Fund Category	: Fixed Income (wholesale)
Fund Type	: Income
Base Currency	: MYR
Financial Year End	: 31 December
Distribution Policy	: Subject to the availability of income, distribution of income will be done semi-annually.

INVESTMENT OBJECTIVE

The Fund endeavours to provide investors with a steady income* stream, in the form of distributions, through investments primarily in bonds and other fixed income instruments.

**Distribution of income can either be in the form of cash or Units.*

Note: Any material change to the Fund's investment objective would require Unit Holders' approval.

BENCHMARK

12-months Malayan Banking Berhad fixed deposit rate

(Source: <http://www.maybank2u.com.my/>)

As this Fund is an income fund which seeks to provide higher returns than fixed deposits, the 12-months Malayan Banking Berhad fixed deposit rate (which is a common benchmark used to observe yield levels of fixed deposits in Malaysia) is chosen as the base of the benchmark.

Investors are advised that the selection of the 12-months Malayan Banking Berhad fixed deposit rate does not imply that the risk profile of this Fund is the same as that of a depositor.

ASSET ALLOCATION

Bonds	Maximum of 95% of the Fund's NAV
Money market instruments and deposits	Minimum of 5% of the Fund's NAV

INVESTMENT STRATEGY

To achieve its objective, the Fund will be investing into a portfolio of bonds. Concurrently, the Fund will also have the flexibility to seek opportunities through exposure to fixed income instruments such as money market instruments and deposits.

We will combine a top-down and bottom-up investment approach to identify investment opportunities. Macroeconomic trends and market analysis are the important considerations in deriving the top-down perspective on interest rate outlook, fixed income markets and currency movements. For its bottom-up approach, we would conduct analysis on the issuers to assess its ability to service its debt obligations.

The Fund's investment in bonds would consist of both government and corporate bonds. The selection of bonds will not be constrained by credit ratings of issuances. However, the selection will depend largely on its quality where the respective issuers display strong ability to meet their financial obligations, healthy cash-flow, the collateral type, value, claims, priority as well as offer highest safety for timely payment of interest and principal.

The Fund will be actively managed and positioned dependent on the interest rate outlook for the market. Depending also on the prevailing economic landscape, we may look to shorten the portfolio duration during a rising interest rate environment to mitigate interest rate risks. Conversely, we would take advantage of the opportunity to lengthen the portfolio duration in a falling interest rate environment.

To achieve its objective, the Fund will also have the flexibility to invest in collective investment schemes that have a similar investment objective to the Fund.

Derivatives

Derivatives trades may be carried out for hedging purposes through financial instruments including, but not limited to, forward contracts, futures contracts and swaps. Futures and forward contracts are generally contracts between two parties to trade an asset at an agreed price on a pre-determined future date whereas swaps is an agreement to swap or exchange two financial instruments between two parties.

The intention of hedging is to preserve the value of the assets from any adverse price movements. For example, to hedge against foreign currency exchange risk, the Fund may enter into a currency forward contract to offset any adverse foreign currency movements by determining an agreed rate for an agreed tenure with its counterparty. While the hedging transactions will assist with mitigating the potential foreign exchange losses by the Fund, any potential foreign exchange gains from the hedging strategy will be capped as well.

The Fund adopts commitment approach to measure the Fund's global exposure to derivatives. The commitment approach is a methodology that aggregates the underlying market values or notional values of derivatives after taking into account the possible effects of netting and/or hedging arrangements. The Fund's global exposure from the derivatives position must not exceed 100% of NAV of the Fund at all times.

Foreign Investments of the Fund

The Fund may invest in investments listed or issued in foreign markets. The decision to invest into foreign markets would be opportunistically driven where we would seek out investments that could provide a potential to enhance the returns of the Fund. The Fund will invest only into countries which are eligible markets.

Temporary Defensive Positions

We hold the option to take temporary defensive positions that may be inconsistent with the Fund's principal strategy and asset allocation to protect the Fund against adverse market conditions that may impact the financial markets. To manage the risk of the Fund, we may shift the Fund's assets to be temporarily invested in money market instruments and/or deposits.

