ABOUT AHAM INCOME FUND I

FUND CATEGORY	: Fixed Income (Wholesale)	BASE CURRENCY	: MYR
FUND TYPE	: Income	LAUNCH DATE	: 1 August 2014
FINANCIAL YEAR END	: 31 December		
DISTRIBUTION POLICY	: The Fund will declare distribution on a monthly basis, subject to the availability of income. The source from which income is distributed to the Unit Holders is derived from the interest income received by the Fund.		

INVESTMENT OBJECTIVE

The Fund aims to provide investors with investment exposure through a portfolio of fixed income instruments.

Any material change to the Fund's investment objective would require Unit Holders' approval.

PERFORMANCE BENCHMARK

BPAM Corporates 3Y-7Y All Bond Index.

The risk profile of this Fund is different from the risk profile of the benchmark.

ASSET ALLOCATION

- A minimum of 70% of the Fund's NAV to be invested in fixed income securities; and
- The remaining balance of the Fund's NAV to be invested in liquid assets.

INVESTMENT STRATEGY

To meet the Fund's objective, we will build a portfolio of fixed income securities focusing on investment opportunities through MYR denominated issuances.

The portfolio will comprise of debentures issued by corporates, as well as Malaysian sovereign bonds and issuances backed by the Malaysian or by government-linked agencies. These instruments may include, but will not be limited to Malaysian government securities, government investment issues, treasury bills, and Bank Negara monetary notes.

We will carry out a stringent credit selection process when identifying issuances to be included into the portfolio. This is done with the aim of ensuring that the underlying investments are of high credit quality and are able to provide relative certainty of principal repayment while maintaining overall total return stability. Concurrently, we will also look towards maintaining the average portfolio duration between 3 to 7 years.

In constructing its portfolio, the Fund's investment into debentures will be subjected to a minimum credit rating of A3 (long-term) or P2 (short-term) by RAM, or its equivalent by MARC.

The Fund will also have the flexibility to maintain the balance of its NAV into more liquid assets such as money market instruments, deposits and/or cash.

To meet its objective, the Fund also have the flexibility to invest into collective investment schemes. However, these collective investment schemes will be restricted to those that are able to provide the Fund with exposure into money market instruments only.

As a temporary defensive measure, we may take a position that may be inconsistent with the Fund's principal strategy by increasing the Fund's exposure to liquid assets to protect the Fund's capital.

Cross Trades Policy

We may conduct cross trades between funds which we are currently managing provided that all criteria imposed by the regulators are met. Notwithstanding the aforesaid, cross trades between the personal account of our employee and the Fund's account(s); and between our proprietary trading accounts and the Fund's account(s) are strictly prohibited. Compliance with the criteria would be monitored by our compliance unit, and reported to our compliance and risk management committee, to avoid conflict of interests and manipulation that could have a negative impact on the investors.

PERMITTED INVESTMENTS

The Fund will invest in the following investments:

- Malaysian sovereign securities, treasury bills, Bank Negara monetary notes and investment certificates, and bonds;
- Other fixed income securities issued or guaranteed by the Malaysian government, Bank Negara Malaysia, Malaysian state governments or Malaysian government-related agencies;
- Debentures;
- Money market instruments;
- Deposits;

- Any other form of investments as may be determined by us from time to time that is in line with the Fund's objective.

We will obtain the daily price or value of the assets for the purpose of valuing the Fund in accordance to the Malaysian Financial Reporting Standard 9 issued by the Malaysian Accounting Standards Board. In the absence of daily price or value of the assets, we will use the latest available price or value of the assets respectively.

The valuation bases for the permitted investments of the Fund are as below:

➤ **Listed Securities**

Valuation of investments in listed securities shall be based on the closing price or last known transacted price on the eligible market on which the investment is quoted. If the price is not representative of its fair value or is not available to the market, including in the event of suspension in the quotation of the listed securities for a period exceeding fourteen (14) days, or such shorter period as agreed by the Trustee, such listed securities will be valued at fair value determined in good faith by the Manager or its delegate, based on methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

➤ **Unlisted Securities**

Valuation of unlisted MYR denominated debentures, valuation will be done using the price quoted by a bond pricing agency ("BPA") registered with the SC. Where the Manager is of the view that the price quoted by BPA differs from the fair value or where reliable market quotations are not available, the fair value will be determined in good faith by the Manager using methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

For other unlisted securities, valuation will be based on fair value as determined in good faith by the Manager using methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

➤ **Deposits**

➤ **Money Market Instruments**

Where the Manager is of the view that the price quoted by BPA differs from the fair value or where reliable market quotations are not available, the fair value will be determined in good faith by the Manager using methods or bases which have been verified by the auditor of the Fund and approved by the Trustee. This may be determined by reference to the valuation of other money market instruments which are comparable in rating, yield, expected maturity date and/or other characteristics.

