## INVESTMENT OBJECTIVE

The Fund aims to provide investors with a steady income over the medium to long-term investment horizon.

*Any material change to the Fund's investment objective would require Unit Holders' approval.*

## PERFORMANCE BENCHMARK

BPAM Corp All Bond 3 years – 7 years Index.

*The risk profile of this Fund is different from the risk profile of the benchmark.*

## ASSET ALLOCATION

- A minimum of 70% of the Fund's NAV to be invested in debentures; and
- A maximum of 30% of the Fund's NAV to be invested in money market instruments, deposits and/or cash.

## INVESTMENT STRATEGY

The Manager will focus on building a Malaysia-focused fixed income portfolio which will consist of debentures, money market instruments, deposits and/or cash with the aim of meeting the Fund's objective.

We will combine a top-down and bottom-up approach to identify investment opportunities. Macroeconomic trends and market analysis are the important considerations in deriving the top-down perspective on interest rate outlook, fixed income markets, and currency movements. For bottom-up approach, we would conduct analysis on the issuers to assess its ability to service its debt obligation.

The Fund's investment would consist of both government and corporate bonds. The Fund will only look to invest in bonds that meet a minimum credit rating of AA3/AA- (national rating) or Baa3/BBB- (international rating) by RAM, MARC, Standard & Poor's, Fitch or Moody's. The selection of fixed income instruments will depend largely on its credit quality where the respective issuers will have strong ability to meet their financial obligations, healthy cash-flow, the collateral type, value, claims priority as well as offer highest safety for timely payment of interest and principal. In addition, the total average duration of the portfolio shall not exceed six (6) years. Individual bonds maturity should be less than or equal to 10.5 years at the time of purchase. The Fund should not utilize leveraged investment. However, the Fund may utilize derivatives for currency hedging purposes.

The Manager seeks to reduce non-Malaysian Ringgit exposure through the use of derivative instruments with their best effort, if the Manager invest in non-Malaysian Ringgit investments.

We will carry out a stringent credit selection process when identifying issuances to be included into the portfolio. This is done with the aim of ensuring that the underlying investments are of high credit quality and are able to provide relative certainty of principal repayment while maintaining overall total return stability.

Additionally, the Fund will also have the flexibility to maintain a maximum of 30% of its NAV into more liquid assets such as cash, deposits and money market instruments, with a minimum credit rating of P1/MARC-1 by RAM or MARC.

In the unlikely event of a credit rating downgrade, we reserve the right to deal with the said investment(s) in the best interest of the investors including to dispose the said investment(s) within a reasonable time frame.

Our trading strategy when managing the portfolio of investments may vary depending on the prevailing market environment, and interest rate outlook. We will largely maintain a buy and hold strategy for the Fund's investments, although the Manager can sell holding issues based on their credit analysis, macroeconomic view etc.

### **Temporary Defensive Measure**

We hold the option to take temporary defensive positions that may be inconsistent with the Fund's principal strategy and asset allocation to protect the Fund against adverse market conditions that may impact financial markets. To manage the risk of the Fund, we may shift the Fund's focus and exposure into lower risk investments such as money market instruments, deposits and cash.

### **Derivatives**

The Fund may employ derivatives, such as foreign exchange forward contracts, cross currency swaps or interest rate swaps primarily for hedging purposes. Cross currency swaps and/or foreign exchange forward contracts could be used to hedge the principal and/or the returns of the foreign currency denominated bonds back to MYR while interest rate swaps could be used to hedge the interest rate exposure borne by the Fund. As prices of bonds are generally inversely related to yields and interest rates, the use of interest rate swap will enable us to exchange the fixed interest rate for floating interest rate with the intention to mitigate the potential decline in prices of the Fund's investments. While the hedging strategy will assist with mitigating the potential foreign exchange losses by the Fund, any potential gains from the hedging strategy will be capped as well.

### **Cross Trades**

AHAM may conduct cross trades between funds which it is currently managing provided that all criteria imposed by the regulators are met. Notwithstanding the aforesaid, cross trades between the personal account of an employee of AHAM and the Fund's account(s) and between AHAM's proprietary trading accounts and the Fund's account(s) are strictly prohibited. Compliance with the criteria would be monitored by AHAM's Compliance Unit, and reported to AHAM's compliance and risk management committee, to avoid conflict of interests and manipulation that could have a negative impact on investors.

### **PERMITTED INVESTMENTS**

The Fund will invest in the following investments:

- Debentures;
- Government Securities, Government Investment Instruments, Cagamas Notes/Bonds, Bank Negara Certificates/Bills, and other obligations issued or guaranteed by the Government of Malaysia, State Governments, Government-related agencies and/or Bank Negara Malaysia;
- Money market instruments;
- Deposits;
- Derivatives; and
- Any other form of investments as may be determined by the Manager from time to time that is in line with the Fund's objective. However, any inclusion of permitted investment requires Unit Holders' consent in advance.

