of units*</p>	<p>400 Units</p>						
<p>Minimum switching of units*</p>	<p>100 Units</p>						

Note: Please refer to the Fund's Prospectus for further details of the Fund.

* At our discretion, we may reduce the transaction value and Units, including for transactions made via digital channels, subject to terms and conditions disclosed in the respective channels.

4. Who am I investing with?

Relevant parties' information:

The Manager	AHAM Asset Management Berhad
The Trustee	AmanahRaya Trustees Berhad

5. What are the possible outcomes of my investment?

The Fund is designed to deliver medium to long term capital appreciation and protection against adverse markets by enabling investors to participate in the growth prospect of the Malaysian market by tactically allocating its assets. Exposure will be allocated into the equity market and lower risk assets to maintain potential for growth opportunities within the domestic market at the prevailing market environment.

The performance of the Fund would be dependent on the fixed income instrument and equities markets that are investable by the Fund. This means that if the fixed income instrument and equities that are investable by the Fund performs well, the Fund may reflect similar performance. However, should the fixed income instrument and equity markets that are investable by the Fund perform poorly, the Fund's performance may also be impacted negatively.

The Fund is not expected to make any income distribution. However incidental distribution may be declared whenever appropriate.

Please note that the capital and returns of the Fund are not guaranteed.

KEY RISKS

6. What are the key risks associated with this product?

General risks

- **Affected by variable factors and not guaranteed** – The performance of a unit trust fund is affected by many variable factors and is not guaranteed. These include overall economic and financial market conditions such as interest rate fluctuation and stability of local currency. While a track record may provide some insight on future performance, it is by no means guaranteed. The prices of Units may go down as well as up. Likewise, distribution may vary from year to year depending on the performance of the unit trust fund.
- **Issuer risk** – The value of each individual securities that a unit trust fund invests in may decline for a number of reasons which is directly related to the issuer, such as but not limited to, the management performance, financial leverage, changing industry conditions and changes in consumer tastes and demand.
- **Fund management risk** – This risk refers to the day-to-day management of the Fund by the Manager which will impact the performance of the Fund. For example, investment decisions undertaken by the Manager as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error, fraud, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.
- **Financing risk** – This risk occurs when you take a financing to finance your investment. The inherent risk of investing with financed money includes you being unable to service the financing repayments. In the event Units are used as collateral, you may be required to top-up your existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower NAV per Unit as compared to the NAV per Unit at the point of purchase towards settling the financing.
- **Suspension of repurchase request risk** – Having considered the best interests of Unit Holders, the repurchase requests by the Unit Holders may be subject to suspension due to exceptional circumstances, where the market value or fair value of a material portion of the Fund's assets cannot be determined. In such case, Unit Holders will not be able to redeem their Units and will be compelled to remain invested in the Fund for a longer period of time. Hence, their investments will continue to be subject to the risks inherent to the Fund.

Specific risks

Equity and securities equivalent to equities investment risk - The buying and selling of equities and securities equivalent to equities (the word "equities" hereinafter is referring to the equity and securities equivalent to equities) carry a number of risks. The most important being the volatility of the capital markets (of those tradable equities), the general insolvency risk associated with the issuers of equities, and/or the performance of the underlying equity that the securities equivalent to equities is linked to.

The value of the equities depends on its growth and earning potential, sound management, treatment of minority shareholders, as well as a myriad of other factors. Failure to achieve the expected earnings would result in declining investment value which in turn affects the performance of the Fund. This risk can be mitigated by diversifying the Fund's portfolio. The Manager will employ stringent stock selection criteria which would effectively filter its stock components to the equities which may provide returns to the Fund in the form of capital gains and income.