Cross Trades Policy

We may conduct cross trades between funds which we are currently managing provided that all criteria imposed by the regulators are met. Notwithstanding the aforesaid, cross trades between the personal account of our employee and the Fund's account(s) and between our proprietary trading accounts and the Fund's account(s) are strictly prohibited. Compliance with the criteria would be monitored by our compliance unit, and reported to our compliance and risk management committee, to avoid conflict of interest and manipulation that could have a negative impact on the investors.

PERMITTED INVESTMENT

Unless otherwise prohibited by the relevant authorities or any relevant laws and provided always that there are no inconsistencies with the objective of the Fund, the Fund may invest in the following investments:

- Malaysian government securities, treasury bills, Bank Negara Malaysia certificates/bills, government investment certificates and Cagamas notes/bonds;

VALUATION POINT OF THE FUND

The Fund will be valued at 6.00 p.m. on every Business Day (or "trading day" or "T day"). However, if the Fund has exposure to investments outside of Malaysia, the Fund will be valued at 11.00 a.m. on the next Business Day (or "T + 1 day"). All foreign assets will be translated into MYR based on the bid exchange rate quoted by Bloomberg/Refinitiv at 4.00 p.m. (United Kingdom time) which is equivalent to 11.00 p.m. or 12.00 midnight (Malaysian time) on the same day, or at such time as stipulated in the investment management standards issued by the Federation of Investment Managers Malaysia.

VALUATION OF ASSETS

We will ensure that the valuation of the Fund is carried out in a fair manner in accordance to the relevant laws and Guidelines. We will obtain the daily price or value of the assets for the purpose of valuing the Fund in accordance with the Malaysian Financial Reporting Standard 9 issued by the Malaysian Accounting Standards Board. In the absence of daily price or value of the assets, we will use the latest available price or value of the assets respectively. The valuation bases for the permitted investments of the Fund are as below:

➤ Bonds

For unlisted MYR denominated bonds, valuation will be done by using the price quoted by a bond pricing agency ("BPA") registered with the SC. For non-MYR denominated unlisted bonds, valuation will be based on the average indicative price quoted by independent and reputable institutions. Where the Manager is of the view that the price quoted by BPA differs from the fair value or where reliable market quotations are not available, the fair value will be determined in good faith by the Manager using methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

For listed bonds, valuation will be based on the closing price or last known transacted price on the eligible market on which the investment is quoted. If the price is not representative of its fair value or is not available to the market, including in the event of suspension in the quotation of the listed bonds for a period exceeding fourteen (14) days, or such shorter period as agreed by the Trustee, such listed bonds will be valued at fair value determined in good faith by the Manager or its delegate, based on the methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

➤ **Deposits**

Valuation of deposits placed with Financial Institutions will be done by reference to the principal value of the deposits and the interests accrued thereon for the relevant period.

➤ **Money Market Instruments**

Valuation of MYR denominated money market instruments will be done using the price quoted by a BPA registered with the SC. For non-MYR denominated money market instruments, valuation will be done using an average of quotations provided by reputable Financial Institutions. Where the Manager is of the view that the price quoted by BPA differs from the fair value or where reliable market quotations are not available, the fair value will be determined in good faith by the Manager using methods or bases which have been verified by the auditor of the Fund and approved by the Trustee. This may be determined by reference to the valuation of other money market instruments which are comparable in rating, yield, expected maturity date and/or other characteristics.

➤ **Derivatives**

Valuation of derivatives will be based on the prices provided by the issuers. The issuers generate the market valuation through the use of their own proprietary valuation models, which incorporate all the relevant and available market data with respect to the derivatives (e.g. interest rates, movement of the underlying assets, volatility of the underlying assets, the correlation of the underlying assets and such other factors). For foreign exchange forward contracts ("FX Forwards"), interpolation formula is applied to compute the value of the FX Forwards based on the rates provided by Bloomberg or Refinitiv. If the rates are not available on Bloomberg or Refinitiv, the FX Forwards will be valued in accordance to a fair value as determined in good faith by the Manager using methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

➤ **Any Other Investments**

Fair value as determined in good faith by the Manager, based on the methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

- we or our delegates will not enter into unnecessary trades in order to achieve a sufficient volume of transactions to qualify for soft commissions.

UNDERSTANDING THE RISKS OF THE FUND

Below are the risks associated with the investments of the Fund that you should consider before investing.