➤ **Collective Investment Schemes**

Valuation of investments in unlisted collective investment schemes shall be based on the last published repurchase price.

Valuation of investments in listed collective investment schemes shall be done in a similar manner used in the valuation of listed securities as described above.

➤ **Any Other Investments**

Fair value as determined in good faith by the Manager, based on the methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

You should be aware that all fees, charges and expenses referred to or quoted in this Information Memorandum (including any supplemental information memorandum) and the Deed (including any supplemental deed) are referred to or quoted as being exclusive of any other applicable taxes. We (including the Trustee and other service providers) will charge any other applicable taxes on the fees, charges and expenses in accordance with any other relevant or applicable laws.

The following are the charges that may be directly incurred by you.

SALES CHARGE

Nil.

REPURCHASE CHARGE

Nil.

TRANSFER FEE

Nil.

SWITCHING FEE

Not applicable as switching is not permitted.

The following are the fees and expenses that you may indirectly incur when you invest in the Fund

ANNUAL MANAGEMENT FEE

The annual management fee is up to 0.20% per annum of the NAV of the Fund (before deducting the management fee and trustee fee). The management fee is calculated and accrued daily and payable monthly to the Manager.

Please note that the example below is for illustration only:

Assuming that the NAV of the Fund is MYR120 million for the day, then the daily accrued management fee would be:-

$$\frac{\text{MYR } 120 \text{ million} \times 0.20\%}{365 \text{ days}} = \text{MYR } 657.53 \text{ per day}$$

ANNUAL TRUSTEE FEE

The Fund pays an annual trustee fee of up to 0.04% per annum of the NAV of the Fund, (excluding foreign custodian fees and charges) (before deducting the management fee and trustee fee). The Trustee may be reimbursed by the Fund for any expenses properly incurred by it in the performance of its duties and responsibilities.

The trustee fee is calculated and accrued daily and payable monthly to the Trustee.

Please note that the example below is for illustration only:

Assuming that the NAV of the Fund is MYR120 million for the day, then the daily accrued trustee fee would be:-

$$\frac{\text{MYR } 120 \text{ million} \times 0.04\%}{365 \text{ days}} = \text{MYR } 131.51 \text{ per day}$$

PERFORMANCE FEE

The Manager will earn a 20% performance fee on the appreciation in the NAV per Unit over and above the Hurdle Value during a Performance Period. However, in the interest of investors, the Manager imposes a Hurdle Value, which is HWM plus 5.0%, in which the Fund's performance has to exceed before the Manager is eligible for a performance fee.

The performance fee is calculated and readjusted on a daily basis. Although calculation is on a daily basis, the performance fee is only payable to the Manager at the end of each Performance Period in the following events:

- (a) Where on the last Business Day of a Performance Period, the NAV per Unit (before performance fee) is higher than the Hurdle Value (see illustration 1 and illustration 2 below);
- (b) The Manager receives a subscription request at the time when the NAV per Unit (before performance fee) is higher than the Hurdle Value, during the Performance Period. Under this circumstance, the subscribing Unit Holder will be subscribing at a NAV per Unit that reflects the performance fee (see illustration 3); and
- (c) The Manager receives a repurchase request at the time when the NAV per Unit (before performance fee) is higher than the Hurdle Value, during the Performance Period. Hence, performance fee is chargeable to the redeeming Unit Holder regardless of the Fund's performance at the end of the particular Performance Period (see illustration 4 below).

