4. RISK FACTORS

This section of the Disclosure Document provides you with information on the general risks involved when investing in the Funds under the Scheme and the specific risks associated with the securities/instruments that the Funds will be investing in.

4.1 GENERAL RISK

The general risks associated with investing in the **Core Funds** and **Islamic Core Funds** include:-

- (1) **Capital and returns not guaranteed risk** – Unlike deposits which generally provide a guarantee on capital invested and carry a specific rate of return, the Funds do not provide a guarantee on capital contributed nor does it guarantee a fixed rate of return.
- (2) **Fund manager risk** – The performance of a Fund depends on the experience, expertise and ability of the Provider to generate returns. Lack of any of the above mentioned may adversely affect the performance of the Funds.
- (3) **Market risk** – Market risk arises because of factors that affect the entire market place. Factors such as economic growth, political stability and social environment are some examples of conditions that have an impact on businesses, whether positive or negative. Market risk cannot be eliminated. It stems from the fact that there are economy-wide perils, or instances of political or social instability which threaten all businesses.
- (4) **Inflation risk** – This is the risk that Members' investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce Members' purchasing power even though the value of the investment in monetary terms has increased.
- (5) **Liquidity risk** – Liquidity risk arises in two scenarios. The first scenario is where an investment cannot be sold due to the unavailability of a buyer for that investment. The second scenario exists where the investment, by its nature, is thinly traded. Liquidity risk will have the effect of causing the investment to be sold below its fair value.
- (6) **Risk associated with Default Option** – For Members who fail to exercise their right to select a Fund under the Core Funds/Islamic Core Funds, their contribution will, by default, be invested into a Core Fund/Islamic Core Fund (i.e. Default Option) based on the age group the Members fall within (refer to Section 6.1 for details). As Members progress to the next age group, their current investments will be switched by default to the investments of the next age group. At the point of switching, the Unit price may be lower than the price Members paid when they contributed into the Core Fund/Islamic Core Fund, and as such Members may be faced with the likelihood of having to realise losses. However, Members should note that the Provider will notify them in writing one month before they reach the maximum age of a particular age group. As such, this risk can be avoided if Members elect to stay on with that particular Core Fund/Islamic Core Fund before their investments are switched.
- (7) **Risk of non-compliance** – The establishment of this Scheme follows rules set out in the Deed and the Guidelines. There is a risk that the Provider may not observe the rules whether intentionally or through inadvertence. Whilst not every non-observance of the rules governing the Funds will necessarily result in some losses to the Funds, you cannot discount the risk that losses may be suffered by the Funds if the non-observance of the rules is serious. This may occur, for instance, if the Provider decides to buy an instrument which is not permitted, whether intentionally or through inadvertence, and thereafter having to sell that instrument which may be at a loss to the Funds.
- (8) **Operational risk** – This risk refers to the possibility of a breakdown in the Provider's internal controls and policies. The breakdown may be a result of human error, system failure or may be fraud where employees of the Provider collude with one another. Whilst this risk may not necessarily cause monetary loss to the Funds, it will most certainly cause inconvenience to Members. The Provider will review its internal policies and system capability to mitigate instances of this risk. Additionally, the Provider maintains a strict segregation of duties to mitigate instances of fraudulent practices amongst employees of the Provider.

- (9) **Legal and regulatory risk** - The investments of the Fund would be exposed to changes in the laws and regulations in the countries in which the Fund is invested. These regulatory changes pose a risk to the Fund as it may materially impact the investments of the Fund. In an effort to manage and mitigate such risk, the Provider seeks to continuously keep abreast of regulatory developments (for example, by closely monitoring announcements on regulators' website and mainstream media) in that country. The Provider may dispose its investments in that particular country should the regulatory changes adversely impact the Members' interest or diminish returns to the Fund. Apart from the aforesaid, the Scheme is also exposed to changes in the law and guidelines relating to private retirement schemes, which may amongst others, affect the Member's PRS account and/or his/her ability to access his/her balance in the account.

4.2 SPECIFIC RISKS FOR THE CORE FUNDS

(1) **Equity investment risk**

The buying and selling of equities carry a number of risks, the most important being the volatility of the capital markets on which those securities are traded and the general insolvency risk associated with the issuers of equities. The value of an equity investment depends on its earnings potential, sound management, treatment of minority shareholders, as well as a myriad of other factors. Failure to achieve the expected earnings would result in declining investment value which in turn affects the performance of the Fund. The Provider will employ stringent stock selection criteria where the Provider will select equities that will potentially increase in value.

(2) **Credit or default risk**

The risk arises when the issuers or Financial Institution of the permitted investments do not make timely payment of profit and/or principal amount. This may lead to default in the payment of profit and/or principal amount and ultimately the value of the Fund may be adversely affected. The management of credit risk is largely accounted for by the Provider's management of issuer or Financial Institution specific risk. This refers to the emphasis on credit analysis conducted to determine the issuer's or the Financial Institution's ability to pay the promised payments. As the Fund may also invest in fixed income instruments that are unrated and rated below the BBB3 / P2 ratings by RAM or equivalent rating by other credit rating agencies, this will imply a higher credit risk.