- **Market risk** - Market risk arises because of factors that affect the entire market place. Factors such as economic growth, political stability and social environment are some examples of conditions that have an impact on businesses, whether positive or negative. Market risk cannot be eliminated but may be reduced through diversification. It stems from the fact that there are economy-wide perils, or instances of political or social instability which threaten all businesses. Hence, the Fund will be exposed to market uncertainties and fluctuations in the economic, political and social environment that will affect the market price of the investments either in a positive or negative way.
- **Stock specific risk** - Prices of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the Fund's NAV.
- **Liquidity risk** - Liquidity risk refers to two scenarios. The first is where an investment cannot be sold due to unavailability of a buyer for that investment. The second scenario exists where the investment, by its nature, is thinly traded. This will have the effect of causing the investment to be sold below its fair value which would adversely affect the NAV of the Fund and subsequently the value of Unit Holders' investments in the Fund.
- **Credit and default risk** - Credit risk relates to the creditworthiness of the issuers of the fixed income instruments such as debentures or money market instruments investment and the Financial Institutions where the deposits are placed (hereinafter referred to as "investment") and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer and/or Financial Institution may impact the value as well as liquidity of the investment. In the case of rated investments, this may lead to a credit downgrade. Default risk relates to the risk of an issuer and/or Financial Institution of the investment either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the investment. This could adversely affect the value of the Fund.
- **Interest rate risk** - This risk refers to the impact of interest rate changes on the valuation of the fixed income instruments such as debentures or money market instruments (hereinafter referred to as "investment"). Generally, movement in interest rates affects the prices of investment inversely. For example, when interest rates rise, prices of investment will fall. The fluctuations of the prices of investment will also have an impact on the NAV of the Fund. This risk can largely be eliminated by holding investment until their maturity. We also manage interest rate risk by considering each investment's sensitivity to interest rate changes. When interest rates are expected to increase, the Fund would then likely seek to switch to investment that are less sensitive to interest rate changes. For investments in deposits, the fluctuations in the interest rates will not affect the placement of deposits but will result in the opportunity loss by the Fund if the placement of deposits is made at lower interest rate.
- **Warrants investment risk** - The value of the warrants will depend on the pricing of the underlying security whereby the growth and performance prospect of the underlying security would consequentially affect the value of the warrants. In addition, the value of the warrants may decrease exponentially as the warrants approach its maturity date and the potential gains from a favourable price movement of the underlying may be offset by aggressive time decay. We may consider unwinding these warrants if there are material adverse changes to its value with the aim to mitigate the risk.
- **Tactical asset allocation fund risk** - A tactical asset allocation fund is where the strategies employed to shift the asset mix between equities and fixed income instruments depending on the prevailing market outlook. The Manager's investment decision pertaining to the asset allocation may adversely affect the Fund's performance if the assessment concluded by the Manager is not consistent with the market outlook.
- **Currency risk** - As the investments of the Fund may be denominated in currencies other than the base currency of the Fund, any fluctuation in the exchange rate between the base currency of the Fund and the currencies in which the investments are denominated may have an impact on the value of these investments. You should be aware that if the currencies in which the investments are denominated depreciate against the base currency of the Fund, this will have an adverse effect on the NAV of the Fund in the base currency of the Fund and vice versa. You should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.
- **Country risk** - The foreign investment of the Fund may be affected by risks specific to the country which it invests in. Such risks, which include changes in a country's economic fundamentals, social and political stability, currency movements and foreign investment policies, may have an impact on the prices of the Fund's investment in that country. Consequently, it may also affect the Fund's NAV.
- **Collective investment scheme risk** - As the Fund is allowed to invest in collective investment schemes, any adverse effect on the respective collective investment schemes will impact the NAV of the Fund. For example, the respective collective investment schemes may under-perform its benchmarks due to poor market conditions and as a result, the NAV of the Fund will be adversely affected as the performance of the Fund is dependent on the performance of the respective collective investment schemes. In addition, any mismanagement of the collective investment schemes or poor decisions taken on the collective investment schemes may adversely affect the NAV of the collective investment schemes and hence the Fund.

Note: Please refer to the Fund's Prospectus for further details of each risk.

It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are recommended to read the whole Prospectus to assess the risks associated with the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.

PERFORMANCE

Average Total Return

	1 Year (1/3/23 – 28/2/24)	3 Years (1/3/21 – 28/2/24)	5 Years (1/3/19 – 28/2/24)	10 Years (1/3/14 – 29/2/24)	Since Commencement (10/8/10 – 28/2/24)
Fund	12.45%	0.82%	7.16%	4.52%	4.90%
Benchmark	5.85%	1.28%	1.32%	2.94%	4.23%

Source: Bloomberg

Annual Total Return

Financial Year End ("FYE")	2024	2023	2022	2021	2020	2019	2018	2017	2016	2015
Fund	12.45%	-3.32%	-5.75%	39.29%	-0.98%	-4.56%	12.46%	8.22%	-3.42%	-3.41%
Benchmark	5.85%	-3.26%	1.45%	4.17%	-1.33%	-1.62%	6.94%	2.96%	8.18%	8.12%

Source: Bloomberg

For the period 1 March 2023 to 29 February 2024, the Fund registered a 12.45% return compared to the Benchmark return of 5.85%. Since commencement, the Fund has registered a return of 91.40% compared to the benchmark return of 75.38%, outperforming by 16.02%.

