#### Movement of the Fund versus the Benchmark

<sup>&</sup>quot;This information is prepared by AHAM Asset Management Berhad for information purposes only. Past earnings or the fund's distribution record is not a guarantee or reflection of the fund's future earnings/future distributions. Investors are advised that unit prices, distributions payable and investment returns may go down as well as up. Source of Benchmark is from Maybank."

Benchmark: Malayan Banking Berhad Foreign Currency Account Overnight USD rate

Past performance is not necessarily indicative of future performance and that Unit prices and investment returns may go down, as well as up.

### **Asset Allocation**

Fund's asset mix during the period under review:

	31 March 2024
	(%)
Cash & money market	100.00
Total	100.00

#### **Breakdown of Distribution**

Class	Ex-Date	Income (per unit) (sens / cents)	Income (%)	Capital (per unit) (sens / cents)	Capital (%)
USD	27-Mar-24	0.0100	100	-	-
USD	28-Feb-24	0.0100	100	-	-
USD	24-Jan-24	0.0100	100	-	-

#### **Strategies Employed**

The Manager maintained a high level of investment in USD-denominated deposit placements to provide investors with regular income stream and liquid access to their respective investments.

#### Market Review

To provide a broad overview of the markets over the period under review, the Standard and Poor's ("S&P") 500 Index returned 10.43% with the Morgan Stanley Capital International ("MSCI") World index slightly behind at 8.92% on a total return basis. Specific to the Asian region, MSCI AC Asia ex Japan Index saw a relatively weaker return of 1.79% while locally, the Financial Times Stock Exchange ("FTSE") Bursa Malaysia Kuala Lumpur Composite Index ("KLCI") fared better at 7.03% in Ringgit terms. Within bond markets, Bloomberg Barclays Global Aggregate Index returned -2.07% while domestically, the bond markets' benchmark 10-year Malaysian Government Securities ("MGS") yield closed at 3.85%.

The United States ("US") Federal Reserve ("Fed") conducts monetary policy by setting a target range for the federal funds rate, which does not directly affect firms and household in the economy. Instead, monetary policy effect cascades to the broader economy by affecting financial conditions including the longer-term interest rates and the exchange value of the dollar. Analysts posit that the Fed's actions of supporting the US economy during the peak of the coronavirus crisis by initiating large purchases of US government and mortgage-backed securities, lending to support household and employers could have been overdone and led to the unwelcome surge in increased inflationary pressures. The Fed has been engaging in a tightening monetary policy stance throughout 2023 to address said inflationary pressures, only relenting towards the end of 2023 when signs of tighter policy was slowing down the economy. Unprecedented global events that unfolded in 2023 also contributed to the Fed's challenge in reigning in inflation rates.

The bond market experienced dynamic shifts, influenced by factors such as inflation concerns, central bank policies, and global economic conditions. The second quarter of 2023 witnessed a decline in market volatility, accompanied by a rise in government bond yields, albeit with some divergence among countries. The United Kingdom ("UK") and Australia underperformed due to higher-than-expected inflation, leading to more aggressive actions by central banks to combat inflation. The Fed paused its consecutive rate increases after more than a year, marking a notable shift in monetary policy. Corporate balance sheets remained relatively strong, despite an uptick in default rates, and global high yield outperformed investment grade bonds. At the start of second half of 2023, the US economy displayed resilience, with signs of improvement in the manufacturing sector and a relatively robust labour market. However, concerns over rising US debt issuance and a downgrade in the US credit rating by Fitch Ratings weighed on the Treasury market. Despite a significant rise in oil prices, inflationary pressures eased in most economies, allowing major central banks to signal a pause in further rate hikes. The last quarter of 2023 was marked by a perceived shift in monetary policy direction, with central banks adopting a more dovish tone leading to a rally in government bond markets, with yields falling sharply and credit markets outperforming government bonds. Despite a slowing growth outlook, corporate bonds staged an impressive rally on hopes of averting a deep recession. The first quarter of 2024 saw a significant shift in inflation and interest rate expectations, with markets initially anticipating faster central bank action to lower rates. However, expectations were scaled back, with central banks proceeding with caution and avoiding premature declarations of victory over inflation. Global economic activity showed signs of improvement, particularly in the US, eurozone, and China, although inflation remained a central concern.

#### **Investment Outlook**

Economic growth is projected to experience a gradual decline throughout the year. This anticipated slowdown reflects broader macroeconomic adjustments and a return to more sustainable growth rates following recent periods of volatility. Concurrently, inflation is expected to continue its downward trajectory, although the journey to the target rate of 2% might be prolonged.

Monetary policy remains a critical driver of market dynamics, with central banks acknowledging the lag effect inherent in their policy measures. Currently, interest rates are deemed to be at reasonable levels, and central banks appear inclined to maintain this status quo, allowing the existing policies to fully permeate the economy.

With the aggressive phase of policy tightening now behind us, the environment is becoming more conducive to fixed income investments. Historically, bonds have performed well in declining interest rate environments, offering attractive opportunities for investors seeking stability and income. In this context, a clear preference emerges for Investment Grade bonds over High Yield bonds.