(3) **Interest rate risk**

This risk refers to the impact of interest rate changes on the valuation of money market instruments. Generally, movement in interest rates affects the prices of money market instruments inversely. For example, when interest rates rise, prices of money market instruments will fall. The fluctuations of the prices of money market instruments will also have an impact on the NAV of the Fund. This risk can largely be eliminated by holding money market instruments until their maturity. We also manage interest rate risk by considering each money market instruments' sensitivity to interest rate changes. When interest rates are expected to increase, the Fund would then likely seek to switch to money market instruments that are less sensitive to interest rate changes. For investments in deposits, the fluctuations in the interest rates will not affect the placement of deposits but will result in the opportunity loss by the Fund if the placement of deposits is made at lower interest rate.

(4) **Collective investment scheme risk**

As the Funds are allowed to invest in collective investment schemes, any adverse effect on the respective collective investment schemes managed by the Provider will impact the NAV of the Funds. For example, the respective collective investment schemes may under-perform its benchmarks due to poor market conditions and as a result, the NAV of the Funds will be adversely affected as the performance of the Funds are dependent on the performance of the respective collective investment schemes.

(5) **Equity-linked instruments investment risk**

(only applicable to AHAM PRS Growth Fund and AHAM PRS Moderate Fund)

Equity-linked instruments would include but are not limited to equity-linked notes. Investments in equity-linked instruments can provide the Fund with the exposure to underlying assets in certain countries which restrict foreign direct investment into its equity market. Equity-linked instruments referenced to underlying securities or indices, are subject to both counterparty risk and the inherent risk of the underlying investment.

The pricing of equity-linked instruments will depend on the growth and performance of the underlying equities (see also “Equity investment risk” above), which would consequentially affect the pricing of the equity-linked instruments. The NAV of the Fund may also be impacted by the valuation of the equity-linked instruments. Factors that may impact the valuation of the instruments will include, but are not to be limited to movement of the underlying asset, volatility of the underlying assets, interest rate levels, the correlation of the underlying assets, the implied future direction of the price of the underlying assets and other such factors. Any change in the aforesaid factors would either positively or negatively impact the valuation of the instruments. If, in the opinion of the Provider, there is material adverse change to the pricing and valuation of the underlying equities, the Provider may consider unwinding the equity-linked instruments to mitigate potential losses that may arise.

(6) Counterparty risk

(only applicable to AHAM PRS Growth Fund and AHAM PRS Moderate Fund)

Counterparty risk concerns the Fund’s investment in structured products that include, but are not limited to, equity-linked notes. Counterparty risk is prevalent as the potential returns derived from the Fund’s investment in structured products are dependent on the ongoing ability and willingness of the counterparty i.e. a Financial Institution to fulfil their respective financial commitments to the Fund in a timely manner. Bankruptcy, fraud or regulatory non-compliance arising out of and/or in connection with the counterparty may impair the operations and/or the performance of the Fund. However, stringent credit selection process of the counterparty of the structured products by the Provider prior to commencement of investments and monitoring mechanisms established by the Provider may potentially mitigate this risk. If, in the opinion of the Provider there is material adverse change to counterparty, the Provider may consider unwinding the counterparty’s structured product to mitigate potential losses that may arise.

(7) Currency risk

Currency risk is also known as foreign exchange risk. It is a risk associated with investments denominated in foreign currencies. When the foreign currencies fluctuate unfavourably against Ringgit Malaysia, this will result in the value of the Funds’ investment to depreciate which will in turn affect the Members’ investments in the Funds.

(8) Country risk

The foreign investment of a Fund may be affected by risks specific to the country in which it invests. Such risks, which include changes in a country’s economic fundamentals, social and political stability, currency movements and foreign investment policies, may have an impact on the prices of the Fund’s investment in that country. Consequently, it may also affect the Fund’s NAV.

(9) Derivatives risk

(only applicable to AHAM PRS Growth Fund and AHAM PRS Moderate Fund)

The Provider may use derivatives for investment purposes. Valuation of derivatives takes into account a multitude of factors such as price of the underlying assets, volatility of underlying assets, interest rate levels, the correlation between the underlying assets and the derivatives, the implied future direction of the underlying assets and other factors. Any adverse changes in the factors mentioned above may result in a lower NAV and higher volatility for the Funds’ NAV.

4.3 SPECIFIC RISKS FOR THE ISLAMIC CORE FUNDS

(1) Shariah-compliant equity investment risk

The buying and selling of Shariah-compliant equities carry a number of risks, the most important being the volatility of the capital markets on which those securities are traded and the general insolvency risk associated with the issuers of the Shariah-compliant equities. The value of an equity investment depends on its earnings potential, sound management, treatment of minority shareholders, as well as a myriad of other factors. Failure to achieve the expected earnings would result in declining investment value which in turn affects the performance of the Fund. The Provider will employ stringent stock selection criteria where the Provider will select equities that will potentially increase in value.

(2) **Shariah-compliant equity-linked instruments investment risk**

(only applicable to AHAM Aiiiman PRS Shariah Growth Fund and AHAM Aiiiman PRS Shariah Moderate Fund)

Shariah-compliant equity-linked instruments would include but are not limited to Shariah-compliant equity-linked notes. Investments in Shariah-compliant equity-linked instruments can provide the Fund with the exposure to underlying assets in certain countries which restrict foreign direct investment into its equity market. Shariah-compliant equity-linked instruments referenced to underlying securities or indices, are subject to both counterparty risk (see “Counterparty risk” below) and the inherent risk of the underlying investment.