GENERAL RISKS OF THE FUND	
Market risk	Market risk arises because of factors that affect the entire market place. Factors such as economic growth, political stability and social environment are some examples of conditions that have an impact on businesses, whether positive or negative. It stems from the fact that there are economy-wide perils, or instances of political or social instability which threaten all businesses. Hence, the Fund will be exposed to market uncertainties and fluctuations in the economic, political and social environment that will affect the market price of the investments either in a positive or negative way.
Fund management risk	This risk refers to the day-to-day management of the Fund by the Manager which will impact the performance of the Fund. For example, investment decisions undertaken by the Manager as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error, fraud, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.
Performance risk	The performance of the Fund depends on the financial instruments that the Fund purchases. If the instruments do not perform within expectation or if there is a default, then, the performance of the Fund will be impacted negatively. The performance of the Fund may also be impacted if the allocation of assets is not properly done. This is where the experience and expertise of the investment managers are important and the risk on the lack of experience and expertise of the investment managers has been highlighted above. On that basis, there is never a guarantee that investing in the Fund will produce the desired investment returns or distribution of income.
Inflation risk	This is the risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
Operational risk	This risk refers to the possibility of a breakdown in the Manager's internal controls and policies. The breakdown may be a result of human error, system failure or fraud where employees of the Manager collude with one another. This risk may cause monetary loss and/or inconvenience to the Unit Holders. The Manager will review its internal policies and system capability to mitigate instances of this risk. Additionally, the Manager maintains a strict segregation of duties to mitigate instances of fraudulent practices amongst employees of the Manager.
Risk of non-compliance	This risk refers to the possibility that the rules governing the Fund which is set out in the Deed or the Guidelines may not be observed by the Manager, whether intentionally or otherwise. Whilst not every non-observance to the rules governing the Fund will necessarily result in some losses to the Fund, investors are advised that the potential for the Fund to suffer losses may be heightened if the non-observation of the rules governing the Fund is due to the fraud or dishonest acts on the part of the Manager.
Political risk	Changes in political environment can directly or indirectly impact the investments of the Fund. For example, political instability that leads to social unrest could lead to disruption of economic activity which may impact the Fund's investment in that country. A change in government policies could also impact the Fund's investments. There is no requirement that a new government must be pro investment or that the existing government shall have the same investment policies in perpetuity. For example, a government may impose a moratorium on foreign investments in favour of nationalisation and this political decision may cause the Fund having to liquidate their investments at a less than ideal price or below market price.
Regulatory risk	The investments of the Fund would be exposed to changes in the laws and regulations in the countries that the Fund is invested in. These regulatory changes pose a risk to the Fund as it may materially impact the investments of the Fund. In an effort to manage and mitigate such risk, the Manager seeks to continuously keep abreast of regulatory developments (for example, by closely monitoring announcements on regulators' website and mainstream media) in that country. The Manager may dispose its investments in that particular country should the regulatory changes adversely impact the Unit Holders' interest or diminish returns to the Fund.

GENERAL RISKS OF THE FUND	
Related party transaction risk	The Fund may also have dealings with parties related to AHAM. Nevertheless, it is our policy that all transactions with related parties are to be executed on terms which are best available to the Fund and which are not less favourable to the Fund than an arm's length transaction between independent parties.
Suspension of repurchase request risk	Having considered the best interests of Unit Holders, the repurchase requests by the Unit Holders may be subject to suspension due to exceptional circumstances, where the market value or fair value of a material portion of the Fund's assets cannot be determined, or such other circumstances as may be determined by the Manager, where there is good and sufficient reason to do so. In such case, Unit Holders will not be able to redeem their Units and will be compelled to remain invested in the Fund for a longer period of time. Hence, their investments will continue to be subject to the risks inherent to the Fund.

