INVESTMENT OBJECTIVE

The Fund aims to provide regular income over the medium to long term period.

Any material change to the Fund's investment objective would require Unit Holders' approval.

PERFORMANCE BENCHMARK

12-month Malayan Banking Berhad Fixed Deposit Rate.

ASSET ALLOCATION

- A minimum of 60% of the Fund's NAV to be invested in bond; and
- A maximum of 40% of the Fund's NAV to be invested in money market instruments, deposits and cash.

INVESTMENT STRATEGY

The Fund will be investing at least 60% of the Fund's NAV in a single bond. Up to 40% of the Fund's NAV will be invested in liquid assets such as money market instruments, deposits and cash.

We will combine a top-down and bottom-up investment approach to identify investment opportunities. Macroeconomic trends and market analysis are the important considerations in deriving the top-down perspective on interest rate outlook, fixed income markets and currency movements. For bottom-up approach, we would conduct analysis on the issuers to assess their ability to service their debt obligations.

The fundamental investment process will be driven by two main factors:

- Credit quality of the bond; and
- Yield of the bond.

The Manager will aim to strike an overall balance between these two factors to deliver the best risk-adjusted return to Unit Holders.

The Fund's investment in the bond would consist of a corporate bond (including hybrid securities such as AT1 CoCo bonds). The selection of the bond will not be constrained by credit ratings of the issuance. However, the selection will depend largely on its quality, where the issuer displays strong ability to meet its financial obligations, healthy cash-flow, the collateral type, value, claims, priority as well as offer highest safety for timely payment of interest and principal. The Fund may invest in foreign market.

This Fund has an **Early Termination** feature. If this feature is triggered, and subject to the requirements specified under "How is an Early Termination triggered?" section of this Information Memorandum, we will return the investment proceeds to you. In the event of an Early Termination, the Fund will be terminated, without having to seek the Unit Holders' prior approval, on the Early Termination Date, which will fall on a Business Day as decided by the Manager.

The payment of proceeds to you, however, is expected to be within two (2) weeks from the Early Termination Date and will not be more than one (1) month from the Early Termination Date.

In the event of redemption or Early Termination is triggered, we will ensure that the Fund has sufficient liquidity to meet the redemption. In an effort to manage and mitigate the risk:-

- The liquidity of the single bond will be screened and assessed during the selection process to ensure that the bond is liquid; and
- The bid-ask spread and transaction volume of the bond in the Fund will be monitored to mitigate the impact from redemption requests on the Fund's NAV.

Please refer to "Early Termination" section of this Information Memorandum for more details.

Temporary Defensive Measure

We may take temporary defensive positions that may be inconsistent with the Fund's principal strategy and asset allocation to protect the Fund against adverse market conditions that may impact financial markets. To manage the risk of the Fund, we may shift the Fund's focus and exposure into lower risk investments such as money market instruments, deposits and cash.

Derivatives

The Fund may employ derivatives, such as foreign exchange forward contracts, cross currency swaps or interest rate swaps primarily for hedging purposes. Cross currency swaps and/or foreign exchange forward contracts could be used to hedge the principal and/or the returns of the foreign currency denominated bond back to MYR while interest rate swaps could be used to hedge the interest rate exposure borne by the Fund. As prices of bonds are generally inversely related to yields and interest rates, the use of interest rate swap will enable us to exchange the fixed interest rate for floating interest rate with the intention to mitigate the potential decline in prices of the Fund's investments. While the hedging strategy will assist with mitigating the potential foreign exchange losses by the Fund, any potential gains from the hedging strategy will be capped as well.

Cross Trades

AHAM may conduct cross trades between funds which it is currently managing provided that all criteria imposed by the regulators are met. Notwithstanding the above, cross trades between the personal account of an employee of AHAM and the Fund's account(s) and between AHAM's proprietary trading accounts and the Fund's account(s) are strictly prohibited. Compliance with the criteria would be monitored by AHAM's compliance unit, and reported to AHAM's compliance and risk management committee, to avoid conflict of interests and manipulation that could have a negative impact on investors.

PERMITTED INVESTMENT

The Fund will invest in the following investments:

- Bond;
- Money market instruments;
- Deposits;
- Derivatives; and
- Any other form of investments as may be determined by the Manager from time to time that is in line with the Fund's objective.

VALUATION POINT OF THE FUND

The Fund will be valued at 6.00 p.m. on every Business Day (or "trading day" or "T day"). However, if the Fund has exposure to investments outside of Malaysia, the Fund shall be valued at 11.00 a.m. on the next Business Day (or "T + 1 day"). All foreign assets are translated into the Base Currency based on the last available bid exchange rate quoted by Bloomberg or Reuters at 4.00 p.m. (United Kingdom time) which is equivalent to 11.00 p.m. or 12.00 midnight (Malaysian time) on the same day, or at such time as stipulated in the investment management standards issued by the FiMM.