The pricing of Shariah-compliant equity-linked instruments will depend on the growth and performance of the underlying equities (see also “Shariah-compliant equity investment risk” above), which would consequentially affect the pricing of the Shariah-compliant equity-linked instruments. The NAV of the Fund may also be impacted by the valuation of the Shariah-compliant equity-linked instruments. Factors that may impact the valuation of the Shariah-compliant equity-linked instruments include, but are not limited to movement of the underlying asset, volatility of the underlying assets, profit rate levels, the correlation of the underlying assets, the implied future direction of the price of the underlying assets and other such factors. Any change in the aforesaid factors would either positively or negatively impact the valuation of the Shariah-compliant equity-linked instruments. If, in the opinion of the Provider, there is material adverse change to the pricing and valuation of the underlying Shariah-compliant equities, the Provider may consider unwinding the Shariah-compliant equity-linked instruments to mitigate potential losses that may arise.

(3) **Counterparty risk**

(only applicable to AHAM Aiiiman PRS Shariah Growth Fund and AHAM Aiiiman PRS Shariah Moderate Fund)

Counterparty risk concerns the Fund’s investment in Shariah-compliant equity-linked instruments and Islamic derivatives (“Investments”). Counterparty risk is prevalent as the potential returns derived from the Investments are dependent on the ongoing ability and willingness of the issuer i.e. a Financial Institution to fulfil their respective financial commitments to the Fund in a timely manner. Bankruptcy, fraud or regulatory non-compliance arising out of and/or in connection with the issuer may impair the operations and/or the performance of the Fund. However, we will conduct stringent credit selection process of the issuer of the Investments prior to commencement of Investments and monitoring mechanisms established by us may potentially mitigate this risk. If, we are of the opinion there is material adverse change to an issuer, we may consider unwinding the issuer’s Investments to mitigate potential losses that may arise.

(4) **Credit or default risk**

The risk arises when the issuers or Financial Institution of the permitted investments do not make timely payment of profit and/or principal amount. This may lead to default in the payment of profit and/or principal amount and ultimately the value of the Fund may be adversely affected. The management of credit risk is largely accounted for by the Provider’s management of issuer or Financial Institution specific risk. This refers to the emphasis on credit analysis conducted to determine the issuer’s or Financial Institution’s ability to pay the promised payments.

(5) **Profit rate risk**

Sukuk and Islamic money market instruments are subject to profit rate fluctuations. Generally, movement in profit rates affects the prices of Sukuk and Islamic money market instruments inversely. For example, when profit rates rise, prices of Sukuk and Islamic money market instruments will fall. The fluctuations of the prices of Sukuk and Islamic money market instruments will also have an impact on the NAV of the Fund. This risk can largely be eliminated by holding the Sukuk and Islamic money market instruments until their maturity. We also manage profit rate risk by considering each Sukuk’s and Islamic money market instruments’ sensitivity to profit rate changes. When profit rates are expected to increase, the Fund would then likely seek to switch to Sukuk and Islamic money market instruments that are less sensitive to profit rate changes. For investments into Islamic deposits, the fluctuations in the profit rates will not affect the placement of Islamic deposits but will result in the opportunity loss by the Fund if the placement of Islamic deposits is made at lower profit rates.

(6) **Islamic collective investment scheme risk**

As the Funds are allowed to invest in Islamic collective investment schemes, any adverse effect on the Islamic collective investment schemes managed by the Provider will impact the NAV of the Fund. For example, the Islamic collective investment schemes may under-perform its benchmarks due to poor market conditions and as a result, the NAV of the Fund will be adversely affected as the performance of the Fund is dependent on the performance of the Islamic collective investment schemes. In addition, any mismanagement of the collective investment schemes or poor decisions taken by the target fund manager may adversely affect the NAV of the collective investment schemes and hence, the Fund.

(7) Currency risk

Currency risk is also known as foreign exchange risk. It is a risk associated with investments denominated in foreign currencies. When the foreign currencies fluctuate unfavourably against Ringgit Malaysia, this will result in the value of the Funds' investment to depreciate which will in turn affect the Members' investments in the Fund.

(8) Country risk

The foreign investments of the Fund may be affected by risks specific to the country in which it invests in. Such risks, which include changes in a country's economic fundamentals, social and political stability, currency movements and foreign investment policies, may have an impact on the prices of the Funds' investments in such countries. Consequently, it may also affect the Funds' NAV.

(9) Reclassification of Shariah status risk

With reference to "Shariah Investment Guidelines" section on page 37, this risk refers to the risk that the currently held Shariah-compliant securities by the Fund may be reclassified to be Shariah non-compliant in the periodic review of the securities by the SAC of the SC or the Shariah Adviser. If this occurs, then the value of the Fund may be adversely affected as the investments will be disposed of at cost, discounting any unrealised gains prior to the sale. The Provider will take the necessary steps to dispose of such securities in accordance with the advice from the Shariah Adviser.

(10) Islamic derivatives risk

(only applicable to AHAM Aiiiman PRS Shariah Growth Fund and AHAM Aiiiman PRS Shariah Moderate Fund)

The Provider may use Islamic derivatives for investment purposes. Valuation of Islamic derivatives takes into account a multitude of factors such as price of the underlying assets, volatility of underlying assets, profit rate levels, the correlation between the underlying assets and the Islamic derivatives, the implied future direction of the underlying assets and other factors. Any adverse changes in the factors mentioned above, may result in a lower NAV.