Determining the High Water Mark (HWM) and Setting the Hurdle Value

At the beginning of a Performance Period, the Manager will firstly determine the HWM. The HWM will be the closing NAV per Unit on the last Business Day of the Performance Period or the HWM of the preceding Performance Period, whichever is higher. For example, if the NAV per Unit on the last Business Day of the 1st Performance Period is MYR 1.08 (which is higher than the HWM for the preceding Performance Period i.e. MYR 1.00), then the HWM for 2nd Performance Period will be MYR 1.08. However, if the NAV per Unit on the last Business Day of the 1st Performance Period is MYR 0.98 (which is lower than the HWM for the preceding Performance Period i.e. MYR 1.00), then the HWM for the 2nd Performance Period will be MYR 1.00.

Next, a Hurdle Value will be determined. A Hurdle Value is the minimum value that needs to be achieved before the Manager is eligible to earn performance fee. The Hurdle Value is calculated by adding 5.0% to the HWM. For example, in Year 1, the HWM is MYR 1.00. The Hurdle Value is therefore MYR 1.05 (i.e. MYR 1.00 x 1.05). The Hurdle Value for each subsequent Performance Period is reset at the beginning of the Performance Period based on the latest HWM.

Illustration 1:

Assuming in Year 1, the Fund's price is MYR 1.00 and there are no subscription and repurchase requests during the Performance Period. The HWM and Hurdle Value are as follows:

Table 1:

1 st Performance Period	The Fund's 1 st financial year
NAV per Unit @ beginning of Year 1	MYR 1.0000
HWM for 1 st Performance Period	MYR 1.0000
Hurdle Value for 1 st Performance Period (which is MYR 1.00 x 1.05)	MYR 1.0500

Therefore, the HWM for the 1st Performance Period is MYR 1.0000 and hence, the Hurdle Value of MYR 1.0500.

Table 2:

2nd Performance Period	The Fund's 2nd financial year
NAV per Unit @ beginning of Year 1 = HWM for 1 st Performance Period	MYR 1.0000
Hurdle Value for 1 st Performance Period	MYR 1.0500
NAV per Unit @ end of Year 1	MYR 1.0800
HWM for 2 nd Performance Period	MYR 1.0800
Hurdle Value for 2 nd Performance Period (which is RM 1.08 x 1.05)	MYR 1.1340

Based on Table 2 above, on the last Business Day of the 1st Performance Period, the NAV per Unit of the Fund rises to MYR 1.0800, which is higher than the HWM for the 1st Performance Period. As a result, the HWM for 2nd Performance Period will be reset to MYR 1.0800.

As the HWM is now MYR 1.0800, the new Hurdle Value for Year 2 will be MYR 1.1340.

Table 3:

3rd Performance Period	The Fund's 3rd financial year
NAV per Unit @ beginning of Year 2 = HWM for 2 nd Performance Period	MYR 1.0800
Hurdle Value for 2 nd Performance Period	MYR 1.1340
NAV per Unit @ end of Year 2	MYR 1.0700
HWM for 3 rd Performance Period	MYR 1.0800
Hurdle Value for 3 rd Performance Period (which is RM 1.08 x 1.05)	MYR 1.1340

Based on Table 3 above, assuming the NAV per Unit on the last Business Day of the 2nd Performance Period fell to MYR 1.0700, which is lower than HWM for the 2nd Performance Period. The HWM for the 3rd Performance Period will not be reset and the HWM of the 2nd Performance Period will be maintained.

The HWM remains as MYR 1.0800, and the Hurdle Value for Year 3 will remain at MYR 1.1340.

Calculation of Performance Fee

The purpose of calculating and readjusting the performance fee on a daily basis is to take into account the calculation of the NAV per Unit for subscription and repurchase requests.

Illustration 2:

This scenario assumes that there are no subscription or repurchase requests during the entire Performance Period, thus Units in Circulation remain the same throughout the entire Performance Period.

Table 4:

Day	Units in Circulation (UIC)	NAV per Unit (before performance fee) (a)	NAV per Unit (after performance fee)	High Water Mark (MYR)	Hurdle Value (HWM x 1.05) (b)	Performance Fee "[a-b] x 20%" x UIC (MYR)
1	500,000	1.0000	1.0000	1.0000	1.0500	0.00
2	500,000	1.0400	1.0400	1.0000	1.0500	0.00
3	500,000	1.0500	1.0500	1.0000	1.0500	0.00
4	500,000	1.0700	1.0660	1.0000	1.0500	2,000.00
5	500,000	1.0900	1.0820	1.0000	1.0500	4,000.00
6	500,000	1.1100	1.0980	1.0000	1.0500	6,000.00
7	500,000	1.1200	1.1060	1.0000	1.0500	7,000.00
8	500,000	1.1150	1.1020	1.0000	1.0500	6,500.00
9	500,000	1.0800	1.0740	1.0000	1.0500	3,000.00
10	500,000	1.0400	1.0400	1.0000	1.0500	0.00
11	500,000	1.1100	1.0980	1.0000	1.0500	6,000.00
↓						
365	500,000	1.1000	1.0900	1.0000	1.0500	5,000.00