VALUATION OF ASSETS

We will ensure that the valuation of the Fund is carried out in a fair manner in accordance to the relevant laws and Guidelines. We will obtain the daily price or value of the assets for the purpose of valuing the Fund in accordance to the Malaysian Financial Reporting Standard 9 issued by the Malaysian Accounting Standards Board. In the absence of daily price or value of the assets, we will use the latest available price or value of the assets respectively. The valuation bases for the permitted investments of the Fund are as below:

➤ **Bonds**

For unlisted MYR denominated bonds, valuation will be done using the price quoted by a bond pricing agency (“BPA”) registered with the SC. For non-MYR denominated unlisted bonds, valuation will be based on the average indicative yield quoted by independent and reputable institutions. Where the Manager is of the view that the price quoted by BPA differs from the fair value or where no market price is available, the fair value will be determined in good faith by the Manager using methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

For listed bonds, valuation shall be based on the closing price or last known transacted price on the eligible market on which the investment is quoted. If the price is not representative of its fair value or is not available to the market, including in the event of suspension in the quotation of the listed bonds for a period exceeding fourteen (14) days, or such shorter period as agreed by the Trustee, such listed bonds will be valued at fair value as determined in good faith by the Manager or its delegate, based on the methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

➤ **Money Market Instruments**

Valuation of MYR denominated money market instruments will be done using the price quoted by a BPA registered with the SC. For non-MYR denominated money market instruments, valuation will be done using the average of quotations provided by reputable Financial Institutions. Where the Manager is of the view that the price quoted by BPA differs from the fair value or where reliable market quotations are not available, the fair value will be determined in good faith by the Manager. This may be determined by reference to the valuation of other money market instruments which are comparable in rating, yield, expected maturity date and/or other characteristics.

➤ **Deposits**

Valuation of deposits placed with Financial Institutions will be done by reference to the principal value of the deposits and the interests accrued thereon for the relevant period.

➤ **Derivatives**

Valuation of derivatives will be based on the prices provided by the respective issuers. The issuers generate the market valuation through the use of their own proprietary valuation models, which incorporate all the relevant and available market data with respect to the derivatives (e.g. interest rates, movement of the underlying assets, volatility of the underlying assets, the correlation of the underlying assets and such other factors). For foreign exchange forward contracts (“FX Forwards”), interpolation formula is applied to compute the value of the FX Forwards based on the rates provided by Bloomberg or Reuters. If the rates are not available on Bloomberg or Reuters, the FX Forwards will be valued based on the fair value as determined in good faith by the Manager, using methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

➤ **Any Other Investments**

Fair value as determined in good faith by us, based on the methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

EARLY TERMINATION

WHAT IS AN EARLY TERMINATION?

An Early Termination is an event where the Fund is unwound on or before its perpetual maturity, subject to a certain requirement being fulfilled (please refer to “How is an Early Termination triggered?” below). Should this occur, the Fund will be terminated on an Early Termination Date. When an Early Termination occurs, we will return to you the NAV in proportion to the number of Units held by you.

HOW IS AN EARLY TERMINATION TRIGGERED?

The Fund’s Early Termination is triggered when the Fund holds 100% in money market instruments, deposits and cash. This occurs when the issuer of the bond calls the bond, the bond matures or when the Manager disposes of all its holdings of the bond in view of the continued deterioration in the credit fundamentals of the bonds which would affect the performance of the Fund and hence, leading to the Manager exercising its discretion to act in the best interests of the Unit Holders.

Once the above criteria is met, the Manager has the option to exercise the right to trigger an Early Termination without having to obtain the Unit Holders’ prior approval by issuing an Early Termination Communiqué to you on the next Business Day of the day when the above criteria is met.

If the Manager has decided to trigger an Early Termination, the Fund will terminate on the Early Termination Date, which will fall on the tenth (10th) Business Day immediately following the date we issued the Early Termination Communiqué to you.

WHAT IS THE EXPECTED PAYOUT TO YOU ONCE AN EARLY TERMINATION IS TRIGGERED?

The Fund will be terminated on the tenth (10th) Business Day immediately following the date the Early Termination Communiqué is issued to you. You will be paid based on the NAV of the Fund in proportion to the number of Units held by you as at the Early Termination Date (“Early Termination Proceeds”).