4.4 RISK MANAGEMENT

In the Provider's day-to-day running of the business, the Provider employs a proactive risk management approach to manage portfolio risks and operational risks. The Board has established a board compliance & risk management committee to oversee the Provider's risk management activities both at operational level and at portfolio management level to ensure that the risk management process is in place and functioning. The board compliance & risk management committee comprises at least three (3) Board members and is chaired by an independent director. At the operational level, the Provider has established a compliance risk oversight committee with the primary function of identifying, evaluating and monitoring risks as well as to formulate internal control measures to manage and mitigate the exposure to risks that may affect the performance of the Fund, returns to the Members' interest within a clearly defined framework and is primarily responsible for ensuring that the policies and procedures that have been implemented are reviewed on an on-going basis with periodic assessments. The compliance & risk oversight committee reports to the board compliance & risk management committee on a quarterly basis.

The Provider has in place a system that is able to monitor the transactions to ensure compliance with the Funds' limits and restrictions. These limits are system-controlled and not manually tracked, thus reducing the probability of human error occurring in ensuring the Funds' limits and restrictions are adhered to. The Provider also undertakes stringent evaluation of movements in market prices and regularly monitors, reviews and reports to the investment committee to ensure that all the Funds' investment objectives are met. Regular portfolio reviews by senior members of the investment team further reduce the risk of implementation inconsistencies and Guidelines violations. The Provider also has in place a credit risk management process to reduce credit risk of derivatives counterparty. Prior to entering into a contract with the counterparty, the Provider will conduct an evaluation on the credit of the counterparty to ensure they are able to meet their contractual obligations. It is important to note that an event of downgrade does not constitute a default. If the Provider views that the downgrade in the rating of the counterparty may lead to high credit risk, the Provider will not hesitate to take pre-emptive measures to unwind these positions. In the event of a downgrade in the rating of the issuer in the case of over-the-counter (OTC) options, the Provider may opt to sell-down or reduce its exposure into the options. Nevertheless, the Provider will carry out a credit analysis on issuers to determine their ability to meet financial obligations prior to making the investment.

THIS IS A PRIVATE RETIREMENT SCHEME

The Provider also employs a performance attribution system that enables the Provider to review the performance of the Funds to determine the key factors that have contributed and detracted from the Funds' performance. This system complements the Provider's overall risk management process as the system also provides standard risk analytics on the portfolio such as the Funds' standard deviation, tracking error and sharpe ratio. The data produced by the performance attribution system is reviewed regularly and at least on a monthly basis in meetings chaired by the managing director and participated by the portfolio managers and the performance evaluation team.

The Provider engages a stringent screening process by conducting fundamental analysis of economic, political and social factors to evaluate their likely effects on the performance of the markets and sectors. Regular meetings are held to discuss investment themes and portfolio decisions taken at the meetings are then implemented according to the investment guidelines which also take into account requirements for minimum portfolio diversification across individual investment holdings, sectors, geographies and asset classes (based on the respective portfolio's objective and strategy). The Provider also practises prudent liquidity management with the objective of ensuring that the Funds are able to meet their short-term expenses.

5.1 AHAM PRS GROWTH FUND

Investment Objective

To facilitate the accumulation of retirement savings[#] by Members for their retirement needs, the Fund aims to generate capital growth.

*Any **material** change to the investment objective of the Fund would require Members’ approval.*

Asset Allocation

The Fund’s asset allocation is as follows:

Equities and equity-linked instruments	0% to 90%
Fixed income instruments	10% to 100%

The Provider will also maintain a sufficient level of cash or cash equivalent for liquidity purposes.

[#] The Fund is not a capital guaranteed nor a capital protected fund.

Investment Strategy

To achieve the objective of generating capital growth, the Fund will invest in a portfolio of mixed assets. Because of the Fund's relatively aggressive nature, the Fund will be investing mainly in a portfolio of growth biased equities to achieve capital growth. The Fund's exposure in the equity markets will be capped at a maximum of 90% of the Fund's NAV and will include investments in Foreign Markets to increase the Fund's investment and diversification opportunities. The Fund may also invest in collective investment schemes that have similar objectives to the Fund.

The Fund will also have a minimum of 10% of its NAV invested in both local and foreign fixed income instruments listed in Section 5.11 below. The Provider will remain focused on a stringent credit selection process to reduce potential volatility and credit default risk.

The Fund may invest in derivatives, such as index futures, foreign exchange forward contracts and cross currency swaps mainly for hedging purposes. Foreign exchange forward contracts enable the Fund to buy or sell currency at the specified exchange rate, specified time and specified amount, as indicated in the contract. Cross currency swaps allow the Fund to convert foreign exchange rate and/or interest rate exposures between two currencies. These derivatives may be used to hedge the principal and/or the returns of the foreign currency denominated investments back to RM. The employment of derivatives under these circumstances is expected to reduce the impact of foreign currency movements on the Fund's NAV. While the hedging strategy will assist with mitigating the potential foreign exchange losses by the Fund, any potential gains from the hedging strategy will be capped as well. The Fund may also employ derivatives for investment purposes to enhance the returns of the Fund by taking a view on the underlying asset or currency and establish a long position to gain a specific underlying exposure.

