Asset Management

This Product Highlights Sheet only highlights the key features and risks of this Fund. Investors are advised to request, read and understand the Prospectus of the Fund before deciding to invest.

PRODUCT HIGHLIGHTS SHEET

AFFIN HWANG SMART INVEST PORTFOLIO - INCOME

BRIEF INFORMATION ON THE PRODUCT

1. What is this product about?

Affin Hwang Smart Invest Portfolio - Income is an open-ended retail income fund-of-funds that aims to provide investors with regular income over a medium and long-term period by investing in a portfolio of collective investment schemes.

PRODUCT SUITABILITY

2. Who is this product suitable for?

The Fund is designed for retail investors who seek regular income, have medium to long-term investment horizon and have a low risk tolerance.

KEY PRODUCT FEATURES

3. What am I investing in?

Classes	A Class
Launch Date	13 July 2020
Base Currency	MYR
Investment Strategy	<p>In line with its objective, the investment strategy of the Fund is to invest in a diversified portfolio of collective investment schemes (CIS) that will provide regular income through exposure into global markets.</p> <p>To offer investment diversification, the selection of CIS will be made based on the geographical and asset class focus to broaden the investment reach. Through its investment into CIS, the Fund will provide you with access into equities listed in global markets, as well as access into fixed income instruments such as debt securities, money market instruments and deposits, issued globally. We will look towards having an income-oriented portfolio by holding more exposure into fixed income instruments and less exposure into dividend equities. Higher exposure into fixed income instruments is generally considered to be able to provide consistent stream of income. However, the Fund will also have remaining exposure in equities in which the dividends will be able to complement the source of income. The allocations in fixed income instruments will be managed optimally so that the Fund would be able to achieve the investment objective without taking excessive risks.</p> <p>In this respect, we take an active investment strategy in terms of its asset allocation, and geographical allocation decision. However, once a decision is made with regard to the actual allocation, the Fund will take a more passive stance by holding on to investments it already owns. Nevertheless, we will hold the flexibility to actively shift its asset and geographical allocation should it deem necessary based on the prevailing market conditions.</p> <p>We may place the uninvested portion of the Fund in liquid assets such as money market instruments and/or deposits with Financial Institutions. However, we may also take temporary defensive positions that may be inconsistent with the Fund's principal strategy by holding up to all of the Fund's NAV in money market instruments and/or deposits with Financial Institutions in attempting to respond to adverse conditions that could negatively impact the financial markets.</p>

Asset Management

	<p>Derivatives</p> <p>The base currency of the Fund is MYR. However, the Fund may also invest in non-MYR denominated assets, which we believe will be able to meet Fund's objective. These non-MYR denominated assets may be hedged back to MYR i.e. the Base Currency, to mitigate foreign currency risk.</p> <p>The Fund may use derivatives, such as foreign exchange forward contracts and cross currency swaps for hedging purposes only. Cross currency swaps and/or foreign exchange forward contracts may be used to hedge the principal and/or the returns of the foreign currency exposure of the Fund, depending on the Manager's view on the invested currency. The employment of derivatives under these circumstances is expected to reduce the impact of foreign currency movements on the Fund's NAV irrespective of the currency classes. While the hedging strategy will assist with mitigating the potential foreign exchange losses by the Fund, any potential foreign exchange gains from the hedging strategy will be capped as well. The types of derivatives envisaged for hedging purposes include forwards and swaps which are OTC or traded on centralised exchanges.</p>
Asset Allocation	<ul style="list-style-type: none"> • A minimum of 95% of the Fund's NAV will be invested in collective investment schemes; and • Maximum of 5% of the Fund's NAV in money market instruments and/or deposits.
Performance Benchmark	<p>Absolute return of 4% per annum.</p> <p><i>It is important to note that this is only a measurement of the Fund's performance and is not a guaranteed return.</i></p>
Distribution Policy	Subject to the availability of income, the Fund will distribute income on a quarterly basis, after the end of its first financial year.
Minimum Initial Investment*	MYR 100
Minimum Additional Investment*	MYR 100
Minimum Units held*	200 Units
Minimum Units of Repurchase*	200 Units

Note: Please refer to the Prospectus for further details of the Fund.