The benchmark was changed from previously 5.0% per annum growth in NAV per Unit + the prevailing Overnight Policy Rate to currently 50% FTSE Bursa Malaysia KLCI + 50% RAM Quantshop MGS All Index.

The composite benchmark has been selected as there is no direct performance benchmark to the Fund's investment strategy. We believe the composite benchmark that comprises 50% FTSE Bursa Malaysia KLCI + 50% RAM Quantshop MGS All Index will be a reflective performance benchmark for the Fund as the Fund holds a strategy that enables it to include exposure into both equities, and fixed income instruments depending on the current market environment.

Basic of calculation and assumption made in calculating the returns:

The performance figures are a comparison of the growth/decline in NAV for the stipulated period taking into account all the distribution payable (if any) during the stipulated period.

Capital return = NAV per Unit end / NAV per Unit begin – 1
 Income return = Income distribution per Unit / NAV per Unit ex-date
 Total return = (1 + Capital return) x (1 + Income Return) – 1

Income Distribution

Financial Year End	29 February 2024	28 February 2023	28 February 2022
Gross distribution per Unit (sen)	0.10	1.35	1.50
Net distribution per Unit (sen)	0.10	1.35	1.50

Distribution will be made in the form of cash as well as Units in lieu of cash, if any.

Portfolio Turnover Ratio (PTR)

Financial Year End	29 February 2024	28 February 2023	28 February 2022
PTR (times)	1.18	1.33	1.78

The Fund recorded a lower PTR as the Manager had reduced its trading activities during the financial year.

PAST PERFORMANCE OF THE FUND IS NOT AN INDICATION OF ITS FUTURE PERFORMANCE

FEES & CHARGES

7. What are the fees and charges involved?

There are fees and charges involved and you are advised to consider them before contributing to the Fund.

What will I be charged by the Manager?

Sales charge	Up to 5.50% of the NAV per Unit. <i>Investors may negotiate for a lower charge.</i> The Sales Charge for investors purchasing Units through the EMIS shall be limited to a maximum charge of 3% of the NAV per Unit or as determined by the EPF.
Repurchase charge	There will be no Repurchase Charge levied on the repurchase of Units for the Fund.
Switching fee	The Manager does not impose any switching fee. However, if the amount of sales charge of the fund (or class) that the Unit Holder intends to switch into is higher than the sales charge imposed by the fund (or class) being switched from, then the difference in the sales charge between the two (2) funds (or classes) shall be borne by the Unit Holder.
Transfer fee	There will be no transfer fee imposed on the transfer facility.

What are the key ongoing fees charged to the Fund?

Management fee	Up to 1.50% per annum of the NAV of the Fund (before deducting the management fee and trustee fee).
Trustee fee	Up to 0.08% per annum of the NAV of the Fund, subject to a minimum of RM18,000 per annum (excluding foreign custodian fees and charges), before deducting the management fee and trustee fee.

Note: Please refer to the Prospectus for further explanation and illustration on the Fund's fees, charges and expenses.

ALL FEES AND CHARGES PAYABLE BY YOU ARE SUBJECT TO ALL APPLICABLE TAXES AND / OR DUTIES AS MAY BE IMPOSED BY THE GOVERNMENT AND / OR THE RELEVANT AUTHORITIES FROM TIME TO TIME.

VALUATIONS AND EXITING FROM INVESTMENT

8. How often are valuations available?

The Fund will be valued on every Business Day and you may obtain the NAV and NAV per Unit of the Fund from our website at www.aham.com.my, our customer service via our toll free number 1-800-88-7080 or email to customercare@aham.com.my.

9. How can I exit from this investment and what are the risks and costs involved?

You may request to redeem your investments in the Fund at any point in time by completing the repurchase application form and returning it to us on any Business Day between 8.45 a.m. to 3.30 p.m. Payments will be made to you within seven (7) Business Days from the day the repurchase request is received by us and provided that all documentations are completed and verifiable.

If you invest through the EMIS, we will remit the repurchase proceeds to EPF for onward crediting to your EPF account. If you are above the age of fifty five (55) and invest through the EMIS, we will remit the repurchase proceeds to you directly.