The Fund may also invest in structured products such as, but not limited to equity-linked notes. Investments in these structured products will provide the Fund with the exposure to the reference asset. Each of these structured products has its own targeted maturity and will expose investors to the price fluctuations of the stock to which the equity-linked note is linked. As a result, any fluctuation in the price of the structured product may also lead to fluctuations in the NAV of the Fund i.e., if the price of the structured product sees a drop in price, the NAV of the Fund will also be negatively impacted. As the note is structured by an external party, investments in a structured product will also expose the Fund to counterparty risk, which the Provider will attempt to mitigate by carrying out a stringent selection process on the counterparty prior to an investment being made..

5.5 AHAM AIIMAN PRS SHARIAH MODERATE FUND

Investment Objective

5.7 INVESTMENT PROCESS

EQUITIES, SHARIAH-COMPLIANT EQUITIES, EQUITY-LINKED INSTRUMENTS OR SHARIAH-COMPLIANT EQUITY-LINKED INSTRUMENTS

(Applicable to Core Funds and Islamic Core Funds.)

The fundamental investment process will be driven by a combination of top-down and bottom-up strategies in the market at any period of time. The stringent investment process and selection process is to generate capital growth over a medium term.

Our top-down strategy is where analysis is done on the macroeconomics which may include but is not limited to the evaluation and analysis of global growth and economic outlook, inflation and interest rate expectations, currency expectations, as well as other common indicators. These indicators will include, but will not be limited to, the country's balance of payments and fiscal position.

Our bottom-up strategy is where analysis is done on individual stocks. Analysis conducted would be fundamental in nature with emphasis on companies' ability to provide growth prospects as well as the cash flow generation ability of the companies. However, for the **AHAM PRS Moderate Fund** and **AHAM Aiiman PRS Shariah Moderate Fund**, the Provider will also be focusing on the companies' ability to pay dividend. Key factors which are useful to the identification of such companies would include assessment on the basis of yield, yield sustainability, earnings multiples, earnings growth, liquidity and stability.

The above would be part of the investment selection process that will be taken by the Provider before making an investment decision.

(Applicable to **AHAM PRS Conservative Fund** and **AHAM Aiiman PRS Shariah Conservative Fund**)

The fundamental investment selection process will be driven by a bottom-up strategy prevailing in the market at any period of time. The bottom-up strategy is where analysis is done on individual stocks. Analysis conducted would be fundamental in nature with emphasis on the companies' ability to pay dividends, its growth prospects as well as the cash flow generation ability of the companies. Key factors which are useful to the identification of such companies would include assessment on the basis of yield, yield sustainability, earnings multiples, earnings growth, liquidity and stability.

The above investment selection process is used by the Provider before making an investment decision. All investments are made through a stringent investment selection process with the aim of meeting the Fund's investment objective.

FIXED INCOME INSTRUMENTS OR ISLAMIC FIXED INCOME INSTRUMENTS

(Applicable to Core Funds and Islamic Core Funds.)

The selection of the investment will depend largely on the credit quality of the issuer to assure the relative certainty of principal repayment and overall total return stability. The Provider will also consider the following issues when considering the portfolio's investment:

- Issuer's and/or guarantor's industry and business medium to long-term outlook;
- Issuer's and/or guarantor's financials strength and gearing levels;
- Issuer's and/or guarantor's cash-flow quality and volatility;
- Issuer's and/or guarantor's expected future cash flow and ability to pay interest and principal;
- Issuer's and/or guarantor's ratings by RAM or equivalent rating by other credit rating agencies;
- Interest rate sensitivity;
- Collateral type and value, and claims priority; and
- Price and yield-to-maturity.

COLLECTIVE INVESTMENT SCHEMES OR ISLAMIC COLLECTIVE INVESTMENT SCHEMES

The Funds can invest up to 95% of its NAV in any one or more of the collective investment schemes or Islamic collective investment schemes that have similar investment objectives to the Funds until the Funds reach a size of RM200 million. Upon reaching RM200 million NAV, the value of the Funds' investment in any of the collective investment schemes or Islamic collective investment schemes must not exceed 40% of the Fund's NAV.

The Provider will be monitoring the investment in collective investment schemes or Islamic collective investment schemes on a monthly basis to ensure that the Fund's asset allocation adheres to the asset allocation set for the Fund. The asset allocation restrictions as mentioned above are determined at the point of purchase and will be complied with at all times subsequent to the purchase. However, as the Fund's NAV is subject to price movements of the Fund's assets and redemption of Units in the Fund, the asset allocation percentage may vary during the month. Should such circumstances occur and result in a breach of the asset allocation limits, we will rebalance the asset allocation during the month-end rebalancing exercise.

5.8 TRADING POLICY

(Applicable to Core Funds and Islamic Core Funds.)

The Provider's investment philosophy is to invest in equities, equity-linked instruments, Shariah-compliant equities and Shariah-compliant equity-linked instruments (hereinafter refer to as "equities" in the context of this section only) based on the in-house investment strategy and equities selection process that have been put in place.

The Provider is optimistic that the investment strategy and equities selection process that are currently used will be an effective tool in making sound investment decisions to enable a possibility of optimising medium term to longer term returns. The Provider will have some core holdings with a medium to long-term investment horizon bias, similar to a buy and hold philosophy to capitalise on growth potential. Concurrently, the Provider will also take advantage of shorter term trades to actively take advantage of market opportunities that may be beneficial for each of the Funds in meeting their respective objectives.