4. Who am I investing with?

Relevant parties' information:

The Manager	Affin Hwang Asset Management Berhad
The Trustee	TMF Trustees Malaysia Berhad
The Trustee's Delegate (Local & Foreign Custodian)	Standard Chartered Bank Malaysia Berhad

5. What are the possible outcomes of my investment?

The Fund is an income fund-of-funds that invests a portfolio of collective investment schemes.

The Fund's returns through its investment in collective investment scheme would, to a great extent, be linked to the performance of the global fixed income market, as well as global equity market. Investments in fixed income instruments are expected to generate consistent and regular income while investments into dividend equities will be able to complement the source of income to the overall portfolio.

Please note that the capital and returns of the Fund is not guaranteed.

* At our discretion, we may reduce the transaction value and Units, including for transactions made via digital channels, subject to the terms and conditions disclosed in the respective channels.

Asset Management

KEY RISKS

6. What are the key risks associated with this product?

General Risks

- **Fund Management Risk** – This risk refers to our day-to-day management of the Fund which will impact the performance of the Fund. For example, our investment decisions as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error, fraud, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.
- **Inflation Risk** – This is the risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
- **Loan Financing Risk** – This risk occurs when you take a loan or financing to finance your investment. The inherent risk of investing with borrowed money includes you being unable to service the loan repayments. In the event Units are used as collateral, you may be required to top-up your existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower net asset value per unit as compared to the net asset value per unit at the point of purchase towards settling the loan.
- **Operational Risk** – This risk refers to the possibility of a breakdown in our internal controls and policies. The breakdown may be a result of human error, system failure or fraud where our employees collude with one another. This risk may cause monetary loss and/or inconvenience to you. We will regularly review our internal policies and system capability to mitigate this risk. Additionally, we maintain a strict segregation of duties to mitigate instances of fraudulent practices amongst our employees.
- **Liquidity Risk** – Liquidity risk refers to two scenarios. The first is where an investment cannot be sold due to unavailability of a buyer for that investment. The second scenario exists where the investment, by its nature, is thinly traded. This will have the effect of causing the investment to be sold below its fair value which would adversely affect the NAV of the Fund. Upon such event and in the best interest of the Unit Holders, the Trustee may suspend the repurchase of Units requests. Please refer to “Suspension of Dealing in Units” section of this the Prospectus for more details.

Specific Risks

Specific risks relating to the Fund are as below:

- **Fund Management Risk** – Given that the Fund invests into collective investment scheme that managed by another manager, the fund manager of the collective investment scheme has the discretion on the portfolio management, investment expertise, administration and day-to-day operation. However, there is a risk of wrong investment decision is made or the mismanagement of the collective investment scheme. Should it happen, the NAV of the Funds would be affected negatively. We will continuously monitor the performance and management of the collective investment scheme. We reserve the right to change to another collective investment scheme so that it, together with other collective investment schemes the Fund invests in, will be able to meet the investment objective of the Fund altogether.
- **Collective Investment Scheme Risk** – Any adverse effect on the collective investment scheme which the Fund is investing in will impact the NAV of the Fund. For example, the respective collective investment schemes may underperform its benchmarks due to poor market conditions and as a result, the NAV of the Fund will be adversely affected as the performance of the Fund is dependent on the performance of the respective collective investment schemes.
- **Credit and Default Risk** – Credit risk relates to the creditworthiness of the issuers of the money market instruments and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the money market instruments. In the case of rated money market instruments, this may lead to a credit downgrade. Default risk relates to the risk of an issuer of the money market instruments either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the money market instruments. This could adversely affect the value of the Fund.
- **Interest Rate Risk** – This risk refers to the impact of interest rate changes on the valuation of money market instruments. When interest rates rise, the money market instruments prices generally decline and this may lower the market value of the money market instruments. The reverse may apply when interest rates fall.
- **Currency Risk** – As the investments of the Fund may be denominated in currencies other than the Base Currency, any fluctuation in the exchange rate between the Base Currency and the currencies in which the

Asset Management

investments are denominated may have an impact on the value of these investments. You should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

- **Related Party Transaction Risk** – The Fund may invest in AHAM's collective investment schemes and may also have dealings with parties related to AHAM. Nevertheless, it is our policy that all transactions with related parties are to be executed on terms which are best available to the Fund and which are not less favourable to the Fund than an arms-length transaction between independent parties.
- **Country Risk** – Investments of the Fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests in. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV of the Fund to fall.