SPECIFIC RISKS OF THE FUND	
Credit risk	<p>Credit risk refers to the risk that the issuer of any bond that is held by the Fund defaults or is unable to make the principal or further coupon payments. The Fund is also exposed to the risk of credit downgrades which in turn would result in a loss and would adversely affect the NAV of the Fund. A tool that the Manager uses to evaluate this risk is the credit ratings ascertained by the Malaysian credit rating agencies (such as RAM or MARC) or global rating agencies (such as Moody's, Fitch and S & P). As a general rule, bonds that carry a lower credit rating carry more risk of a default. On the other hand, these bonds with lower credit rating also, generally, give higher yields.</p> <p>This risk is mitigated by performing continuous fundamental credit research and analysis to ascertain the creditworthiness of the relevant issuers.</p>
Liquidity risk	Liquidity risk refers to two scenarios. The first scenario is where an investment cannot be sold due to the unavailability of a buyer for that investment. The second scenario exists where the investment, by its nature, is thinly traded. This will have the effect of causing the investment to be sold below its fair value which would adversely affect the NAV of the Fund and subsequently the value of Unit Holders' investments in the Fund. Upon such event and in the best interest of the Unit Holders, the Manager may suspend the repurchase of Units requests. Please refer to "Suspension of Dealing in Units" section of this Information Memorandum for more details.
Interest rate risk	This risk refers to the impact of interest rate changes on the valuation of debentures or money market instruments (hereinafter referred to as "investment"). Generally, movement in interest rates affects the prices of investment inversely. For example, when interest rates rise, prices of investment will fall. The fluctuations of the prices of investment will also have an impact on the NAV of the Fund. This risk can largely be eliminated by holding the investment until their maturity. We also manage interest rate risk by considering each investment's sensitivity to interest rate changes. When interest rates are expected to increase, the Fund would then likely seek to switch to investment that are less sensitive to interest rate changes. For investments in deposits, the fluctuations in the interest rates will not affect the placement of deposits but will result in the opportunity loss by the Fund if the placement of deposits is made at lower interest rate.
Country risk	Investments of the Fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV of the Fund or prices of Units to fall.
Currency risk	As the investments of the Fund may be denominated in currencies other than the base currency of the Fund, any fluctuation in the exchange rate between the base currency and the currencies in which the investments are denominated may have an impact on the value of these investments. You should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

SPECIFIC RISKS OF THE FUND	
Prepayment and commitment risk	<p>Certain investments of this Fund are intended to be held until maturity. However, the Manager may be required to liquidate such investments in order to meet repurchase request of Unit Holders. As such, any premature liquidation of the investments may cause the price of the investments to be lower compared to the price if the investments had been held until maturity.</p>
Derivatives risk	<p>The Manager does not intend to use derivative transactions for speculation or leverage but may use them for hedging.</p> <p>The Manager may hedge the foreign currency exposure of the Fund by entering into one or more foreign exchange forward contracts and/or cross currency swap transactions. The Manager may also hedge the interest rate exposure of the Fund by entering into one or more interest rate swap contracts.</p> <p>Hedging using derivatives may be subject to risks, which in some cases, may be greater than the risks presented by more traditional instruments investments. Some of the risks associated with derivatives are, but not limited to, market risk, management risk, credit risk, liquidity risk, operational risk and leverage risk. There can therefore be no assurance that the hedging strategy will be possible to meet its intended objective, which would have an adverse impact on the NAV of the Fund.</p> <p>Investments in derivatives may require the deposit of initial margin and additional margin on short notice if the market moves against the investment positions. If no provision is made for the required margin within the prescribed time, the investment may be liquidated at a loss. Therefore, it is essential that such investments in derivatives are monitored closely. The Manager has the necessary controls for investments in derivatives and has in place systems to monitor the derivative positions for the Fund.</p>
Counterparty risk	<p>The Fund will be exposed to the credit risk of the parties with which it transacts and may also bear the risk of settlement default. Credit risk is the risk that the counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. This would include the counterparties to derivatives that it enters into. Trading in derivatives which have not been collateralised gives rise to direct counterparty exposure. The Fund mitigates much of its credit risk to its derivatives counterparties by receiving collateral with a value at least equal to the exposure to each counterparty but, to the extent that any derivative is not fully collateralised, a default by the counterparty may result in a reduction in the value of the Fund. A formal review of each new counterparty is completed and all approved counterparties are monitored and reviewed on an ongoing basis. The Fund maintains an active oversight of counterparty exposure and the collateral management process.</p>

! It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are recommended to read the whole Information Memorandum to assess the risks associated with the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.