(Applicable to **AHAM PRS Conservative Fund** and **AHAM Aiiman PRS Shariah Conservative Fund**)

The Provider does not expect to actively trade the portfolio. However, the Provider actively monitors individual securities within the portfolio and will not hesitate to liquidate an investment if there are potential signs of price deterioration.

5.9 TEMPORARY DEFENSIVE MEASURES

The Provider may take temporary defensive positions that may be inconsistent with the Funds' principal strategy by raising cash levels and investing in fixed income instruments (for **AHAM PRS Growth Fund** and **AHAM PRS Moderate Fund**) and Islamic fixed income instruments (for **AHAM Aiiman PRS Shariah Growth Fund** and **AHAM Aiiman PRS Shariah Moderate Fund**), in attempting to respond to adverse market conditions, economics, political or any other conditions. Fixed income instruments/Islamic fixed income instruments that may be used during a temporary defensive position would include liquid and low risk fixed income instruments/Islamic fixed income instruments such as short duration bonds/sukuks and government bonds/sukuks. The Fund may also invest in collective investment scheme that provides exposure to these fixed income instruments/Islamic fixed income instruments.

For **AHAM PRS Conservative Fund** and **AHAM Aiiman PRS Shariah Conservative Fund**, during periods of economic uncertainty or a downturn in economic conditions, the Provider may look to temporarily increase holdings in money market instruments/ Islamic money market instruments, and deposits/Islamic deposits up to 100% of the Fund's NAV to protect the overall portfolio.

5.10 SHARIAH INVESTMENT GUIDELINES

The following are the Shariah investment guidelines for the Islamic Core Funds, which the Provider, is to strictly adhere to on a continuous basis. At all times, the Islamic Core Funds shall invest in activities and instruments that are allowed under Shariah principles and shall not invest in activities and instruments that are prohibited under Shariah principles based on the Shariah Adviser's established parameters which are mutually agreed by the Provider.

^{1,2} Interest income and dividends from Shariah non-compliant investments will be compared against the group revenue. However, if the main activity of the company is holding of investments, the dividends from Shariah non-compliant investments will be compared against the group revenue and group profit before taxation.

B. Financial Ratio Benchmarks

The applicable financial ratios benchmarks are as follows:

- Cash over Total Assets
Cash will only include cash placed in conventional accounts and instruments, whereas cash placed in Islamic accounts and instruments will be excluded from the calculation.
- Debt over Total Assets
Debt will only include interest-bearing debt whereas Islamic financing or sukuk will be excluded from the calculation.
Each ratio, which is intended to measure riba and riba-based elements within a company's statements of financial position, must be less than 33%.

In addition to the above two-tier quantitative criteria, the SAC of the SC also takes into account the qualitative aspect which involves public perception or image of the company's activities from the perspective of Islamic teaching.

1. Investment in Foreign Markets

The following matters are adopted by the Shariah Adviser in determining the Shariah status of the Fund's investments.

- (c) sum of accounts receivable and cash divided by average 36-month market capitalization must be less than 49 per cent, where "accounts receivables" means current receivables plus longer term receivables;

Where the use of the quoted market price is inappropriate, or where no market price is available, including in the event of suspension in the quotation of the securities for a period exceeding fourteen (14) days, or such shorter period as agreed by the Scheme Trustee, such securities/ Shariah-compliant securities will be valued at fair value determined in good faith by the Provider, based on the methods or bases approved by the Scheme Trustee after appropriate technical consultation.

Debentures/Sukuk

For unlisted debentures/Sukuk denominated in RM will be done using the price quoted by a bond pricing agency (“BPA”) registered with the SC. If the Provider is of the view that the price quoted by BPA differs from the market price quoted by at least three (3) independent dealers by more than twenty (20) basis points and the Provider determines that the methodology used by the dealers to obtain the market price is more appropriate, the Provider may elect to use the price quoted by the independent dealers as the market price, provided that the Provider records the basis for using a non-BPA price, obtain the necessary internal approvals to use the non-BPA price and keep an audit trail of all decisions and basis for adopting the market yields. Investments in unlisted foreign debentures/Sukuk will be valued using the average indicative price quoted by at least three (3) independent and reputable institutions.

For foreign exchange forward contracts and Islamic foreign exchange forward contracts (“FX Forwards”), we will apply interpolation formula to compute the value of the FX Forwards based on the rates provided by Bloomberg or Reuters. If the rates are not available on Bloomberg or Reuters, the FX Forwards will be valued by reference to the average indicative rate quoted by at least three (3) independent dealers. Sales Charge	=	Nil
NAV per Unit	=	RM 0.50 (Selling Price)

Items	Formula	Amount

Tax penalty	=	8% on the amount withdrawn (for pre-retirement withdrawal and applicable to Sub-account B only)

Items	Formula	Amount
Number of Units of withdrawal	-	10,000 Units
Amount of withdrawal	Total Units of withdrawal x NAV per Unit = 10,000 Units x RM0.50	RM 5,000

7.3 WITHDRAWAL FREQUENCY AND MINIMUM UNITS WITHDRAWN

Members can request their first pre-retirement withdrawal from Sub-account B, one (1) year after making their first contribution (whether by Member or employer on behalf of its employee) with that private retirement scheme provider. Any subsequent withdrawal thereafter can be made by the Member once every calendar year from the Provider or other private retirement scheme provider (from one or multiple funds under this Scheme or other private retirement schemes).

