INVESTMENT STRATEGY

The Manager will endeavour to achieve the Fund's investment objective by investing a minimum of 80% of the Fund's NAV in debt securities and money market instruments, and a maximum of 20% of the Fund's NAV in deposits and/or cash. In the unlikely event of a credit rating downgrade, we may deal with the said investment(s) in the best interests of the Unit Holders including to dispose of the said investment(s) within a reasonable time frame.

The fundamental investment process will be driven by considering the interest rate outlook for the market over the medium to long-term horizon. This entails studying the relevant economic and business statistics in order to produce forecasts of interest rate trends. This will enable us to decide on the maturity structure for the Fund. We will adopt an investment policy which is flexible and adaptable, which entails the Fund, in accordance with its investment policy.

Our trading strategy when managing the portfolio of investments may vary depending on the prevailing market environment, and interest rate outlook. We will largely maintain a buy and hold strategy for the Fund's investments.

However, we may reduce the Fund's exposure in any investments that we believe may be impacted from the prevailing market conditions. We will, however, remain focused on constructing a portfolio of liquid investments that are able to provide relative certainty of meeting its financial obligations.

We may conduct cross trades between funds which we are currently managing provided that all criteria imposed by the regulators are met. Notwithstanding the above, cross trades between the personal account of our employee and the Fund's account(s) and between our proprietary trading accounts and the Fund's account(s) are strictly prohibited. For listed debt securities, valuation shall be based on the closing price or last known transacted price on the eligible market on which the investment is quoted. If the price is not representative of its fair value or is not available to the market, including in the event of suspension in the quotation of the listed debt securities for a period exceeding fourteen (14) days, or such shorter period as agreed by the Trustee, such listed debt securities will be valued at fair value as determined in good faith by the Manager, based on the methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

UNDERSTANDING THE RISKS OF THE FUND

Below are the risks associated with the investments of the Fund that you should consider before investing.

GENERAL RISKS OF THE FUND	
Market risk	Market risk arises because of factors that affect the entire market place. Factors such as economic growth, political stability and social environment are some examples of conditions that have an impact on businesses, whether positive or negative. It stems from the fact that there are economy-wide perils, or instances of political or social instability which threaten all businesses. Hence, the Fund will be exposed to market uncertainties and fluctuations in the economic, political and social environment that will affect the market price of the investments either in a positive or negative way.
Fund management risk	This risk refers to the day-to-day management of the Fund by us which will impact the performance of the Fund. For example, investment decisions undertaken by us as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error, fraud, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.
Operational risk	Operational risk is the risk of loss due to the breakdown, deficiencies or weaknesses in the operational support functions resulting in the operations or internal control processes producing an insufficient degree of customer quality or internal control by the Manager. Operational risk is typically associated with human error, system failure, fraud and inadequate or defective procedures and controls.
Inflation risk	This is the risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
Loan financing risk	This risk occurs when you take a loan or financing to finance your investment. The inherent risk of investing with borrowed or financed money includes you being unable to service the loan or financing repayments. In the event Units are used as collateral, you may be required to top-up your existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower NAV per Unit as compared to the NAV per Unit at the point of purchase towards settling the loan.
Risk of non-compliance	This risk refers to the possibility that the rules governing the Fund which is set out in the Deed or the Guidelines may not be observed by the Manager, whether intentionally or otherwise. Whilst not every non-observance to the rules governing the Fund will necessarily result in some losses to the Fund, investors are advised that the potential for the Fund to suffer losses may be heightened if the non-observation of the rules governing the Fund is due to the fraud or dishonest acts on the part of the Manager.
Liquidity risk	Liquidity risk arises in two scenarios. The first scenario is where an investment cannot be sold due to the unavailability of a buyer for that investment. The second scenario exists where the investment, by its nature, is thinly traded. This will have the effect of causing the investment to be sold below its fair value which would adversely affect the NAV of the Fund. Upon such event and in the best interest of the Unit Holders, the Trustee may suspend the repurchase of Units requests. Please refer to “ <i>Suspension of Dealing in Units</i> ” of this Information Memorandum for more details.

SPECIFIC RISKS OF THE FUND	
Interest rate risk	<p>This risk refers to the impact of interest rate changes on the valuation of debt securities or money market instruments (hereinafter referred to as “investment”). Generally, movement in interest rates affects the prices of investment inversely. For example, when interest rates rise, prices of investment will fall. The fluctuations of the prices of investment will also have an impact on the NAV of the Fund. This risk can largely be eliminated by holding the investment until their maturity. We also manage interest rate risk by considering each investment’s sensitivity to interest rate changes. When interest rates are expected to increase, the Fund would then likely seek to switch to investment that are less sensitive to interest rate changes. For investments in deposits, the fluctuations in the interest rates will not affect the placement of deposits but will result in the opportunity loss by the Fund if the placement of deposits is made at lower interest rate.</p>
Credit and default risk	<p>Credit risk relates to the creditworthiness of the issuers of the debt securities and money markets instruments and the Financial Institutions where the deposits are placed (hereinafter referred to as “investment”) and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer and/or Financial Institution may impact the value as well as liquidity of the investment. In the case of rated investments, this may lead to a credit downgrade. Default risk relates to the risk of an issuer and/or a Financial Institution of the investment either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the investment. This could adversely affect the value of the Fund.</p>

! It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are recommended to read the whole Information Memorandum to assess the risks associated with the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.

The Manager may, in consultation with the Trustee and having considered the interests of the Unit Holders, suspend the dealing in Units due to exceptional circumstances, where there is good and sufficient reason to do so. The Manager will cease the suspension as soon as practicable after the exceptional circumstances have ceased, and in any event, within twenty-one (21) days from the commencement of suspension.

The period of suspension may be extended if the Manager satisfies the Trustee that it is in the best interest of the Unit Holders for the dealing in Units to remain suspended, subject to a weekly review by the Trustee.

The Trustee may suspend the dealing in Units, if the Trustee, on its own accord, considers that exceptional circumstances have been triggered. In such a case, the Trustee shall immediately call for a Unit Holders' meeting to decide on the next course of action.