As a reminder, the Early Termination Proceeds may be subject to market conditions, liquidation costs and may be higher or lower than your initial investments. The Early Termination Proceeds will be communicated to you via a Communiqué.

ADDITIONAL INFORMATION IN RELATION TO THE BOND

Bond Types

Although not exhaustive, the bond that the Fund invests in may be one or a combination of more than one of the following types:

➤ **Bullet Bond**

A bullet bond is a bond whose entire principal is paid at once on the specified maturity date. Bullet bonds cannot be early redeemed by the issuer, as such they are deemed non-callable.

➤ **Perpetual Bond**

Perpetual bonds are bonds which have no maturity date. Issuers pay coupons on perpetual bonds forever, and they do not have to redeem the principal.

➤ **Callable Bond**

Bonds with a call feature, or callable bonds, are bonds that can be early redeemed by the issuer prior to its maturity date.

➤ **AT1 CoCo Bond**

AT1 CoCo Bond are hybrid perpetual securities which are subordinated (rank lower) to debt but senior to common shares. These bonds are often callable after a call protection period, have deferrable coupon payments which may be non-cumulative, and may be converted into shares upon the occurrence of a trigger event. In addition, these securities form part of the issuer's total equity, but does not grant investors voting rights.

➤ **Deferable Coupon Bond**

The issuer of a deferrable coupon bond may elect to defer any payment of coupon for a period of time and this deferral may be cumulative or non-cumulative. If the terms of the bond are such that coupons are deferrable and non-cumulative, there is a risk that the bondholder may not get any returns on the investment. However, these bonds are normally structured to satisfy certain conditions before the issuer is entitled to defer payment of coupons, such as there can be no declaration or payment of dividends in respect of lower ranked securities, e.g. common shares.

When would the bond likely be called/not be called?

The bond is likely to be called when:

- interest rates fall adequately, allowing the issuer to refinance the bond at a lower rate;
- the issuer's credit quality improves adequately, allowing them to raise capital at cheaper rates relative to the bond;
- the issuer's capital position improves, allowing them to redeem the bond; and
- regulatory changes make it beneficial for the issuer to call the bond.

In contrast, if interest rates were to rise, the issuer's credit quality or capital position worsens, or if regulatory changes were disadvantageous, it would make the bond less likely to be called by the issuer. The following scenarios present different circumstances under which the bond is likely or not likely to be called.

Scenario 1

The bond has a coupon rate of 5.00% per annum. Upon reaching the first Call Date, the issuer is able to refinance the bond at a coupon rate of 4.00% per annum. In this case, the issuer is likely to call the bond and re-issue at the lower rate of 4.00% per annum as it is now cheaper to re-issue the bond.

Scenario 2

The bond has a coupon rate of 5.00% per annum. Upon reaching the first Call Date, the issuer is able to refinance the bond at a coupon rate of 6.00% per annum. It is then unlikely that the issuer will call the bond as it is now more expensive to re-issue the bond.

Scenario 3

The bond has a coupon rate of 5.00% per annum. Upon reaching the first Call Date, the issuer is able to refinance the bond at a coupon rate of 4.00% per annum. However, the issuer does not have sufficient capital to redeem the bond and therefore is not likely to call the bond.

What happens when the bond is called?

When the bond is called, the issuer redeems the bond from bondholders at the call price. The call price is determined upfront upon issuance and could be at par (100), at a discount (below 100) or at a premium (above 100). If the bond is called at a price lower than the stipulated call price, this is considered a default. If the bond is called, condition for an Early Termination event is satisfied and the Manager will have the option to fully trigger the Early Termination event (see "*How is an Early Termination triggered?*" section of this Information Memorandum).

Trigger / Loss-absorption Event

A trigger / loss-absorption event is when the issuer may be required to cancel any accrued coupon that is owed to investors, convert the bonds into shares of the issuing company, or permanently write down partially or in full the principal amount of the bond. The conditions which satisfy a trigger event depends on each bond terms, but usually includes a breach of any capital adequacy ratio, a declaration by the relevant regulatory authority that a write-off is necessary (without which the issuer would become non-viable), a public injection of funds or equivalent support without which the issuer would become non-viable, or a breach of any other quantitative threshold used to gauge the financial viability of the issuer, e.g. Common Equity Tier 1 (CET1) Ratio.

For example, an AT1 CoCo bond is issued with terms specifying that if the issuer's CET1 Ratio falls below 5.00% at any given time, then a trigger event will occur. Assuming that the issuer's CET1 Ratio breaches the threshold of 5.00%, the bond may be converted into shares or partially/fully written-off in order to raise the issuer's CET1 Ratio back to the minimum level of 5.00%.