There is no minimum number of Units for withdrawal request to be made from Sub-account B.

7.4 COOLING-OFF RIGHT AND COOLING-OFF PERIOD

A Cooling-off Right refers to the right of the Member to obtain a refund of his/her contribution in the Funds if he/she so requests within the Cooling-off Period i.e. within six (6) Business Days from the date of receipt of the application by the Provider. The Provider must obtain prior authorisation of the PPA before this request can be processed.

A Cooling-off Right is only given to an individual who makes a contribution in a private retirement scheme for the first time, with the exception of the following listed parties.

- (1) A staff of the Provider; and
- (2) A person registered with a body approved by the SC to deal in private retirement schemes.

Once an individual is a member of a private retirement scheme and has exercised his/her Cooling-off Right, the Cooling-off Right is not available for contributions in other private retirement schemes. Members who exercise their Cooling-off Right will be refunded for every Unit held based on the NAV per Unit, on the day those Units were first purchased and the Sales Charge per Unit originally imposed on the day the Units were first purchased. Members shall be refunded within ten (10) days from date the application request is authorised by the PPA.

7.5 TRANSFER FACILITY

Prior to Members reaching the Retirement Age, transfer may be requested by the Members to transfer their Units or vested Units in the Fund or Funds under this Scheme to another private retirement scheme of another private retirement scheme provider once every calendar year provided that:

- (1) the Member has been a member of this Scheme for at least one (1) year; and
- (2) the transfer of Units from a Fund must be made to one (1) fund under another private retirement scheme of another private retirement scheme provider.

In effecting the transfer of Units,

- (1) the Provider may rely on the intended private retirement scheme provider's verification of the identity of the Member requesting such transfer; and
- (2) the proceeds from the cancellation of Units in Sub-account A (whether from the Fund or Funds managed by the Provider) must be used to create Units in "sub-account a" of one or multiple funds managed by another private retirement scheme provider. Similarly, the proceeds from the cancellation of Units in Sub-account B (whether from the Fund or Funds managed by the Provider) must be used to create Units in "sub-account b" of one or multiple funds managed by another private retirement scheme provider.

Monies will be transferred to the other private retirement scheme provider within five (5) Business Days of receiving a completed transfer form from the PPA.

Note: Members who hold conditionally vested Units are not permitted to transfer their Units. In this case, it would apply to contribution made by employer on behalf of the employee which may be subject to a Vesting Schedule. Transfer of Units to another private retirement scheme provider can only be made when Units issued pursuant to such contributions are vested Units.

7.6 SWITCHING FACILITY

Members are permitted to switch from and to other Funds within the Scheme. There will not be any limitation imposed on the frequency of switching and there is no minimum amount per switch as well. The switching will be made at the prevailing Redemption Price of the Fund and the Selling Price of the intended Fund to be acquired, on a Business Day when the switching request is received by the Provider.

The Provider reserves the right to reject any switching request:-

- (1) that it regards as disruptive to efficient portfolio management; or

Please note that switching from AHAM Aiiiman PRS Shariah Growth Fund, AHAM Aiiiman PRS Shariah Moderate Fund and AHAM Aiiiman PRS Shariah Conservative Fund to a conventional fund is discouraged for Muslim Members.

Pursuant to the Anti-Money Laundering, Anti-Terrorism Financing and Proceeds of Unlawful Activities Act 2001 (“AMLATFPUAA”) and SC’s Guidelines on Prevention of Money Laundering and Terrorism Financing for Reporting Institutions in the Capital Market, it is the responsibility of the Provider to prevent AHAM from being used for money laundering and terrorism financing activities. To this end, the Provider has established an Anti-Money Laundering /Counter-Financing of Terrorism Framework (AML/CFT Framework) and put in place anti-money laundering process and procedures to combat such activities. This includes a robust due diligence process and procedures for client-onboarding (such as know-your-client procedures and customer due diligence) as well as ongoing monitoring of clients’ transactions to detect any suspicious transactions.

To meet the regulatory obligations to verify the identity of our clients and to verify the source of funds, the Provider may request for additional information from the client. Information requested may include, but not limited to, supporting documents, documentary evidence to support information given and could extend to documents regarding identity of beneficial owners (if applicable). The Provider reserves the right to reject an application to invest in the Fund should the clients fail to provide the information required. Taxation of the Funds and Members

1. This letter has been prepared for inclusion in the Replacement Disclosure Document ("the Disclosure Document") in connection with the offer of units in the abovementioned Funds (each of the Funds is referred to hereinafter as "the Fund").

The following is general information based on Malaysian tax law in force at the time of lodging the Replacement Disclosure Document with the Securities Commission Malaysia ("SC") and investors should be aware that the tax law may be changed at any time. To an extent, the application of tax law depends upon a member's individual circumstances. The information provided below does not constitute tax advice. The PRS Provider therefore recommends that a member consult his accountant or tax adviser on questions about his individual tax position.

2. Taxation of the Fund

2.1 Income Tax

As the Fund's Trustee is a resident in Malaysia, the Fund is regarded as a resident in Malaysia. The taxation of the Fund is governed principally by Sections 61 and 63B of the Malaysian Income Tax Act, 1967 ("MITA").

