KEY RISKS

6. What are the key risks associated with this product?

General Risks

- **Fund Management Risk** – This risk refers to our day-to-day management of the Fund which will impact the performance of the Fund. For example, our investment decisions as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error, fraud, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.
- **Capital and Returns Not Guaranteed** – You should be aware that by investing in the Fund, there is no guarantee of any returns or capital appreciation. Unlike fixed deposits placed directly by the investors into any financial institutions which carry a specific rate of return, this Fund does not provide a fixed rate of return. There is no guarantee that you will enjoy any capital appreciation or will not experience any loss of capital invested in the Fund.
- **Inflation Risk** – This is the risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
- **Loan Financing Risk** – This risk occurs when you take a financing to finance your investment. The inherent risk of investing with borrowed money includes you being unable to service the financing repayments. In the event Units are used as collateral, you may be required to top-up your existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower NAV per Unit as compared to the NAV per Unit at the point of purchase towards settling the loan.
- **Operational Risk** – This risk refers to the possibility of a breakdown in our internal controls and policies. The breakdown may be a result of human error, system failure or fraud where our employees collude with one another. This risk may cause monetary loss and/or inconvenience to you.

Specific Risks

- **Concentration Risk** – As a feeder fund, this Fund invests in a single collective investment scheme. Any adverse effect on the Target Fund will inevitably affect the Fund as well. The performance of the Fund is also dependent on the performance of the Target Fund.
- **Liquidity Risk** – Liquidity risk refers to the risk that units of the Target Fund cannot be sold due to unavailability of buyers for such units or restriction on realisation of units of the Target Fund. Upon such event and in the best interest of the Unit Holders, the Trustee may suspend the repurchase of Units requests. Please refer to “Suspension of Dealing in Units” section of the Prospectus for more details.
- **Counterparty Risk** – Counterparty risk concerns the Fund's investment in derivatives (“Investments”). Counterparty risk is prevalent as the potential returns derived from the Investments are dependent on the ongoing ability and willingness of the Participating Dealer to fulfill their respective financial commitments in a timely manner. Bankruptcy, fraud or regulatory non-compliance arising out of and/or in connection with the issuer may impair the operations and/or the performance of the Fund.
- **Legal and Regulatory Risk** – The Fund must comply with regulatory constraints or changes in the laws affecting it or its investment restrictions which might require a change in the investment policy and objective followed by the Fund. Furthermore, such changes in the laws may have an impact on the market sentiment which may in turn affect the performance of the Fund. It is impossible to predict whether such impact caused by any change in the law will be positive or negative for the Fund. In the worst case scenario, a Unit Holder may lose all his investments in the Fund.
- **Related Party Transaction Risk** – The Fund invests in AHAM's collective investment scheme and may also have dealings with parties related to AHAM. Nevertheless, it is our policy that all transactions with related parties are to be executed on terms which are best available to the Fund and which are not less favourable to the Fund than an arms-length transaction between independent parties.

Note: Please refer to the Prospectus for further details on each risk.

It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are recommended to read the whole Prospectus to assess the risks associated with the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.