Based on the figures in Table 4 above, the HWM for the Performance Period is MYR 1.0000 which is also the NAV per Unit on Day 1 and hence, the Hurdle Value is MYR 1.0500. Let us assume that on Day 4, the NAV per Unit (before performance fee) is MYR 1.0700 while the Hurdle Value is MYR 1.0500, with the Units in Circulation of 500,000 Units.

The performance fee calculation is then done as follows:

Performance fee = (The difference between the NAV per Unit (before performance fee) and the Hurdle Value) x 20% x Total number of Units in Circulation of the Fund

$$\begin{aligned}
 &= (\text{MYR } 1.0700 - \text{MYR } 1.0500) \times 20\% \times 500,000 \text{ Units} \\
 &= \text{MYR } 0.0040 \times 500,000 \text{ Units} \\
 &= \text{MYR } 2,000
 \end{aligned}$$

As illustrated in Table 4 above, the performance fee, if any, will be readjusted* on a daily basis. On Day 365, which is the last Business Day, the NAV per Unit (before performance fee) is higher than the Hurdle Value; therefore, a performance fee of MYR 5,000 will be charged and payable to the Manager at the end of the Performance Period.

* Adjustment is by reversing the daily accrued performance fee payable to the Manager. For example, on Day 10, the accrued performance fee from Day 9, which is MYR 3,000, will be reversed.

Note: Where the difference between the NAV per Unit on the last Business Day of the Performance Period and the Hurdle Value is a negative figure, no performance fee is payable to the Manager.

Illustration 3:

Where there is a subscription request by a Unit Holder during the Performance Period, the chargeable performance fee (if any) on the day of the subscription will be reflected in the NAV per Unit (after performance fee).

Illustration is based on the Day 4 figures in Table 4 above:-

HWM	= MYR 1.0000
Hurdle Value	= MYR 1.0500
NAV per Unit (before performance fee)	= MYR 1.0700
NAV per Unit (after performance fee)	= MYR 1.0660

The NAV per Unit payable by the Unit Holder would be MYR 1.0660, i.e. Selling Price.

Illustration 4:

Where there is a repurchase request by a Unit Holder during the Performance Period, the chargeable performance fee (if any) will be calculated as follows:

Illustration is based on the Day 11 figures in Table 4 above:

Number of Units repurchased by Unit Holder	= 5,000 Units
Hurdle Value for the Performance Period	= MYR 1.0500
NAV per Unit (before performance fee) @ Day 11	= MYR 1.1100

The repurchase request is received by the Manager on Day 11 of the Performance Period where the NAV per Unit is higher than the Hurdle Value of the Performance Period. As such, a performance fee is then due to the Manager based on the calculation below:

$$\begin{aligned} & \text{(The difference between the NAV per Unit on the Business Day when the redemption occurred and the Hurdle Value) } \times \\ & \text{total number of Units redeemed } \times 20\% \\ & = (\text{MYR } 1.1100 - \text{MYR } 1.0500) \times 5,000 \text{ Units } \times 20\% \\ & = \text{MYR } 60.00^* \end{aligned}$$

** During the Performance Period, such amount will be maintained in the account payable of the Fund and will be paid to the Manager at the end of the Performance Period.*

FUND EXPENSES

Only the expenses (or part thereof) which are directly related and necessary to the operation and administration of the Fund may be charged to the Fund. These would include (but are not limited to) the following:

UNDERSTANDING THE RISKS OF THE FUND

Below are the risks associated with the investments of the Fund that you should consider before investing.