UNDERSTANDING THE RISKS OF THE FUND

Below are the risks associated with the investments of the Fund that you should consider before investing.

GENERAL RISKS OF THE FUND	
Affected by variable factors and not guaranteed	The performance of the Fund is affected by many variable factors and is not guaranteed. These include overall economic and financial market conditions such as interest rate fluctuation and stability of local currency. While a track record may provide some insight on future performance, it is by no means guaranteed. The prices of Units may go down as well as up. Likewise, distribution may vary from year to year depending on the performance of the Fund.
Fund management risk	This risk refers to the day-to-day management of the Fund by us which will impact the performance of the Fund. For example, investment decisions undertaken by us as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error, fraud, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.
Operational risk	Operational risk is the risk of loss due to the breakdown, deficiencies or weaknesses in the operational support functions resulting in the operations or internal control processes producing an insufficient degree of customer quality or internal control by the Manager. Operational risk is typically associated with human error, system failure, fraud and inadequate or defective procedures and controls.
Counterparty risk	The Fund will be exposed to the credit risk of the parties with which it transacts with and may also bear the risk of settlement default. Credit risk is the risk that the counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. This would include the counterparties to any derivatives that it enters into. Trading in derivatives which have not been collateralised gives rise to direct counterparty exposure. The Fund mitigates much of the credit risk to its derivatives counterparties by receiving collateral with a value at least equal to the exposure to each counterparty but, to the extent that any derivative is not fully collateralised, a default by the counterparty may result in a reduction in the value of the Fund. A formal review of each new counterparty is completed and all approved counterparties are monitored and reviewed on an ongoing basis. The Fund maintains an active oversight of counterparty exposure and the collateral management process.

SPECIFIC RISKS OF THE FUND	
Interest rate risk	This risk refers to the impact of interest rate changes on the valuation of bonds or money market instruments (hereinafter referred to as “investment”). When interest rates rise, the investment prices generally decline and this may lower the market value of the investment. The reverse may apply when interest rates fall.
Credit and default risk	Credit risk relates to the creditworthiness of the issuers of the bonds and money markets instruments and the Financial Institutions where the deposits are placed (hereinafter referred to as “investment”) and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer and/or Financial Institution may impact the value as well as liquidity of the investment. In the case of rated investments, this may lead to a credit downgrade. Default risk relates to the risk of an issuer and/or a Financial Institution of the investment either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the investment. This could adversely affect the value of the Fund.
Reinvestment risk	Reinvestment risk refers to the risk that any distributions or proceeds will be unable to be reinvested at a rate comparable to the current investment’s rate of return. It is the likelihood that cash flows from the investment will earn less in a new security.

	SPECIFIC RISKS OF THE FUND
Concentration risk	This Fund invests in a single bond. Any adverse effect on the bond will inevitably affect the Fund as well. The performance of the Fund is also dependent on the performance of the bond. This risk may be mitigated as we are allowed to take temporary defensive positions in response to adverse market conditions.
Country risk	Investments of the Fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests in. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV of the Fund or prices of Units to fall.
Currency risk	As the investments of the Fund may be denominated in currencies other than the Base Currency, any fluctuation in the exchange rate between the Base Currency and the currencies in which the investments are denominated may have an impact on the value of these investments. You should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.
Political risk	Political instability in the country which the Fund is invested in may lead to a situation in which the Fund does not receive part or all of the monies owed to it in spite of the solvency of the issuer of the respective security or other assets. Currency or transfer restrictions or other legal changes, for example, may be significant in this regard.
Regulatory risk	The investments of the Fund would be exposed to changes in the laws and regulations in the countries that the Fund is invested in. These regulatory changes pose a risk to the Fund as it may materially impact the investments of the Fund. In an effort to manage and mitigate such risk, the Manager seeks to continuously keep abreast of regulatory developments (for example, by closely monitoring announcements on regulators' website and mainstream media) in that country. The Manager may dispose of its investments in that particular country should the regulatory changes adversely impact the Unit Holders' interest or diminish returns to the Fund.
Liquidity risk	Liquidity risk refers to two scenarios. The first scenario is where an investment cannot be sold due to unavailability of a buyer for that investment. The second scenario exists where the investment, by its nature, is thinly traded. This will have the effect of causing the investment to be sold below its fair value which would adversely affect the NAV of the Fund. Upon such event and in the best interest of the Unit Holders, the Trustee may suspend the repurchase of Units requests. Please refer to " <i>Suspension of Dealing in Units</i> " section of this Information Memorandum for more details.

! It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are recommended to read the whole Information Memorandum to assess the risks associated with the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.