### **INVESTMENT RESTRICTIONS AND LIMITS**

The purchase of the permitted investments set out above shall not contravene with the following limits:

- The value of the Fund's investment in debentures issued by any single issuer must not exceed 5% of the Fund's NAV at the time of purchase;
- The Fund may only invest in debentures carrying a minimum rating of AA3/AA- national rating or Baa3/BBB- international rating by RAM, MARC, Standard & Poor's, Fitch or Moody's at the point of purchase;
- The Fund may only invest in money market instruments carrying a minimum rating of P1/MARC-1 rating by RAM, or MARC at the point of purchase;
- The Fund is not allowed to invest in bond paper that has effective maturity period of more than ten and a half (10.5) years; and
- There will be no limits and restrictions on securities or instruments issued or guaranteed by governments, Bank Negara Malaysia, state authorities, or the issue is an issue guaranteed by any of the abovementioned institutions, or the issue is government-backed.

## VALUATION POINT OF THE FUND

The Fund will be valued at 6.00 p.m. on every Business Day (or “trading day” or “T” day”). However, if the Fund has exposure to investments outside of Malaysia, the Fund shall be valued at 11.00 a.m. on the next Business Day (or “T + 1 day”). All foreign assets are translated into the Base Currency based on the bid exchange rate quoted by Bloomberg/Refinitiv at 4.00 p.m. (United Kingdom time) which is equivalent to 11.00 p.m. or 12.00 midnight (Malaysian time) on the same day, or at such time as stipulated in the investment management standards issued by the FiMM.

## VALUATION OF ASSETS

We will ensure that the valuation of the Fund is carried out in a fair manner in accordance to the relevant laws and Guidelines. We will obtain the daily price or value of the assets for the purpose of valuing the Fund in accordance to the Malaysian Financial Reporting Standard 9 issued by the Malaysian Accounting Standards Board. In the absence of daily price or value of the assets, we will use the latest available price or value of the assets respectively. The valuation bases for the permitted investments of the Fund are as below:

### ➤ **Debentures**

For unlisted MYR denominated debentures, valuation will be done using the price quoted by a bond pricing agency (“BPA”) registered with the SC. For non-MYR denominated unlisted debentures, valuation will be based on the average indicative price quoted by independent and reputable Financial Institutions. Where the Manager is of the view that the price quoted by BPA differs from the fair value or where reliable market quotations are not available, the fair value will be determined in good faith by the Manager using methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

For listed debentures, valuation shall be based on the closing price or last known transacted price on the eligible market on which the investment is quoted. If the price is not representative of its fair value or is not available to the market, including in the event of suspension in the quotation of the listed debentures for a period exceeding fourteen (14) days, or such shorter period as agreed by the Trustee, such listed debentures will be valued at fair value as determined in good faith by the Manager or its delegate, based on the methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

### ➤ **Deposits**

Valuation deposits placed with Financial Institutions will be done by reference to the principal value of the deposits and the interests accrued thereon for the relevant period.

### ➤ **Money market instruments**

Valuation of MYR denominated money market instruments will be done using the price quoted by a BPA registered with the SC. For non-MYR denominated money market instruments, valuation will be done using an average of quotations provided by reputable Financial Institutions. Where the Manager is of the view that the price quoted by BPA differs from the fair value or where reliable market quotations are not available, the fair value will be determined in good faith by the Manager using methods or bases which have been verified by the auditor of the Fund and approved by the Trustee. This may be determined by reference to the valuation of other money market instruments which are comparable in rating, yield, expected maturity date and/or other characteristics.

### ➤ **Derivatives**

Valuation of derivatives will be based on the rates provided by the issuers. The issuers generate the market valuation through the use of their own proprietary valuation models, which incorporate all the relevant and available market data with respect to the derivatives (e.g. interest rates, movement of the underlying assets, volatility of the underlying assets, the correlation of the underlying assets and such other factors). For foreign exchange forward contracts (“FX Forwards”), interpolation formula is applied to compute the value of the FX Forwards based on the rates provided by Bloomberg or Refinitiv. If the rates are not available on Bloomberg or Refinitiv, the FX Forwards will be valued in accordance to a fair value as determined in good faith by the Manager using methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

### ➤ **Any other investments**

Fair value as determined in good faith by the Manager, based on the methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

**The Fund may create new classes of Units without having to seek Unit Holders’ prior approval. You will be notified of the issuance of the new classes of Units by way of communiqué and the prospective investors will be notified of the same by way of a supplemental/replacement information memorandum.**

- we or our delegates will not enter into unnecessary trades in order to achieve a sufficient volume of transactions to qualify for soft commissions.

# UNDERSTANDING THE RISKS OF THE FUND

Below are the risks associated with the investments of the Fund that you should consider before investing.

