4. Who am I investing with?

Relevant parties' information:

The Manager	AHAM Asset Management Berhad (formerly known as Affin Hwang Asset Management Berhad)
The Trustee	TMF Trustees Malaysia Berhad

5. What are the possible outcomes of my investment?

The Fund is a wholesale feeder fund that invests in the Target Fund, which in turn invests in listed equities. The performance of this Fund would to a great extent be linked to the price movements of the Target Fund which in turn is reliant on the performance of the underlying investments that it is invested in.

As such, the value of your investments will be reliant on the performance of the Target Fund. This means that if the Target Fund performs well, the Fund may reflect similar performance and likewise if the performance of the Target Fund falls, the value of your investment will also be affected. The Fund's performance is dependent on the investment manager's expertise in managing the Fund.

The Fund is not expected to make distribution. However, incidental distribution may be declared whenever is appropriate.

Please note that the capital and returns of the Fund are not guaranteed.

KEY RISKS

6. What are the key risks associated with this product?

General risks

- **Market risk** – Market risk arises because of factors that affect the entire market place. Factors such as economic growth, political stability and social environment are some examples of conditions that have an impact on businesses, whether positive or negative. Market risk cannot be eliminated but may be reduced through diversification. It stems from the fact that there are economy-wide perils, or instances of political or social instability which threaten all businesses. Hence, the Fund will be exposed to market uncertainties and fluctuations in the economic, political and social environment that will affect the market price of the investments either in a positive or negative way.
- **Fund management risk** – This risk refers to the day-to-day management of the Fund by us which will impact the performance of the Fund. For example, investment decisions undertaken by us as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error, fraud, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.
- **Performance risk** – The Fund is a feeder fund which invests in another collective investment scheme, namely the Target Fund. The performance of the Fund very much depends on the performance of the Target Fund. If the Target Fund does not perform in accordance with its investment objective, the performance of the Fund will also be impacted negatively. The performance of the Target Fund and consequently of the Fund may go down as well as up, depending on the circumstances prevailing at a particular given time. On that basis, there is never a guarantee that investing in the Fund will produce a positive investment returns in accordance with its investment objective.
- **Liquidity risk** - This is the risk that the shares of the Target Fund that is held by the Fund cannot be readily sold and converted into cash. This can occur when there is a restriction on realisation of shares of the Target Fund. The Management Company may suspend the realisation of shares of the Target Fund or delay the payment of realisation proceeds in respect of any realisation request received, during any period in which the determination of the net asset value of the Target Fund is suspended. As a result, the Fund may not be able to receive the repurchase proceeds in a timely manner which in turn may delay the payment of repurchase proceeds to the Unit Holders. In managing liquidity risk, we will maintain sufficient liquidity level for the purposes of meeting repurchase requests.
- **Operational risk** – This risk refers to the possibility of a breakdown in our internal controls and policies. The breakdown may be a result of human error, system failure or fraud where our employees collude with one another. This risk may cause monetary loss and/or inconvenience to you. We will review our internal policies and system capability to mitigate instances of this risk. Additionally, we maintain a strict segregation of duties to mitigate instances of fraudulent practices amongst our employees.
- **Inflation risk** – This is the risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.

- **Loan financing risk** – This risk occurs when you take a loan or financing to finance your investment. The inherent risk of investing with borrowed or financed money includes you being unable to service the loan or financing payments. In the event Units are used as collateral, you may be required to top-up your existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower NAV per Unit as compared to the NAV per Unit at the point of purchase towards settling the loan or financing.
- **Suspension of repurchase request risk** – Having considered the best interests of Unit Holders, the repurchase requests by the Unit Holders may be subject to suspension due to exceptional circumstances, where the market value or fair value of a material portion of the Fund's assets cannot be determined, or such other circumstances as may be determined by the Manager, where there is good and sufficient reason to do so.

The exceptional circumstances may include, amongst others, the suspension of dealing by the Target Fund. In such case, Unit Holders will not be able to redeem their Units and will be compelled to remain invested in the Fund for a longer period of time. Hence, their investments will continue to be subject to the risks inherent to the Fund.

Specific risks

- **Concentration risk** – As a feeder fund, this Fund invests in a single collective investment scheme. Any adverse effect on the Target Fund will inevitably affect the Fund as well. The performance of the Fund is also dependent on the performance of the Target Fund. This risk may be mitigated as we are allowed to take temporary defensive positions in response to adverse market conditions. We are also able to substitute the Target Fund with another fund with similar investment objective of the Fund if, in our opinion, the Target Fund no longer meets the Fund's investment objective subject to Unit Holders' approval.
- **Country risk** – Investments of the Fund in the Target Fund which is domiciled in Luxembourg may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of Luxembourg. For example, the deteriorating economic condition of such country may adversely affect the value of the investments undertaken by the Fund. This in turn may cause the NAV of the Fund or prices of Units to fall.
- **Counterparty risk** – The Fund will be exposed to the credit risk of the parties with which it transacts and may also bear the risk of settlement default. Credit risk is the risk that the counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. This would include the counterparties to derivatives that it enters into. Trading in derivatives which have not been collateralised gives rise to direct counterparty exposure. The Fund mitigates much of its credit risk to its derivatives counterparties by receiving collateral with a value at least equal to the exposure to each counterparty but, to the extent that any derivative is not fully collateralised, a default by the counterparty may result in a reduction in the value of the Fund. A formal review of each new counterparty is completed and all approved counterparties are monitored and reviewed on an ongoing basis. The Fund maintains an active oversight of counterparty exposure and the collateral management process.
- **Currency risk** – As the investments of the Fund may be denominated in currencies other than the Base Currency, any fluctuation in the exchange rate between the Base Currency and the currencies in which the investments are denominated may have an impact on the value of these investments. You should be aware that if the currencies in which the investments are denominated depreciate against the Base Currency, this will have an adverse effect on the NAV of the Fund in the Base Currency and vice versa. You should note that any gain or loss arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

Currency risk at the Class level

The impact of the exchange rate movement between the Base Currency and the currency of the respective Classes (other than USD Class) may result in a depreciation of your holdings as expressed in the Base Currency.

Currency risk at the Hedged-class level

Currency hedging reduces the effect of exchange rate movements for the Hedged-class, but it does not entirely eliminate currency risk between the Hedged-class and the Base Currency (not a perfect hedge). Hence, the unhedged portion of the respective Hedged-class will still be affected by the exchange rate movements and it may cause fluctuation of NAV of the respective Hedged-class. You should note, however, that if the exchange rate moves favourably, the Hedged-class would not benefit from any upside in currency movement due to the hedging strategy. In addition, hedging is subject to a minimum investment size of entering into a forward contract and the cost of hedging which may affect returns of the respective Hedged-class.

- **Target fund manager risk** – The Target Fund (which the Fund invests in) is managed by the Management Company. It is important to note that the Manager has no control over the investment management techniques and operational controls of the Management Company. Thus, mismanagement of the Target Fund (i.e. breach of its prescribed investment restriction due to human error) may negatively affect the Fund (as an investor of the Target Fund). Should such a situation arise, the Manager may propose to invest in other alternative collective investment scheme that is consistent with the investment objective of the Fund provided always that the approval of the Unit Holders has been obtained.

Risks related to the Target Fund