The Scheme is an approved scheme under the MITA pursuant to Section 2 of the MITA. Section 2 defines approved scheme as the Employees Provident Fund, PRS or any pension or provident fund, scheme or society approved by the Director General of the Inland Revenue ("DGIR") under Section 150 of the MITA. PRS is further defined as a retirement scheme approved by the SC in accordance with the Capital Markets and Services Act, 2007.

Based on the above, income received by the Fund of the Scheme is exempted from income tax ("income tax" or "tax") pursuant to Paragraph 20 of Schedule 6 to the MITA.

2.2 Gains on Disposal of Investments

Gains on disposal of investments by the Fund will not be subject to income tax but where the investments represent shares in real property companies, such gains may be subject to Real Property Gains Tax ("RPGT") under the RPGT Act, 1976. A real property company is a controlled company which owns or acquires real properties or shares in real property companies with a market value of not less than 75% of its total tangible assets. A controlled company is a company which does not have more than 50 members and is controlled by not more than 5 persons.

2.3 Service Tax

The issuance of units by the Fund to investors will not be subject to Service Tax. Any distributions made by the Fund to unitholders are also not subject to Service Tax. The Fund would not be required to pay Service Tax on the acquisition of fund management services from the PRS provider.

To the extent that the Fund invests in any financial services products (e.g. securities, derivatives, units in a fund or unit trust), the acquisition of these interests will also not be subject to Service Tax.

If the Fund acquires any imported taxable services from a service provider outside of Malaysia, these services would be subject to 6% Service Tax. The Fund would be required to file an SST-02A return on an ad hoc basis and report and pay this amount of tax to the Royal Malaysian Customs Department.

3. Taxation of Members

3.1 Taxable Distribution

The amount determined by the PRS Provider to be distributed shall be distributed to all members in proportion to the number of units held by them in the Fund as of the date that the distribution is declared. The distribution shall be effected by the creation of additional units of the Fund in favour of and to the credit of the member.

Distribution of income in the form of units of the Fund to member which are reinvested in the PRS are not liable to tax as the member does not made any withdrawals from the Fund.

3.2 Withdrawal from the Scheme

Pursuant to Section 109G of the MITA, where withdrawal of contributions from the Scheme by a member is made prior to the member attaining the age of 55 (other than by reason of permanent total disablement, serious disease, mental disability, death or permanently leaving Malaysia) the amount of contribution withdrawn will be taxed at the rate of 8%. The PRS Provider is required to deduct tax at the rate of 8% from the withdrawn amount before making payment to the member. The tax withheld has to be remitted to the DGIR within one month after making the payment to the member. In the event that the PRS Provider fails to remit any amount of the tax withheld, a penalty of a sum equivalent to 10% of the amount not remitted shall be imposed on the PRS Provider and the increased sum shall be a debt due from the PRS Provider to the government.

3.3 Switching Fund

If a member switches a fund to another fund either managed by the same or a different PRS provider, no withholding tax would be imposed as the member does not make any withdrawal in cash when the switch is made.

3.4 Sale, Transfer or Redemption of Units

Any gains realised by a member on the sale, transfer or redemption of his units are generally tax-free capital gains unless the member is an insurance company, a financial institution or a person trading or dealing in securities. Generally, the gains realised by these categories of members constitute business income on which tax is chargeable.

3.5 Reinvestment of Distribution

Members who receive their income distribution by way of investment in the form of the purchase of new units will be deemed to have received their income distribution after tax and reinvested that amount in the Fund.

3.7 Unit Splits

Unit splits issued by the Fund are not taxable in the hands of the members.

3.8 Service Tax

Pursuant to the Lampiran A of the First Schedule of the Service Tax Regulations 2018 (“First Schedule”), only taxable services listed in the First Schedule are subject to service tax. This excludes any investment income or gains received by the member as such income and gains are not prescribed taxable services.

The legal fees, consultant fees and management fees may be subject to service tax at 6% if the service providers are registered for Services Tax. Effective from 1 January 2019, the imposition and scope of service tax has been widened to include any imported taxable service.

4. Tax Relief and Deduction on Contributions to the Scheme

Pursuant to Section 49(1D) of the MITA, a member who is tax resident for the basis period for a year of assessment (“YA”) is entitled to a tax relief of up to RM3,000 in respect of contributions made to a PRS or deferred annuity. This is effective from YA 2012 and extended until YA 2025.

Employers are given a tax deduction of up to 19% of the employees’ remuneration under Section 34(4) of the MITA for contributions made by the employers to an approved scheme which is defined in (3.1) above. The tax deduction on contributions made by employers on behalf of employees to a PRS is effective from YA 2012.

With respect to employers’ contributions to a PRS on behalf of employees that are subject to a vesting schedule, upon termination of employment of an employee, unvested benefits (to which the employee is not entitled in the member’s account) returned to the employer may be subject to tax in the hands of the employer pursuant to Section 22(2) of the MITA.

We hereby confirm that the statements made in this tax adviser letter correctly reflect our understanding and the interpretation of the current Malaysian tax legislations and the related interpretation and practice thereof, all of which may subject to change. Our comments above are general in nature and cover taxation in the context of Malaysian tax legislation only and do not cover foreign tax legislation. The comments do not represent specific tax advice to any investors and we recommend that investors obtain independent advice on the tax issues associated with their investments in the Fund.