	GENERAL RISKS OF THE FUND
<b>Affected by variable factors and not guaranteed</b>	The performance of the Fund is affected by many variable factors and is not guaranteed. These include overall economic and financial market conditions such as interest rate fluctuation and stability of local currency. While a track record may provide some insight on future performance, it is by no means guaranteed. The prices of Units may go down as well as up. Likewise, distribution may vary from year to year depending on the performance of the Fund.
<b>Fund management risk</b>	This risk refers to the day-to-day management of the Fund by us which will impact the performance of the Fund. For example, investment decisions undertaken by us as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error, fraud, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.
<b>Operational risk</b>	This risk refers to the possibility of a breakdown in the Manager's internal controls and policies. The breakdown may be a result of human error, system failure or fraud where employees of the Manager collude with one another. This risk may cause monetary loss and/or inconvenience to you. The Manager will review its internal policies and system capability to mitigate instances of this risk. Additionally, the Manager maintains a strict segregation of duties to mitigate instances of fraudulent practices amongst employees of the Manager.
<b>Inflation risk</b>	This is the risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
<b>Loan / Financing risk</b>	This risk occurs when you take a loan/financing to finance your investment. The inherent risk of investing with borrowed/financed money includes you being unable to service the loan/financing repayments. In the event Units are used as collateral, you may be required to top-up your existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower NAV per Unit as compared to the NAV per Unit at the point of purchase towards settling the loan/financing.
<b>Risk of non-compliance</b>	This risk refers to the possibility that the rules governing the Fund which is set out in the Deed or the Guidelines may not be observed by the Manager, whether intentionally or otherwise. Whilst not every non-observance to the rules governing the Fund will necessarily result in some losses to the Fund, investors are advised that the potential for the Fund to suffer losses may be heightened if the non-observation of the rules governing the Fund is due to the fraud or dishonest acts on the part of the Manager.
<b>Liquidity risk</b>	Liquidity risk refers to two scenarios. The first scenario is where an investment cannot be sold due to the unavailability of a buyer for that investment. The second scenario exists where the investment, by its nature, is thinly traded. This will have the effect of causing the investment to be sold below its fair value which would adversely affect the NAV of the Fund and subsequently the value of Unit Holders' investments in the Fund. Upon such event and in the best interest of the Unit Holders, the Manager may suspend the repurchase of Units requests. Please refer to " <i>Suspension of Dealing in Units</i> " section of this Information Memorandum for more details.

<b>Suspension of repurchase request risk</b>	Having considered the best interests of Unit Holders, the repurchase requests by the Unit Holders may be subject to suspension due to exceptional circumstances, where the market value or fair value of a material portion of the Fund's assets cannot be determined, or such other circumstances as may be determined by the Manager, where there is good and sufficient reason to do so. In such case, Unit Holders will not be able to redeem their Units and will be compelled to remain invested in the Fund for a longer period of time. Hence, their investments will continue to be subject to the risks inherent to the Fund.
<b>Related party transaction risk</b>	The Fund may also have dealings with parties related to AHAM. Nevertheless, it is our policy that all transactions with related parties are to be executed on terms which are best available to the Fund and which are not less favourable to the Fund than an arm's length transaction between independent parties.

<b>SPECIFIC RISKS OF THE FUND</b>	
<b>Interest rate risk</b>	This risk refers to the impact of interest rate changes on the valuation of debentures or money market instruments (hereinafter referred to as "investment"). Generally, movement in interest rates affects the prices of investment inversely. For example, when interest rates rise, prices of investment will fall. The fluctuations of the prices of investment will also have an impact on the NAV of the Fund. This risk can largely be eliminated by holding the investment until their maturity. We also manage interest rate risk by considering each investment's sensitivity to interest rate changes. When interest rates are expected to increase, the Fund would then likely seek to switch to investment that are less sensitive to interest rate changes. For investments in deposits, the fluctuations in the interest rates will not affect the placement of deposits but will result in the opportunity loss by the Fund if the placement of deposits is made at lower interest rate.
<b>Credit and default risk</b>	Credit risk relates to the creditworthiness of the issuers of the debentures and money market instruments and the Financial Institutions where the deposits are placed (hereinafter referred to as "investment") and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer and/or Financial Institution may impact the value as well as liquidity of the investment. In the case of rated investment, this may lead to a credit downgrade. Default risk relates to the risk of an issuer and/or a Financial Institution of the investment either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the investment. This could adversely affect the value of the Fund.
<b>Counterparty risk</b>	The Fund will be exposed to the credit risk of the parties with which it transacts and may also bear the risk of settlement default. Credit risk is the risk that the counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. This would include the counterparties to any derivatives that it enters into. Trading in derivatives which have not been collateralised gives rise to direct counterparty exposure. The Fund mitigates much of its credit risk to its derivatives counterparties by receiving collateral with a value at least equal to the exposure to each counterparty but, to the extent that any derivative is not fully collateralised, a default by the counterparty may result in a reduction in the value of the Fund. A formal review of each new counterparty is completed and all approved counterparties are monitored and reviewed on an ongoing basis. The Fund maintains an active oversight of counterparty exposure and the collateral management process.

**!** It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks.