GENERAL RISKS OF THE FUND	
Market risk	Market risk arises because of factors that affect the entire market place. Factors such as economic growth, political stability and social environment are some examples of conditions that have an impact on businesses, whether positive or negative. It stems from the fact that there are economy-wide perils, or instances of political or social instability which threaten all businesses. Hence, the Fund will be exposed to market uncertainties and fluctuations in the economic, political and social environment that will affect the market price of the investments either in a positive or negative way.
Fund management risk	This risk refers to the day-to-day management of the Fund by us which will impact the performance of the Fund. For example, investment decisions undertaken by us as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error, fraud, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.
Liquidity risk	Liquidity risk refers to two scenarios. The first scenario is where an investment cannot be sold due to the unavailability of a buyer for that investment. The second scenario exists where the investment, by its nature, is thinly traded. This will have the effect of causing the investment to be sold below its fair value which would adversely affect the NAV of the Fund and subsequently the value of Unit Holders' investments in the Fund. Upon such event and in the best interest of the Unit Holders, the Manager may suspend the repurchase of Units requests. Please refer to " <i>Suspension of Dealing in Units</i> " section of this Information Memorandum for more details.
Inflation risk	This is the risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
Loan / Financing risk	This risk occurs when you take a loan or financing to finance your investment. The inherent risk of investing with borrowed or financed money includes you being unable to service the loan or financing repayments. In the event Units are used as collateral, you may be required to top-up your existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower NAV per Unit as compared to the NAV per Unit at the point of purchase towards settling the loan or financing.
Operational risk	This risk refers to the possibility of a breakdown in the Manager's internal controls and policies. The breakdown may be a result of human error, system failure or fraud where employees of the Manager collude with one another. This risk may cause monetary loss and/or inconvenience to you. The Manager will regularly review its internal policies and system capability to mitigate instances of this risk. Additionally, the Manager maintains a strict segregation of duties to mitigate instances of fraudulent practices amongst employees of the Manager.
Risk of non-compliance	This risk refers to the possibility that the rules governing the Fund which is set out in the Deed or the Guidelines may not be observed by the Manager, whether intentionally or otherwise. Whilst not every non-observance to the rules governing the Fund will necessarily result in some losses to the Fund, investors are advised that the potential for the Fund to suffer losses may be heightened if the non-observation of the rules governing the Fund is due to the fraud or dishonest acts on the part of the Manager.

Related party transaction risk	The Fund may also have dealings with parties related to AHAM. Nevertheless, it is our policy that all transactions with related parties are to be executed on terms which are best available to the Fund and which are not less favourable to the Fund than an arm's length transaction between independent parties.
Suspension of repurchase request risk	Having considered the best interests of Unit Holders, the repurchase requests by the Unit Holders may be subject to suspension due to exceptional circumstances, where the market value or fair value of a material portion of the Fund's assets cannot be determined, or such other circumstances as may be determined by the Manager, where there is good and sufficient reason to do so. In such case, Unit Holders will not be able to redeem their Units and will be compelled to remain invested in the Fund for a longer period of time. Hence, their investments will continue to be subject to the risks inherent to the Fund.

SPECIFIC RISKS OF THE FUND

Credit and default risk	Credit risk relates to the creditworthiness of the issuers of the debentures and money markets instruments and the Financial Institutions where the deposits are placed (hereinafter referred to as "investments") and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer and/or Financial Institution may impact the value as well as liquidity of the investments. In the case of rated investment, this may lead to a credit downgrade. Default risk relates to the risk of an issuer and/or a Financial Institution of the investments either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the investments. This could adversely affect the value of the Fund.
Interest rate risk	This risk refers to the impact of interest rate changes on the valuation of the fixed income securities i.e., debentures or money market instruments (hereinafter referred to as "investments"). Generally, movement in interest rates affects the prices of investment inversely. For example, when interest rates rise, prices of investment will fall. The fluctuations of the prices of investment will also have an impact on the NAV of the Fund. This risk can largely be eliminated by holding the investment until their maturity. We also manage interest rate risk by considering each investment's sensitivity to interest rate changes. When interest rates are expected to increase, the Fund would then likely seek to switch to investment that are less sensitive to interest rate changes. For investments in deposits, the fluctuations in the interest rates will not affect the placement of deposits but will result in the opportunity loss by the Fund if the placement of deposits is made at lower interest rate.

! It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are recommended to read the whole Information Memorandum to assess the risks associated with the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.