Specific risks relating to the collective investment schemes in which the Fund invests are as below:

- **Equity Investment Risk** – The buying and selling of equity carry a number of risks. The most important being the general insolvency risk associated with the issuers of equities. The value of equities investment depends on its earning potential, sound management, treatment of minority shareholders, as well as a myriad of other factors. Failure to achieve the expected earnings would result in declining equities value.
- **Credit and Default Risk** - Credit risk relates to the creditworthiness of the issuers of the debt securities or money market instruments (hereinafter referred to as "investment") and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the investment. In the case of rated investment, this may lead to a credit downgrade. Default risk relates to the risk of an issuer of the investment either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the investment.
- **Interest Rate Risk** – This risk refers to the impact of interest rate changes on the valuation of debt securities or money market instruments (hereinafter referred to as "investment"). When interest rates rise, the investment prices generally decline and this may lower the market value of the investment. The reverse may apply when interest rates fall.

Note: Please refer to the Prospectus on further detail of each risk.

It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are recommended to read the whole Prospectus to assess the risks associated with the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.

PERFORMANCE

Average Total Return

	Since Commencement (3/8/20 – 30/4/21)
Fund	11.80%
Benchmark	4.00%

Source: Bloomberg

Annual Total Return

Financial Year End	Since Commencement (3/8/20 – 30/4/21)
Fund	8.63%
Benchmark	2.95%

Source: Bloomberg

For the period under review i.e. 3 August 2020 to 30 April 2021, the Fund registered a return of 8.63% compared to the benchmark return of 2.95%. Since commencement, the Fund registered a total return of 11.80%, outperforming the benchmark total return of 4.00%.

Asset Management

Basic of calculation and assumption made in calculating the returns

The performance figures are a comparison of the growth/decline in NAV for the stipulated period taking into account all the distribution payable (if any) during the stipulated period.

Capital return = NAV per Unit end / NAV per Unit begin – 1

Income return = Income distribution per Unit / NAV per Unit ex-date

Total return = (1+Capital return) x (1+Income return) – 1

Income Distribution

Financial Year End	2021
Gross distribution per Unit (sen)	1.13
Net distribution per Unit (sen)	1.13

Distribution will be made in the form of cash as well as Units in lieu of cash, if any.

Portfolio Turnover Ratio (PTR)

Financial Year End	2021
PTR (times)	1.95

PAST PERFORMANCE OF THE FUND IS NOT AN INDICATION OF ITS FUTURE PERFORMANCE

FEES & CHARGES

7. What are the fees and charges involved?

There are fees and charges involved and you are advised to consider them before contributing to the Fund.

What will I be charged by the Manager?

Class	A Class
Sales charge	Nil
Repurchase charge	1.00% on the NAV per Unit
Switching fee	The Manager does not impose any switching fee. However, if the amount of sales charge of the fund (or class) that the Unit Holder intends to switch into is higher than the sales charge imposed by the fund (or class) being switched from, then the difference in the sales charge between the two (2) funds (or classes) shall be borne by the Unit Holder
Transfer fee	Nil

What are the key ongoing fees charged to the Fund?

Annual management fee	Up to 1.20% per annum of the NAV of the Fund (before deducting the management fee and trustee fee).
Annual trustee fee	Up to 0.06% per annum of the NAV of the Fund (excluding foreign custodian fees and charges).

Note: Please refer to the Prospectus for further explanation and illustration of the Fund's fees, charges and expenses.

ALL FEES AND CHARGES PAYABLE BY YOU ARE SUBJECT TO ALL APPLICABLE TAXES AND / OR DUTIES AS MAY BE IMPOSED BY THE GOVERNMENT AND / OR THE RELEVANT AUTHORITIES FROM TIME TO TIME.
